FAR case 94–721 implements Sections 1201 through 1210 and Sections 1251 and 1252 of the Act. Highlights include making TINA requirements for civilian agencies substantially the same as those for the Department of Defense (increasing the threshold for submission of "cost or pricing data" to $500,000 and adding penalties for defective pricing). Provisions are also included that increase the threshold for cost or pricing data submission every 5 years beginning October 1, 1995. A new exception is added to the requirement for the submission of "cost or pricing data" for commercial items; the approval level for waivers is changed, and prohibitions are placed on acquiring "cost or pricing data" when an exception applies. The coverage includes a clear explanation of adequate price competition as required by the Act.

Also, FAR coverage has been included that addresses (1) "information other than cost or pricing data", (2) exceptions based on established catalog or market price, (3) inter-divisional transfers of commercial items at price, and (4) price competition when only one offer has been received.

The FAR language primarily modifies Part 15, together with associated Part 52 clauses and Part 53 forms. However, changes are also made to clauses where threshold changes are made in Part 14 pertaining to sealed bid contracting, and in Part 31 where the cost principle on material costs has been amended to address inter-divisional transfers of commercial items at price. Additional miscellaneous changes in Parts 1, 4, 16, 33, 36, 45, 46, and 49 have also been included.

The interim rule published at 59 FR 62498, December 5, 1994 (FAR case 94–720, FAC 90–22) is adopted as final, as amended by this FAR case 94–721. FAR case 94–720 provided for an immediate increase to the threshold for "cost or pricing data" submission by contractors to civilian agencies to $500,000. FAC 90–22 (FAR case 94–720) also removed the certification requirement of commercial pricing for parts or components for contractors doing business with civilian agencies.

Policy for Determining Reasonableness of Price

Two major changes are found in the new coverage. The first change shifts the policy of FAR Part 15 with respect to determining price reasonableness. A hierarchical policy preference for the types of information to be used in assessing reasonableness of price is established. The policy states that no additional information should be obtained from the contractor if there is adequate price competition. This is followed by allowing progressively more intrusive types of data requirements. Obtaining "cost or pricing data" is designated as the last choice. Use of "cost or pricing data" is coupled with a reminder that unnecessarily requiring that type of data is not desirable and can lead to additional costs to both the Government and the contractor.

New FAR coverage, based on the Act, is presented that expands the exception based on adequate price competition and provides for a special exception for commercial items. A new section addressing "information other than cost or pricing data" is created and a Standard Form 1448 is provided for use by contractors.

The new policy at FAR 15.804–1(b)(1)(ii) recognizes circumstances when it can be determined that adequate price competition exists even though only one offeror has responded to the Government's requirement.

Defining "Cost or Pricing Data"

The second major change accomplished by the coverage is the clarification of the meaning of the term "cost or pricing data." Currently, the FAR uses the term inconsistently. In some places, "certified cost or pricing data" is used and in other locations, it states "cost or pricing data." In the new coverage, the term has been clarified in the definition to mean that, among other things, "cost or pricing data" is required to be certified in accordance with TINA and FAR 15.804–4, and means all facts that as of the date of agreement on price (or other mutually agreeable date) prudent buyers and sellers would reasonably expect to affect the price negotiations significantly.

Information Other Than Cost or Pricing Data

Since a bright-line test for "cost or pricing data" has now been established, it is also possible to craft a second category of data—"information other than cost or pricing data"—that may be required by the contracting officer in order to establish cost realism or price reasonableness. This information can include limited cost information, sales data or pricing information. The intent is also clear with respect to this category of information. Because it is not "cost or pricing data," certification shall not be required and approval to obtain this information is vested in the contracting officer. The new FAR coverage gives a detailed discussion of "information other than cost or pricing data" at 15.804–5.

B. Regulatory Flexibility Act

The proposed rule was not expected to have a significant impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* Accordingly, an initial regulatory flexibility analysis was not prepared. Although there were no public comments on this rule that indicated that this line of reasoning was incorrect nor that treatment of small entities in the proposed rule was inappropriate, the final rule may have a significant economic impact on a substantial number of small entities because the final rule will substantially affect the price negotiations of non-competitive commercial item contracts. Small businesses may receive a substantial portion of these awards. The rule is expected to decrease the administrative expense of negotiating these awards by reducing the amount of cost or pricing data that must be submitted, reducing the amount of information necessary to qualify for an exception from cost or pricing data requirements, and streamlining the requirements for information supporting price proposals. Accordingly, a Final Regulatory Flexibility Analysis (FRFA) has been prepared and provided to the Chief Counsel for Advocacy for the Small Business Administration. A copy of the FRFA may be obtained from the FAR Secretariat.

C. Paperwork Reduction Act

The Paperwork Reduction Act, Pub. L. 96–511, is deemed to apply because this final rule contains information collection requirements. Approval was obtained from the Office of Management and Budget (OMB) on March 24, 1995, under OMB Control No. 9000–0013. A request for a three-year extension was submitted to OMB on July 11, 1995. Public comments concerning this request were invited through a **Federal Register** notice at 60 FR 36406, July 17, 1995.

D. Public Comments

On January 6, 1995, a proposed rule was published in the **Federal Register** (60 FR 2282). The proposed rule afforded the public a 60-day comment period. During that time, 40 organizations submitted more than 213 comments. A public meeting was also held on this rule on February 13, 1995. Based upon comments received, the TINA drafting team refined the coverage.

On June 19, 1995, at 60 FR 31935, a notification of additional changes was published that revised the original January 6, 1995 proposed rule. Interested parties were advised that the original rule had been modified as a result of earlier comments and that a copy of the revised proposed rule could be obtained from the FAR Secretariat. Those who had commented on the original rule were provided with the updated document. A 30-day written comment period was provided for, and another public hearing was conducted on July 7, 1995. As a result of the second public comment period, the Team received 148 pages of written comments from 18 commenters and one telephonic comment. Based upon comments received, the TINA drafting team further refined the coverage.

The following are highlights of changes that were made to the proposed rule as a result of both rounds of public comments and both public meetings:

- The Rule was edited to improve readability.
- The hierarchical policy at FAR 15.802 was clarified to ensure that it is consistent with TINA and FASA.
- Regulatory guidance implementing the catalog or market price exception to TINA was replaced with more flexible procedures (See 52.215–41 & –42).
  - —The Standard Form (SF) 1412, "Request for Exemption from Submission of Cost or Pricing Data," was eliminated.
  - —Relational tests were eliminated.
  - —Disclosure of lowest prices is no longer mandated.
  - —TINA based postaward audit access is no longer required.
  - —Expanded guidance was provided on what constitutes substantial sales.
  - —Requirement for offerors to account for "government end use" when addressing sales to the general public was eliminated.
  - —Reference to GSA certifications was removed.
- Flexibility in requesting an exception to TINA was improved via generic provisions at FAR 52.215–41 & 52.215–42 that provide broad guidelines on the type of data that would be needed to qualify for a TINA exception.
- The barriers in the proposed rule that prevented easier access to the new commercial item exception have been substantially decreased, to the maximum extent permitted by FASA.
- A Commercial Item definition cross-reference was given.
- A definition of cost realism was added.
- Additional data requirements were removed for qualification under the commercial item exception created by FASA (rebates, credits, warranties, sales to resellers).
- Expanded guidance was provided on effective dates for certification of cost or pricing data.
- The new SF 1448 has been substantially revised to remove reference to cost related information that may not be appropriate for all users of the form.

Disposition of Public Comments

Commercial Exception

Several commenters expressed concern that the proposed coverage continued to subordinate the new commercial item exception to TINA to the traditional TINA exceptions of adequate price competition, catalog or market price, or price set by law or regulation.

The Team has carefully considered this issue. The Team concludes that making the new commercial item exception (Section 1204(d)(2), 1251(d)(2)) co-equal with the original TINA exceptions is consistent with the philosophy of FASA which is intended to make it easier for commercial companies to do business with the Government. However, the Team also concludes that the language at (d)(2), "and the procurement is not covered by an exception in subsection (b)," is clear on its face and prevents an absolute co-equal relationship. Nevertheless, upon further consideration of the issue, the Team has decided that there is sufficient statutory flexibility to provide for a more liberal regulatory implementation of the commercial item exception. Therefore, the Team has modified its proposed FAR language to make regulatory use of the commercial item exception more readily available while still providing for a consistent interpretation of statutory requirements. This is accomplished by replacing the words, "if an exception does not apply" with the words "if the contracting officer does not have sufficient information to support an exception" at 15.804–1(a)(2) and 15.804–1(b)(4).

The Team has also reduced the contractor's risk of doing business with the Government by including a statement in the solicitation provision at 52.215–41 that indicates that providing information on one TINA exception is not a representation that only one TINA exception may apply.

Most Favored Customer

Other commenters were pleased to see that the SF 1412, "Request for Exemption from Submission of Cost or Pricing Data," had been eliminated from the coverage. However, the treatment of "most favored customer" pricing remains a major concern. The commenters continue to press for a FAR prohibition on asking for this type of information.

The Team believes that establishing a FAR prohibition on any specific contracting practice is contrary to the philosophy of FASA to empower the contracting officer and to provide for regulatory flexibility. Furthermore, it is bad policy guidance to construct an absolute prohibition because it is not possible to foresee all circumstances and an absolute prohibition could preclude a reasonable course of action under circumstances that could not be foreseen.

With respect to the specific issue, just as the Team believes having requirements that always mandate obtaining "most favored customer" pricing is flawed, so would a policy that prohibits obtaining this kind of information also be flawed. The Team is convinced that both policy and procedural rules need to be constructed in a flexible manner so they may be adapted to specific sets of circumstances. As a result of earlier comments, the Team removed the Standard Form 1412 and its associated requirement to disclose this type of information as a condition of applying for a catalog or market price exception to TINA.

The Team has also included policy guidance at 15.802 that indicates a strong preference for pricing contracts with the minimum amount of data needed to accomplish the task.

Specifically, when adequate price competition is present, the contracting officer is strongly admonished not to obtain any additional information from the offeror. As the situation moves away from that of adequate price competition, the negotiation position between the parties moves more in favor of the contractor and the contracting officer is allowed to use more pricing tools. Nevertheless, the policy is to price the contract in the least intrusive manner.

SF 1448, "Proposal Cover Sheet/Cost or Pricing Data Not Required"

Concern was also expressed that with the elimination of the SF 1412, contracting officers might request submission of catalog or market price exception data on the new SF 1448. The commenters believed that the SF 1448 was not properly designed for that purpose.

Although the SF 1448 is not intended as a substitute for the SF 1412, the Team modified the SF 1448 to eliminate reference to cost related information. This preserves the bright line between "cost or pricing data" that can only be submitted on an SF 1411 and all other "information other than cost or pricing data" that may be submitted using the SF 1448.

Cost Accounting Standards

Several commenters stated that the Cost Accounting Standards (CAS) needed to be revised to narrow the definition of what constitutes "cost or pricing data" for purposes of CAS covered contracts. The commenters believe that until CAS is modified the coverage in the TINA rule would not completely address the issue of commercial contractors being required to expose cost data to the Government and to be accountable for such data.

The Team believes the commenters have identified a valid concern. However, the matter rests with the CAS Board as the problem is that the CAS definition of "cost data" is more broadly based than the "cost or pricing data" definition in the FAR coverage.

Market Price Exception

Commenters also stated that for the market price exception to be useful to industry it should not be tied to independent verification.

The Team does not agree with the commenters. It believes that it makes sense to maintain this requirement as FASA requires clear FAR standards as to what is required to qualify for a TINA exception. The Team believes independent verification is an essential element of a market price. Furthermore, with the creation of the new FASA commercial item exception to TINA, it is useful to differentiate a price reasonableness determination based on market price from information provided directly by an offeror under the authority of the new FASA commercial item exception.

List of Subjects in 48 CFR Parts 1, 4, 14, 15, 16, 31, 33, 36, 45, 46, 49, 52, and 53

Government procurement.

Dated: September 7, 1995.

Edward C. Loeb,

Deputy Project Manager for the Implementation of the Federal Acquisition Streamlining Act of 1994.

The interim rule published at 59 FR 62498, December 5, 1994, FAC 90–22, FAR case 94–720, is adopted as final, as amended by this FAR case 94–721. Therefore, 48 CFR Parts 1, 4, 14, 15, 16, 31, 33, 36, 45, 46, 49, 52, and 53 are amended as set forth below:

1. The authority citation for 48 CFR Parts 1, 4, 14, 15, 16, 31, 33, 36, 45, 46, 49, 52, and 53 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 1—FEDERAL ACQUISITION REGULATIONS SYSTEM

2. The table in section 1.106 is amended under the "FAR Segment" and "OMB Control Number" columns by removing "52.215–32" and "9000–0105", and "SF 1412" and "9000–0013"; and adding entries, in numerical order, to read as follows:

1.106 OMB approval under the Paperwork Reduction Act.

* * * * *

FAR segment	OMB control No.
* * * *	*
52.215–41	9000–0013
52.215–42	9000–0013
* * * *	*
SF 1448	9000–0013
SF 1449	9000–0136

PART 4—ADMINISTRATIVE MATTERS

3. Section 4.702 is amended by adding paragraph (a)(3) to read as follows:

4.702 Applicability.

* * * * *

(a)(3) Audit—Commercial Items (52.215–43).

* * * * *

4. Section 4.803 is amended by revising paragraphs (a)(17) and (b)(4) to read as follows:

4.803 Contents of contract files.

* * * * *

(a) * * *

(17) Cost or pricing data and Certificates of Current Cost or Pricing Data or a required justification for waiver, or information other than cost or pricing data.

* * * * *

(b) * * *

(4) Cost or pricing data, Certificates of Current Cost or Pricing Data, or information other than cost or pricing data; cost or price analysis; and other documentation supporting contractual actions executed by the contract administration office.

* * * * *

PART 14—SEALED BIDDING

14.201–7 [Amended]

5. Section 14.201–7 is amended by removing paragraph (d) and redesignating paragraph "(e)" as paragraph "(d)."

PART 15—CONTRACTING BY NEGOTIATION

6. Section 15.106–2 is added to read as follows:

15.106–2 Audit—Commercial Items.

(a) This subsection implements 10 U.S.C. 2306a(d)(2) and (3) and 41 U.S.C. 254b(d)(2) and (3).

(b) The contracting officer shall, when contracting by negotiation, insert clause 52.215–43, Audit—Commercial Items, in solicitations and contracts when submission of cost or pricing data is expected to be excepted under 15.804–1(a)(2) (i.e., a commercial item where price is otherwise fair and reasonable). The clause shall also be included in solicitations and contracts when cost or pricing data are required, for incorporation into subcontracts that may be excepted under 15.804–1(a)(2).

15.406–5 [Amended]

7. Section 15.406–5(b) is amended by inserting at the end of the paragraph the parenthetical "(see 15.804–6 and 15.804–8).".

8. Section 15.703(a)(2) is revised to read as follows:

15.703 Acquisitions requiring make-or-buy programs.

(a) * * *

(2) Qualifies for an exception from the requirement to submit cost or pricing data under 15.804–1; or

* * * * *

9. Section 15.801 is amended by revising the definitions of "Cost analysis" and "Cost or pricing data", and adding in alphabetical order "Information other than cost or pricing data", "Subcontract", "Commercial item", and "Cost realism" to read as follows:

15.801 Definitions.

Commercial item is defined in 2.101.

Cost analysis means the review and evaluation of the separate cost elements and proposed profit of (a) an offeror's or contractor's cost or pricing data or information other than cost or pricing data and (b) the judgmental factors applied in projecting from the data to the estimated costs in order to form an opinion on the degree to which the proposed costs represent what the cost of the contract should be, assuming reasonable economy and efficiency.

Cost or pricing data means all facts that, as of the date of price agreement or, if applicable, another date agreed upon between the parties that is as close as practicable to the date of agreement on price, prudent buyers and sellers would reasonably expect to affect price negotiations significantly. Cost or pricing data are data requiring certification in accordance with 15.804–4. Cost or pricing data are factual, not judgmental, and are therefore verifiable. While they do not indicate the accuracy of the prospective contractor's judgment about estimated future costs or projections, they do include the data forming the basis for that judgment. Cost or pricing data are more than historical accounting data; they are all the facts that can be reasonably expected to contribute to the soundness of estimates of future costs and to the validity of determinations of costs already incurred. They also include such factors as—

(a) Vendor quotations;

(b) Nonrecurring costs;

(c) Information on changes in production methods and in production or purchasing volume;

(d) Data supporting projections of business prospects and objectives and related operations costs;

(e) Unit-cost trends such as those associated with labor efficiency;

(f) Make-or-buy decisions;

(g) Estimated resources to attain business goals; and

(h) Information on management decisions that could have a significant bearing on costs.

Cost realism means the costs in an offeror's proposal are (a) realistic for the work to be performed; (b) reflect a clear understanding of the requirements; and (c) are consistent with the various elements of the offeror's technical proposal.

* * * * *

Information other than cost or pricing data means any type of information that is not required to be certified, in accordance with 15.804–4, that is necessary to determine price reasonableness or cost realism. For example, such information may include pricing, sales, or cost information, and includes cost or pricing data for which certification is determined inapplicable after submission.

* * * * *

Subcontract, as used in this subpart, includes a transfer of commercial items between divisions, subsidiaries, or affiliates of a contractor or a subcontractor.

* * * * *

10. Section 15.802 is revised to read as follows:

15.802 Policy.

Contracting officers shall—

(a) Purchase supplies and services from responsible sources at fair and reasonable prices. In establishing the reasonableness of the offered prices, the contracting officer shall not obtain more information than is necessary. To the extent that the Truth in Negotiations Act, as implemented in 15.804–2 and 15.804–5(b) permits, the contracting officer shall generally use the following order of preference in determining the type of information required:

(1) No further information from the offeror if the price is based on adequate price competition, except as provided by 15.804–5(a)(3).

(2) Information other than cost or pricing data:

(i) Information related to prices (*e.g.*, established catalog or market prices), relying first on information available within the Government; second, on information obtained from sources other than the offeror; and, if necessary, on information obtained from the offeror.

(ii) Cost information, which does not meet the definition of cost or pricing data at 15.801.

(3) *Cost or pricing data*. The contracting officer should use every means available to ascertain a fair and reasonable price prior to requesting cost or pricing data. Contracting officers shall not unnecessarily require the submission of cost or pricing data, because it leads to increased proposal preparation costs, generally extends acquisition lead-time, and wastes both contractor and Government resources.

(b) Price each contract separately and independently and not—

(1) Use proposed price reductions under other contracts as an evaluation factor, or

(2) Consider losses or profits realized or anticipated under other contracts.

(c) Not include in a contract price any amount for a specified contingency to the extent that the contract provides for a price adjustment based upon the occurrence of that contingency.

11. Section 15.803 is amended in paragraph (a) by revising the last sentence to read as follows:

15.803 General.

(a) * * * This prohibition does not preclude disclosing discrepancies or mistakes of fact (such as duplications, omissions, and errors in computation) contained in the cost or pricing data or information other than cost or pricing data supporting the proposal.

15.804 Cost or pricing data and information other than cost or pricing data.

12. Section 15.804, heading, is revised to read as set forth above.

13. Section 15.804–1 is revised to read as follows:

15.804–1 Prohibition on obtaining cost or pricing data.

(a) *Exceptions to cost or pricing data requirements.* The contracting officer shall not, pursuant to 10 U.S.C. 2306a and 41 U.S.C. 254b, require submission of cost or pricing data (but may require information other than cost or pricing data to support a determination of price reasonableness or cost realism)—

(1) If the contracting officer determines that prices agreed upon are based on—

(i) Adequate price competition (see exception standards at paragraph (b)(1) of this subsection);

(ii) Established catalog or market prices of commercial items sold in substantial quantities to the general public (see exception standards at paragraph (b)(2) of this section); or

(iii) Prices set by law or regulation (see exception standards at paragraph (b)(3) of this subsection).

(2) For acquisition of a commercial item, if the contracting officer does not have sufficient information to support an exception under paragraph (a)(1) of this section, but the contracting officer can determine the price is fair and reasonable (see exception standards at paragraph (b)(4) of this section and pricing requirements at 15.804–5(b));

(3) For exceptional cases where a waiver has been granted (see exception standards at paragraph (b)(5) of this section); or

(4) For modifications to contracts or subcontracts for commercial items, if the basic contract or subcontract was awarded without the submission of cost or pricing data because the action was granted an exception from cost or pricing data requirements under paragraph (a)(1) of this section and the modification does not change the contract or subcontract to a contract or subcontract for the acquisition of other than a commercial item (see exception standards at paragraph (b)(6) of this subsection).

(b) *Standards for exceptions from cost or pricing data requirements*—(1) *Adequate price competition.* A price is based on adequate price competition if—

(i) Two or more responsible offerors, competing independently, submit priced offers responsive to the Government's expressed requirement and if—

(A) Award will be made to a responsible offeror whose proposal offers either—

(*1*) The greatest value (see 15.605(c)) to the Government and price is a substantial factor in source selection; or

(*2*) The lowest evaluated price; and

(B) There is no finding that the price of the otherwise successful offeror is unreasonable. Any such finding must be supported by a statement of the facts and approved at a level above the contracting officer;

(ii) There was a reasonable expectation, based on market research or other assessment, that two or more responsible offerors, competing independently, would submit priced offers responsive to the solicitation's expressed requirement, even though only one offer is received from a responsible, responsive offeror and if—

(A) Based on the offer received, the contracting officer can reasonably conclude that the offer was submitted with the expectation of competition, e.g., circumstances indicate that—

(*1*) The offeror believed that at least one other offeror was capable of submitting a meaningful, responsive offer; and

(*2*) The offeror had no reason to believe that other potential offerors did not intend to submit an offer; and

(B) The determination that the proposed price is based on adequate price competition and is reasonable is approved at a level above the contracting officer; or

(iii) Price analysis clearly demonstrates that the proposed price is reasonable in comparison with current or recent prices for the same or similar items purchased in comparable quantities, under comparable terms and conditions under contracts that resulted from adequate price competition.

(2) *Established catalog or market prices*—(i) *Established catalog price.* Established catalog prices are prices (including discount prices) recorded in a catalog, price list, schedule, or other verifiable and established record that (A) are regularly maintained by the manufacturer or vendor; and (B) are published or otherwise available for customer inspection.

(ii) *Established market price.* An established market price is a price that is established in the course of ordinary and usual trade between buyers and sellers free to bargain and that can be substantiated by data from sources independent of the offeror.

(iii) *Based on.* A price may also be based on an established catalog or market price if the item or class of items being purchased is not itself a catalog or market priced commercial item but is sufficiently similar to the catalog or market priced commercial item to ensure that any difference in prices can be identified and justified without resorting to cost analysis.

(iv) *Sold in substantial quantities.* An item is sold in substantial quantities if there are sales of more than a nominal quantity based on the norm of the industry segment. In determining what constitutes a substantial quantity, the contracting officer should consider such things as the size of the market; and how recently the item was introduced into the market. Models, samples, prototypes, and experimental units are not substantial quantities. For services to be sold in substantial quantities, they must also be customarily provided by the offeror, using personnel regularly employed and equipment (if any is necessary) regularly maintained principally to provide the services.

(A) The method used to establish sales may be sales order, contract, shipment, invoice, actual recorded sales, or other records, so long as the method used is consistent, provides an accurate indication of sales activity, and is verifiable. If the item would not otherwise qualify for an exception, sales of the item by affiliates may be considered. In addition, sales of essentially the same commercial item by other manufacturers or vendors may be considered in determining whether sales are substantial, provided that the price of those sales is also considered. Data to support sales quantities may also come from other manufacturers, industry associations or marketing groups, annual financial reports, etc.

(B) An exception may apply for an item based on the market price of the item regardless of the quantity of sales of the item previously made by the offeror or the types of customers for these sales, provided that sales of the same or similar items by other sellers meet the exception criteria.

(v) *General public.* The general public ordinarily consists of buyers other than the U.S. Government or its instrumentalities, *e.g.*, U.S. Government corporations. Sales to the general public do not include sales to affiliates of the offerors or purchases by the U.S. Government on behalf of foreign governments, such as for Foreign Military Sales. If the contracting officer can determine without requiring information from the offeror that sales are for Government end use, these sales need not be considered sales to the general public.

(3) *Prices set by law or regulation.* Pronouncements in the form of periodic rulings, reviews, or similar actions of a governmental body, or embodied in the laws are sufficient to set a price.

(4) *Commercial items.* For acquisition of a commercial item, if the contracting officer does not have sufficient information to support an exception under 15.804–1(a)(1) or (a)(4), the contracting officer shall grant an exception for a contract, subcontract, or modification of a contract or subcontract if the contracting officer obtains the pricing information described in 15.804–5(b). Cost or pricing data may be obtained for such a commercial item only if the contracting officer makes a written determination that the pricing information is inadequate for performing a price analysis and determining price reasonableness.

(5) *Exceptional cases.* The head of the contracting activity may, without power of delegation, waive the requirement for submission of cost or pricing data. The authorization for the waiver and the reasons for granting it shall be in writing. A waiver may be considered if another exception does not apply but the price can be determined to be fair and reasonable without submission of cost or pricing data. For example, if cost or pricing data were furnished on previous production buys and the contracting officer determines such data are sufficient, when combined with updated information, a waiver may be granted. If the head of the contracting activity has waived the requirement for submission of cost or pricing data, the contractor or higher-tier subcontractor to whom the waiver relates shall be considered as having been required to make available cost or pricing data. Consequently, award of any lower-tier subcontract expected to exceed the cost or pricing data threshold requires the submission of cost or pricing data unless an exception otherwise applies to the subcontract.

(6) *Modifications.* This exception only applies when the original contract or subcontract was exempt from cost or pricing data based on adequate price competition, catalog or market price, or price set by law or regulation (15.804–1(a)(1)). For modifications of contracts or subcontracts for commercial items, the exception at 15.804–1(a)(4) applies if the modification does not change the item from a commercial item to a noncommercial item. However, if the modification to a contract or a subcontract changes the nature of the work under the contract or subcontract either by a change to the commercial item or by the addition of other noncommercial work, the contracting officer is not prohibited from obtaining cost or pricing data for the added work.

(c) *Special circumstances when purchasing commercial items.* (1) It is not necessary to obtain information supporting an exception for each line item. Sampling techniques may be used.

(2) If the U.S. Government has acted favorably on an exception request for the same or similar items, the contracting officer may consider the prior submissions as support for the current exception request. Relief from the submission of new information does not relieve the contracting officer from the requirement to determine reasonableness of price on the current acquisition.

(3) When acquiring by separate contract an item included on an active Federal Supply Service or Information Technology Service Multiple Award Schedule contract, the contracting officer should grant an exception and not require documentation if the offeror has provided proof that an exception has been granted for the schedule item. Price analysis shall be performed in accordance with 15.805–2 to determine reasonableness of price.

(4) The contracting officer and offeror may make special arrangements for the submission of exception requests for repetitive acquisitions. These arrangements can take any form as long as they set forth an effective period and the exception criteria at 15.804–1 are satisfied. Such arrangements may be extended to other Government offices with their concurrence.

(d) *Requesting an exception.* In order to qualify for an exception, other than an exception for adequate price competition, from the requirements to submit cost or pricing data, the offeror must submit a written request. The solicitation provision at 52.215–41 or other methods may be used. It is the responsibility of the contracting officer to determine, based on the information submitted, and any other information available to the contracting officer, which exception, if any, applies.

14. Section 15.804–2 is revised to read as follows:

15.804–2 Requiring cost or pricing data.

(a) (1) Pursuant to 10 U.S.C. 2306a and 41 U.S.C. 254b, cost or pricing data shall be obtained only if the contracting officer concludes that none of the exceptions in 15.804–1 applies. However, if the contracting officer has sufficient information available to determine price reasonableness, then a waiver under the exception at 15.804–1(b)(5) should be considered. The threshold for obtaining cost or pricing data is $500,000. This amount will be subject to adjustment, effective October 1, 1995, and every five years thereafter. Unless an exception applies, cost or pricing data are required before accomplishing any of the following actions expected to exceed the threshold in effect on the date of agreement on price, or the date of award, whichever is later; or, in the case of existing contracts, the threshold specified in the contract:

(i) The award of any negotiated contract (except for undefinitized actions such as letter contracts).

(ii) The award of a subcontract at any tier, if the contractor and each higher-tier subcontractor have been required to furnish cost or pricing data (but see exceptional cases at 15.804–1(b)(5)).

(iii) The modification of any sealed bid or negotiated contract (whether or not cost or pricing data were initially required) or subcontract covered by paragraph (a)(1)(ii) of this subsection. Price adjustment amounts shall consider both increases and decreases. (For example, a $150,000 modification resulting from a reduction of $350,000 and an increase of $200,000 is a pricing adjustment exceeding $500,000.) This requirement does not apply when unrelated and separately priced changes for which cost or pricing data would not otherwise be required are included for administrative convenience in the same modification.

(2) Unless prohibited because an exception at 15.804–1(a)(1) applies, the head of the contracting activity, without power of delegation, may authorize the contracting officer to obtain cost or pricing data for pricing actions below the pertinent threshold in paragraph (a)(1) of this subsection provided the action exceeds the simplified acquisition threshold. The head of the contracting activity shall justify the requirement for cost or pricing data. The documentation shall include a written finding that cost or pricing data are necessary to determine whether the price is fair and reasonable and the facts supporting that finding.

(b) When cost or pricing data are required, the contracting officer shall require the contractor or prospective contractor to submit to the contracting officer (and to have any subcontractor or prospective subcontractor submit to the prime contractor or appropriate subcontractor tier) the following in support of any proposal:

(1) The cost or pricing data.

(2) A certificate of current cost or pricing data, in the format specified in 15.804–4, certifying that to the best of its knowledge and belief, the cost or pricing data were accurate, complete, and current as of the date of agreement on price or, if applicable, another date agreed upon between the parties that is as close as practicable to the date of agreement on price.

(c) If cost or pricing data are requested and submitted by an offeror, but an exception is later found to apply, the data shall not be considered cost or pricing data as defined in 15.801 and shall not be certified in accordance with 15.804–4.

(d) The requirements of this section also apply to contracts entered into by the head of an agency on behalf of a foreign government.

15.804–3 [Reserved]

15. Section 15.804–3 is removed and reserved.

16. Section 15.804–4 is amended by revising paragraph (a), the double asterisk footnote to the certification statement following paragraph (a), paragraph (c), and paragraph (e); and in paragraphs (f) and (h) by removing the word "certified". The revised text reads as follows:

15.804–4 Certificate of Current Cost or Pricing Data.

(a) When cost or pricing data are required, the contracting officer shall require the contractor to execute a Certificate of Current Cost or Pricing Data, shown following this paragraph (a), and shall include the executed certificate in the contract file.

Certificate of Current Cost or Pricing Data

* * * * *

* * * Insert the day, month, and year when price negotiations were concluded and price agreement was reached or, if applicable, another date agreed upon between the parties that is as close as practicable to the date of agreement on price.

* * * * *

(c) The contracting officer and contractor are encouraged to reach a prior agreement on criteria for establishing closing or cutoff dates when appropriate in order to minimize delays associated with proposal updates. Closing or cutoff dates should be included as part of the data submitted with the proposal and, before agreement on price, data should be updated by the contractor to the latest closing or cutoff dates for which the data are available. Use of cutoff dates coinciding with reports is acceptable, as certain data may not be reasonably available before normal periodic closing dates (*e.g.*, actual indirect costs). Data within the contractor's or a subcontractor's organization on matters significant to contractor management and to the Government will be treated as reasonably available. What is significant depends upon the circumstances of each acquisition.

* * * * *

(e) If cost or pricing data are requested and submitted by an offeror, but an exception is later found to apply, the data shall not be considered cost or pricing data and shall not be certified in accordance with this subsection.

* * * * *

17. Section 15.804–5 is added to read as follows:

15.804–5 Requiring information other than cost or pricing data.

(a)(1) If cost or pricing data are not required because an exception applies, or an action is at or below the cost or pricing data threshold, the contracting officer shall make a price analysis to determine the reasonableness of the price and any need for further negotiation.

(2) The contracting officer may require submission of information other than cost or pricing data only to the extent necessary to determine reasonableness of the price or cost realism. The contractor's format for submitting such information shall be used unless the contracting officer determines that use of a specific format is essential. The contracting officer shall ensure that information used to support price negotiations is sufficiently current to permit negotiation of a fair and reasonable price. Requests for updated offeror information should be limited to information that affects the adequacy of the proposal for negotiations, such as changes in price lists. Such data shall not be certified in accordance with 15.804–4.

(3) When an acquisition is based on adequate price competition, generally no additional information is necessary to determine the reasonableness of price. However, if it is determined that additional information is necessary to determine the reasonableness of the price, the contracting officer shall, to the maximum extent practicable, obtain the additional information from sources other than the offeror. In addition, the contracting officer may request information to determine the cost realism of competing offers or to evaluate competing approaches.

(4) When cost or pricing data are not required because an action is at or below the cost or pricing data threshold, information requested shall include, as a minimum, appropriate information on the prices and quantities at which the same or similar items have previously been sold, that is adequate for evaluating the reasonableness of the proposed price. Cost information may also be required. For example, cost information might be necessary to support an analysis of material costs.

(b)(1) When acquiring commercial items for which an exception under 15.804–1(a)(2) may apply, the contracting officer shall seek to obtain from the offeror or contractor information on prices at which the same or similar items have been sold in the commercial market, that is adequate for evaluating, through price analysis, the reasonableness of the price of the action.

(2) If such information is not available from the offeror or contractor, the contracting officer shall seek to obtain such information from another source or sources.

(3) Requests for sales data relating to commercial items shall be limited to data for the same or similar items during a relevant time period.

(4) In requesting information from an offeror under this paragraph (b), the contracting officer shall, to the maximum extent practicable, limit the scope of the request to include only information that is in the form regularly maintained by the offeror in commercial operations.

(5) Any information obtained pursuant to this paragraph (b) that is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552(b)) shall not be disclosed by the Government.

(c) If, after receipt of offers, the contracting officer concludes there is insufficient information available to determine price reasonableness and none of the exceptions applies, then cost or pricing data shall be obtained.

18. Section 15.804–6 is amended by revising the heading and paragraphs (a) and (b);

Amending Table 15–2 by:

(a) Revising the heading;

(b) Adding introductory text;

(c) Revising the first paragraph of item 1, and the fourth paragraph of Item 1 entitled "Established Catalog or Market Prices/Prices Set by Law or Regulation";

(d) Revising item 4; and

(e) Amending 8B by revising the paragraph "Under Column (2)" instruction under the table;

Adding Table 15–3 following Table 15–2;

And revising paragraph (c) of 15.804–6; and revising the first sentence of paragraph (d).

The revised and added text reads as follows:

15.804–6 Instructions for submission of cost or pricing data or information other than cost or pricing data.

(a) Taking into consideration the hierarchy at 15.802, the contracting officer shall specify in the solicitation (see 15.804–8 (h) and (i))—

(1) Whether cost or pricing data are required;

(2) That, in lieu of submitting cost or pricing data, the offeror may submit a request for exception from the requirement to submit cost or pricing data;

(3) Whether information other than cost or pricing data is required, if cost or pricing data are not necessary;

(4) The format (see paragraph (b) of this subsection) in which the cost or pricing data or information other than cost or pricing data shall be submitted; and

(5) Necessary preaward or postaward access to offeror's records if not provided by the use of a standard form or clause.

(b)(1) Cost or pricing data shall be submitted on a SF 1411 unless required to be submitted on one of the termination forms specified in subpart 49.6. The SF 1411 shall not be used unless cost or pricing data are required to be submitted. Contract pricing proposals submitted on a SF 1411 with supporting attachments shall be prepared in accordance with Table 15–2 or as specified by the contracting officer. Data supporting forward pricing rate agreements or final indirect cost proposals shall be submitted in a format acceptable to the contracting officer.

(2) If information other than cost or pricing data is required to support price reasonableness or cost realism, the contracting officer may require such information to be submitted using a SF 1448. Requests for information should be tailored so that only necessary data are requested. The information is not considered cost or pricing data and shall not be certified in accordance with 15.804–4. Information submitted on a SF 1448 shall be prepared following the instructions provided in Table 15–3.

Table 15–2 Instructions for Submission of a Contract Pricing Proposal When Cost or Pricing Data are Required

The SF 1411 provides a cover sheet for use by offerors to submit to the Government a pricing proposal of estimated and/or actual costs only when cost or pricing data are required.

1. The pricing proposal shall be segregated by contract line item with sufficient detail to permit cost analysis. Attach cost-element breakdowns, using the applicable formats prescribed in Item 8A, B, or C of this section, for each proposed line item. These breakdowns must conform to the instructions in the solicitation and any specific requirements established by the contracting officer. Furnish supporting breakdowns for each cost element, consistent with the offeror's cost accounting system.

* * * * *

Established Catalog or Market Prices or Prices Set by Law or Regulation or Commercial Item Not Covered By Another Exception—When an exception from the requirement to submit cost or pricing data is requested, whether the item was produced by others or by the offeror, provide justification for the exception as required by 15.804–1(d).

* * * * *

4. There is a clear distinction between submitting cost or pricing data and merely making available books, records, and other documents without identification. The requirement for submission of cost or pricing data is met when all accurate cost or pricing data reasonably available to the offeror have been submitted, either actually or by specific identification, to the contracting officer or an authorized representative. As later information comes into the offeror's possession, it should be promptly submitted to the contracting officer in a manner that clearly shows how the information relates to the offeror's price proposal. The requirement for submission of cost or pricing data continues up to the time of agreement on price, or another date agreed upon between the parties if applicable.

* * * * *

8. Headings for Submission of Line-Item Summaries:

* * * * *

B. Change Orders, Modifications, and Claims.

* * * * *

Under Column (2)—Include the current estimates of what the cost would have been to complete the deleted work not yet performed (not the original proposal estimates), and the cost of deleted work already performed.

* * * * *

Table 15–3 Instructions for Submission of Information Other Than Cost or Pricing Data

SF 1448 is a cover sheet for use by offerors to submit information to the Government when cost or pricing data are not required but the contracting officer has requested information to help establish price reasonableness or cost realism. Such information is not considered cost or pricing data, and shall not be certified in accordance with 15.804–4.

1. The information submitted shall be at the level of detail described in the solicitation or specified by the contracting officer. The offeror's own format is acceptable unless the contracting officer determines that use of a specific format is essential.

A. If adequate price competition is expected, the information may include cost or technical information necessary to determine the cost realism and adequacy of the offeror's proposal, e.g., information adequate to validate that the proposed costs are consistent with the technical proposal, or cost breakdowns to help identify unrealistically priced proposals.

B. If the offer is expected to be at or below the cost or pricing data threshold, and adequate price competition is not expected, the information may consist of data to permit the contracting officer and authorized representatives to determine price reasonableness, e.g., information to support an analysis of material costs (when sufficient information on labor and overhead rates is already available), or information on prices and quantities at which the offeror has previously sold the same or similar items.

2. Any information submitted must support the price proposed. Include sufficient detail or cross references to clearly establish the relationship of the information provided to the price proposed. Support any information provided by explanations or supporting rationale as needed to permit the contracting officer and authorized representatives to evaluate the documentation.

* * * * *

(c) Closing or cutoff dates should be included as part of the data submitted with the proposal (see 15.804–4(c)).

(d) The requirement for submission of cost or pricing data is met if all cost or pricing data reasonably available to the offeror are either submitted or specifically identified in writing by the time of agreement on price or another time agreed upon by the parties. * * *

* * * * *

19. Section 15.804–7 is amended by revising paragraphs (b)(7)(i), (ii)(B), and (iii) to read as follows:

15.804–7 Defective cost or pricing data.

* * * * *

(b) * * *

(7)(i) In addition to the price adjustment amount, the Government is entitled to interest on any overpayments. The Government is also entitled to penalty amounts on certain of these overpayments. Overpayment occurs only when payment is made for supplies or services accepted by the Government. Overpayments would not result from amounts paid for contract financing as defined in 32.902.

(ii) * * *

(B) Consider the date of each overpayment (the date of overpayment for this interest calculation shall be (*1*) the date payment was made for the related completed and accepted contract items, or (*2*) for subcontract defective pricing, the date payment was made to the prime contractor, based on prime contract progress billings or deliveries, which included payments for a completed and accepted subcontract item); and

* * * * *

(iii) In arriving at the amount due for penalties on contracts where the submission of defective cost or pricing data was a knowing submission, the contracting officer shall obtain an amount equal to the amount of overpayment made. Before taking any contractual actions concerning penalties, the contracting officer shall obtain the advice of counsel.

* * * * *

20. Section 15.804–8 is amended by revising the heading and adding paragraphs (h) and (i) to read as follows:

15.804–8 Contract clauses and solicitation provisions.

* * * * *

(h) *Requirements for cost or pricing data or information other than cost or pricing data.* Considering the hierarchy at 15.802, the contracting officer may insert the provision at 52.215–41, Requirements for Cost or Pricing Data or Information Other Than Cost or Pricing Data, in solicitations if it is reasonably certain that cost or pricing data or information other than cost or pricing data will be required. This provision also provides instructions to offerors on how to request an exception. Use the provision with Alternate I to specify a format for cost or pricing data other than the format required by Table 15–2 of 15.804–6(b). Use the provision with Alternate II when copies of the proposal are to be sent to the administrative contracting officer and contract auditor. Use the provision with Alternate III when submission via electronic media is required. Replace the basic provision with Alternate IV when a SF 1411 will not be required because an exception may apply, but information other than cost or pricing data is required as described in 15.804–5.

(i) *Requirements for cost or pricing data or information other than cost or pricing data—modifications.* Considering the hierarchy at 15.802, the contracting officer may insert the clause at 52.215–42, Requirements for Cost or Pricing Data or Information Other Than Cost or Pricing Data—Modifications, in solicitations and contracts if it is reasonably certain that cost or pricing data or information other than cost or pricing data will be required for modifications. This clause also provides instructions to contractors on how to request an exception. Use the clause with Alternate I to specify a format for cost or pricing data other than the format required by Table 15–2 of 15.804–6(b). Use the clause with Alternate II if copies of the proposal are to be sent to the administrative contracting officer and contract auditor. Use the clause with Alternate III if submission via electronic media is required. Replace the basic clause with Alternate IV if a SF 1411 is not required because an exception may apply, but information other than cost or pricing data is required as described in 15.804–5.

21. Section 15.805–1 is amended in the first sentence of paragraph (a) by inserting a comma after the word "engineering"; and by adding paragraph (d) to read as follows:

15.805–1 General.

* * * * *

(d) The Armed Services Pricing Manual (ASPM Volume I, "Contract Pricing," and Volume 2, "Price Analysis") was issued by the Department of Defense to guide pricing and negotiating personnel. The ASPM provides detailed discussion and examples applying pricing policies to pricing problems. The ASPM is available for use for instruction and professional guidance. However, it is not directive and its references to Department of Defense forms and regulations should be considered informational only. Copies of ASPM Vol. 1 (Stock No. 008–000–00457–9) and Vol. 2 (Stock No. 008–000–00467–6) may be purchased from the Superintendent of Documents, U.S. Government Printing Office, by telephone (202) 512–1800 or facsimile (202) 512–2250, or by mail order from the Superintendent of Documents, P. O. Box 371954, Pittsburgh, PA 15250–7954.

22. Section 15.805–2 is amended by adding paragraph (f) to read as follows:

15.805–2 Price analysis.

* * * * *

(f) Comparison of proposed prices with prices for the same or similar items obtained through market research.

23. Section 15.806–1 is amended in the first sentence of paragraph (a)(2) by removing the phrase "claims for exemption" and inserting "requests for exception" in its place, and revising (b) to read as follows:

15.806–1 General.

* * * * *

(b) Unless the subcontract qualifies for an exception under 15.804–1, any contractor required to submit cost or pricing data also shall obtain cost or pricing data before awarding any subcontract or purchase order expected to exceed the cost or pricing data threshold, or issuing any modification involving a price adjustment expected to exceed the cost or pricing data threshold.

* * * * *

24. Section 15.806–2 is amended by revising paragraph (a), the first sentence of (c), and (d) to read as follows:

15.806–2 Prospective subcontractor cost or pricing data.

(a) The contracting officer shall require a contractor that is required to submit cost or pricing data also to submit to the Government (or cause submission of) accurate, complete, and current cost or pricing data from prospective subcontractors in support of each subcontract cost estimate that is

(1) $1,000,000 or more,

(2) Both more than the cost or pricing data threshold and more than 10 percent of the prime contractor's proposed price, or

(3) Considered to be necessary for adequately pricing the prime contract. These subcontract cost or pricing data may be submitted using a Standard Form (SF) 1411, Contract Pricing Proposal Cover Sheet (Cost or Pricing Data Required).

* * * * *

(c) If the prospective contractor satisfies the contracting officer that a subcontract will be priced on the basis of one of the exceptions, the contracting officer shall not require submission of cost or pricing data to the Government in that case. * * *

(d) Subcontractor cost or pricing data shall be accurate, complete, and current as of the date of price agreement or, if applicable, another date agreed upon between the parties, given on the contractor's Certificate of Current Cost or Pricing Data. The prospective contractor shall be responsible for updating a prospective subcontractor's data.

* * * * *

25. Section 15.808 is amended in paragraph (a)(5) introductory text by removing the word "certified"; by revising paragraph (a)(6); by removing paragraph (a)(7) and redesignating paragraphs (a)(8) through (a)(10) as (a)(7) through (a)(9) to read as follows:

15.808 Price negotiation memorandum.

(a) * * *

(6) If cost or pricing data were not required in the case of any price negotiation exceeding the cost or pricing data threshold, the exception used and the basis for it.

* * * * *

26. Section 15.812–1 is amended by revising paragraph (b) and the second sentence of paragraph (c) to read as follows:

15.812–1 General.

* * * * *

(b) However, the policy in paragraph (a) of this subsection does not apply to any contract or subcontract item of supply for which the price is, or is based on, an established catalog or market price of a commercial item sold in substantial quantities to the general public under 15.804–1(b)(2) or a commercial item exception under 15.804–1(b)(4).

(c) * * * The contracting officer shall require similar information when contracting by negotiation with full and open competition if adequate price competition is not expected (see 15.804–1(b)(1)). * * *

PART 16—TYPES OF CONTRACTS

16.203–4 [Amended]

27. Section 16.203–4 is amended in paragraphs (a)(1)(ii) and (b)(1)(ii) by removing "15.804–3" and inserting "15.804–1" in its place.

28. Section 16.501(c) is amended by revising the first sentence to read as follows:

16.501 General.

* * * * *

(c) Indefinite-delivery contracts may provide for firm-fixed-prices (see 16.202), fixed prices with economic price adjustment (see 16.203), fixed prices with prospective redetermination (see 16.205), or prices based on catalog or market prices (see 15.804–1(b)(2)).

* * *

28a. Section 16.603–4 is amended after the first sentence in paragraph (b)(3) by adding a sentence to read as follows:

16.603–4 Contract clauses.

* * * * *

(b)(3) * * * If, at the time of entering into the letter contract, the contracting officer knows that the definitive contract will be based on adequate price competition or will otherwise meet the criteria of 15.804–1 for not requiring submission of cost or pricing data, the words "and cost or pricing data supporting its proposal" may be deleted from paragraph (a) of the clause. * * *

* * * * *

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

29. Section 31.205–26 is amended by revising paragraphs (e) and (f) to read as follows:

31.205–26 Material costs.

* * * * *

(e) Allowance for all materials, supplies, and services that are sold or transferred between any divisions, subdivisions, subsidiaries, or affiliates of the contractor under a common control shall be on the basis of cost incurred in accordance with this subpart. However, allowance may be at price when it is the established practice of the transferring organization to price interorganizational transfers at other than cost for commercial work of the contractor or any division, subsidiary, or affiliate of the contractor under a common control, and when the item being transferred qualifies for an exception under 15.804–1 and the contracting officer has not determined the price to be unreasonable.

(f) When a catalog or market price exception under 15.804–1(a)(1)(ii) applies under paragraph (e) of this subsection, the price should be adjusted to reflect the quantities being acquired and may be adjusted to reflect the actual cost of any modifications necessary because of contract requirements.

PART 33—PROTESTS, DISPUTES, AND APPEALS

30. Section 33.207(d) is revised to read as follows:

33.207 Contractor certification.

* * * * *

(d) The aggregate amount of both increased and decreased costs shall be used in determining when the dollar thresholds requiring certification are met (see example in 15.804–2(a)(1)(iii) regarding cost or pricing data).

* * * * *

PART 36—CONSTRUCTION AND ARCHITECT ENGINEERING CONTRACTS

31. Section 36.402 is amended by revising the introductory text of paragraph (b) and (b)(1) to read as follows:

36.402 Price negotiation.

* * * * *

(b) The contracting officer shall evaluate proposals and associated cost or pricing data or information other than cost or pricing data and shall compare them to the Government estimate.

(1) When submission of cost or pricing data is not required (see 15.804–1 and 15.804–2), and any element of proposed cost differs significantly from the Government estimate, the contracting officer should request the offeror to submit cost information concerning that element (e.g., wage rates or fringe benefits, significant materials, equipment allowances, and subcontractor costs).

* * * * *

PART 45—GOVERNMENT PROPERTY

32. Section 45.103(b)(1) is revised to read as follows:

45.103 Responsibility and liability for Government property.

* * * * *

(b) * * *

(1) Negotiated fixed-price contracts for which the contract price is not based upon an exception at 15.804–1;

* * * * *

33. Section 45.106(b)(2) is revised to read as follows:

45.106 Government property clauses.

* * * * *

(b) * * *

(2) If the contract is—

(i) A negotiated fixed-price contract for which prices are not based on an exception at 15.804–1; or

(ii) A fixed-price service contract which is performed primarily on a Government installation, provided the contracting officer determines it to be in the best interest of the Government (see 45.103(b)(4)), the contracting officer shall use the clause with its Alternate I.

* * * * *

PART 46—QUALITY ASSURANCE

46.804 [Amended]

34. Section 46.804 is amended by removing the parenthetical "(see 15.804–3(c))" and inserting "(see 15.804–1(b)(2))".

PART 49—TERMINATION OF CONTRACTS

35. Section 49.208 is amended in the introductory paragraph by revising the last sentence to read as follows:

49.208 Equitable adjustment after partial termination.

* * * The contractor shall submit the proposal on SF 1411, Contract Pricing Proposal Cover Sheet (Cost or Pricing Data Required).

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

35a. Part 52 is amended by removing the derivation lines following all "(End of provision)" or "(End of clause)" parentheticals and Alternates.

36. Section 52.214–27 is amended by revising the date of the clause and paragraphs (a) and (e)(2) to read as follows:

52.214–27 Price Reduction for Defective Cost or Pricing Data—Modifications—Sealed Bidding.

* * * * *

Price Reduction for Defective Cost or Pricing Data—Modifications—Sealed Bidding (Oct. 1995)

(a) This clause shall become operative only for any modification to this contract involving aggregate increases and/or decreases in costs, plus applicable profits, expected to exceed the threshold for the submission of cost or pricing data at FAR 15.804–2(a)(1), except that this clause does not apply to a modification if an exception under FAR 15.804–1 applies.

* * * * *

(e) * * *

(2) A penalty equal to the amount of the overpayment, if the Contractor or subcontractor knowingly submitted cost or pricing data which were incomplete, inaccurate, or noncurrent.

(End of clause.)

37. Section 52.214–28 is amended by revising the date of the clause and paragraphs (b) and (d) to read as follows:

52.214–28 Subcontractor Cost or Pricing Data—Modifications—Sealed Bidding.

* * * * *

Subcontractor Cost or Pricing Data—Modifications—Sealed Bidding (Oct. 1995)

* * * * *

(b) Before awarding any subcontract expected to exceed the threshold for submission of cost or pricing data at FAR 15.804–2(a)(1), on the date of agreement on price or the date of award, whichever is later; or before pricing any subcontract modifications involving aggregate increases and/or decreases in costs, plus applicable profits, expected to exceed the threshold for submission of cost or pricing data at FAR 15.804–2(a)(1), the Contractor shall require the subcontractor to submit cost or pricing data (actually or by specific identification in writing), unless an exception under FAR 15.804–1 applies.

* * * * *

(d) The Contractor shall insert the substance of this clause, including this paragraph (d), in each subcontract that, when entered into, exceeds the threshold for submission of cost or pricing data at FAR 15.804–2(a)(1).

(End of clause.)

52.214–29 [Amended]

37a. Section 52.214–29 is amended in the introductory text by removing the citation "14.201–7(e)" and inserting "14.201–7(d)" in its place.

38. Section 52.215–22 is amended by revising the date of the clause, and paragraph (d)(2) to read as follows:

52.215–22 Price Reduction for Defective Cost or Pricing Data.

* * * * *

Price Reduction for Defective Cost or Pricing Data (Oct. 1995)

* * * * *

(d) * * *

(2) A penalty equal to the amount of the overpayment, if the Contractor or subcontractor knowingly submitted cost or pricing data which were incomplete, inaccurate, or noncurrent.

(End of clause.)

39. Section 52.215–23 is amended by revising the clause date and paragraphs (a) and (e)(2) to read as follows:

52.215–23 Price Reduction for Defective Cost or Pricing Data—Modifications

* * * * *

Price Reduction for Defective Cost or Pricing Data—Modifications (Oct. 1995)

(a) This clause shall become operative only for any modification to this contract involving a pricing adjustment expected to exceed the threshold for submission of cost or pricing data at FAR 15.804–2(a)(1), except that this clause does not apply to any modification if an exception under FAR 15.804–1 applies.

* * * * *

(e) * * *

(2) A penalty equal to the amount of the overpayment, if the Contractor or subcontractor knowingly submitted cost or pricing data which were incomplete, inaccurate, or noncurrent.

(End of clause)

40. Section 52.215–24 is amended by revising the date of the clause, and paragraph (a) to read as follows:

52.215–24 Subcontractor Cost or Pricing Data.

* * * * *

Subcontractor Cost or Pricing Data (Oct 1995)

(a) Before awarding any subcontract expected to exceed the threshold for submission of cost or pricing data at FAR 15.804–2(a)(1), on the date of agreement on price or the date of award, whichever is later; or before pricing any subcontract modification involving a pricing adjustment expected to exceed the threshold for submission of cost or pricing data at FAR 15.804–2(a)(1), the Contractor shall require the subcontractor to submit cost or pricing data (actually or by specific identification in writing), unless an exception under FAR 15.804–1 applies.

* * * * *

41. Section 52.215–25 is amended by revising the date of the clause and paragraphs (b) and (d) to read as follows:

52.215–25 Subcontractor Cost or Pricing Data—Modifications.

* * * * *

Subcontractor Cost or Pricing Data—Modifications (Oct 1995)

(b) Before awarding any subcontract expected to exceed the threshold for submission of cost or pricing data at FAR 15.804–2(a)(1), on the date of agreement on price or the date of award, whichever is later; or before pricing any subcontract modification involving a pricing adjustment expected to exceed the threshold for submission of cost or pricing data at FAR 15.804–2(a)(1), the Contractor shall require the subcontractor to submit cost or pricing data (actually or by specific identification in writing), unless an exception under FAR 15.804–1 applies.

* * * * *

(d) The Contractor shall insert the substance of this clause, including this paragraph (d), in each subcontract that exceeds the threshold for submission of cost or pricing data at FAR 15.804–2(a)(1) on the date of agreement on price or the date of award, whichever is later.

(End of clause)

42. Section 52.215–26 is amended by revising the clause date and paragraph (b) to read as follows:

52.215–26 Integrity of Unit Prices.

* * * * *

Integrity of Unit Prices (Oct 1995)

* * * * *

(b) The requirement in paragraph (a) of this clause does not apply to any contract or subcontract item of supply for which the unit price is, or is based on, an established catalog or market price for a commercial item sold in substantial quantities to the general public or to an item qualifying for a commercial item exception to cost or pricing data. A price is based on an established catalog or market price only if the item being purchased is sufficiently similar to the catalog or market priced commercial item to ensure that any difference in prices can be identified and justified without resort to cost analysis.

* * * * *

43. Sections 52.215–41 through 52.215–43 are added to read as follows:

52.215–41 Requirements for Cost or Pricing Data or Information Other Than Cost or Pricing Data.

As prescribed in 15.804–8(h), insert the following provision:

Requirements for Cost or Pricing Data or Information Other Than Cost or Pricing Data (Oct 1995)

(a) *Exceptions from cost or pricing data.* (1) In lieu of submitting cost or pricing data, offerors may submit a written request for exception by submitting the information described in the following subparagraphs. The Contracting Officer may require additional supporting information, but only to the extent necessary to determine whether an exception should be granted, and whether the price is fair and reasonable.

(i) Information relative to an exception granted for prior or repetitive acquisitions.

(ii) Catalog price information as follows:

(A) Attach a copy of or identify the catalog and its date, or the appropriate pages for the offered items, or a statement that the catalog is on file in the buying office to which this proposal is being made.

(B) Provide a copy or describe current discount policies and price lists (published or unpublished), e.g., wholesale, original equipment manufacturer, and reseller.

(C) Additionally, for each catalog item that exceeds ______ * (extended value not unit price), provide evidence of substantial sales to the general public. This may include sales order, contract, shipment, invoice, actual recorded sales or other records that are verifiable. In addition, if the basis of the price proposal is sales of essentially the same commercial item by affiliates, other manufacturers or vendors, those sales may be included. The offeror shall explain the basis of each offered price and its relationship to the established catalog price. When substantial general public sales have also been made at prices other than catalog or price list prices, the offeror shall indicate how the proposed price relates to the price of such recent sales in quantities similar to the proposed quantities.

(iii) *Market price information.* Include the source and date or period of the market quotation or other basis for market price, the base amount, and applicable discounts. The nature of the market should be described. The supply or service being purchased should be the same as or similar to the market price supply or service. Data supporting substantial sales to the general public is also required.

(iv) Identification of the law or regulation establishing the price offered. If the price is controlled under law by periodic rulings, reviews, or similar actions of a governmental body, attach a copy of the controlling document, unless it was previously submitted to the contracting office.

(v) For a commercial item exception, information on prices at which the same item or similar items have been sold in the commercial market.

(2) The offeror grants the Contracting Officer or an authorized representative the right to examine, at any time before award, books, records, documents, or other directly pertinent records to verify any request for an exception under this provision, and the reasonableness of price. Access does not extend to cost or profit information or other data relevant solely to the offeror's determination of the prices to be offered in the catalog or marketplace.

(b) *Requirements for cost or pricing data.* If the offeror is not granted an exception from the requirement to submit cost or pricing data, the following applies:

---

*Insert dollar amount for sampling (see 15.804–1(c)(1))

(1) The offeror shall submit cost or pricing data on Standard Form (SF) 1411, Contract Pricing Proposal Cover Sheet (Cost or Pricing Data Required), with supporting attachments prepared in accordance with Table 15–2 of FAR 15.804–6(b)(2).

(2) As soon as practicable after agreement on price, but before contract award (except for unpriced actions such as letter contracts), the offeror shall submit a Certificate of Current Cost or Pricing Data, as prescribed by FAR 15.804–4.

(c) By submitting information to qualify for an exception, an offeror is not representing that this is the only exception that may apply.

(End of provision)

Alternate I (Oct 1995). As prescribed in 15.804–8(h), substitute the following paragraph (b)(1) for paragraph (b)(1) of the basic provision:

(b)(1) The offeror shall submit cost or pricing data on Standard Form (SF) 1411, Contract Pricing Proposal Cover Sheet (Cost or Pricing Data Required), with supporting attachments prepared in the following format:

Alternate II (Oct 1995). As prescribed in 15.804–8(h), add the following paragraph (d) to the basic provision:

(c) When the proposal is submitted, also submit one copy each, including the SF 1411 and supporting attachments, to: (1) the Administrative Contracting Officer, and (2) the Contract Auditor.

Alternate III (Oct. 1995). As prescribed in 15.804–8(h), add the following paragraph (d) to the basic provision (if Alternate II is also used, redesignate as paragraph (e)):

(d) Submit the cost portion of the proposal via the following electronic media: *(Insert media format, e.g., electronic spreadsheet format, electronic mail, etc.).*

Alternate IV (Oct. 1995). As prescribed in 15.804–8(h), replace the text of the basic provision with the following:

(a) Submission of cost or pricing data is not required.

(b) Provide information described below: (*Insert description of the information and the format that are required, including access to records necessary to permit an adequate evaluation of the proposed price in accordance with 15.804–6(a)(5). Standard Form 1448, Proposal Cover Sheet (Cost or Pricing Data Not Required), may be used for information other than cost or pricing data).*

52.215–42 Requirements for Cost or Pricing Data or Information Other Than Cost or Pricing Data—Modifications.

As prescribed in 15.804–8(i), insert the following clause:

Requirements for Cost or Pricing Data or Information Other Than Cost or Pricing Data—Modifications (Oct. 1995)

(a) *Exceptions from cost or pricing data.* (1) In lieu of submitting cost or pricing data for modifications under this contract, for price adjustments expected to exceed the threshold set forth at FAR 15.804–2(a)(1) on the date of the agreement on price or the date of the award, whichever is later, the Contractor may submit a written request for exception by submitting the information described in the following subparagraphs. The Contracting Officer may require additional supporting information, but only to the extent necessary to determine whether an exception should be granted, and whether the price is fair and reasonable—

(i) Information relative to an exception granted for prior or repetitive acquisitions.

(ii) Catalog price information as follows:

(A) Attach a copy of or identify the catalog and its date, or the appropriate pages for the offered items, or a statement that the catalog is on file in the buying office to which this proposal is being made.

(B) Provide a copy or describe current discount policies and price lists (published or unpublished), e.g., wholesale, original equipment manufacturer, and reseller.

(C) Additionally, for each catalog item that exceeds _____* (extended value not unit price), provide evidence of substantial sales to the general public. This may include sales order, contract, shipment, invoice, actual recorded sales or other records that are verifiable. In addition, if the basis of the price proposal is sales of essentially the same commercial item by affiliates, other manufacturers or vendors, those sales may be included. The offeror shall explain the basis of each offered price and its relationship to the established catalog price. When substantial general public sales have also been made at prices other than catalog or price list prices, the offeror shall indicate how the proposed price relates to the price of such recent sales in quantities similar to the proposed quantities.

(iii) *Market price information*. Include the source and date or period of the market quotation or other basis for market price, the base amount, and applicable discounts. The nature of the market should be described. The supply or service being purchased should be the same as or similar to the market price supply or service. Data supporting substantial sales to the general public is also required.

(iv) Identification of the law or regulation establishing the price offered. If the price is controlled under law by periodic rulings, reviews, or similar actions of a governmental body, attach a copy of the controlling document, unless it was previously submitted to the contracting office.

(v) Information on modifications of contracts or subcontracts for commercial items.

(A) If (*1*) The original contract or subcontract was granted an exception from cost or pricing data requirements because the price agreed upon was based on adequate price competition, catalog or market prices of commercial items, or prices set by law or regulation; and (*2*) the modification (to the contract or subcontract) is not exempted based on one of these exceptions, then the Contractor may provide information to establish that the modification would not change the contract or subcontract from a contract or subcontract for the acquisition of a commercial item to a contract or subcontract for the acquisition of an item other than a commercial item.

(B) For a commercial item exception, the Contractor may provide information on prices at which the same item or similar items have been sold in the commercial market.

(2) The Contractor grants the Contracting Officer or an authorized representative the right to examine, at any time before award, books, records, documents, or other directly pertinent records to verify any request for an exception under this clause, and the reasonableness of price. Access does not extend to cost or profit information or other data relevant solely to the Contractor's determination of the prices to be offered in the catalog or marketplace.

(3) By submitting information to qualify for an exception, an offeror is not representing that this is the only exception that may apply.

(b) *Requirements for cost or pricing data.* If the Contractor is not granted an exception from the requirement to submit cost or pricing data, the following applies:

(1) The Contractor shall submit cost or pricing data on Standard Form (SF) 1411, Contract Pricing Proposal Cover Sheet (Cost or Pricing Data Required), with supporting attachments prepared in accordance with Table 15–2 of FAR 15.804–6(b)(2).

(2) As soon as practicable after agreement on price, but before award (except for unpriced actions), the Contractor shall submit a Certificate of Current Cost or Pricing Data, as prescribed by FAR 15.804–4.

(End of clause.)

Alternate I (Oct. 1995). As prescribed in 15.804–8(i), substitute the following paragraph (b)(1) for paragraph (b)(1) of the basic clause.

(b)(1) The Contractor shall submit cost or pricing data on Standard Form (SF) 1411, Contract Pricing Proposal Cover Sheet (Cost or Pricing Data Required), with supporting attachments prepared in the following format:

Alternate II (Oct. 1995). As prescribed in 15.804–8(i), add the following paragraph (c) to the basic clause:

(c) When the proposal is submitted, also submit one copy each, including the SF 1411 and supporting attachments, to: (1) The Administrative Contracting Officer, and (2) the Contract Auditor.

Alternate III (Oct. 1995). As prescribed in 15.804–8(i), add the following paragraph (c) to the basic clause (if Alternate II is also used, redesignate as paragraph (d)):

(c) Submit the cost portion of the proposal via the following electronic media: (*Insert media format*).

Alternate IV (Oct. 1995). As prescribed in 15.804–8(i), replace the text of the basic clause with the following:

(a) Submission of cost or pricing data is not required.

(b) Provide information described below: (*Insert description of the information and the format that are required, including access to records necessary to permit an adequate evaluation of the proposed price in accordance with 15.804–6(a)(5). Standard Form 1448, Proposal Cover Sheet (Cost or Pricing Data Not Required), may be used for information other than cost or pricing data.*)

---

*Insert dollar amount for sampling (see 15.804–1(c)(1)).

52.215–43 Audit—Commercial Items.

As prescribed at 15.106–2, insert the following clause:

Audit—Commercial Items (Oct. 1995)

(a) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of whether such items are in written form, in the form of computer data, or any other form.

(b) This paragraph applies to solicitations and contracts or subcontracts for commercial items that may be or have been granted an exception from submittal of cost or pricing data only under FAR 15.804–1(a)(2). In order to determine the accuracy of the information on prices at which the same or similar items have been sold in the commercial market, the Contracting Officer and authorized representatives have a right to examine such information provided by the offeror, Contractor, or subcontractor, and all records that directly relate to such information. Access does not extend to cost or profit information or other data relevant solely to the offeror's determination of the prices to be offered in the marketplace. This right shall expire two years after the date of award of the contract, or two years after the date of any modification to the contract, with respect to which this information is provided.

(c) If the prime Contractor and each higher-tier subcontractor were required to submit cost or pricing data, the Contractor and each subcontractor shall insert the substance of this clause, including this paragraph (c), in each subcontract for which submission of cost or pricing data was required or for which an exception was granted under FAR 15.804–1(a)(2).

(End of clause.)

52.216–2 [Amended]

44. Section 52.216–2 is amended in the clause heading by revising the date to read "(Oct. 1995)"; in paragraph (a)(2) by removing "15.804–3" and inserting "15.804–1" in its place; and removing the parenthetical following "(End of clause)".

52.216–3 [Amended]

45. Section 52.216–3 is amended in the clause heading by removing "(APR 1984)" and inserting "(Oct. 1995)"; in paragraph (a)(2) by removing the reference "15.804–3" and inserting "15.804–1"; and by removing the parenthetical following "(End of clause)".

46. Section 52.216–5 is amended by revising the clause date and paragraph (d)(1)(i)(A); and by removing the parenthetical following "(End of clause)" to read as follows:

52.216–5 Price Redetermination—Prospective.

* * * * *

Price Redetermination—Prospective (Oct. 1995)

* * * * *

(d) * * *

(1) * * *

(i) * * *

(A) An estimate and breakdown of the costs of these supplies or services on Standard Form 1411, Contract Pricing Proposal Cover Sheet (Cost or Pricing Data Required), or in any other form on which the parties may agree;

* * * * *

47. Section 52.216–6 is amended by revising the introductory text, the clause date, and paragraph (c)(1)(ii) to read as follows:

52.216–6 Price Redetermination—Retroactive.

As prescribed in 16.206–4, insert the following clause:

Price Redetermination—Retroactive (Oct. 1995)

* * * * *

(c) * * *

(1) * * *

(ii) A statement on Standard Form 1411, Contract Pricing Proposal Cover Sheet (Cost or Pricing Data Required), or in any other form on which the parties may agree, of all costs incurred in performing the contract; and

* * * * *

48. Section 52.216–25 is amended by revising the introductory paragraph; and the parentheticals following the end of the main clause and the end of Alternate I are removed to read as follows:

52.216–25 Contract Definitization.

As prescribed in 16.603–4(b)(3), insert the following clause:

* * * * *

49. Section 52.222–48 is amended by revising the clause date, redesignating paragraphs (a) (i), (ii), and (iii) as (a) (1), (2), and (3), and revising newly redesignated paragraph (a)(2) to read as follows:

52.222–48 Exemption from Application of Service Contract Act Provisions for Contracts for Maintenance, Calibration, and/or Repair of Certain ADP, Scientific and Medical and/or Office and Business Equipment—Contractor Certification.

* * * * *

Exemption From Application of Service Contract Act Provisions for Contracts for Maintenance, Calibration, and/or Repair of Certain ADP, Scientific and Medical and/or Office and Business Equipment—Contractor Certification (Oct. 1995)

(a) * * * (2) The contract services are furnished at prices which are, or are based on, established catalog or market prices for the maintenance, calibration, and/or repair of certain ADP, scientific and medical and/or office and business equipment. An "established catalog price" is a price (including discount price) recorded in a catalog, price list, schedule, or other verifiable and established record that is regularly maintained by the manufacturer or the Contractor and is either published or otherwise available for inspection by customers. An "established market price" is a current price, established in the course of ordinary and usual trade between buyers and sellers free to bargain, which can be substantiated by data from sources independent of the manufacturer or Contractor; and * * *

* * * * *

PART 53—FORMS

50. Section 53.215–2 is revised to read as follows:

53.215–2 Price negotiation (SF's 1411 and 1448).

The following standard forms are prescribed for use in connection with requirements for obtaining cost or pricing data or information other than cost or pricing data from offerors or contractors, as specified in 15.804:

(a) SF 1411 (REV. OCT./95), *Contract Pricing Proposal Cover Sheet (Cost or Pricing Data Required).* (See 15.804–6(b)(1).) SF 1411 is authorized for local reproduction and a copy is furnished for this purpose in Part 53 of the loose-leaf edition of the FAR.

(b) SF 1448 (OCT/95), *Proposal Cover Sheet (Cost or Pricing Data Not Required).* (See 15.804–6(b)(2).) SF 1448 is authorized for local reproduction and a copy is furnished for this purpose in Part 53 of the loose-leaf edition of the FAR.

51. Section 53.301–1411 is revised and 53.301–1448 is added to read as follows:

BILLING CODE 6820–EP–P

53.301–1411 Contract Pricing Proposal Cover Sheet.

CONTRACT PRICING PROPOSAL COVER SHEET

Federal Acquisition Regulation; Protests, Disputes, and Appeals

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: This final rule is issued pursuant to the Federal Acquisition Streamlining Act of 1994 (Pub. L. 103–355) (the Act) dated October 13, 1994, to implement the Act's requirements with respect to disputes and protests to the General Accounting Office and General Services Administration Board of Contract Appeals. This regulatory action was subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

DATES: *Effective date:* October 1, 1995.

Applicability date: Where this rule repeats a GSBCA rule that went into effect earlier, the date of the GSBCA rule and its applicability provision prevails; otherwise, this rule is applicable to protests or claims filed on or after the effective date of this rule.

FOR FURTHER INFORMATION CONTACT: Mr. Craig E. Hodge, Protests/Disputes Team Leader, at (703) 274–8940 in reference to this FAR case. For general information, contact the FAR Secretariat, Room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–32, FAR case 94–730, Protests, Disputes and Appeals.

SUPPLEMENTARY INFORMATION:

A. Background

The Federal Acquisition Streamlining Act of 1994, Pub. L. 103–355, (the Act) provides authorities that streamline the acquisition process and minimize burdensome Government-unique requirements.

This notice announces FAR revisions developed under FAR Case 94–730, Protests, Disputes, and Appeals. The Act changed the General Accounting Office (GAO) protest procedures, the General Services Board of Contract Appeals (GSBCA) protest procedures, and the alternative dispute resolution (ADR) procedures. This rule reflects those changes to GAO, GSBCA, and ADR procedures that require revisions to the FAR.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because a relatively small number of firms file protests or claims. In addition, this rule is generally derivative of GAO and GSBCA rules which implement the statute. Neither the GAO nor the GSBCA concluded that the rules they were promulgating, which form the basis for this rule, had a significant economic impact on a substantial number of small entities.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the change to the FAR does not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

D. Public Comments

On January 10, 1995, a proposed rule was published in the **Federal Register** (60 FR 2630). In response to the notice of proposed rulemaking, 19 public comments were received.

The largest number of public comments concerned the definition of "accrual". Some commenters felt that contractor and Government claims were to be treated differently because "accrual" was defined only in terms of the contractor claim. To resolve that problem, a general definition of "accrual" has been added. Several commenters requested retroactive language be added. Therefore, the six-year limitation was specifically applied only to contracts awarded after the end of the current fiscal year. There were also a number of alternate definitions of "accrual" proposed. In addition to the discovery of the events, a discovery of some damage has been added to cover the unusual case where the party is aware of the events giving rise to the claim, but not of any resulting damage.

In the protest area, commenters exhibited the most interest in the GAO bid protest file, and requested guidance on GAO and GSBCA witness fee limitations. The protest file requirement has been clarified. Although the GAO rule was concerned with providing protest files to the intervenors, Congress mandated protest files be made available by the contracting officer even to parties which failed to intervene. The extent to which the discussion of protest files differs between the proposed GAO regulation and this regulation reflects that difference. In any event, the GAO final regulation dropped the requirement for a protest file. Further specific guidance concerning witness fee limitations has now been incorporated in the regulation.

List of Subjects in 48 CFR Parts 1, 33, 42, 50 and 52

Government procurement.

Dated: September 7, 1995.

Edward C. Loeb,

Deputy Project Manager for the Implementation of the Federal Acquisition Streamlining Act of 1994.

Therefore, 48 CFR Parts 1, 33, 42, 50, and 52 are amended as set forth below:

1. The authority citation for 48 CFR Parts 1, 33, 42, 50, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 1—FEDERAL ACQUISITION REGULATION SYSTEM

2. Section 1.602–3 is amended by revising paragraph (c)(2) to read as follows:

1.602–3 Ratification of unauthorized commitments.

* * * * *

(c) * * *

(2) The ratifying official has the authority to enter into a contractual commitment;

* * * * *

PART 33—PROTESTS, DISPUTES, AND APPEALS

3. Section 33.101 is amended by adding in alphabetical order the definitions "Day" and "Filed", and revising the definition "Protest" to read as follows:

33.101 Definitions.

Day, as used in this subpart, means a calendar day, unless otherwise specified. In the computation of any period—

(a) The day of the act, event, or default from which the designated period of time begins to run is not included; and

(b) The last day after the act, event, or default is included unless—

(1) The last day is a Saturday, Sunday, or legal holiday; or

(2) In the case of a filing of a paper at any appropriate administrative forum, the last day is a day on which weather or other conditions cause the closing of the forum for all or part of the day, in which event the next day on which the appropriate administrative forum is open is included.

(c) In the case of the 5-day period after a debriefing date and the 10-day period after contract award for filing a protest resulting in a suspension (as described at 33.104(c)), Saturdays, Sundays, and legal holidays shall be counted.

Filed, as used in this subpart, means the complete receipt of any document by an agency before its close of business. Documents received after close of business are considered filed as of the next day. Unless otherwise stated, the agency close of business is presumed to be 4:30 p.m., local time.

* * * * *

Protest, as used in this subpart, means a written objection by an interested party to any of the following:

(a) A solicitation or other request by an agency for offers for a contract for the procurement of property or services.

(b) The cancellation of the solicitation or other request.

(c) An award or proposed award of the contract.

(d) A termination or cancellation of an award of the contract, if the written objection contains an allegation that the termination or cancellation is based in whole or in part on improprieties concerning the award of the contract.

4. Section 33.102 is amended by revising paragraph (a); redesignating paragraphs (b) and (c) as (c) and (e), respectively, and adding new paragraphs (b) and (d); and revising newly designated paragraphs (e)(2) and (e)(3) to read as follows:

33.102 General.

(a) Contracting officers shall consider all protests and seek legal advice, whether protests are submitted before or after award and whether filed directly with the agency, the General Accounting Office (GAO), or for automatic data processing acquisitions under 40 U.S.C. 759 (ADP contracts), the General Services Board of Contract Appeals (GSBCA or the Board). (See 19.302 for protests of small business status and 22.608–3 for protests involving eligibility under the Walsh-Healey Public Contracts Act.)

(b) If, in connection with a protest, the head of an agency determines that a solicitation, proposed award, or award does not comply with the requirements of law or regulation, the head of the agency may—

(1) Take any action that could have been recommended by the Comptroller General had the protest been filed with the General Accounting Office; and

(2) Pay appropriate costs as stated in 33.104(h).

* * * * *

(d) *Protest likely after award.* The contracting officer may stay performance of a contract within the time period contained in 33.104(c)(1) if the contracting officer makes a written determination that—

(1) A protest is likely to be filed; and

(2) Delay of performance is, under the circumstances, in the best interests of the United States.

(e) * * *

(2) May protest to the GAO in accordance with GAO regulations (4 CFR Part 21). An interested party who has filed a protest regarding an ADP procurement with the GAO may not file a protest with the GSBCA with respect to that procurement.

(3) May protest to the GSBCA regarding an award of an ADP contract in accordance with GSBCA Rules of Procedure (48 CFR Chapter 61). An interested party who has filed a protest regarding an ADP procurement with GSBCA (40 U.S.C. 759(f)) may not file a protest with the GAO with respect to that procurement.

---

5. Section 33.103 is amended in the first sentence of (b)(1) by removing "or" and inserting "and" in its place; revising the second and third sentences of (b)(2) and the second sentence in (b)(4); and adding (b)(5) to read as follows:

33.103 Protests to the agency.

* * * * *

(b) * * *

(2) * * * In all other cases, protests shall be filed not later than 14 days after the basis of protest is known or should have been known, whichever is earlier. The agency, for good cause shown, or where it determines that a protest raises issues significant to the agency's acquisition system, may consider the merits of any protest which is not timely filed.

* * * * *

(4) * * * Failure to substantially comply with any of the requirements of this paragraph (b) may be grounds for dismissal of the protest.

(5) The agency should furnish a copy of the written protest ruling to the protester by certified mail, return receipt requested, or by any other method that provides evidence of receipt.

6. Section 33.104 is amended—

a. By revising the introductory text, paragraphs (a)(1), (a)(3), the first sentence of (a)(4)(i) introductory text, (a)(4)(ii) (A) and (B), (a)(5) introductory text, (a)(5) (i), (ii), and (iii), (a)(6), (c)(1), (c)(5), (e), (f), (g), and (h);

b. By removing from the first sentence of (a)(2) the words "substantial and";

c. By adding a sentence to the end of paragraph (a)(2)(ii); and

d. By removing from (b)(1)(ii) the word "calendar"; and by removing the word "protestor" and inserting "protester" in (a)(4)(i) introductory text, (a)(4)(ii)(C), and (d), and by removing the word "Protestor's" in paragraph (a)(4)(i)(B) and adding "Protester's" in its place.

The revised and added text reads as follows:

33.104 Protests to GAO.

Procedures for protests to GAO are found at 4 CFR Part 21 (GAO Bid Protest Regulations). In the event guidance concerning GAO procedure in this section conflicts with 4 CFR Part 21, 4 CFR Part 21 governs.

(a) *General procedures.* (1) A protester is required to furnish a copy of its complete protest to the official and location designated in the solicitation or, in the absence of such a designation, to the contracting officer, so it is received no later than 1 day after the protest is filed with the GAO. The GAO may dismiss the protest if the protester fails to furnish a complete copy of the protest within 1 day.

(2) * * *

(ii) * * * However, if the protester has identified sensitive information and requests a protective order, then the contracting officer shall obtain a redacted version from the protester to furnish to other interested parties, if one has not already been provided.

(3)(i) Upon notice that a protest has been filed with the GAO, the contracting officer shall immediately begin compiling the information necessary for a report to the GAO. The agency shall submit a complete report to the GAO within 35 days after the GAO notifies the agency by telephone that a protest has been filed, or within 20 days after receipt from the GAO of a determination to use the express option, unless the GAO—

(A) Advises the agency that the protest has been dismissed; or

(B) Authorizes a longer period in response to an agency's request for an extension. Any new date is documented in the agency's file.

(ii) When a protest is filed with the GAO, and an actual or prospective offeror so requests, the procuring agency shall, in accordance with any applicable protective orders, provide actual or prospective offerors reasonable access to the protest file. However, if the GAO dismisses the protest before the documents are submitted to the GAO, then no protest file need be made available. Information exempt from disclosure under 5 U.S.C. 552 may be redacted from the protest file. The protest file shall be made available to non-intervening actual or prospective offerors within a reasonable time after submittal of an agency report to the GAO. The protest file shall include an index and as appropriate—

(A) The protest;

(B) The offer submitted by the protester;

(C) The offer being considered for award or being protested;

(D) All relevant evaluation documents;

(E) The solicitation, including the specifications or portions relevant to the protest;

(F) The abstract of offers or relevant portions; and

(G) Any other documents that the agency determines are relevant to the protest, including documents specifically requested by the protester.

(iii) The agency report to the GAO shall include—

(A) A copy of the documents described in 33.104(a)(3)(ii);

(B) The contracting officer's signed statement of relevant facts and a memorandum of law. The contracting officer's statement shall set forth findings, actions, and recommendations, and any additional evidence or information not provided in the protest file that may be necessary to determine the merits of the protest;

(C) A list of the documents withheld from the protester, or intervenors, and the reasons for withholding them. The list identifies any documents specifically requested by, and withheld from, the protester; and

(D) A list of parties being provided the documents.

(4)(i) At the same time the agency submits its report to the GAO, the agency shall furnish copies of its report to the protestor and any intervenors. * * *

* * * * *

(ii)(A) If the protester requests additional documents within 2 days after the protester knew the existence or relevance of additional documents, or should have known, the agency shall provide the requested documents to the GAO within 5 days of receipt of the request.

(B) The additional documents shall also be provided to the protester and other interested parties within this 5-day period unless the agency has decided to withhold them for any reason (see subdivision (a)(4)(i) of this section). This includes any documents covered by a protective order issued by the GAO. Documents covered by a protective order shall be provided only in accordance with the terms of the order.

* * * * *

(5) The GAO may issue protective orders which establish terms, conditions, and restrictions for the provision of any document to an interested party. Protective orders prohibit or restrict the disclosure by the party of procurement sensitive information, trade secrets or other proprietary or confidential research, development or commercial information that is contained in such document. Protective orders do not authorize withholding any documents or information from the United States Congress or an executive agency.

(i) *Requests for protective orders.* Any party seeking issuance of a protective order shall file its request with the GAO as soon as practicable after the protest is filed, with copies furnished simultaneously to all parties.

(ii) *Exclusions and rebuttals.* Within 2 days after receipt of a copy of the protective order request, any party may file with the GAO a request that particular documents be excluded from the coverage of the protective order, or that particular parties or individuals be included in or excluded from the protective order. Copies of the request shall be furnished simultaneously to all parties.

(iii) *Additional documents.* If the existence or relevance of additional documents first becomes evident after a protective order has been issued, any party may request that these additional documents be covered by the protective order. Any party to the protective order also may request that individuals not already covered by the protective order be included in the order. Requests shall be filed with the GAO, with copies furnished simultaneously to all parties.

* * * * *

(6) The protester and other interested parties are required to furnish a copy of any comments on the agency report directly to the GAO within 14 days, or 7 days if express option is used, after receipt of the report, with copies provided to the contracting officer and to other participating interested parties. If a hearing is held, these comments are due within 7 days after the hearing.

* * * * *

(c) *Protests after award.* (1) When the agency receives notice of a protest from the GAO within 10 days after contract award or within 5 days after a debriefing date offered to the protester for any debriefing that is required by 15.1004, whichever is later, the contracting officer shall immediately suspend performance or terminate the awarded contract, except as provided in paragraphs (c) (2) and (3) of this section.

* * * * *

(5) When the agency receives notice of a protest filed with the GAO after the dates contained in subparagraph (c)(1), the contracting officer need not suspend contract performance or terminate the awarded contract unless the contracting officer believes that an award may be invalidated and a delay in receiving the supplies or services is not prejudicial to the Government's interest.

* * * * *

(e) *Hearings.* The GAO may hold a hearing at the request of the agency, a protester, or other interested party who has responded to the notice in paragraph (a)(2) of this section. A recording or transcription of the hearing will normally be made, and copies may be obtained from the GAO. All parties may file comments on the hearing and report within 7 days of the hearing.

(f) *GAO decision time.* GAO issues its recommendation on a protest within 125 days from the date of filing of the protest with the GAO, or within 65 days under the express option. The GAO attempts to issue its recommendation on an amended protest that adds a new ground of protest within the time limit of the initial protest. If an amended protest cannot be resolved within the initial time limit, the GAO may resolve the amended protest through an express option.

(g) *Notice to GAO.* If the agency has not fully implemented the GAO recommendations with respect to a solicitation for a contract or an award or a proposed award of a contract within 60 days of receiving the GAO recommendations, the head of the contracting activity responsible for that contract shall report the failure to the GAO not later than 5 days after the expiration of the 60-day period. The report shall explain the reasons why the GAO's recommendation, exclusive of costs, has not been followed by the agency.

(h) *Award of costs.* (1) If the GAO determines that a solicitation for a contract, a proposed award, or an award of a contract does not comply with a statute or regulation, the GAO may recommend that the agency pay to an appropriate protester the cost, exclusive of profit, of filing and pursuing the protest, including reasonable attorney, consultant and expert witness fees, and bid and proposal preparation costs. The agency shall use funds available for the procurement to pay the costs awarded.

(2) If the GAO recommends the award of costs to an interested party, the agency shall attempt to reach an agreement on the amount of the cost to be paid. If the agency and the interested party are unable to agree on the amount to be paid, GAO may, upon request of the interested party, recommend to the agency the amount of cost that the agency should pay.

(3) No agency shall pay a party, other than a small business concern within the meaning of section 3(a) of the Small Business Act (see 19.001, "Small business concern"), costs under paragraph (h)(2) of this section—

(i) For consultant and expert witness fees that exceed the highest rate of compensation for expert witnesses paid by the Government pursuant to 5 U.S.C. 3109 and Expert and Consultant Appointments, 60 FR 45649, September 1, 1995 (5 CFR 304.105); or

(ii) For attorneys' fees that exceed $150 per hour, unless the agency determines, based on the recommendation of the Comptroller General on a case-by-case basis, that an increase in the cost of living or a special factor, such as the limited availability of qualified attorneys for the proceedings involved, justifies a higher fee. The cap placed on attorneys' fees for businesses, other than small businesses, constitutes a benchmark as to a "reasonable" level for attorneys' fees for small businesses.

(4) A recommended award of costs may be paid by the agency from funds available to or for the use of the agency for the acquisition of supplies or services. Before paying a recommended award of costs, agency personnel should consult legal counsel. Section 33.104(h) applies to all recommended awards of costs which have not yet been paid.

(5) If the GAO recommends that the agency pay costs (as defined in paragraph (h)(1) of this section) and the agency does not promptly pay the costs, the agency shall promptly report to GAO the reasons for the failure to follow the GAO recommendation.

(6) Any costs the contractor receives under this section shall not be the subject of subsequent proposals, billings, or claims against the Government and those exclusions should be reflected in the cost agreement.

7. Section 33.105 is amended—

a. By adding an introductory paragraph;

b. By revising (a)(1) and the introductory text of (d)(1);

c. By removing from (a)(2)(i) "working day" and inserting "work day" in its place, from (a)(2)(ii) "five working days" and inserting "3 work days"; from (b)(6) "protestors" and inserting "protesters"; from (c) "15" and inserting "10", from (d)(1)(i) the word "calendar", and from (e) "25 work days" and "45 work days" and inserting "35 days" and "65 days", respectively;

d. By redesignating paragraphs (f) and (g) as (g) and (h), respectively, and revising the newly redesignated (g) and (h), and

f. By adding new paragraphs (d)(4) and (f).

The revised and added text reads as follows:

33.105 Protests to GSBCA.

Procedures for protests to the GSBCA, are found at 48 CFR Chapter 61 (GSBCA Rules). In the event guidance concerning GSBCA procedures in this subpart conflicts with 48 CFR Chapter 61, 48 CFR Chapter 61 governs.

(a)(1) Upon request of an interested party in connection with any procurement that is subject to Section 111 of the Federal Property and Administrative Services Act (40 U.S.C. 759), the GSBCA reviews any decision by the contracting officer that is alleged to violate a statute, a regulation, or the conditions of a delegation of procurement authority. ADP acquisition protests not covered under this section may not be heard by the GSBCA, but may be heard by the agency, the courts, or GAO. A protester shall furnish a copy of its complete protest to the official and location designated in the solicitation, or in the absence of such a designation, to the contracting officer on the same day the protest is filed with the GSBCA. Any request for a hearing on either a suspension of procurement authority or on the merits shall be in the protest.

* * * * *

(d)(1) If a protest contains a timely request for a suspension of procurement authority, the Board will hold a hearing, unless the agency does not contest an order suspending its procurement authority. A timely request for suspension of procurement authority is one that is filed before award, within 10 days of award, or within five days of the offered debriefing, when the debriefing is required by 15.1004, whichever applies. The Board suspends the procurement authority unless the agency establishes that—

* * * * *

(4) A suspension shall not preclude the agency concerned from continuing the procurement process up to, but not including, the award of the contract unless the Board determines the action is not in the best interests of the United States.

* * * * *

(f) Any agreement that provides for the dismissal of a protest and involves a direct or indirect expenditure of appropriated funds shall be made part of the public record (subject to any protective order considered appropriate by the Board) before dismissal of the protest. If an agency is party to a settlement agreement, the submission of the agreement to the Board shall include a memorandum, signed by the contracting officer concerned, that describes in detail the procurement, the grounds for protest, the Government's position regarding the grounds for protest, the terms of the settlement, and the agency's position regarding the propriety of the award or proposed award of the contract at issue in the protest.

(g)(1) The GSBCA may declare an appropriate prevailing party to be entitled to the cost, exclusive of profit, of—

(i) Filing and pursuing the protest, including reasonable attorney, consultant and expert witness fees; and

(ii) Bid and proposal preparation.

(2) Costs awarded under subparagraph (g)(1) of this section, or payments of amounts due under settlement agreements, shall be paid out in accordance with the procedures provided in 31 U.S.C. 1304 (the Permanent Indefinite Judgment Fund). The agency concerned shall reimburse that fund out of funds available for the procurement.

(3) No agency shall pay a party, other than a small business concern within the meaning of section 3(a) of the Small Business Act (see 19.001, "Small business concern"), costs under paragraph (g)(1) of this section for—

(i) Consultant and expert witness fees that exceed the highest rate of compensation for expert witnesses paid by the Government pursuant to 5 U.S.C. 3109 and Expert and Consultant Appointments, 60 FR 45649, September 1, 1995 (5 CFR 304.105); or

(ii) Attorneys' fees that exceed $150 per hour, unless the Board determines, on a case-by-case basis, that an increase in the cost of living or a special factor, such as the limited availability of qualified attorneys for the proceedings involved, justifies a higher fee. The cap placed on attorneys' fees for businesses, other than small businesses, constitutes a benchmark as to a "reasonable" level for attorneys' fees for small businesses.

(4) Within 30 days after receipt by the agency of an application for costs, the agency may file an answer.

(h) The GSBCA's final decision may be appealed by the agency or by any interested party, including any intervening interested parties, as set forth in the Contract Disputes Act of 1978 (41 U.S.C. 601–613).

8. Section 33.201 is amended by adding in alphabetical order definitions for "Accrual of a claim" and "Alternative dispute resolution (ADR)" removing the definition "Alternative means of dispute resolution (ADR)"; and in the definition "Claim" by removing the amount "$50,000" and inserting "$100,000" in its place.

33.201 Definitions.

Accrual of a claim occurs on the date when all events, which fix the alleged liability of either the Government or the contractor and permit assertion of the claim, were known or should have been known. For liability to be fixed, some injury must have occurred. However, monetary damages need not have been incurred.

Alternative dispute resolution (ADR) means any procedure or combination of procedures voluntarily used to resolve issues in controversy without the need to resort to litigation. These procedures may include, but are not limited to, assisted settlement negotiations, conciliation, facilitation, mediation, fact-finding, minitrials, and arbitration.

* * * * *

9. Section 33.206 is revised to read as follows:

33.206 Initiation of a claim.

(a) Contractor claims shall be submitted, in writing, to the contracting officer for a decision within 6 years after accrual of a claim, unless the contracting parties agreed to a shorter time period. This 6-year time period does not apply to contracts awarded prior to October 1, 1995. The contracting officer shall document the contract file with evidence of the date of receipt of any submission from the contractor deemed to be a claim by the contracting officer.

(b) The contracting officer shall issue a written decision on any Government claim initiated against a contractor within 6 years after accrual of the claim, unless the contracting parties agreed to a shorter time period. The 6-year period shall not apply to contracts awarded prior to October 1, 1995, or to a Government claim based on a contractor claim involving fraud.

33.207 [Amended]

10. Section 33.207 is amended in paragraph (a)(1) by removing "$50,000" and inserting "$100,000" in its place.

33.208 [Amended]

11. Section 33.208 is amended in paragraph (c) by removing "as defined in 33.201,".

12. Section 33.211 is amended in paragraph (a)(4)(v) by removing "$10,000" and "$50,000" and inserting "$50,000" and "$100,000", respectively; in (c)(1), (c)(2) and (e) by removing "$50,000" and inserting "$100,000" in its place; and by revising paragraph (f) to read as follows:

33.211 Contracting officer's decision.

* * * * *

(f) In the event of undue delay by the contracting officer in rendering a decision on a claim, the contractor may request the tribunal concerned to direct the contracting officer to issue a decision in a specified time period determined by the tribunal.

* * * * *

13. Section 33.214 is amended by redesignating paragraphs (b) through (d) as (c) through (e) and adding a new paragraph (b) to read as follows:

33.214 Alternative dispute resolution (ADR).

* * * * *

(b) If the contracting officer rejects a request for ADR from a small business contractor, the contracting officer shall provide the contractor written explanation citing one or more of the conditions in 5 U.S.C. 572(b) or such other specific reasons that ADR procedures are inappropriate for the resolution of the dispute. In any case where a contractor rejects a request of an agency for ADR proceedings, the contractor shall inform the agency in writing of the contractor's specific reasons for rejecting the request.

* * * * *

14. Subpart 42.16 is added to read as follows:

Subpart 42.16—Small Business Contract Administration

42.1601 General.

The contracting officer shall make every reasonable effort to respond in writing within 30 days to any written request to the contracting officer from a small business concern with respect to a contract administration matter. In the event the contracting officer cannot respond to the request within the 30-day period, the contracting officer shall, within the period, transmit to the contractor a written notification of the specific date the contracting officer expects to respond. This provision shall not apply to a request for a contracting officer decision under the Contract Disputes Act of 1978 (41 U.S.C. 601–613).

PART 50—EXTRAORDINARY CONTRACTUAL ACTIONS

15. Section 50.303 is redesignated as 50.303–1 and a new 50.303 heading is added to read as follows:

50.303 Contract adjustment.

* * * * *

16. Section 50.303–2 is added to read as follows:

50.303–2 Contractor certification.

A contractor seeking a contract adjustment that exceeds the simplified acquisition threshold shall, at the time the request is submitted, submit a certification by a person authorized to certify the request on behalf of the contractor that (a) the request is made in good faith and (b) the supporting data are accurate and complete to the best of that person's knowledge and belief.

50.304, 50.305 & 50.306 [Amended]

17. Sections 50.304(a) introductory text, 50.305(a) and 50.306 introductory text are amended by removing the reference "50.303" and inserting "50.303–1" in its place.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

18. Section 52.233–1 is amended by revising the date of the clause, the third sentence in paragraph (c), and paragraphs (d)(1) and (g); in (d)(2)(i)(A) and twice in (e) by removing "$50,000" and inserting "$100,000" to read as follows:

52.233–1 Disputes.

* * * * *

Disputes (Oct 1995)

* * * * *

(c) * * * However, a written demand or written assertion by the Contractor seeking the payment of money exceeding $100,000 is not a claim under the Act until certified as required by subparagraph (d)(2) of this clause. * * *

(d)(1) A claim by the Contractor shall be made in writing and, unless otherwise stated in this contract, submitted within 6 years after accrual of the claim to the Contracting Officer for a written decision. A claim by the Government against the Contractor shall be subject to a written decision by the Contracting Officer.

* * * * *

(g) If the claim by the Contractor is submitted to the Contracting Officer or a claim by the Government is presented to the Contractor, the parties, by mutual consent,

may agree to use ADR. If the Contractor refuses an offer for alternative disputes resolution, the Contractor shall inform the Contracting Officer, in writing, of the Contractor's specific reasons for rejecting the request. When using arbitration conducted pursuant to 5 U.S.C. 575–580, or when using any other ADR technique that the agency elects to handle in accordance with the ADRA, any claim, regardless of amount, shall be accompanied by the certification described in subparagraph (d)(2)(iii) of this clause, and executed in accordance with subparagraph (d)(3) of this clause.

* * * * *

19. Section 52.233–2 is amended by revising the date of the clause and adding paragraph (c) to read as follows:

52.233–2 Service of Protest.

* * * * *

Service of Protest (Oct 1995)

* * * * *

(c) In this procurement, you may not protest to the GSBCA because of the nature of the supplies or services being procured. (*Contracting Officer shall strike the word "not" where the GSBCA is a correct forum.*)

(End of provision)

20. Section 52.233–3 is amended by revising the date of the clause and the first sentence of (a) to read as follows:

52.233–3 Protest after Award.

* * * * *

Protest After Award (Oct 1995)

* * * * *

(a) Upon receipt of a notice of protest (as defined in FAR 33.101) or a determination that a protest is likely (see FAR 33.102(d)), the Contracting Officer may, by written order to the Contractor, direct the Contractor to stop performance of the work called for by this contract. * * *

[FAC 90–32; FAR Case 94–790; Item III]

RIN 9000–AG38

Federal Acquisition Regulation; Acquisition of Commercial Items

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: This final rule is issued pursuant to the Federal Acquisition Streamlining Act of 1994 to implement the revised statutory authorities in Title VIII of the Act for the acquisition of commercial items and components by Federal Government agencies as well as contractors and subcontractors at all levels. This regulatory action was subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

EFFECTIVE DATE: October 1, 1995.

Applicability date: For solicitations issued on or after October 1, 1995; use of the new policies, provisions and clauses is optional for solicitations issued before December 1, 1995, and mandatory for solicitations issued after December 1, 1995.

FOR FURTHER INFORMATION CONTACT: Colonel Laurence M. Trowel, Commercial Item Team Leader, at (703) 695–3858 in reference to this FAR case. For general information, contact the FAR Secretariat, Room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–32, FAR case 94–790.

SUPPLEMENTARY INFORMATION:

A. Background

The Federal Acquisition Streamlining Act of 1994, Pub. L. 103–355, provides authorities that streamline the acquisition process and minimize burdensome Government-unique requirements. This notice announces revisions developed under FAR case 94–790, Acquisition of Commercial Items, which encourage the acquisition of commercial end items and components by Federal Government agencies as well as contractors and subcontractors at all levels. The most significant revisions are in the following FAR parts:

Part 2 has been amended to incorporated the definitions of "commercial item," "component," "commercial component" and "nondevelopmental item" from the Act with only minor revisions for clarification. The clause at 52.202–1, Definitions, has been similarly revised to make the definitions available to prime and subcontractors.

Part 10 has been completely revised to address market research. It contains some language taken from the current FAR Part 11. This new part establishes the requirement for market research as the first step in the acquisition process. Market research is an essential element in the later steps of describing the agency's need, developing the overall acquisition strategy and identifying terms and conditions unique to the item being acquired.

Part 11 has been completely revised to address the process of describing agency needs. It contains some of the language on specifications and standards formerly found in FAR Part 10, but takes a more streamlined approach. In addition, the revised Part 11 establishes the Government's order of precedence for requirements documents and addresses the concept of market acceptance contained in the Act. The revised Part 11 also contains coverage on Delivery or Performance Schedules, Liquidated Damages, Priorities and Allocations, and Variations in Quantity taken from the current Part 12 with only minor editorial revisions. The current Part 12 coverage on Suspension of Work, Stop Work Orders, and Government Delay of Work has been moved to Subpart 42.13 with only minor editorial revisions.

Part 12 has been completely revised to address the acquisition of commercial items. The Team created this entirely new coverage to address in one FAR part the policies for the acquisition of commercial items.

—Subpart 12.1 states that the policies in the revised Part 12 are applicable to all acquisitions of commercial items above the micro-purchase threshold. The requirements of other parts of the FAR apply to commercial items to the extent they are not inconsistent with Part 12;

—Subpart 12.2 identifies special requirements for the acquisition of commercial items. These requirements generally reflect the requirements of Title VIII.

—Subpart 12.3 establishes standard provisions and clauses for use in the acquisition of commercial items. This approach is essential to meet the requirements of the statute and provide contracting officers and industry with an easy to use, simplified method for acquiring commercial items. However, it is essential that contracting officers be allowed to tailor solicitations and contracts to meet the needs of the particular acquisition and the marketplace for that item. Subpart 12.3 gives contracting officers broad authority to tailor solicitations and contracts, a practice itself that is consistent with commercial practices. The Act requires that some limitations be placed on this authority to tailor, and that has also been accommodated in this subpart.

—A new form, the Standard Form 1449, Solicitation/Contract/Order for Commercial Items, was established.

The SF 1449 combines features of the SF 33, Solicitation, Offer and Award; the SF 1447, Solicitation/Contract; and the DD 1155, Order for Supplies and Services. The most significant element is the addition of acceptance blocks at the bottom of the form (patterned after the DD Form 1155). This will allow suppliers of commercial items to utilize the SF 1449 to document receipt of the supplies or services by the government avoiding the need for preparation of separate receipt/acceptance forms.

—Subpart 12.5 identifies the applicability of certain laws to the acquisition of commercial items. This subpart is intended to meet the requirements of Section 8003(a) of the Act which requires that the FAR contain a list of laws determined to be inapplicable to prime contracts for commercial items.

—Section 12.503 contains the list of laws determined to be not applicable to executive agency prime contracts for acquisition of commercial items. This list has been expanded to also include those laws that have been revised in some manner to modify their applicability to commercial items. In each instance, the specific prescriptive language elsewhere in the FAR has been revised to reflect this modified applicability. FAR 12.503 only includes those laws that apply to prime contracts awarded by both DOD and civilian agencies. Agency unique laws determined to be not applicable to prime contracts are not addressed in this rule and may be addressed separately by the respective agencies.

—Section 12.504 contains the list of laws determined to be not applicable to subcontracts for commercial items. This list has been expanded to also include those laws that have been revised in some manner to modify their applicability to subcontracts for commercial items.

—Subpart 12.6 identifies two streamlined procedures for the evaluation and solicitation of contracts for commercial items. These procedures may be used at the discretion of the contracting officer.

Part 52 has been amended to include several new provisions and clauses to be inserted in all solicitations and contracts for the acquisition of commercial items:

—Section 52.212–1, Instructions to Offerors—Commercial Items, contains solicitation instructions unique to Government procurement and is based upon existing FAR language. The information has been simplified and tailored to meet the requirements of commercial items. For the most part, the simplified paragraphs in the new provision do not contain new concepts.

—Section 52.212–2, Evaluation—Commercial Items, contains evaluation information that has been simplified and tailored to meet the requirements of commercial items. Again, this provision does not contain new concepts and is generally based upon provisions prescribed in Parts 14 and 15. This provision may be used at the discretion of the contracting officer. It requires the contracting officer to establish specific evaluation factors and the relative order of importance for each acquisition.

—Section 52.212–3, Offeror Representations and Certifications—Commercial Items, includes the certifications and representations required to comply with laws or Executive orders. Instead of using the numerous certifications contained in the FAR, the Team drafted a single provision containing all the requirements that may apply to the acquisition of commercial items.

—Section 52.212–4, Contract Terms and Conditions—Commercial Items, contains the terms and conditions the Team believes are consistent with customary commercial practice by addressing general areas that previous studies have identified as the "core" areas covered by commercial contracts. Several concepts included in the clause at 52.212–4 represent significant changes from standard Government practices to commercial-like practices.

—Section 52.212–5, Contract Terms and Conditions Required to Implement Statutes or Executive orders—Commercial Items, implements provisions of law or executive orders applicable to Government acquisitions of commercial items or commercial components. The Team believes the clause at 52.212–5 represents the minimum number of clauses required to implement statutes and Executive orders. Certain clauses may apply depending upon the circumstances; the contracting officer will indicate which of these clauses apply for the specific acquisition. In addition, this clause provides that the contractor is not required to include any FAR provision or clause in its subcontracts other than those listed in the clause as applying to subcontracts for commercial items.

—Section 52.244–6, Subcontracts for Commercial Items and Commercial Components, implements the preference for the acquisition of commercial items or nondevelopmental items as components of items to be supplied under Federal contracts. This clause will be inserted in all solicitations and contracts for supplies and services other than commercial items. It provides that the contractor is not required to include in its subcontracts for commercial items any FAR provision or clause, other than those listed in the clause.

B. Regulatory Flexibility Act

This final rule will have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq*. This rule will have this impact as a result of the following:

(1) It establishes a much broader definition of "commercial items" compared to the language of Part 11, it includes certain modifications to existing items, and includes certain commercial services. In all these cases, small business is very likely to benefit from this expanded definition;

(2) It establishes a requirement for conducting market research in certain circumstances before issuing solicitations which should benefit small business by ensuring the contracting activity has conducted sufficient research to be aware of the availability of commercial items and the practices used in the commercial marketplace to acquire them. The rule also cautions contracting officers not to request potential sources to submit more than the minimum information necessary as a part of market research.

(3) It establishes a preference for the acquisition of commercial items thereby enabling more small businesses that offer commercial items to participate in Government acquisition;

(4) It establishes a preference for stating Government requirements in terms of functions to be performed, performance required, or essential physical characteristics rather than detailed, Government-unique design specifications thereby allowing a broader range of products of small businesses to satisfy the Government need;

(5) It establishes the Government order of precedence for requirements documents emphasizing performance-oriented documents and nongovernment standards rather than Federal/Military-unique standards thereby allowing a broader range of small businesses to participate in Government acquisitions;

(6) It allows contracting officers the flexibility to use either the streamlined solicitation procedure in the revised Subpart 12.6 for acquiring commercial items, or the existing procedures in Parts 13, 14 or 15, as applicable, if they are more streamlined and beneficial, thereby allowing maximum flexibility for contracting with small businesses;

(7) It allows the use of the streamlined terms and conditions for acquiring commercial items for every acquisition above the micropurchase threshold thereby allowing the maximum number of small businesses to benefit from these procedures;

(8) It requires, except in unique circumstances, that the Government rely on the contractor's quality assurance system thereby allowing small businesses to utilize their own quality system when selling commercial items rather than a Government-specified system;

(9) It requires that, when acquiring commercial items, the contracting officer use the solicitation provisions and contract clauses specifically established for acquiring commercial items. The contracting officer may tailor those provisions and clauses when the customary practices in the market dictate the use of other terms and conditions or when a waiver is approved; and

(10) By significantly limiting the flow down of Government-unique terms and conditions to subcontractors at all levels thereby minimizing the burden on a significant number of small businesses.

A Final Regulatory Flexibility Analysis (FRFA) has been prepared and will be provided to the Chief Counsel for Advocacy for the Small Business Administration. A copy of the FRFA may be obtained from the FAR Secretariat.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) is deemed to apply because the final rule contains information collection requirements. Accordingly, a request for approval of a new information collection requirement concerning Acquisition of Commercial Items was submitted to the Office of Management and Budget and approved through OMB Control No. 9000–0136. Public comments concerning this request were invited in a **Federal Register** notice at 60 FR 11219, March 1, 1995.

D. Public Comments

Title VIII of the Act makes significant statutory revisions to facilitate the acquisition of commercial items and components by Federal Government agencies, as well as contractors and subcontractors at all levels. This final rule incorporates revisions to two proposed rules resulting from a public meeting held on April 3, 1995, and written comments received in response to publication of the two proposed rules in the **Federal Register**. The first proposed rule was published in the **Federal Register** on March 1, 1995 (60 FR 11198), under FAR case 94–790. That proposed rule made changes throughout the FAR to incorporate provisions of Title VIII. The second proposed rule was published in the **Federal Register** on March 22, 1995 (60 FR 15220), under FAR case 94–791. That case contained the list of laws required by Section 8003(a) of the Act that were determined to be inapplicable to Executive agency contracts and subcontracts for commercial items. FAR case 94–791 also contained the list of contract clauses determined to be applicable to subcontracts for the acquisition of commercial items. On April 4, 1995, a correction to the proposed rule under FAR case 94–791 was published in the **Federal Register** (60 FR 17184), to correct section 52.212–5 to include access to contractor records by the Comptroller General of the United States for contracts awarded using other than sealed bidding in excess of the simplified acquisition threshold.

A total of 559 written comments were received on the proposed rule from 60 commentors. Each comment was analyzed by the Commercial Items Drafting Team and, where appropriate, changes were made in the proposed FAR language as reflected in this final rule. The comments largely fell in the following general areas:

1. Definitions of Commercial Items and Nondevelopmental Item

The language describing a "minor" modification was revised to clarify the intent. The revised language was drawn from a related Congressional report. The definition of nondevelopmental items was also clarified to alleviate confusion regarding what commentors identified as the "circular logic" of commercial items being a subset of nondevelopmental items, and certain nondevelopmental items being a subset of commercial items. The revision clarifies the distinction between commercial items and nondevelopmental items. Several commentors asked that specific examples of items that would be considered "commercial" be included in the definition. The Team rejected this suggestion citing the impossibility of developing examples that would adequately describe the range of commercial items the government might buy while not unnecessarily limiting the breadth of the definition.

2. Decision to Utilize Commercial Items Authority

Several commentors expressed confusion over how the Government would decide when the commercial items authorities in Part 12 could be used. FAR 10.002 was revised to include language explaining the decision process that would follow the completion of market research.

3. Market Acceptance

Several commentors were concerned with the lack of sufficient guidance on market acceptance. Several changes were made in an effort to balance the concerns expressed by the public and those expressed by Government agencies. The final rule clarifies the circumstances where market acceptance may be appropriate, cautions that it is not appropriate when new or evolving commercial items may meet the agency's needs, and contains guidance on developing criteria for demonstrating market acceptance.

4. Relationship of Part 12 to Other FAR Parts

Several commentors expressed confusion over the relationship of Part 12 to other Parts, especially Part 13, Simplified Acquisition Procedures; Part 14, Sealed Bidding; and Part 15, Contracting By Negotiation. FAR 12.203 was revised to clarify that Part 12 contains unique policies for the acquisition of commercial items. These unique policies are intended to be used in conjunction with the existing procedures contained in Parts 13, 14, and 15 for the solicitation, evaluation, and award of contracts, purchase orders and other instruments. Part 12 will take precedence over other FAR parts only where the policies in those parts are inconsistent.

5. Use of the Standard Form (SF) 1449

Several commentors questioned the rationale for requiring the use of the new SF 1449 for all acquisitions of commercial items. The SF 1449 was specifically developed in conjunction with the provisions and clauses developed for the acquisition of commercial items. The SF 1449 and the prescribed provisions and clauses are designed to complement each other in several respects. Forms currently prescribed in the FAR contain references to FAR provisions and clauses that are not used for commercial items, and references to the Uniform

Contract Format, also not used for acquiring commercial items. Finally, the use of a single form throughout the Federal Government for all acquisitions of commercial items will aid those offerors that will, as a result of the publication of this rule, seek to do business with the Federal Government.

6. Quality Assurance

Several commentors questioned the intent of the language regarding the reliance on contractors' existing quality assurance systems. The rule has been revised to clarify that where buyer in-process inspection is a customary practice, any Government inprocess inspection shall be conducted in a manner consistent with commercial practice.

7. Commercial Item Pricing

Commentors suggested that Part 12 should discuss the techniques for pricing commercial items. The policies and procedures for determining the price reasonableness of commercial items are contained in Subpart 15.8 and the Team did not want to conflict with those policies. However, a brief summary of pricing considerations used when contracting by negotiation under Part 15 has been included in Part 12.

8. Technical Data and Computer Software

In response to numerous comments on technical data and computer software, the final rule has been revised. The subpart on technical data has been revised to cover the general principle that the Government will acquire only technical data customarily provided to the public, except as provided by agency-specific statutes. The technical data subpart references FAR Part 27 and agency supplements, where detailed rules implementing the technical data statutes can be found. A new section on computer software was added to require that commercial computer software be acquired under licenses customarily provided to the public to the extent those licenses are consistent with Federal procurement law.

9. Discretionary Use of FAR Provisions and Clauses

Several commentors asked if existing FAR provisions and clauses could be used if needed. Guidance concerning the discretionary use of other FAR clauses, consistent with market research and customary commercial practice, has been provided in the final rule. Specific examples of FAR clauses that may be appropriate for use include clauses for ordering procedures for indefinite delivery contracts and option exercise.

10. Tailoring of Provisions and Clauses

Additional guidance concerning contracting officer authority to tailor Part 12 clauses, consistent with customary commercial market practices, has also been provided. Specific paragraphs of the clause at 52.212–4, Contract Terms and Conditions—Commercial Items, that are based in statute and may not be tailored, have been identified.

11. Unique Requirements Regarding Terms and Conditions for Commercial Items.

Many commentors from both industry and Government noted that the new terms and conditions prescribed for commercial items are significantly different than the existing FAR provisions and clauses. In response to the numerous questions and concerns, the Team expanded the discussion in the proposed rule describing the key features of these unique provisions and clauses.

12. Laws Inapplicable to Contractors and Subcontractors

The language describing the laws determined inapplicable to prime and subcontractors has been revised to clarify several areas of confusion. In addition, the Service Contract Act (SCA) was added to the list of laws inapplicable to subcontractors. The proposed rule clearly did not call out the SCA for flow down to subcontractors in paragraph (e) of the clause at 52.212–5, but inadvertently omitted the law from the list of laws inapplicable to subcontractors. Finally, as indicated in the March 22, 1995, **Federal Register** notice, the DOD-unique laws identified in the proposed rule have been removed from the FAR rule and will appear in the DOD FAR Supplement (DFARS) coverage.

13. Certification Regarding Debarment and Suspension

A certification regarding an offeror's debarment, suspension or ineligibility for award was added to the provision at 52.212–3 to implement the requirements of Executive Order 12549.

14. Acceptance and Warranties

The language concerning acceptance and warranties in the clause at 52.212–4 was revised to incorporate the acceptance principles found in the Uniform Commercial Code. It was also revised to establish the implied warranties of merchantability and fitness for a particular purpose as the Government's minimum warranties. Corresponding guidance is provided in Part 12 on evaluating and incorporating express warranties, which may overcome the implied warranties, and ensuring any express warranty and the acceptance terms of the contract are consistent with the concepts contained in the rule.

15. Terminations

Guidance on procedures for contract terminations, reflecting the language in the clause at 52.212–4, has been provided in FAR Part 12. In addition, language has been included to clarify that negotiation of termination charges in terminations for the Government's convenience does not require government unique record keeping, compliance with the cost accounting standards or the contract cost principles.

16. Limitation of Liability

The limitation of contractor liability language, which appeared in the proposed rule in the "Warranty" paragraph of the clause at 52.212–4, has been moved to a separate paragraph to clarify that the limitation does not apply solely to liability relating to any warranty.

17. Subcontracting Plans

The requirement for Small, Small Disadvantaged and Women Owned Small Business Subcontracting Plans was included in the clause at 52.212–5 after it was determined that there was no exemption from this requirement for commercial items. However, in this regard, the Office of Procurement Policy (OFPP) is preparing to issue Policy Letter 95–1, Subcontracting Plans for Companies Supplying Commercial Items. This Policy Letter states that when a subcontracting plan is required, annual commercial subcontracting plans that relate to the company's commercial and noncommercial production are authorized and preferred for (1) prime contracts for commercial items; or (2) subcontractors that provide commercial items under a prime contract, whether or not the prime contractor is supplying a commercial item. The policy revisions contained in Policy Letter 95–1 will be incorporated into the FAR by a separate FAR case.

18. Other Revisions to the Proposed Rule

Numerous other revisions were made to the proposed rule to correct inconsistencies, clarify intent, improve editorial clarity and to bring the language of the case up to the latest FAR baseline through FAC 90–31.

List of Subjects in 48 CFR Parts 2, 3, 5, 6, 7, 8, 9, 10, 11, 12, 14, 15, 16, 22, 23, 31, 36, 42, 44, 46, 47, 49, 52 and 53

Government procurement.

Dated: September 7, 1995.

Edward C. Loeb,

Deputy Project Manager for the Implementation of the Federal Acquisition Streamlining Act of 1994.

Therefore, 48 CFR Parts 2, 3, 5, 6, 7, 8, 9, 10, 11, 12, 14, 15, 16, 22, 23, 31, 36, 42, 44, 46, 47, 49, 52, and 53 are amended as set forth below:

1. The authority citation for 48 CFR Parts 2, 3, 5, 6, 7, 8, 9, 10, 11, 12, 14, 15, 16, 22, 23, 31, 36, 42, 44, 46, 47, 49, 52, and 53 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 2—DEFINITIONS OF WORDS AND TERMS

2. Section 2.101 is amended by adding in alphabetical order the definitions "Commercial component", "Commercial item", "Component", "Market research", and "Nondevelopmental item" to read as follows:

2.101 Definitions.

* * * * *

Commercial component means any component that is a commercial item.

Commercial item means—

(a) Any item, other than real property, that is of a type customarily used for nongovernmental purposes and that—

(1) Has been sold, leased, or licensed to the general public; or,

(2) Has been offered for sale, lease, or license to the general public;

(b) Any item that evolved from an item described in paragraph (a) of this definition through advances in technology or performance and that is not yet available in the commercial marketplace, but will be available in the commercial marketplace in time to satisfy the delivery requirements under a Government solicitation;

(c) Any item that would satisfy a criterion expressed in paragraphs (a) or (b) of this definition, but for—

(1) Modifications of a type customarily available in the commercial marketplace; or

(2) Minor modifications of a type not customarily available in the commercial marketplace made to meet Federal Government requirements. "Minor" modifications means modifications that do not significantly alter the nongovernmental function or essential physical characteristics of an item or component, or change the purpose of a process. Factors to be considered in determining whether a modification is minor include the value and size of the modification and the comparative value and size of the final product. Dollar values and percentages may be used as guideposts, but are not conclusive evidence that a modification is minor;

(d) Any combination of items meeting the requirements of paragraphs (a), (b), (c), or (e) of this definition that are of a type customarily combined and sold in combination to the general public;

(e) Installation services, maintenance services, repair services, training services, and other services if such services are procured for support of an item referred to in paragraphs (a), (b), (c), or (d) of this definition, and if the source of such services—

(1) Offers such services to the general public and the Federal Government contemporaneously and under similar terms and conditions; and

(2) Offers to use the same work force for providing the Federal Government with such services as the source uses for providing such services to the general public;

(f) Services of a type offered and sold competitively in substantial quantities in the commercial marketplace based on established catalog or market prices for specific tasks performed under standard commercial terms and conditions. This does not include services that are sold based on hourly rates without an established catalog or market price for a specific service performed;

(g) Any item, combination of items, or service referred to in paragraphs (a) through (f), notwithstanding the fact that the item, combination of items, or service is transferred between or among separate divisions, subsidiaries, or affiliates of a contractor; or

(h) A nondevelopmental item, if the procuring agency determines the item was developed exclusively at private expense and sold in substantial quantities, on a competitive basis, to multiple State and local governments.

Component means any item supplied to the Federal Government as part of an end item or of another component.

* * * * *

Market research means collecting and analyzing information about capabilities within the market to satisfy agency needs.

* * * * *

Nondevelopmental item means—

(a) Any previously developed item of supply used exclusively for governmental purposes by a Federal agency, a State or local government, or a foreign government with which the United States has a mutual defense cooperation agreement;

(b) Any item described in paragraph (a) of this definition that requires only minor modification or modifications of a type customarily available in the commercial marketplace in order to meet the requirements of the procuring department or agency; or

(c) Any item of supply being produced that does not meet the requirements of paragraph (a) or (b) solely because the item is not yet in use.

* * * * *

PART 3—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

3. Section 3.404 is amended by removing "or" from the end of paragraph (b)(4); by redesignating paragraph (b)(5) as (b)(6) and adding a new paragraph (b)(5); and by revising paragraph (c) to read as follows:

3.404 Solicitation provision and contract clause.

* * * * *

(b) * * *

(5) The solicitation is for a commercial item (see parts 2 and 12); or

* * * * *

(c) The contracting officer shall insert the clause at 52.203–5, Covenant Against Contingent Fees, in solicitations and contracts exceeding the simplified acquisition threshold in part 13 other than those for commercial items (see Parts 2 and 12).

4. Section 3.502–2 is amended by revising the introductory text of paragraph (i) to read as follows:

3.502–2 General.

* * * * *

(i) Requires each contracting agency to include in each prime contract, except contracts for commercial items (see part 12), a requirement that the prime contractor shall—

* * * * *

5. Section 3.502–3 is revised to read as follows:

3.502–3 Contract clause.

The contracting officer shall insert the clause at 52.203–7, Anti-Kickback Procedures, in solicitations and contracts exceeding the simplified acquisition threshold in part 13, other than those for commercial items (see part 12).

6. Section 3.503–2 is revised to read as follows:

3.503–2 Contract clause.

The contracting officer shall insert the clause at 52.203–6, Restrictions on Subcontractor Sales to the Government, in solicitations and contracts exceeding the simplified acquisition threshold in part 13. For the acquisition of commercial items, the contracting officer shall use the clause with its Alternate I.

PART 5—PUBLICIZING CONTRACT ACTIONS

7. Section 5.203 is amended by revising paragraphs (a), (b), and (c) to read as follows:

5.203 Publicizing and response time.

* * * * *

(a) A notice of contract action shall be published in the CBD at least 15 days before issuance of a solicitation except when the combined CBD synopsis/solicitation procedure for acquisition of commercial items is used (see 12.603).

(b) The contracting officer shall establish a solicitation response time which will afford potential offerors a reasonable opportunity to respond for (1) each contract action, including actions via FACNET, in an amount estimated to be greater than $25,000, but not greater than the simplified acquisition threshold; or (2) each contract action for the acquisition of commercial items in an amount estimated to be greater than $25,000 (see part 12). The contracting officer should consider the circumstances of the individual acquisition, such as the complexity, commerciality, availability, and urgency, when establishing the solicitation response time.

(c) Except for the acquisition of commercial items (see 5.203(b)), agencies shall allow at least a 30-day response time for receipt of bids or proposals from the date of issuance of a solicitation, if the contract action is expected to exceed the simplified acquisition threshold.

* * * * *

8. Section 5.207 is amended by adding paragraph (e)(4) to read as follows:

5.207 Preparation and transmittal of synopses.

* * * * *

(e) * * *

(4) If, under the proposed acquisition, the Government does not intend to acquire a commercial item using part 12, the synopsis shall refer to Numbered Note 26.

* * * * *

PART 6—COMPETITION REQUIREMENTS

9. Section 6.303–2 is amended by revising paragraph (a)(8) to read as follows:

6.303–2 Content.

(a) * * *

(8) A description of the market research conducted (see part 10) and the results or a statement of the reason market research was not conducted.

* * * * *

10. Section 6.502 is revised to read as follows:

6.502 Duties and responsibilities.

(a) Agency and procuring activity competition advocates are responsible for promoting the acquisition of commercial items, promoting full and open competition, challenging requirements that are not stated in terms of functions to be performed, performance required or essential physical characteristics, and challenging barriers to the acquisition of commercial items and full and open competition such as unnecessarily restrictive statements of work, unnecessarily detailed specifications, and unnecessarily burdensome contract clauses.

(b) Agency competition advocates shall—

(1) Review the contracting operations of the agency and identify and report to the agency senior procurement executive—

(i) Opportunities and actions taken to acquire commercial items to meet the needs of the agency;

(ii) Opportunities and actions taken to achieve full and open competition in the contracting operations of the agency;

(iii) Actions taken to challenge requirements that are not stated in terms of functions to be performed, performance required or essential physical characteristics;

(iv) Any condition or action that has the effect of unnecessarily restricting the acquisition of commercial items or competition in the contracting actions of the agency;

(2) Prepare and submit an annual report to the agency senior procurement executive, in accordance with agency procedures, describing—

(i) Such advocate's activities under this subpart;

(ii) New initiatives required to increase the acquisition of commercial items;

(iii) New initiatives required to increase competition;

(iv) New initiatives to ensure requirements are stated in terms of functions to be performed, performance required or essential physical characteristics;

(v) Any barriers to the acquisition of commercial items or competition that remain; and

(vi) Other ways in which the agency has emphasized the acquisition of commercial items and competition in areas such as acquisition training and research;

(3) Recommend to the senior procurement executive of the agency goals and plans for increasing competition on a fiscal year basis; and

(4) Recommend to the senior procurement executive of the agency a system of personal and organizational accountability for competition, which may include the use of recognition and awards to motivate program managers, contracting officers, and others in authority to promote competition in acquisition.

PART 7—ACQUISITION PLANNING

7.101 [Amended]

11. Section 7.101 is amended by removing the definition "Market survey".

12. Section 7.102 is revised to read as follows:

7.102 Policy.

(a) Agencies shall perform acquisition planning and conduct market research (see part 10) for all acquisitions in order to promote and provide for—

(1) Acquisition of commercial items or, to the extent that commercial items suitable to meet the agency's needs are not available, nondevelopmental items, to the maximum extent practicable (10 U.S.C. 2377 and 41 U.S.C. 251, *et seq.*); and

(2) Full and open competition (see part 6) or, when full and open competition is not required in accordance with part 6, to obtain competition to the maximum extent practicable, with due regard to the nature of the supplies or services to be acquired (10 U.S.C. 2301(a)(5) and 41 U.S.C. 253a(a)(1)).

(b) This planning shall integrate the efforts of all personnel responsible for significant aspects of the acquisition. The purpose of this planning is to ensure that the Government meets its needs in the most effective, economical, and timely manner. Agencies that have a detailed acquisition planning system in place that generally meets the requirements of 7.104 and 7.105 need not revise their system to specifically meet all of these requirements.

13. Section 7.103 is amended by revising paragraph (b); and in paragraph (m) by removing "10.002(c)" and inserting "11.001(b)" to read as follows:

7.103 Agency-head responsibilities.

* * * * *

(b) Encouraging offerors to supply commercial items, or to the extent that commercial items suitable to meet the agency needs are not available, nondevelopmental items in response to agency solicitations (10 U.S.C. 2377 and 41 U.S.C. 251, *et seq.*); and

* * * * *

14. Section 7.105 is amended in paragraph (a)(5) by removing "subpart 12.1" and inserting "subpart 11.4" in its place; in paragraph (a)(8)(iii) by removing the parenthetical "(see 10.002(c))"; by revising paragraph (b)(1); in paragraph (b)(6) by removing "part 10" and inserting "part 11" in its place; in paragraph (b)(7) by removing "subpart 12.3" and inserting "subpart 11.6" in its place; and by revising paragraph (b)(12)(i) to read as follows:

7.105 Contents of written acquisition plans.

* * * * *

(b) *Plan of action*—(1) *Sources.* Indicate the prospective sources of supplies and/or services that can meet the need. Consider required sources of supplies or services (see part 8). Include consideration of small business, small disadvantaged business, and women-owned small business concerns (see part 19). Address the extent and results of the market research and indicate their impact on the various elements of the plan (see part 10).

* * * * *

(12) * * *

(i) The assumptions determining contractor or agency support, both initially and over the life of the acquisition, including consideration of contractor or agency maintenance and servicing (see subpart 7.3) and distribution of commercial items;

* * * * *

PART 8—REQUIRED SOURCES OF SUPPLIES AND SERVICES

8.1104 [Amended]

15. Section 8.1104 is amended in paragraph (e)(1) by removing "52.212–9" and inserting "52.211–16" in its place.

PART 9—CONTRACTOR QUALIFICATIONS

16. Section 9.106–1 is amended by revising paragraph (a) to read as follows:

9.106–1 Conditions for preaward surveys.

(a) A preaward survey is normally required when the information on hand or readily available to the contracting officer is not sufficient to make a determination regarding responsibility. However, if the contemplated contract will have a fixed price at or below the simplified acquisition threshold or will involve the acquisition of commercial items (see part 12), the contracting officer should not request a preaward survey unless circumstances justify its cost.

* * * * *

17. Section 9.306 is amended in the introductory text of paragraph (f) by revising the parenthetical to read "(see 11.404)".

18. Section 9.405–2 is amended by revising the second sentence of paragraph (b) introductory text to read as follows:

9.405–2 Restrictions on subcontracting.

* * * * *

(b) * * * By operation of the clause at 52.209–6, Protecting the Government's Interests When Subcontracting with Contractors Debarred, Suspended or Proposed for Debarment, contractors shall not enter into any subcontract in excess of $25,000 with a contractor that has been debarred, suspended, or proposed for debarment unless there is a compelling reason to do so. * * *

* * * * *

19. Part 10 is revised to read as follows:

PART 10—MARKET RESEARCH

Sec.

10.000 Scope of part.
10.001 Policy.
10.002 Procedures.

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

10.000 Scope of part.

This part prescribes policies and procedures for conducting market research to arrive at the most suitable approach to acquiring, distributing, and supporting supplies and services. This part implements requirements of 41 U.S.C. 253a(a)(1), 41 U.S.C 264b, and 10 U.S.C. 2377.

10.001 Policy.

(a) Agencies shall—

(1) Ensure that legitimate needs are identified and trade-offs evaluated to acquire items which meet those needs;

(2) Conduct market research appropriate to the circumstances—

(i) Before developing new requirements documents for an acquisition by that agency;

(ii) Before soliciting offers for acquisitions with an estimated value in excess of the simplified acquisition threshold; and

(iii) Before soliciting offers for acquisitions with an estimated value less than the simplified acquisition threshold when adequate information is not available and the circumstances justify its cost; and

(3) Use the results of market research to—

(i) Determine if sources capable of satisfying the agency's requirements exist;

(ii) Determine if commercial items or, to the extent commercial items suitable to meet the agency's needs are not available, nondevelopmental items are available that—

(A) Meet the agency's requirements;

(B) Could be modified to meet the agency's requirements; or

(C) Could meet the agency's requirements if those requirements were modified to a reasonable extent;

(iii) Determine the extent to which commercial items or nondevelopmental items could be incorporated at the component level;

(iv) Determine the practices of firms engaged in producing, distributing, and supporting commercial items, such as terms for warranties, buyer financing, maintenance and packaging, and marking; and

(v) Ensure maximum practicable use of recovered materials (see subpart 23.4) and promote energy conservation and efficiency.

(b) When conducting market research, agencies should not request potential sources to submit more than the minimum information necessary.

10.002 Procedures.

(a) Acquisitions begin with a description of the Government's needs stated in terms sufficient to allow conduct of market research.

(b) Market research is then conducted to determine if commercial items or nondevelopmental items are available to meet the Government's needs or could be modified to meet the Government's needs.

(1) The extent of market research will vary, depending on such factors as urgency, estimated dollar value, complexity, and past experience. Market research involves obtaining information specific to the item being acquired and should include—

(i) Whether the Government's needs can be met by—

(A) Items of a type customarily available in the commercial marketplace;

(B) Items of a type customarily available in the commercial marketplace with modifications; or

(C) Items used exclusively for governmental purposes;

(ii) Customary practices regarding customizing, modifying or tailoring of items to meet customer needs and associated costs;

(iii) Customary practices, including warranty, buyer financing, discounts, etc., under which commercial sales of the products are made;

(iv) The requirements of any laws and regulations unique to the item being acquired;

(v) The availability of items that contain recovered materials and items that are energy efficient;

(vi) The distribution and support capabilities of potential suppliers, including alternative arrangements and cost estimates; and

(vii) Size and status of potential sources (see part 19).

(2) Techniques for conducting market research may include any or all of the following:

(i) Contacting knowledgeable individuals in Government and industry regarding market capabilities to meet requirements.

(ii) Reviewing the results of recent market research undertaken to meet similar or identical requirements.

(iii) Publishing formal requests for information in appropriate technical or scientific journals or business publications.

(iv) Querying Government data bases that provide information relevant to agency acquisitions.

(v) Participating in interactive, on-line communication among industry, acquisition personnel, and customers.

(vi) Obtaining source lists of similar items from other contracting activities or agencies, trade associations or other sources.

(vii) Reviewing catalogs and other generally available product literature published by manufacturers, distributors, and dealers or available on-line.

(viii) Conducting interchange meetings or holding presolicitation conferences to involve potential offerors early in the acquisition process.

(c) If market research indicates commercial or nondevelopmental items might not be available to satisfy agency needs, agencies shall reevaluate the need in accordance with 10.001(a)(3)(ii) and determine whether the need can be restated to permit commercial or nondevelopmental items to satisfy the agency's needs.

(d)(1) If market research establishes that the Government's need may be met by a type of item or service customarily available in the commercial marketplace that would meet the definition of a commercial item at subpart 2.1, the contracting officer shall solicit and award any resultant contract using the policies and procedures in part 12.

(2) If market research establishes that the Government's need cannot be met by a type of item or service customarily available in the marketplace, part 12 shall not be used. When publication of the notice at 5.201 is required, the contracting officer shall include a notice to prospective offerors that the Government does not intend to use part 12 for the acquisition (see 5.207(e)(4)).

(e) Agencies should document the results of market research in a manner appropriate to the size and complexity of the acquisition.

20. Part 11 is revised to read as follows:

PART 11—DESCRIBING AGENCY NEEDS

Sec.

11.000 Scope of part.
11.001 Definitions.
11.002 Policy.

Subpart 11.1—Selecting and Developing Requirements Documents

11.101 Order of precedence for requirements documents.
11.102 Standardization program.
11.103 Market acceptance.
11.104 Items peculiar to one manufacturer.

Subpart 11.2—Using and Maintaining Requirements Documents

11.201 Identification and availability of specifications.
11.202 Maintenance of standardization documents.
11.203 Customer satisfaction.
11.204 Solicitation provisions and contract clauses.

Subpart 11.3—Acquiring Other Than New Material, Former Government Surplus Property and Residual Inventory

11.301 Policy.
11.302 Solicitation provisions and contract clauses.

Subpart 11.4—Delivery or Performance Schedules

11.401 General.
11.402 Factors to consider in establishing schedules.
11.403 Supplies or services.
11.404 Contract clauses.

Subpart 11.5—Liquidated Damages

11.501 General.
11.502 Policy.
11.503 Procedures.
11.504 Contract clauses.

Subpart 11.6—Priorities and Allocations

11.600 Scope of part.
11.601 Definitions.
11.602 General.
11.603 Procedures.
11.604 Solicitation provisions and contract clauses.

Subpart 11.7—Variation in Quantity

11.701 Supply contracts.
11.702 Construction contracts.
11.703 Contract clauses.

11.000 Scope of part.

This part prescribes policies and procedures for describing agency needs.

11.001 Definitions.

Material, as used in this part, includes, but is not limited to, raw material, parts, items, components, and end products.

New, as used in this part, means previously unused or composed of previously unused materials and may include unused residual inventory or unused former Government surplus property.

Other than new, as used in this part, includes, but is not limited to, recycled, recovered, remanufactured, used, and reconditioned.

Reconditioned, as used in this part, means restored to an earlier normal operating condition by readjustments and replacement of parts.

Remanufactured, as used in this part, means factory rebuilt to new equipment performance specification and unused subsequent to rebuilding.

11.002 Policy.

(a) In fulfilling requirements of 10 U.S.C. 2305(a)(1), 10 U.S.C. 2377, 41 U.S.C. 253a(a), and 41 U.S.C. 264b, agencies shall—

(1) Specify needs using market research in a manner designed to—

(i) Promote full and open competition (see part 6), with due regard to the nature of the supplies or services to be acquired; and

(ii) Only include restrictive provisions or conditions to the extent necessary to satisfy the minimum needs of the agency or as authorized by law.

(2) To the maximum extent practicable, ensure that acquisition officials—

(i) State requirements with respect to an acquisition of supplies or services in terms of—

(A) Functions to be performed;

(B) Performance required; or

(C) Essential physical characteristics;

(ii) Define requirements in terms that enable and encourage offerors to supply commercial items, or, to the extent that commercial items suitable to meet the agency's needs are not available, nondevelopmental items, in response to the agency solicitations;

(iii) Provide offerors of commercial items and nondevelopmental items an opportunity to compete in any acquisition to fill such requirements;

(iv) Require prime contractors and subcontractors at all tiers under the agency contracts to incorporate commercial items or nondevelopmental items as components of items supplied to the agency; and

(v) Modify requirements in appropriate cases to ensure that the requirements can be met by commercial items or, to the extent that commercial

items suitable to meet the agency's needs are not available, nondevelopmental items.

(b) The Metric Conversion Act of 1975, as amended by the Omnibus Trade and Competitiveness Act of 1988 (15 U.S.C. 205a, *et seq.*), designates the metric system of measurement as the preferred system of weights and measures for United States trade and commerce, and it requires that each agency use the metric system of measurement in its acquisitions, except to the extent that such use is impracticable or is likely to cause significant inefficiencies or loss of markets to United States firms. Requiring activities are responsible for establishing guidance implementing this policy in formulating their requirements for acquisitions.

(c) To the extent practicable and consistent with subpart 9.5, potential offerors should be given an opportunity to comment on agency requirements or to recommend application and tailoring of requirements documents and alternative approaches. Requiring agencies should apply specifications, standards, and related documents initially for guidance only, making final decisions on the application and tailoring of these documents as a product of the design and development process. Requiring agencies should not dictate detailed design solutions prematurely (see 7.101 and 7.105(a)(8)).

(d) The Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6901, *et seq.*), as amended, and Executive Order 12873, dated October 20, 1993, establish requirements for the procurement of products containing recovered materials, and environmentally preferable and energy-efficient products and services. Requiring activities shall prepare plans, drawings, specifications, standards (including voluntary standards), and purchase descriptions that consider the requirements set forth in part 23.

Subpart 11.1—Selecting and Developing Requirements Documents

11.101 Order of precedence for requirements documents.

(a) Agencies may select from existing requirements documents, modify or combine existing requirements documents, or create new requirements documents to meet agency needs, consistent with the following order of precedence:

(1) Documents mandated for use by law.

(2) Performance-oriented documents.

(3) Detailed design-oriented documents.

(4) Standards, specifications and related publications issued by the Government outside the Defense or Federal series for the non-repetitive acquisition of items.

(b) Agencies should prepare product descriptions to achieve maximum practicable use of recovered material and other materials that are environmentally preferable (see subparts 23.4 and 23.7).

11.102 Standardization program.

Agencies shall select existing requirements documents or develop new requirements documents that meet the needs of the agency in accordance with the guidance contained in the Federal Standardization Manual and, for DOD components, DOD 4120.3–M, Defense Standardization Program Policies and Procedures. The Federal Standardization Manual may be obtained from General Services Administration, Federal Supply Service Bureau, Specifications Section, Suite 8100, 470 L'Enfant Plaza, SW, Washington, DC 20407. DOD 4120.3–M may be obtained from DOD Single Stock Point, Standardization Document Order Desk, Building 4D, 700 Robbins Avenue, Philadelphia, PA 19111–5094.

11.103 Market acceptance.

(a) Section 8002(c) of Pub. L. 103–355 provides that, in accordance with agency procedures, the head of an agency may, under appropriate circumstances, require offerors to demonstrate that the items offered—

(1) Have either—

(i) Achieved commercial market acceptance; or

(ii) Been satisfactorily supplied to an agency under current or recent contracts for the same or similar requirements; and

(2) Otherwise meet the item description, specifications, or other criteria prescribed in the public notice and solicitation.

(b) Appropriate circumstances may, for example, include situations where the agency's minimum need is for an item that has a demonstrated reliability, performance or product support record in a specified environment. Use of market acceptance is inappropriate when new or evolving items may meet the agency's needs.

(c) In developing criteria for demonstrating that an item has achieved commercial market acceptance, the contracting officer shall ensure the criteria in the solicitation—

(1) Reflect the minimum need of the agency and are reasonably related to the demonstration of an item's acceptability to meet the agency's minimum need;

(2) Relate to an item's performance and intended use, not an offeror's capability;

(3) Are supported by market research;

(4) Include consideration of items supplied satisfactorily under recent or current Government contracts, for the same or similar items; and

(5) Consider the entire relevant commercial market, including small business concerns.

(d) Commercial market acceptance shall not be used as a sole criterion to evaluate whether an item meets the Government's requirements.

(e) When commercial market acceptance is used, the contracting officer shall document the file to—

(1) Describe the circumstances justifying the use of commercial market acceptance criteria; and

(2) Support the specific criteria being used.

11.104 Items peculiar to one manufacturer.

Agency requirements shall not be written so as to require a particular brand-name, product, or a feature of a product, peculiar to one manufacturer, thereby precluding consideration of a product manufactured by another company, unless—

(a) The particular brand-name, product, or feature is essential to the Government's requirements, and market research indicates other companies' similar products, or products lacking the particular feature, do not meet, or can not be modified to meet, the agency's minimum needs; and

(b) The authority to contract without providing for full and open competition is supported by the required justifications and approvals (see 6.302–1).

Subpart 11.2—Using and Maintaining Requirements Documents

11.201 Identification and availability of specifications.

(a) Solicitations citing requirements documents listed in the General Services Administration (GSA) Index of Federal Specifications, Standards and Commercial Item Descriptions, the DoD Index of Specifications and Standards (DoDISS), or other agency index shall identify each document's approval date and the dates of any applicable amendments and revisions. Do not use general identification references, such as "the issue in effect on the date of the solicitation." Contracting offices will not normally furnish these cited documents with the solicitation, except when—

(1) The requirements document must be furnished with the solicitation to

enable prospective contractors to make a competent evaluation of the solicitation;

(2) In the judgment of the contracting officer, it would be impracticable for prospective contractors to obtain the documents in reasonable time to respond to the solicitation; or

(3) A prospective contractor requests a copy of a Government promulgated requirements document.

(b) Contracting offices shall clearly identify in the solicitation any pertinent documents not listed in the GSA Index of Federal Specifications, Standards and Commercial Item Descriptions or DoDISS. Such documents shall be furnished with the solicitation or specific instructions shall be furnished for obtaining or examining such documents.

(c) When documents refer to other documents, such references shall

(1) Be restricted to documents, or appropriate portions of documents, that apply in the acquisition;

(2) Cite the extent of their applicability;

(3) Not conflict with other documents and provisions of the solicitation; and

(4) Identify all applicable first tier references.

(d) The GSA Index of Federal Specifications, Standards and Commercial Item Descriptions may be purchased from the General Services Administration, Federal Supply Service Bureau, Specification Section, Suite 8100, 470 L'Enfant Plaza, SW, Washington, DC 20407, telephone (202) 755–0325/0326. The DoDISS may be purchased from the Standardization Documents Desk, Building 4D, 700 Robbins Avenue, Philadelphia, PA 19111–5094, telephone (215) 697–2569.

(e) Agencies may generally obtain from the GSA Specification Section or the DOD Standardization Documents Desk those nongovernment (voluntary) standards adopted for use by Federal or Defense activities. Standards not available from these sources may be obtained from Government libraries, activities subscribing to document handling services or the organization responsible for the preparation, publication or maintenance of the standard.

11.202 Maintenance of standardization documents.

(a) Recommendations for changes to standardization documents listed in the GSA Index of Federal Specifications, Standards and Commercial Item Descriptions should be submitted to the General Services Administration, Federal Supply Service, Office of Acquisition, Washington, DC 20406. Agencies shall submit recommendations for changes to standardization documents listed in the DoDISS to the cognizant preparing activity.

(b) When an agency cites an existing standardization document but modifies it to meet its needs, the agency shall follow the guidance in Federal Standardization Manual and, for Defense components, DoD 4120.3–M, Defense Standardization Program Policies and Procedures.

11.203 Customer satisfaction.

Acquisition organizations shall communicate with customers to determine how well the requirements document reflects the customer's needs and to obtain suggestions for corrective actions. Whenever practicable, the agency may provide affected industry an opportunity to comment on the requirements documents.

11.204 Solicitation provisions and contract clauses.

(a) The contracting officer shall insert the provision at 52.211–1, Availability of Specifications Listed in the GSA Index of Federal Specifications, Standards and Commercial Item Descriptions, in solicitations that

(1) Are issued by civilian agency contracting offices and

(2) Cite specifications listed in the Index that are not furnished with the solicitation.

(b) The contracting officer shall insert the provision at 52.211–2, Availability of Specifications Listed in the DoD Index of Specifications and Standards (DoDISS), in solicitations that

(1) Are issued by DoD contracting offices and

(2) Cite specifications listed in the DoDISS that are not furnished with the solicitation.

(c) The contracting officer shall insert a provision substantially the same as the provision at 52.211–3, Availability of Specifications Not Listed in the GSA Index of Federal Specifications, Standards and Commercial Item Descriptions, in solicitations that cite specifications that are not listed in the Index and are not furnished with the solicitation, but may be obtained from a designated source.

(d) The contracting officer shall insert a provision substantially the same as the provision at 52.211–4, Availability for Examination of Specifications Not Listed in the GSA Index of Federal Specifications, Standards and Commercial Item Descriptions, in solicitations that cite specifications that are not listed in the Index and are available for examination at a specified location.

Subpart 11.3—Acquiring Other Than New Material, Former Government Surplus Property, and Residual Inventory

11.301 Policy.

(a) Agencies shall allow offers of other than new material, former Government surplus property, or residual inventory unless it is determined that such materials are unacceptable. When acquiring commercial items, the contracting officer should consider the customary practice in the industry for the item being acquired. When only new material is acceptable, the solicitation shall clearly identify the material that must be new. Offerors providing other than new material shall be required to comply with the clause at 52.211–5, New Material, the provision at 52.211–6, Listing of Other Than New Material, Residual Inventory, and Former Government Surplus Property, and the clause at 52.211–7, Other Than New Material, Residual Inventory, and Former Government Surplus Property, as appropriate.

(b) Agencies shall specify products, including packaging, that contain the highest practicable percentage of recovered and environmentally preferable materials, and where applicable, post-consumer material, consistent with performance requirements, availability, price reasonableness, and cost-effectiveness.

(c) Contracting officers shall consider the following when determining whether other than new materials, former Government surplus property, or residual inventory are acceptable:

(1) Safety of persons or property.

(2) Specification and performance requirements.

(3) Price reasonableness.

(4) Total cost to the Government (including maintenance, inspection, testing, and useful life).

(d) When a contract calls for material to be furnished at cost, the allowable charge for former Government surplus property shall not exceed the cost at which the contractor acquired the property.

11.302 Solicitation provisions and contract clauses.

(a) The contracting officer may insert the clause at 52.211–5, New Material, in solicitations and contracts for supplies. The clause shall not be used if it would be contrary to customary commercial practices for the item being acquired.

(b) The contracting officer shall insert the provision at 52.211–6, Listing of Other Than New Material, Residual Inventory, and Former Government Surplus Property, in solicitations containing the clause at 52.211–5.

(c) The contracting officer shall insert the clause at 52.211–7, Other Than New Material, Residual Inventory, and Former Government Surplus Property, in contracts containing the clause at 52.211–5.

Subpart 11.4—[Redesignated from 12.1]

21. and 22. Subpart 11.4 is redesignated from Subpart 12.1 and sections 12.101 through 12.104 are redesignated as sections 11.401 through 11.404, respectively.

23. Newly redesignated section 11.401 is amended in paragraph (a) by revising the last sentence; and in the parenthetical of paragraph (c) by removing "Subpart 12.2" and inserting "Subpart 11.5". The revised text reads as follows:

11.401 General.

(a) * * * Schedules that are unnecessarily short or difficult to attain

(1) Tend to restrict competition,

(2) Are inconsistent with small business policies, and

(3) May result in higher contract prices.

* * * * *

24. Newly redesignated section 11.402 is amended by revising paragraphs (a)(2) and (5) to read as follows:

11.402 Factors to consider in establishing schedules.

(a) * * *

(2) Industry practices;

* * * * *

(5) Production time;

* * * * *

11.404 [Amended]

25. Newly redesignated section 11.404 is amended in paragraph (a)(2) by removing "52.212–1" and inserting "52.211–8"; in paragraph (a)(3) by removing "52.212–2" and inserting "52.211–9"; and in paragraph (b) by removing "52.212–3" and inserting "52.211–10".

Subpart 11.5—[Redesignated From Subpart 12.2]

26. Subpart 11.5 is redesignated from Subpart 12.2 and sections 11.501 through 11.504 are redesignated from sections 12.201 through 12.204, respectively.

11.504 [Amended]

27. Newly designated 11.504 is amended in paragraph (a) by removing "52.212–4" and inserting "52.211–11"; in paragraph (b) by removing "52.212–5" and inserting "52.211–12"; and in paragraph (c) by removing "52.212–6" and "52.212–5" and inserting "52.211–13" and "52.211–12", respectively.

Subpart 11.6 [Redesignated From 12.3]

28. Subpart 11.6 is redesignated from Subpart 12.3 and sections 11.600 through 11.604 are redesignated from sections 12.300 through 12.304, respectively.

11.604 [Amended]

29. Newly redesignated section 11.604 is amended in paragraph (a) by removing "52.212–7" and inserting "52.211–14"; and in paragraph (b) by removing "52.212–8" and inserting "52.211–15".

Subpart 11.7—[Redesignated From 12.4]

30. Subpart 11.7 is redesignated from Subpart 12.4 and sections 11.701 through 11.703 are redesignated from 12.401 through 12.403, respectively.

11.703 [Amended]

31. Newly redesignated section 11.703 is amended in paragraph (a) by removing "52.212–9" and inserting "52.211–16"; in paragraph (b) by removing "52.212–10" and inserting "52.211–17"; and in paragraph (c) by removing "52.212–11" and inserting "52.211–18".

32. Subpart 12.5 is redesignated as Subpart 42.13 and sections 12.501 through 12.505 are redesignated as sections 42.1301 through 42.1305, respectively.

33. Part 12 is revised to read as follows:

PART 12—ACQUISITION OF COMMERCIAL ITEMS

Sec.
12.000 Scope of part.
12.001 Definition.

Subpart 12.1—Acquisition of Commercial Items—General

12.101 Policy.
12.102 Applicability.

Subpart 12.2—Special Requirements for the Acquisition of Commercial Items

12.201 General.
12.202 Market research and description of agency need.
12.203 Procedures for solicitation, evaluation, and award.
12.204 Solicitation/contract form.
12.205 Offers.
12.206 Use of past performance.
12.207 Contract type.
12.208 Contract quality assurance.
12.209 Pricing of commercial items when contracting by negotiation.
12.210 Contract financing.
12.211 Technical data.
12.212 Computer software.
12.213 Other customary commercial practices.

Subpart 12.3—Solicitation Provisions and Contract Clauses for the Acquisition of Commercial Items

12.300 Scope of subpart.
12.301 Solicitation provisions and contract clauses for the acquisition of commercial items.
12.302 Tailoring of provisions and clauses for the acquisition of commercial items.
12.303 Contract format.

Subpart 12.4—Unique Requirements Regarding Terms and Conditions for Commercial Items

12.401 General.
12.402 Acceptance.
12.403 Termination.
12.404 Warranties.

Subpart 12.5—Applicability of Certain Laws to the Acquisition of Commercial Items

12.500 Scope of subpart.
12.501 Applicability.
12.502 Procedures.
12.503 Applicability of certain laws to Executive agency contracts for the acquisition of commercial items.
12.504 Applicability of certain laws to subcontracts for the acquisition of commercial items.

Subpart 12.6—Streamlined Procedures for Evaluation and Solicitation for Commercial Items

12.601 General.
12.602 Streamlined evaluation of offers.
12.603 Streamlined solicitation for commercial items.

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

12.000 Scope of part.

This part prescribes policies and procedures unique to the acquisition of commercial items. It implements the Federal Government's preference for the acquisition of commercial items contained in Title VIII of the Federal Acquisition Streamlining Act of 1994 (Public Law 103–355) by establishing acquisition policies more closely resembling those of the commercial marketplace and encouraging the acquisition of commercial items and components.

12.001 Definition.

Subcontract, as used in this part, includes, but is not limited to, a transfer of commercial items between divisions, subsidiaries, or affiliates of a contractor or subcontractor.

Subpart 12.1—Acquisition of Commercial Items— General

12.101 Policy.

Agencies shall—

(a) Conduct market research to determine whether commercial items or nondevelopmental items are available that could meet the agency's requirements;

(b) Acquire commercial items or nondevelopmental items when they are available to meet the needs of the agency; and

(c) Require prime contractors and subcontractors at all tiers to incorporate, to the maximum extent practicable, commercial items or nondevelopmental items as components of items supplied to the agency.

12.102 Applicability.

(a) This part shall be used for the acquisition of supplies or services that meet the definition of commercial items at section 2.101.

(b) Contracting officers shall use the policies in this part in conjunction with the policies and procedures for solicitation, evaluation and award prescribed in part 13, Simplified Acquisition Procedures; part 14, Sealed Bidding; or part 15, Contracting by Negotiation, as appropriate for the particular acquisition.

(c) Contracts for the acquisition of commercial items are subject to the policies in other parts of this chapter. When a policy in another part of this chapter is inconsistent with a policy in this part, this part 12 shall take precedence for the acquisition of commercial items.

(d) This part shall not apply to the acquisition of commercial items—

(1) At or below the micro-purchase threshold (see subpart 13.6);

(2) Using the SF 44 (see section 13.505–3);

(3) Using the imprest fund (see subpart 13.4); or

(4) Using the Governmentwide commercial purchase card (see subpart 13.6).

Subpart 12.2—Special Requirements for the Acquisition of Commercial Items

12.201 General.

Public Law 103–355 establishes special requirements for the acquisition of commercial items intended to more closely resemble those customarily used in the commercial marketplace. This subpart identifies those special requirements as well as other considerations necessary for proper planning, solicitation, evaluation and award of contracts for commercial items.

12.202 Market research and description of agency need.

(a) Market research (see 10.001) is an essential element of building an effective strategy for the acquisition of commercial items and establishes the foundation for the agency description of need (see part 11), the solicitation, and resulting contract.

(b) The description of agency need must contain sufficient detail for potential offerors of commercial items to know which commercial products or services to offer. Generally, for acquisitions in excess of the simplified acquisition threshold, an agency's statement of need for a commercial item will describe the product or service to be acquired and explain how the agency intends to use the product or service in terms of function to be performed, performance requirement or essential physical characteristics. Describing the agency's need in these terms allows offerors to propose methods that will best meet the needs of the Government.

(c) Follow the procedures in subpart 11.2 regarding the identification and availability of specifications, standards and commercial item descriptions.

12.203 Procedures for solicitation, evaluation, and award.

Contracting officers shall use the policies unique to the acquisition of commercial items prescribed in this part in conjunction with the policies and procedures for solicitation, evaluation and award prescribed in part 13, Simplified Acquisition Procedures; part 14, Sealed Bidding; or part 15, Contracting by Negotiation, as appropriate for the particular acquisition. The contracting officer may use the streamlined procedure for soliciting offers for commercial items prescribed in 12.603.

12.204 Solicitation/contract form.

The Standard Form 1449, Solicitation/Contract/Order for Commercial Items, shall be used by the contracting officer when issuing written solicitations and awarding contracts and placing orders for commercial items. This form contains the information necessary for solicitations and contracts. The form may also be used for documenting receipt, inspection and acceptance of commercial items. Other forms shall not be used for solicitation or award of contracts or orders for the acquisition of commercial items.

12.205 Offers.

(a) Where technical information is necessary for evaluation of offers, agencies should, as part of market research, review existing product literature generally available in the industry to determine its adequacy for purposes of evaluation. If adequate, contracting officers shall request existing product literature from offerors of commercial items in lieu of unique technical proposals.

(b) Contracting officers should allow offerors to propose more than one product that will meet a Government need in response to solicitations for commercial items. The contracting officer shall evaluate each product as a separate offer.

(c) Contracting officers may, considering the circumstances described in 5.203(b), allow fewer than 30 days response time for receipt of offers for commercial items.

12.206 Use of past performance.

Past performance should be an important element of every evaluation and contract award for commercial items. Contracting officers should consider past performance data from a wide variety of sources both inside and outside the Federal Government in accordance with the policies and procedures contained in subpart 9.1, section 13.106–1, or subpart 15.6, as applicable.

12.207 Contract type.

Agencies shall use firm-fixed-price contracts or fixed-price contracts with economic price adjustment for the acquisition of commercial items. Indefinite-delivery contracts (see subpart 16.5) may be used where the prices are established based on a firm-fixed-price or fixed-price with economic price adjustment. Use of any other contract type to acquire commercial items is prohibited.

12.208 Contract quality assurance.

Contracts for commercial items shall rely on contractors' existing quality assurance systems as a substitute for Government inspection and testing before tender for acceptance unless customary market practices for the commercial item being acquired include in-process inspection. Any in-process inspection by the Government shall be conducted in a manner consistent with commercial practice.

12.209 Pricing of commercial items when contracting by negotiation.

(a) When contracting by negotiation for commercial items, the policies and procedures in part 15 shall be used to establish the reasonableness of prices.

(b) The provisions and clauses prescribed in this part for the acquisition of commercial items do not include the provisions and clauses prescribed in part 15 because they assume prices for commercial items will either

(1) Not be subject to the Truth in Negotiations Act because the contract

price is below the dollar threshold for application of the Act; or

(2) Be based upon one of the exceptions to cost or pricing data requirements contained in 15.804–1(a)(1).

(c) If the contracting officer determines it is appropriate to use the commercial item exception to cost or pricing data requirements (see 15.804–1(a)(2)), the provisions and clauses prescribed in 15.804–8 and 15.106 for this purpose shall be inserted in an addendum to the solicitation and contract.

(d) If the contracting officer is required to obtain cost or pricing data (see 15.804–1(b)(4) and 15.804–2), the provisions and clauses prescribed in 15.804–8 and 15.106 for this purpose shall be inserted in an addendum to the solicitation and contract.

(e) When a contract is priced using the exceptions at 15.804–1(a)(1), no cost or pricing data may be obtained for modifications unless the proposed modification would change the contract from a contract for a commercial item to a contract for other than a commercial item (see 15.804–1(b)(6)). If the exceptions at 15.804–1(a)(1) are not used, the contracting officer may be required to obtain cost or pricing data to determine the reasonableness of prices for subsequent modifications (see 15.804–2(a)(1)) and the contracting officer shall insert the provisions and clauses prescribed for this purpose in an addendum to the solicitation and contract.

12.210 Contract financing.

Customary market practice for some commercial items may include buyer contract financing. The contracting officer may offer Government financing in accordance with the policies and procedures in part 32.

12.211 Technical data.

Except as provided by agency-specific statutes, the Government shall acquire only the technical data and the rights in that data customarily provided to the public with a commercial item or process. The contracting officer shall presume that data delivered under a contract for commercial items was developed exclusively at private expense. When a contract for commercial items requires the delivery of technical data, the contracting officer shall include appropriate provisions and clauses delineating the rights in the technical data in addenda to the solicitation and contract (see part 27 or agency FAR supplements).

12.212 Computer software.

(a) Commercial computer software or commercial computer software documentation shall be acquired under licenses customarily provided to the public to the extent such licenses are consistent with Federal law and otherwise satisfy the Government's needs. Generally, offerors and contractors shall not be required to—

(1) Furnish technical information related to commercial computer software or commercial computer software documentation that is not customarily provided to the public; or

(2) Relinquish to, or otherwise provide, the Government rights to use, modify, reproduce, release, perform, display, or disclose commercial computer software or commercial computer software documentation except as mutually agreed to by the parties.

(b) With regard to commercial computer software and commercial computer software documentation, the Government shall have only those rights specified in the license contained in any addendum to the contract.

12.213 Other customary commercial practices.

It is customary practice in the commercial marketplace for both the buyer and seller to propose terms and conditions for a given transaction, each written from their particular perspectives. The terms and conditions prescribed in this part 12 seek to balance the interests of both the buyer and seller. These terms and conditions are generally appropriate for use in a wide range of acquisitions. However, market research may indicate other customary commercial practices that are appropriate for the acquisition of the particular item. These practices should be considered for incorporation into the solicitation and contract if the contracting officer determines them appropriate in concluding a business arrangement satisfactory to both parties and not otherwise precluded by law or executive order.

Subpart 12.3—Solicitation Provisions and Contract Clauses for the Acquisition of Commercial Items

12.300 Scope of subpart.

This subpart establishes provisions and clauses to be used when acquiring commercial items.

12.301 Solicitation provisions and contract clauses for the acquisition of commercial items.

(a) In accordance with Section 8002 of Public Law 103–355 (41 U.S.C 264, note), contracts for the acquisition of commercial items shall, to the maximum extent practicable, include only those clauses—

(1) Required to implement provisions of law or executive orders applicable to the acquisition of commercial items; or

(2) Determined to be consistent with customary commercial practice.

(b) To implement this Act, the contracting officer shall insert the following provisions in solicitations for the acquisition of commercial items, and clauses in solicitations and contracts for the acquisition of commercial items:

(1) The provision at 52.212–1, Instructions to Offerors—Commercial Items. This provision provides a single, streamlined set of instructions to be used when soliciting offers for commercial items and is incorporated in the solicitation by reference (see Block 26, SF 1449). The contracting officer may tailor these instructions or provide additional instructions tailored to the specific acquisition in accordance with 12.302;

(2) The provision at 52.212–3, Offeror Representations and Certifications—Commercial Items. This provision provides a single, consolidated list of certifications and representations for the acquisition of commercial items and is attached to the solicitation for offerors to complete and return with their offer. This provision may not be tailored except in accordance with Subpart 1.4;

(3) The clause at 52.212–4, Contract Terms and Conditions—Commercial Items. This clause includes terms and conditions which are, to the maximum extent practicable, consistent with customary commercial practices and is incorporated in the solicitation and contract by reference (see Block 26, SF 1449). The contracting officer may tailor this clause in accordance with 12.302; and

(4) The clause at 52.212–5, Contract Terms and Conditions Required to Implement Statutes or Executive Orders—Commercial Items. This clause incorporates by reference only those clauses required to implement provisions of law or executive orders applicable to the acquisition of commercial items. The contracting officer shall attach this clause to the solicitation and contract and, using the appropriate clause prescriptions, indicate which, if any, of the additional clauses cited in 52.2125(b) or (c) are applicable to the specific acquisition. When cost information is obtained pursuant to part 15 to establish the reasonableness of prices for commercial items, the contracting officer shall insert the clauses prescribed for this purpose in an addendum to the solicitation and contract. This clause may not be tailored.

(c) When the use of evaluation factors is appropriate, the contracting officer may—

(1) Insert the provision at 52.212–2, Evaluation— Commercial Items, in solicitations for commercial items (see 12.602); or

(2) Include a similar provision containing all evaluation factors required by section 13.106–1, Subpart 14.2 or subpart 15.6, as an addendum (see 12.302(d)).

(d) *Use of required provisions and clauses.* Notwithstanding prescriptions contained elsewhere in the FAR, when acquiring commercial items, contracting officers shall be required to use only those provisions and clauses prescribed in this part. The provisions and clauses prescribed in this part shall be revised, as necessary, to reflect the applicability of statutes and executive orders to the acquisition of commercial items.

(e) *Discretionary use of FAR provisions and clauses.* The contracting officer may include in solicitations and contracts by addendum other FAR provisions and clauses when their use is consistent with the limitations contained in 12.302. For example:

(1) The contracting officer may include appropriate clauses when an indefinite-delivery type of contract will be used. The clauses prescribed at 16.505 may be used for this purpose.

(2) The contracting officer may include appropriate provisions and clauses when the use of options is in the Government's interest. The provisions and clauses prescribed in 17.208 may be used for this purpose. If the provision at 52.212–2 is used, paragraph (b) provides for the evaluation of options.

(3) The contracting officer may use the provisions and clauses contained in part 23 regarding the use of recovered material when appropriate for the item being acquired.

(f) Agencies may supplement the provisions and clauses prescribed in this part (to require use of additional provisions and clauses) only as necessary to reflect agency unique statutes applicable to the acquisition of commercial items or as may be approved by the agency senior procurement executive, or the individual responsible for representing the agency on the FAR Council, without power of delegation.

12.302 Tailoring of provisions and clauses for the acquisition of commercial items.

(a) *General.* The provisions and clauses established in this subpart are intended to address, to the maximum extent practicable, customary commercial market practices for a wide range of potential Government acquisitions of commercial items. However, because of the broad range of commercial items acquired by the Government, variations in customary commercial practices across markets and the relative volume of the Government's acquisitions in the specific market, contracting officers may, within the limitations of this subpart, and after conducting appropriate market research, tailor the provision at 52.212–1, Instructions to Offerors—Commercial Items, and the clause at 52.212–4, Contract Terms and Conditions—Commercial Items, to adapt to the market conditions for each acquisition.

(b) *Tailoring 52.212–4, Contract Terms and Conditions—Commercial Items.* The following paragraphs of the clause at 52.212–4, Contract Terms and Conditions—Commercial Items, implement statutory requirements and shall not be tailored—

(1) Assignments;

(2) Disputes;

(3) Payment;

(4) Invoice;

(5) Other compliances; and

(6) Compliance with laws unique to Government contracts.

(c) *Tailoring inconsistent with customary commercial practice.* The contracting officer shall not tailor any clause or otherwise include any additional terms or conditions in a solicitation or contract for commercial items in a manner that is inconsistent with customary commercial practice for the item being acquired unless a waiver is approved in accordance with agency procedures. The request for waiver must describe the customary commercial practice found in the marketplace, support the need to include a term or condition that is inconsistent with that practice and include a determination that use of the customary commercial practice is inconsistent with the needs of the Government. A waiver may be requested for an individual or class of contracts for that specific item.

(d) Tailoring shall be by addenda to the solicitation and contract. The contracting officer shall indicate in Block 26 of the SF 1449 if addenda are attached. These addenda may include, for example, a continuation of the schedule of supplies/services to be acquired from blocks 18 through 21 of the SF 1449; a continuation of the description of the supplies/services being acquired; further elaboration of any other item(s) on the SF 1449; any other terms or conditions necessary for the performance of the proposed contract (such as options, ordering procedures for indefinite-delivery type contracts, warranties, contract financing arrangements, etc.).

12.303 Contract format.

Solicitations and contracts for the acquisition of commercial items prepared using this part 12 shall be assembled, to the maximum extent practicable, using the following format:

(a) Standard Form (SF) 1449;

(b) Continuation of any block from SF 1449, such as—

(1) Block 10 if set-aside for emerging small businesses;

(2) Block 16B for remittance address;

(3) Block 18 for contract line item numbers;

(4) Block 19 for schedule of supplies/services; or

(5) Block 24 for accounting data;

(c) Contract clauses—

(1) 52.212–4, Contract Terms and Conditions—Commercial Items, by reference (see SF 1449, Block 26);

(2) Any addendum to 52.212–4; and

(3) 52.212–5, Contract Terms and Conditions Required to Implement Statutes and Executive Orders;

(d) Any contract documents, exhibits or attachments; and

(e) Solicitation provisions—

(1) 52.212–1, Instructions to Offerors—Commercial Items, by reference (see SF 1449, Block 26);

(2) Any addendum to 52.212–1;

(3) 52.212–2, Evaluation—Commercial Items, or other description of evaluation factors for award, if used; and

(4) 52.212–3, Offeror Representations and Certifications—Commercial Items.

Subpart 12.4—Unique Requirements Regarding Terms and Conditions for Commercial Items

12.401 General.

This subpart provides—

(a) Guidance regarding tailoring of the paragraphs in the clause at 52.212–4, Contract Terms and Conditions—Commercial Items, when the paragraphs do not reflect the customary practice for a particular market; and

(b) Guidance on the administration of contracts for commercial items in those areas where the terms and conditions in 52.212–4 differ substantially from those contained elsewhere in the FAR.

12.402 Acceptance.

(a) The acceptance paragraph in 52.212–4 is based upon the assumption that the Government will rely on the contractor's assurances that the commercial item tendered for acceptance conforms to the contract requirements. The Government inspection of commercial items will not

prejudice its other rights under the acceptance paragraph. Additionally, although the paragraph does not address the issue of rejection, the Government always has the right to refuse acceptance of nonconforming items. This paragraph is generally appropriate when the Government is acquiring noncomplex commercial items.

(b) Other acceptance procedures may be more appropriate for the acquisition of complex commercial items or commercial items used in critical applications. In such cases, the contracting officer shall include alternative inspection procedure(s) in an addendum and ensure these procedures and the postaward remedies adequately protect the interests of the Government. The contracting officer must carefully examine the terms and conditions of any express warranty with regard to the effect it may have on the Government's available postaward remedies (see 12.404).

(c) The acquisition of commercial items under other circumstances such as on an "as is" basis may also require acceptance procedures different from those contained in 52.212–4. The contracting officer should consider the effect the specific circumstances will have on the acceptance paragraph as well as other paragraphs of the clause.

12.403 Termination.

(a) *General.* The clause at 52.212–4 permits the Government to terminate a contract for commercial items either for the convenience of the Government or for cause. However, the paragraphs in 52.212–4 entitled "Termination for the Government's Convenience" and "Termination for Cause" contain concepts which differ from those contained in the termination clauses prescribed in part 49. Consequently, the requirements of part 49 do not apply when terminating contracts for commercial items and contracting officers shall follow the procedures in this section. Contracting officers may continue to use part 49 as guidance to the extent that part 49 does not conflict with this section and the language of the termination paragraphs in 52.212–4.

(b) *Policy.* The contracting officer should exercise the Government's right to terminate a contract for commercial items either for convenience or for cause only when such a termination would be in the best interests of the Government. The contracting officer should consult with counsel prior to terminating for cause.

(c) *Termination for cause.* (1) The paragraph in 52.2124 entitled "Excusable Delay" requires contractors notify the contracting officer as soon as possible after commencement of any excusable delay. In most situations, this requirement should eliminate the need for a show cause notice prior to terminating a contract. The contracting officer shall send a cure notice prior to terminating a contract for a reason other than late delivery.

(2) The Government's rights after a termination for cause shall include all the remedies available to any buyer in the marketplace. The Government's preferred remedy will be to acquire similar items from another contractor and to charge the defaulted contractor with any excess reprocurement costs together with any incidental or consequential damages incurred because of the termination.

(3) When a termination for cause is appropriate, the contracting officer shall send the contractor a written notification regarding the termination. At a minimum, this notification shall—

(i) Indicate the contract is terminated for cause;

(ii) Specify the reasons for the termination;

(iii) Indicate which remedies the Government intends to seek or provide a date by which the Government will inform the contractor of the remedy; and

(iv) State that the notice constitutes a final decision of the contracting officer and that the contractor has the right to appeal under the Disputes clause (see 33.211).

(d) *Termination for the Government's convenience.* (1) When the contracting officer terminates a contract for commercial items for the Government's convenience, the contractor shall be paid—

(i) The percentage of the contract price reflecting the percentage of the work performed prior to the notice of the termination, and

(ii) Any charges the contractor can demonstrate directly resulted from the termination. The contractor may demonstrate such charges using its standard record keeping system and is not required to comply with the cost accounting standards or the contract cost principles in part 31. The Government does not have any right to audit the contractor's records solely because of the termination for convenience.

(2) Generally, the parties should mutually agree upon the requirements of the termination proposal. The parties must balance the Government's need to obtain sufficient documentation to support payment to the contractor against the goal of having a simple and expeditious settlement.

12.404 Warranties.

(a) *Implied warranties.* The Government's post award rights contained in 52.212–4 are the implied warranty of merchantability, the implied warranty of fitness for particular purpose and the remedies contained in the acceptance paragraph.

(1) The implied warranty of merchantability provides that an item is reasonably fit for the ordinary purposes for which such items are used. The items must be of at least average, fair or medium-grade quality and must be comparable in quality to those that will pass without objection in the trade or market for items of the same description.

(2) The implied warranty of fitness for a particular purpose provides that an item is fit for use for the particular purpose for which the Government will use the items. The Government can rely upon an implied warranty of fitness for particular purpose when—

(i) The seller knows the particular purpose for which the Government intends to use the item; and

(ii) The Government relied upon the contractor's skill and judgment that the item would be appropriate for that particular purpose.

(3) Contracting officers should consult with legal counsel prior to asserting any claim for a breach of an implied warranty.

(b) *Express warranties.* The Federal Acquisition Streamlining Act of 1994 (41 U.S.C. 264 note) requires contracting officers to take advantage of commercial warranties. To the maximum extent practicable, solicitations for commercial items shall require offerors to offer the Government at least the same warranty terms, including offers of extended warranties, offered to the general public in customary commercial practice. Solicitations may specify minimum warranty terms, such as minimum duration, appropriate for the Government's intended use of the item.

(1) Any express warranty the Government intends to rely upon must meet the needs of the Government. The contracting officer should analyze any commercial warranty to determine if—

(i) The warranty is adequate to protect the needs of the Government, e.g., items covered by the warranty and length of warranty;

(ii) The terms allow the Government effective postaward administration of the warranty to include the identification of warranted items, procedures for the return of warranted items to the contractor for repair or replacement, and collection of product performance information; and

(iii) The warranty is cost-effective.

(2) In some markets, it may be customary commercial practice for contractors to exclude or limit the implied warranties contained in 52.212–4 in the provisions of an express warranty. In such cases, the contracting officer shall ensure that the express warranty provides for the repair or replacement of defective items discovered within a reasonable period of time after acceptance.

(3) Express warranties shall be included in the contract by addendum (see 12.302).

Subpart 12.5—Applicability of Certain Laws to the Acquisition of Commercial Items

12.500 Scope of subpart.

As required by Section 34 of the Office of Federal Procurement Policy Act (41 U.S.C. 430), this subpart lists provisions of laws that are not applicable to contracts for the acquisition of commercial items, or are not applicable to subcontracts, at any tier, for the acquisition of a commercial item. This subpart also lists provisions of law that have been amended to eliminate or modify their applicability to either contracts or subcontracts for the acquisition of commercial items.

12.501 Applicability.

(a) This subpart applies to any contract or subcontract at any tier for the acquisition of commercial items.

(b) Nothing in this subpart shall be construed to authorize the waiver of any provision of law with respect to any subcontract if the prime contractor is reselling or distributing commercial items of another contractor without adding value. This limitation is intended to preclude establishment of unusual contractual arrangements solely for the purpose of Government sales.

(c) For purposes of this subpart, contractors awarded subcontracts under subpart 19.8, Contracting with the Small Business Administration (the 8(a) Program), shall be considered prime contractors.

12.502 Procedures.

(a) The FAR prescription for the provision or clause for each of the laws listed in 12.503 has been revised in the appropriate part to reflect its proper application to prime contracts for the acquisition of commercial items.

(b) For subcontracts for the acquisition of commercial items or commercial components, the clauses at 52.212–5, Contract Terms and Conditions Required to Implement Statutes or Executive Orders—Commercial Items, and 52.244–6, Subcontracts for Commercial Items and Commercial Components, reflect the applicability of the laws listed in 12.504 by identifying the only provisions and clauses that are required to be included in a subcontract at any tier for the acquisition of commercial items or commercial components.

12.503 Applicability of certain laws to executive agency contracts for the acquisition of commercial items.

(a) The following laws are not applicable to executive agency contracts for the acquisition of commercial items:

(1) 41 U.S.C. 43, Walsh-Healey Act (see subpart 22.6).

(2) 41 U.S.C. 254(a) and 10 U.S.C. 2306(b), Contingent Fees (see 3.404).

(3) 41 U.S.C. 416(a)(6), Minimum Response Time for Offers under Office of Federal Procurement Policy Act (see 5.203).

(4) 41 U.S.C. 701, *et seq.*, Drug-Free Workplace Act of 1988 (see 23.501).

(b) Certain requirements of the following laws have been eliminated for executive agency contracts for the acquisition of commercial items:

(1) 33 U.S.C. 1368, Requirement for a certificate and clause under the Federal Water Pollution Control Act (see 23.105).

(2) 40 U.S.C. 327 *et seq.*, Requirement for a certificate and clause under the Contract Work Hours and Safety Standards Act (see 22.305).

(3) 41 U.S.C. 57(a) and (b), and 58, Requirement for a clause and certain other requirements related to the Anti-Kickback Act of 1986 (see 3.502).

(4) 41 U.S.C. 423(e)(1)(B), Requirement for a certain certification under the Procurement Integrity Act (see 3.104–9).

(5) 42 U.S.C. 7606, Requirements for a certificate and clause under the Clean Air Act (see 23.105).

(6) 49 U.S.C. 40118, Requirement for a certificate and clause under the Fly American provisions (see 47.405).

(c) The applicability of the following laws have been modified in regards to Executive agency contracts for the acquisition of commercial items:

(1) 41 U.S.C. 253g and 10 U.S.C. 2402, Prohibition on Limiting Subcontractor Direct Sales to the United States (see 3.503).

(2) 41 U.S.C. 254(d) and 10 U.S.C. 2306a, Truth in Negotiations Act (see 15.804).

(3) 41 U.S.C. 422, Cost Accounting Standards (see 48 CFR chapter 99).

12.504 Applicability of certain laws to subcontracts for the acquisition of commercial items.

(a) The following laws are not applicable to subcontracts at any tier for the acquisition of commercial items or commercial components at any tier:

(1) 15 U.S.C. 644(d), Requirements relative to labor surplus areas under the Small Business Act (see subpart 19.2).

(2) 19 U.S.C. 1202, Tariff Act of 1930 (see subpart 25.6).

(3) 19 U.S.C. 1309, Supplies for Certain Vessels and Aircraft (see subpart 25.6).

(4) 19 U.S.C. 2701, *et seq.*, Authority to Grant Duty Free Treatment (see subpart 25.6).

(5) 31 U.S.C. 1352, Limitation on Payments to Influence Certain Federal Transactions (see subpart 3.8).

(6) 41 U.S.C. 43, Walsh-Healey Act (see subpart 22.6).

(7) 41 U.S.C. 253d, Validation of Proprietary Data Restrictions (see subpart 27.4).

(8) 41 U.S.C. 254(a) and 10 U.S.C. 2306(b), Contingent Fees (see subpart 3.4).

(9) 41 U.S.C. 254d(c) and 10 U.S.C. 2313(c), Examination of Records of Contractor, when a subcontractor is not required to provide cost or pricing data (see subpart 15.1).

(10) 41 U.S.C. 351, Service Contract Act of 1965, as amended (see subpart 22.10).

(11) 41 U.S.C. 416(a)(6), Minimum Response Time for Offers under Office of Federal Procurement Policy Act (see subpart 5.2).

(12) 41 U.S.C. 418a, Rights in Technical Data (see subpart 27.4).

(13) 41 U.S.C. 701, *et seq.*, Drug-Free Workplace Act of 1988 (see subpart 23.5).

(14) 46 U.S.C. 1241(b), Transportation in American Vessels of Government Personnel and Certain Cargo (see subpart 47.5) (inapplicability effective May 1, 1996).

(15) 49 U.S.C. 40118, Fly American provisions (see subpart 47.4).

(16) Public Law 90–469, William Langer Jewel Bearing Plant Special Act (see subpart 8.2).

(b) Certain requirements of the following laws have been eliminated for subcontracts at any tier for the acquisition of commercial items or commercial components:

(1) 33 U.S.C. 1368, Requirement for a certificate and clause under the Federal Water Pollution Control Act (see subpart 23.1).

(2) 40 U.S.C. 327, *et seq.*, Requirement for a certificate and clause under the Contract Work Hours and Safety Standards Act (see subpart 22.3).

(3) 41 U.S.C. 423(e)(1)(B), Requirement for certain certifications under the Procurement Integrity Act (see subpart 3.1).

(4) 42 U.S.C. 7606, Requirements for a certificate and clause under the Clean Air Act (see subpart 23.1).

(c) The applicability of the following laws have been modified in regards to subcontracts at any tier for the acquisition of commercial items or commercial components:

(1) 41 U.S.C. 253g and 10 U.S.C. 2402, Prohibition on Limiting Subcontractor Direct Sales to the United States (see subpart 3.5).

(2) 41 U.S.C. 254(d) and 10 U.S.C. 2306a, Truth in Negotiations Act (see subpart 15.8).

(3) 41 U.S.C. 422, Cost Accounting Standards (see 48 CFR chapter 99).

Subpart 12.6—Streamlined Procedures for Evaluation and Solicitation for Commercial Items

12.601 General.

This subpart provides optional procedures for—

(a) Streamlined evaluation of offers for commercial items; and

(b) Streamlined solicitation of offers for commercial items for use where appropriate.

These procedures are intended to simplify the process of preparing and issuing solicitations, and evaluating offers for commercial items consistent with customary commercial practices.

12.602 Streamlined evaluation of offers.

(a) When evaluation factors are used, the contracting officer may insert a provision substantially the same as the provision at 52.212–2, Evaluation—Commercial Items, in solicitations for commercial items or comply with the procedures in 13.106–1 if the acquisition is being made using the procedures in part 13. When the provision at 52.212–2 is used, paragraph (a) of the provision shall be tailored to the specific acquisition to describe the evaluation factors and relative importance of those factors. This provision contemplates an approach designed to select the source whose offer will provide the Government with the greatest value in terms of performance and other factors. Other methods of evaluation and basis for award may be more appropriate for a given acquisition.

(b) Offers shall be evaluated in accordance with the criteria contained in the solicitation. For many commercial items, the criteria need not be more detailed than technical (capability of the item offered to meet the agency need), price and past performance. Technical capability may be evaluated by how well the proposed products meet the Government requirement instead of predetermined subfactors. Solicitations for commercial items do not have to contain subfactors for technical capability when the solicitation adequately describes the item's intended use. A technical evaluation would normally include examination of such things as product literature, product samples (if requested), technical features and warranty provisions. Past performance shall be evaluated in accordance with the procedures in section 13.106–1 or subpart 15.6, as applicable. The contracting officer shall ensure the instructions provided in the provision at 52.212–1, Instructions to Offerors—Commercial Items, and the evaluation criteria provided in the provision at 52.212–2, Evaluation—Commercial Items, are in agreement.

(c) Select the offer that is most advantageous to the Government based on the factors contained in the solicitation. Fully document the rationale for selection of the successful offeror including discussion of any tradeoffs considered.

12.603 Streamlined solicitation for commercial items.

(a) When a written solicitation will be issued, the contracting officer may use the following procedure to reduce the time required to solicit and award contracts for the acquisition of commercial items. This procedure combines the Commerce Business Daily (CBD) synopsis required by 5.203 and the issuance of the solicitation into a single document with the following limitations:

(1) Section 5.207 limits submissions to the CBD to 12,000 textual characters (approximately 3 ½ single-spaced pages).

(2) This combined CBD synopsis/solicitation is only appropriate where the solicitation is relatively simple and is not recommended for use when lengthy addenda to the solicitation are necessary.

(b) When using the combined synopsis/solicitation procedure, the SF 1449 is not used for issuing the solicitation.

(c) To use these procedures, the contracting officer shall—

(1) Prepare the synopsis as described at 5.207 for items 1–16.

(2) In item 17, Description, include the following additional information:

(i) The following statement:

> This is a combined synopsis/solicitation for commercial items prepared in accordance with the format in FAR Subpart 12.6, as supplemented with additional information included in this notice. This announcement constitutes the only solicitation; proposals are being requested and a written solicitation will not be issued.

(ii) The solicitation number and a statement that the solicitation is issued as an invitation to bid (IFB), request for quotation (RFQ) or request for proposal (RFP).

(iii) A statement that the solicitation document and incorporated provisions and clauses are those in effect through Federal Acquisition Circular ______.

(iv) A notice regarding any set-aside and the associated standard industrial classification code and small business size standard. Also include a statement regarding the Small Business Competitiveness Demonstration Program, if applicable.

(v) A list of contract line item number(s) and items, quantities and units of measure, (including option(s), if applicable).

(vi) Description of requirements for the items to be acquired.

(vii) Date(s) and place(s) of delivery and acceptance and FOB point.

(viii) A statement that the provision at 52.212–1, Instructions to Offerors—Commercial, applies to this acquisition and a statement regarding any addenda to the provision.

(ix) A statement regarding the applicability of the provision at 52.212–2, Evaluation—Commercial Items, if used, and the specific evaluation criteria to be included in paragraph (a) of that provision. If this provision is not used, describe the evaluation procedures to be used.

(x) A statement advising offerors to include a completed copy of the provision at 52.212–3, Offeror Representations and Certifications—Commercial Items, with its offer.

(xi) A statement that the clause at 52.212–4, Contract Terms and Conditions—Commercial Items, applies to this acquisition and a statement regarding any addenda to the clause.

(xii) A statement that the clause at 52.212–5, Contract Terms and Conditions Required To Implement Statutes Or Executive Orders—Commercial Items, applies to this acquisition and a statement regarding which, if any, of the additional FAR clauses cited in the clause are applicable to the acquisition.

(xiii) A statement regarding any additional contract requirement(s) or terms and conditions (such as contract financing arrangements, warranty requirements or GSA Delegation of Procurement Authority (DPA) case number (see 48 CFR 201–39.106–4)) determined by the contracting officer to be necessary for this acquisition and consistent with customary commercial practices.

(xiv) A statement regarding the Defense Priorities and Allocations System (DPAS) and assigned rating, if applicable.

(xv) A statement regarding any applicable Commerce Business Daily numbered notes.

(xvi) The date, time and place offers are due.

(xvii) The name and telephone number of the individual to contact for information regarding the solicitation.

(3) Allow response time for receipt of offers as follows:

(i) Because the CBD synopsis and solicitation are contained in a single document, it is not necessary to publish a separate CBD synopsis 15 days before the issuance of the solicitation.

(ii) When using the combined CBD synopsis/solicitation, contracting officers shall establish a response time in accordance with 5.203(b), but shall allow at least 15 days response time from the date the notice is published in the CBD.

(4) Publish amendments to solicitations in the same manner as the initial synopsis/solicitation.

PART 14—SEALED BIDDING

14.201–2 [Amended]

34. Section 14.201–2 is amended in the parenthetical of paragraphs (b) and (c) by removing "part 10, Specifications, Standards, and Other Product Descriptions" and inserting "part 11" in its place; in paragraph (d) by removing "(see 10.004(e))"; and in the parenthetical of paragraph (f) by revising the parenthetical to read "(see subpart 11.4, Delivery or Performance Schedules)."

14.404–1 [Amended]

35. Section 14.404–1 is amended in paragraph (b) by removing "10.008" and inserting "11.201".

PART 15—CONTRACTING BY NEGOTIATION

15.406–2 [Amended]

36. Section 15.406–2 is amended in the parenthetical of paragraph (c) by removing "part 10, Specifications, Standards, and Other Product Descriptions" and inserting "part 11"; in paragraph (d) by removing "(see 10.004(e))"; and in paragraph (f) by revising the parenthetical to read "(subpart 11.4, Delivery or Performance Schedules, and 47.301–1)."

37. Section 15.501 is amended by revising the definition "Commercial product offer" to read as follows:

15.501 Definitions.

* * * * *

Commercial item offer means an offer of a commercial item the vendor wishes to see introduced in the Government's supply system as an alternate or replacement for an existing supply item.

* * * * *

15.503 [Amended]

38. Section 15.503 is amended in paragraph (b) by removing the word "product" and inserting "item".

39. Section 15.704 is amended by revising the second sentence to read as follows:

15.704 Items and work included.

* * * Raw materials, commercial items (see 2.101), and off-the-shelf items (see 46.101) shall not be included, unless their potential impact on contract cost or schedule is critical. * * *

PART 16—TYPES OF CONTRACTS

40. Section 16.201 is amended by adding a sentence at the end of the paragraph to read as follows:

16.201 General.

* * * The contracting officer shall use firm-fixed-price or fixed-price with economic price adjustment contracts when acquiring commercial items.

41. Section 16.202–2 is amended by revising the introductory paragraph to read as follows:

16.202–2 Application.

A firm-fixed-price contract is suitable for acquiring commercial items (see parts 2 and 12) or for acquiring other supplies or services on the basis of reasonably definite functional or detailed specifications (see part 11) when the contracting officer can establish fair and reasonable prices at the outset, such as when—

* * * * *

42. Section 16.301–3 is amended by redesignating paragraphs (a) through (c) as paragraph (a)(1) through (a)(3), respectively; designating the introductory text as paragraph (a) introductory text and adding new (b) to read as follows:

16.301–3 Limitations.

* * * * *

(b) The use of cost-reimbursement contracts is prohibited for the acquisition of commercial items (see parts 2 and 12).

16.603–2 [Amended]

43. Section 16.603–2 is amended in paragraph (e) by removing "12.304" and inserting "11.604".

PART 22—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITIONS

44. Section 22.305 is amended by redesignating paragraph (g) as (h) and adding a new paragraph (g) to read as follows:

22.305 Contract clause.

* * * * *

(g) Contracts for commercial items (see parts 2 and 12).

* * * * *

45. Section 22.604–1 is amended by revising paragraph (a) to read as follows:

22.604–1 Statutory exemptions.

* * * * *

(a) Any item in those situations where the contracting officer is authorized by the express language of a statute to purchase "in the open market" generally (such as commercial items, see part 12); or where a specific purchase is made under the conditions described in 6.302–2 in circumstances where immediate delivery is required by the public exigency.

* * * * *

PART 23—ENVIRONMENTAL, CONSERVATION, OCCUPATIONAL SAFETY, AND DRUG-FREE WORKPLACE

46. Section 23.104 is amended in paragraph (a)(1) by removing the word "or" the second time it is used; in paragraph (a)(2) by removing the period and inserting "; or" and adding paragraph (a)(3) to read as follows:

23.104 Exemptions.

(a) * * * (3) for commercial items.

* * * * *

47. Section 23.501 is amended by redesignating paragraphs (b) through (d) as (c) through (e) and adding a new paragraph (b) to read as follows:

23.501 Applicability.

* * * * *

(b) Contracts for the acquisition of commercial items (see part 12);

* * * * *

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

31.106–3 [Amended]

48. Section 31.106–3 is amended in the section heading and the first sentence of the undesignated paragraph by removing the word "products" and inserting "items" in their place.

PART 36—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

36.202 [Amended]

49. Section 36.202 is amended in paragraph (a) by removing "part 10" and inserting "part 11" in its place.

36.206 [Amended]

50. Section 36.206 is amended by removing "12.202" and inserting "11.502".

36.303 [Amended]

51. Section 36.303 is amended in paragraph (c)(4) by removing "12.1" and inserting "11.4".

PART 42—CONTRACT ADMINISTRATION

42.1105 [Amended]

53. Section 42.1105 is amended by removing the reference "subpart 12.3" and inserting "subpart 11.6".

Subpart 42.13—[Redesignated from Subpart 12.5]

42.1304 [Amended]

54. and 55. Newly redesignated section 42.1304 (redesignated from 12.504) is amended in paragraph (a) by removing "52.212–15" and inserting "52.242–17"; and at the end of paragraph (d) by removing the period and inserting ", or information other than cost or pricing data." in its place.

42.1305 [Amended]

56. Newly redesignated section 42.1305 (redesignated from 12.505) is amended in paragraph (a) by removing "52.212–12" and inserting "52.24214"; in paragraph (b)(1) by removing "52.212–13" and inserting "52.242–15"; in paragraph (c) by removing "52.21214" and inserting "52.242–16"; and in paragraph (d) by removing "52.212–15" and inserting "52.242–17".

PART 44—SUBCONTRACTING POLICIES AND PROCEDURES

57. Subpart 44.4, consisting of sections 44.400 through 44.403, is added to read as follows:

Subpart 44.4—Subcontracts for Commercial Items and Commercial Components

Sec.
44.400 Scope of subpart.
44.401 Applicability.
44.402 Policy requirements.
44.403 Contract clause.

Subpart 44.4—Subcontracts for Commercial Items and Commercial Components

44.400 Scope of subpart.

This subpart prescribes the policies limiting the contract clauses a prime contractor may be required to apply to any subcontractors that are furnishing commercial items or commercial components in accordance with Section 8002(b)(2) (Public Law 103–355).

44.401 Applicability.

This subpart applies to all contracts and subcontracts. For the purpose of this subpart, the term "subcontract" has the same meaning as defined in part 12.

44.402 Policy requirements.

(a) Contractors and subcontractors at all tiers shall, to the maximum extent practicable:

(1) Be required to incorporate commercial items or nondevelopmental items as components of items delivered to the Government; and

(2) Not be required to apply to any of its divisions, subsidiaries, affiliates, subcontractors or suppliers that are furnishing commercial items or commercial components any clause, except those—

(i) Required to implement provisions of law or executive orders applicable to subcontractors furnishing commercial items or commercial components; or

(ii) Determined to be consistent with customary commercial practice for the item being acquired.

(b) The clause at 52.244–6, Subcontracts for Commercial Items and Commercial Components, implements the policy in paragraph (a) of this section. Notwithstanding any other clause in the prime contract, only those clauses identified in the clause at 52.244–6 are required to be in subcontracts for commercial items or commercial components.

(c) Agencies may supplement the clause at 52.244–6 only as necessary to reflect agency unique statutes applicable to the acquisition of commercial items.

44.403 Contract clause.

The contracting officer shall insert the clause at 52.244–6, Subcontracts for Commercial Items and Commercial Components, in solicitations and contracts for supplies or services other than commercial items.

PART 46—QUALITY ASSURANCE

58. Section 46.101 is amended by adding in alphabetical order the definition "Commercial item" to read as follows:

46.101 Definitions.

* * * * *

Commercial item (see 2.101).

* * * * *

59. Section 46.102 is amended in paragraph (e) by removing "and"; by redesignating paragraph (f) as (g) and adding a new paragraph (f) to read as follows:

46.102 Policy.

* * * * *

(f) Contracts for commercial items shall rely on a contractor's existing quality assurance system as a substitute for compliance with Government inspection and testing before tender for acceptance unless customary market practices for the commercial item being acquired permit in-process inspection (Section 8002 of Public Law 103–355). Any in-process inspection by the Government shall be conducted in a manner consistent with commercial practice; and

* * * * *

46.202 [Amended]

60. Section 46.202 is amended by removing "three" and inserting "four".

61. Sections 46.202–1 through 46.202–3 are redesignated as 46.202–2 through 46.202–4 and a new 46.202–1 is added to read as follows:

46.202–1 Contracts for commercial items.

When acquiring commercial items (see part 12), the Government shall rely on contractors' existing quality assurance systems as a substitute for Government inspection and testing before tender for acceptance unless customary market practices for the commercial item being acquired include in-process inspection. Any in-process inspection by the Government shall be conducted in a manner consistent with commercial practice.

46.202–2 [Amended]

62. Newly redesignated section 46.202–2 is amended in paragraph (b)(1) by removing "(see 46.204 and Table 46–1)".

46.202–4 [Amended]

63. Newly redesignated section 46.202–4 is amended in paragraph (a)(1) by removing "(see 46.204 and Table 46–1)".

64. Section 46.203 is amended by revising paragraph (a)(1); at the end of paragraph (a)(2) by removing ";or" and inserting a period; and by removing paragraph (a)(3). The revised text reads as follows:

46.203 Criteria for use of contract quality requirements.

* * * * *

(a) * * *

(1) Commercial (described in commercial catalogs, drawings, or industrial standards; see part 2); or

* * * * *

46.204 [Removed and reserved]

65. Section 46.204 and Table 46–1 are removed.

46.301 [Amended]

66. Section 46.301 is amended by removing "46.202–1(b)" and inserting "46.202–2(b)" in its place.

46.311 and 46.402 [Amended]

67. Sections 46.311 and 46.402(e) are amended by removing "46.202–3" and inserting "46.202–4" in their place.

46.404 [Amended]

68. Section 46.404 is amended at the end of paragraph (a) by removing "46.202–1" and inserting "46.202–2" in its place; in paragraph (b) introductory text by removing "46.202–1(b)" and inserting "46.202–2(b)" in its place; and in paragraph (b)(2) by removing the last sentence.

69. Section 46.709 is revised to read as follows:

46.709 Warranties of commercial items.

The contracting officer should take advantage of commercial warranties, including extended warranties, where appropriate and in the Government's best interests, offered by the contractor for the repair and replacement of commercial items (see part 12).

70. Section 46.710 is amended by revising the first sentence of the introductory paragraph; by removing paragraphs (a)(2) and (b)(2) and redesignating paragraphs (a)(3) through (a)(6) as (a)(2) through (a)(5), and paragraphs (b)(3) through (b)(5) as (b)(2) through (b)(4), respectively. The revised text reads as follows:

46.710 Contract clauses.

The clauses and alternates prescribed in this section may be used in solicitations and contracts in which inclusion of a warranty is appropriate (see 46.709 for warranties for commercial items). * * *

* * * * *

PART 47—TRANSPORTATION

71. Section 47.405 is amended by revising the last sentence to read as follows:

47.405 Contract clause.

* * * This clause does not apply to contracts awarded using the simplified acquisition procedures in part 13 or contracts for commercial items (see part 12).

72. Section 47.504 is amended by adding paragraph (e) to read as follows:

47.504 Exceptions.

* * * * *

(e) Beginning May 1, 1996, subcontracts for the acquisition of commercial items or commercial components (see 12.504(a)(13)). This exception does not apply to grants-in-aid shipments, such as agricultural and food-aid shipments, to shipments covered under Export-Import Bank loans or guarantees, and to subcontracts under Government contracts or agreements for ocean transportation services.

PART 49—TERMINATION OF CONTRACTS

49.402–7 [Amended]

73. Section 49.402–7 is amended in the last sentence of paragraph (a) by removing "52.212–4" and inserting "52.211–11" in its place.

74. Section 49.501 is revised to read as follows:

49.501 General.

This subpart prescribes the principal contract termination clauses. For contracts for the acquisition of commercial items, this part provides administrative guidance which may be followed when it is consistent with the requirements and procedures in the clause at 52.212–4, Contract Terms and Conditions—Commercial Items. In appropriate cases, agencies may authorize the use of special purpose clauses, if consistent with this chapter.

49.607 [Amended]

75. Section 49.607 is amended by removing from the introductory text "12.5" and inserting "42.13".

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

76. Section 52.202–1 is amended by revising the date of the clause; by redesignating paragraphs (b) and (c) as (f) and (g), and adding new paragraphs (b), (c), (d), and (e) to read as follows:

52.202–1 Definitions.

* * * * *

Definitions (Oct. 1995)

* * * * *

(b) *Commercial component* means any component that is a commercial item.

(c) *Commercial item* means—

(1) Any item, other than real property, that is of a type customarily used for nongovernmental purposes and that—

(i) Has been sold, leased, or licensed to the general public; or

(ii) Has been offered for sale, lease, or license to the general public;

(2) Any item that evolved from an item described in paragraph (c)(1) of this clause through advances in technology or performance and that is not yet available in the commercial marketplace, but will be available in the commercial marketplace in time to satisfy the delivery requirements under a Government solicitation;

(3) Any item that would satisfy a criterion expressed in paragraphs (c)(1) or (c)(2) of this clause, but for—

(i) Modifications of a type customarily available in the commercial marketplace; or

(ii) *Minor* modifications of a type not customarily available in the commercial marketplace made to meet Federal Government requirements. "Minor" modifications means modifications that do not significantly alter the nongovernmental function or essential physical characteristics of an item or component, or change the purpose of a process. Factors to be considered in determining whether a modification is minor include the value and size of the modification and the comparative value and size of the final product. Dollar values and percentages may be used as guideposts, but are not conclusive evidence that a modification is minor;

(4) Any combination of items meeting the requirements of paragraphs (c)(1), (2), (3), or (5) of this clause that are of a type customarily combined and sold in combination to the general public;

(5) Installation services, maintenance services, repair services, training services, and other services if such services are procured for support of an item referred to in paragraphs (c)(1), (2), (3), or (4) of this clause, and if the source of such services—

(i) Offers such services to the general public and the Federal Government contemporaneously and under similar terms and conditions; and

(ii) Offers to use the same work force for providing the Federal Government with such services as the source uses for providing such services to the general public;

(6) Services of a type offered and sold competitively in substantial quantities in the commercial marketplace based on established catalog or market prices for specific tasks performed under standard commercial terms and conditions. This does not include services that are sold based on hourly rates without an established catalog or market price for a specific service performed;

(7) Any item, combination of items, or service referred to in subparagraphs (c)(1) through (c)(6), notwithstanding the fact that the item, combination of items, or service is transferred between or among separate divisions, subsidiaries, or affiliates of a Contractor; or

(8) A nondevelopmental item, if the procuring agency determines the item was developed exclusively at private expense and sold in substantial quantities, on a competitive basis, to multiple State and local Governments.

(d) *Component* means any item supplied to the Federal Government as part of an end item or of another component.

(e) *Nondevelopmental item* means—

(1) Any previously developed item of supply used exclusively for governmental purposes by a Federal agency, a State or local government, or a foreign government with which the United States has a mutual defense cooperation agreement;

(2) Any item described in paragraph (e)(1) of this definition that requires only minor modification or modifications of a type customarily available in the commercial marketplace in order to meet the requirements of the procuring department or agency; or

(3) Any item of supply being produced that does not meet the requirements of paragraph (e)(1) or (e)(2) solely because the item is not yet in use.

* * * * *

(End of clause)

52.203–4 [Amended]

77. Section 52.203–4 is amended in the first sentence of the introductory text by removing "(b)(5)" and inserting "(b)(6)" in its place.

78. Section 52.203–6 is amended by revising the date of the clause and adding an Alternate I following paragraph (c) to read as follows:

52.203–6 Restrictions on Subcontractor Sales to the Government.

Restrictions on Subcontractor Sales to the Government (Oct. 1995)

* * * * *

Alternate I (OCT. 1995). As prescribed in 3.503–2, substitute the following paragraph in place of paragraph (b) of the basic clause:

(b) The prohibition in paragraph (a) of this clause does not preclude the Contractor from asserting rights that are otherwise authorized by law or regulation. For acquisitions of commercial items, the prohibition in paragraph (a) applies only to the extent that any agreement restricting sales by subcontractors results in the Federal Government being treated differently from any other prospective purchaser for the sale of the commercial item(s).

52.210–1 through 52.210–7 [Redesignated]

79. Sections 52.210–1 through 52.210–7 are redesignated as 52.211–1 through 52.211–7.

52.212–1 through 52.212–11 [Redesignated]

80. Sections 52.212–1 through 52.212–11 are redesignated as 52.211–8 through 52.211–18.

52.212–12 through 52.212–15 [Redesignated]

81. Sections 52.212–12 through 52.212–15 are redesignated as 52.242–14 through 52.242–17, respectively.

52.212–1 through 52.212–5 [Added]

82. Part 52 is amended by adding new sections 52.212–1 through 52.212–5 to read as follows:

Sec.
52.212–1 Instructions to Offerors-Commercial Items.
52.212–2 Evaluation-Commercial Items.
52.212–3 Offeror Representations and Certifications-Commercial Items.
52.212–4 Contract Terms and Conditions-Commercial Items.
52.212–5 Contract Terms and Conditions Required to Implement Statutes or Executive Orders-Commercial Items.

52.212–1 Instructions to Offerors—Commercial Items.

As prescribed in 12.301(b)(1), insert the following provision:

Instructions to Offerors—Commercial Items (Oct. 1995)

(a) *Standard industrial classification (SIC) code and small business size standard.* The SIC code and small business size standard for this acquisition appear in Block 10 of the solicitation cover sheet (SF 1449). However, the small business size standard for a concern which submits an offer in its own name, but which proposes to furnish an item which it did not itself manufacture, is 500 employees.

(b) *Submission of offers.* Submit signed and dated offers to the office specified in this solicitation at or before the exact time specified in this solicitation. Offers may be submitted on the SF 1449, letterhead stationery, or as otherwise specified in the solicitation. As a minimum, offers must show——

(1) The solicitation number;

(2) The time specified in the solicitation for receipt of offers;

(3) The name, address, and telephone number of the offeror;

(4) A technical description of the items being offered in sufficient detail to evaluate compliance with the requirements in the solicitation. This may include product literature, or other documents, if necessary;

(5) Terms of any express warranty;

(6) Price and any discount terms;

(7) "Remit to" address, if different than mailing address;

(8) A completed copy of the representations and certifications at FAR 52.212–3;

(9) Acknowledgment of Solicitation Amendments;

(10) Past performance information, when included as an evaluation factor, to include recent and relevant contracts for the same or similar items and other references (including contract numbers, points of contact with telephone numbers and other relevant information); and

(11) If the offer is not submitted on the SF 1449, include a statement specifying the extent of agreement with all terms, conditions, and provisions included in the solicitation. Offers that fail to furnish required representations or information, or reject the terms and conditions of the solicitation may be excluded from consideration.

(c) *Period for acceptance of offers.* The offeror agrees to hold the prices in its offer firm for 30 calendar days from the date specified for receipt of offers, unless another time period is specified in an addendum to the solicitation.

(d) *Product samples.* When required by the solicitation, product samples shall be submitted at or prior to the time specified for receipt of offers. Unless otherwise specified in this solicitation, these samples shall be submitted at no expense to the Government, and returned at the sender's request and expense, unless they are destroyed during preaward testing.

(e) *Multiple offers.* Offerors are encouraged to submit multiple offers presenting alternative terms and conditions or commercial items for satisfying the requirements of this solicitation. Each offer submitted will be evaluated separately.

(f) *Late offers.* Offers or modifications of offers received at the address specified for the receipt of offers after the exact time specified for receipt of offers will not be considered.

(g) *Contract award (not applicable to Invitation for Bids).* The Government intends to evaluate offers and award a contract without discussions with offerors. Therefore, the offeror's initial offer should contain the offeror's best terms from a price and technical standpoint. However, the Government reserves the right to conduct discussions if later determined by the Contracting Officer to be necessary. The Government may reject any or all offers if such action is in the public interest; accept other than the lowest offer; and waive informalities and minor irregularities in offers received.

(h) *Multiple awards.* The Government may accept any item or group of items of an offer, unless the offeror qualifies the offer by specific limitations. Unless otherwise provided in the Schedule [illegible] may not be submitted for [illegible] than those specified. The [illegible] reserves the right to make an [illegible] for a quantity less than the [illegible], at the unit prices offered, unless the offeror specifies otherwise in the offer.

(i) *Availability of requirements documents cited in the solicitation.* (1) The Index of Federal Specifications, Standards and Commercial Item Descriptions and the documents listed in it may be obtained from the General Services Administration, Federal Supply Service Bureau, Specifications Section, Suite 8100, 470 L'Enfant Plaza, SW., Washington, DC 20407 ((202) 755–0325/0326).

(2) The DOD Index of Specifications and Standards (DODISS) and documents listed in it may be obtained from the Standardization Documents Desk, Building 4D, 700 Robbins Avenue, Philadelphia, PA 19111–5094 (telephone (215) 697–2569).

(i) Automatic distribution may be obtained on a subscription basis.

(ii) Individual documents may be ordered from the Telespecs ordering system by touch-tone telephone. A customer number is required to use this service and can be obtained from the Standardization Documents Order Desk or the Special Assistance Desk (telephone (610) 607–2667/2179).

(3) Nongovernment (voluntary) standards must be obtained from the organization responsible for their preparation, publication or maintenance.

(End of provision)

52.212-2 Evaluation—Commercial Items.

As prescribed in 12.301(c), the Contracting Officer may insert a provision substantially as follows:

Evaluation—Commercial Items (Oct. 1995)

(a) The Government will award a contract resulting from this solicitation to the responsible offeror whose offer conforming to the solicitation will be most advantageous to the Government, price and other factors considered. The following factors shall be used to evaluate offers:

____

____

(Contracting Officer shall insert the significant evaluation factors, such as (i) technical capability of the item offered to meet the Government requirement; (ii) price; (iii) past performance (see FAR 15.605) and include them in the relative order of importance of the evaluation factors, such as in descending order of importance.)

Technical and past performance, when combined, are ____ (Contracting Officer state, in accordance with FAR 15.605, the relative importance of all other evaluation factors, when combined, when compared to price.)

(b) *Options.* The Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. The Government may determine that an offer is unacceptable if the option prices are significantly unbalanced. Evaluation of options shall not obligate the Government to exercise the option(s).

(c) A written notice of award or acceptance of an offer, mailed or otherwise furnished to the successful offeror within the time for acceptance specified in the offer, shall result in a binding contract without further action by either party. Before the offer's specified expiration time, the Government may accept an offer (or part of an offer), whether or not there are negotiations after its receipt, unless a written notice of withdrawal is received before award.

(End of Provision)

52.212-3 Offeror Representations and Certifications Commercial Items.

As prescribed in 12.301(b)(2), insert the following provision:

Offeror Representations and Certifications—Commercial Items (Oct. 1995)

(a) *Definitions.* As used in this provision:

Emerging small business means a small business concern whose size is no greater than 50 percent of the numerical size standard for the standard industrial classification code designated.

Small business concern means a concern, including its affiliates, that is independently owned and operated, not dominant in the field of operation in which it is bidding on Government contracts, and qualified as a small business under the criteria in 13 CFR Part 121 and size standards in this solicitation.

Small disadvantaged business concern means a small business concern that—

(1) Is at least 51 percent unconditionally owned by one or more individuals who are both socially and economically disadvantaged, or a publicly owned business, having at least 51 percent of its stock unconditionally owned by one or more socially and economically disadvantaged individuals, and

(2) Has its management and daily business controlled by one or more such individuals. This term also means a small business concern that is at least 51 percent unconditionally owned by an economically disadvantaged Indian tribe or Native Hawaiian organization, or a publicly owned business having at least 51 percent of its stock unconditionally owned by one or more of these entities, which has its management and daily business controlled by members of an economically disadvantaged Indian tribe or Native Hawaiian organization and which meets the requirements of 13 CFR Part 124.

Women-owned small business concern means a small business concern—

(a) Which is at least 51 percent owned by one or more women or, in the case of any publicly owned business, at least 51 percent of the stock of which is owned by one or more women; and

(b) Whose management and daily business operations are controlled by one or more women.

Women-owned business concern means a concern which is at least 51 percent owned by one or more women; or in the case of any publicly owned business, at least 51 percent of the stock of which is owned by one or more women; and whose management and daily business operations are controlled by one or more women.

(b) *Taxpayer identification number (TIN) (26 U.S.C. 6050M).* (1) Taxpayer Identification Number (TIN).

☐ TIN: ____.

☐ TIN has been applied for.

☐ TIN is not required because:

☐ Offeror is a nonresident alien, foreign corporation, or foreign partnership that does not have income effectively connected with the conduct of a trade or business in the U.S. and does not have an office or place of business or a fiscal paying agent in the U.S.;

☐ Offeror is an agency or instrumentality of a foreign government;

☐ Offeror is an agency or instrumentality of a Federal, state, or local government;

☐ Other. State basis. ____

(2) Corporate Status.

☐ Corporation providing medical and health care services, or engaged in the billing and collecting of payments for such services;

☐ Other corporate entity;

☐ Not a corporate entity:

☐ Sole proprietorship

☐ Partnership

☐ Hospital or extended care facility described in 26 CFR 501(c)(3) that is exempt from taxation under 26 CFR 501(a).

(3) Common Parent.

☐ Offeror is not owned or controlled by a common parent.

Name and TIN of common parent:

Name ____

TIN ____

(c) Offerors must complete the following representations when the resulting contract is to be performed inside the United States, its territories or possessions, Puerto Rico, the Trust Territory of the Pacific Islands, or the District of Columbia. Check all that apply.

(1) *Small business concern.* The offeror represents as part of its offer that it ☐ is, ☐ is not a small business concern.

(2) *Small disadvantaged business concern.* The offeror represents and certifies that it ☐ is, ☐ is not a small disadvantaged business concern.

(3) *Women-owned small business concern.* The offeror represents that it ☐ is, ☐ is not a women-owned small business concern.

Note: Complete paragraphs (c)(4) and (c)(5) only if this solicitation is expected to exceed the simplified acquisition threshold.

(4) *Women-owned business concern.* The offeror represents that it ☐ is, ☐ is not, a women-owned business concern.

(5) *Tie bid priority for labor surplus area concerns.* If this is an invitation for bid, small business offerors may identify the labor surplus areas in which costs to be incurred on account of manufacturing or production (by offeror or first-tier subcontractors) amount to more than 50 percent of the contract price:

____

(6) *Small Business Size for the Small Business Competitiveness Demonstration Program and for the Targeted Industry Categories under the Small Business Competitiveness Demonstration Program. [Complete only if the offeror has certified itself to be a small business concern under the size standards for this solicitation.]*

(i) *(Complete only for solicitations indicated in an addendum as being set-aside for emerging small businesses in one of the four designated industry groups (DIGs).) The offeror represents as part of its offer that it ☐ is, ☐ is not an emerging small business.*

(ii) (*Complete only for solicitations indicated in an addendum as being for one of the targeted industry categories (TICs) or four designated industry groups (DIGs).)* Offeror represents and certifies as follows:

(A) Offeror's number of employees for the past 12 months (check the Employees column if size standard stated in the solicitation is expressed in terms of number of employees); or

(B) Offeror's average annual gross revenue for the last 3 fiscal years (check the Average Annual Gross Number of Revenues column if size standard stated in the solicitation is expressed in terms of annual receipts)

(Check one of the following):

Number of Employees	*Average Annual Gross Revenues*
____ 50 or fewer	____ $1 million or less
____ 51–100	____ $1,000,001–$2 million
____ 101–250	____ $2,000,001–$3.5 million
____ 251–500	____ $3,500,001–$5 million
____ 501–750	____ $5,000,001–$10 million
____ 751–1,000	____ $10,000,001–$17 million
____ Over 1,000	____ Over $17 million

(d) Certifications and representations required to implement provisions of Executive Order 11246—

(1) *Certification of non-segregated facilities.* (Applies only if the contract amount is expected to exceed $10,000)—

By submission of this offer, the offeror certifies that it does not and will not maintain or provide for its employees, any facilities that are segregated on the basis of race, color, religion, or national origin because of habit, local custom, or otherwise and that it does not and will not permit its employees to perform their services at any location where segregated facilities are maintained. The offeror agrees that a breach of this certification is a violation of the Equal Opportunity clause in the contract.

(2) Previous Contracts and Compliance. The offeror represents that—

(i) It ☐ has, ☐ has not, participated in a previous contract or subcontract subject either to the Equal Opportunity clause of this solicitation, the clause originally contained in Section 310 of Executive Order 10925, or the clause contained in Section 201 of Executive Order 11114; and

(ii) It ☐ has, ☐ has not, filed all required compliance reports.

(3) Affirmative Action Compliance. The offeror represents that—

(i) It ☐ has developed and has on file, ☐ has not developed and does not have on file, at each establishment, affirmative action programs required by rules and regulations of the Secretary of Labor (41 CFR Subparts 60–1 and 60–2), or

(ii) It ☐ has not previously had contracts subject to the written affirmative action programs requirement of the rules and regulations of the Secretary of Labor.

(e) *Certification Regarding Payments to Influence Federal Transactions (31 U.S.C. 1352).* (Applies only if the contract is expected to exceed $100,000.) By submission of its offer, the offeror certifies to the best of its knowledge and belief that no Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress or an employee of a Member of Congress on his or her behalf in connection with the award of any resultant contract.

(f) *Buy American Act—Trade Agreements—Balance of Payments Program Certificate.* (Applies only if FAR clause 52.225–9, Buy American Act—Trade Agreement—Balance of Payments Program, is included in this solicitation.)

(1) The offeror hereby certifies that each end product, except those listed in paragraph (f)(2) of this provision, is a domestic end product (as defined in the clause entitled "Buy American Act—Trade Agreements Balance of Payments Program") and that components of unknown origin have been considered to have been mined, produced, or manufactured outside the United States, a designated country, a North American Free Trade Agreement (NAFTA) country, or a Caribbean Basin country, as defined in section 25.401 of the Federal Acquisition Regulation.

(2) Excluded End Products:

Line item No.	Country of origin
____	____
____	____

(List as necessary)

(3) Offers will be evaluated by giving certain preferences to domestic end products, designated country end products, NAFTA country end products, and Caribbean Basin country end products over other end products. In order to obtain these preferences in the evaluation of each excluded end product listed in paragraph (f)(2) of this provision, offerors must identify and certify below those excluded end products that are designated or NAFTA country end products, or Caribbean Basin country end products. Products that are not identified and certified below will not be deemed designated country end products, NAFTA country end products, or Caribbean Basin country end products. Offerors must certify by inserting the applicable line item numbers in the following:

(i) The offeror certifies that the following supplies qualify as "designated or NAFTA country end products" as those terms are defined in the clause entitled "Buy American Act—Trade Agreements—Balance of Payments Program:"

____

____

____

(Insert line item numbers)

(ii) The offeror certifies that the following supplies qualify as "Caribbean Basin country end products" as that term is defined in the clause entitled "Buy American Act—Trade Agreements—Balance of Payments Program":

____

____

____

(Insert line item numbers)

(4) Offers will be evaluated in accordance with FAR Part 25.

(g) *Buy American Act—North American Free Trade Agreement (NAFTA) Implementation Act—Balance of Payments Program Certificate.* (Applies only if FAR clause 52.22521, Buy American Act—North American Free Trade Agreement (NAFTA) Implementation Act—Balance of Payments Program, is included in this solicitation.)

(1) The offeror hereby certifies that each end product, except those listed in paragraph (g)(2) of this provision, is a domestic end product (as defined in the clause entitled "Buy American Act—North American Free Trade Agreement (NAFTA) Implementation Act-Balance of Payments Program" and that components of unknown origin have been considered to have been mined, produced, or manufactured outside the United States.

(2) Excluded End Products:

Line item No.	Country of origin
____	____
____	____

(List as necessary)

(3) Offers will be evaluated by giving certain preferences to domestic end products or NAFTA country end products over other end products. In order to obtain these preferences in the evaluation of each excluded end product listed in paragraph (g)(2) of this provision, offerors must identify and certify below those excluded end products that are NAFTA country end products. Products that are not identified and certified below will not be deemed NAFTA coun' :y end products. Offerors must certify by inserting the applicable line item numbers in the following:

The offeror certifies that the following supplies qualify as "NAFTA country end products" as that term is defined in the clause entitled "Buy American Act—North American Free Trade Agreement Implementation Act—Balance of Payments Program:"

____

____

____

(Insert line item numbers)

(4) Offers will be evaluated in accordance with FAR Part 25.

(h) *Certification Regarding Debarment, Suspension or Ineligibility for Award (Executive Order 12549).* The offeror certifies, to the best of its knowledge and belief, that—

(1) The offeror and/or any of its principals ☐ are, ☐ are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency, and

(2) ☐ Have, ☐ have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving

stolen property; and ☐ are, ☐ are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses.

(i) *Procurement Integrity Certification (41 U.S.C. 423).* (Applies only if the contract is expected to exceed $100,000.)

I, the undersigned, am the officer or employee responsible for the preparation of this offer. I certify, to the best of my knowledge and belief, that either—

☐ I have no information, or

☐ I have disclosed information to the Contracting Officer concerning a violation or possible violation of subsection (a), (b), (d) or (f) of 41 U.S.C. 423, Procurement Integrity, or its implementing regulations that may have occurred during the conduct of this procurement.

Signature of the officer or employee responsible for the offer and date.

(End of Provision)

52.212-4 Contract Terms and Conditions—Commercial Items.

As prescribed in 12.301(b)(3), insert the following clause:

Contract Terms and Conditions—Commercial Items (Oct 1995)

(a) *Inspection/Acceptance.* The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The Government reserves the right to inspect or test any supplies or services that have been tendered for acceptance. The Government may require repair or replacement of nonconforming supplies or reperformance of nonconforming services at no increase in contract price. The Government must exercise its postacceptance rights (1) within a reasonable time after the defect was discovered or should have been discovered; and (2) before any substantial change occurs in the condition of the item, unless the change is due to the defect in the item.

(b) *Assignment.* The Contractor or its assignee's rights to be paid amounts due as a result of performance of this contract, may be assigned to a bank, trust company, or other financing institution, including any Federal lending agency in accordance with the Assignment of Claims Act (31 U.S.C. 3727).

(c) *Changes.* Changes in the terms and conditions of this contract may be made only by written agreement of the parties.

(d) *Disputes.* This contract is subject to the Contract Disputes Act of 1978, as amended (41 U.S.C. 601–613). Failure of the parties to this contract to reach agreement on any request for equitable adjustment, claim, appeal or action arising under or relating to this contract shall be a dispute to be resolved in accordance with the clause at FAR 52.233–1, Disputes, which is incorporated herein by reference. The Contractor shall proceed diligently with performance of this contract, pending final resolution of any dispute arising under the contract.

(e) *Definitions.* The clause at FAR 52.202–1, Definitions, is incorporated herein by reference.

(f) *Excusable delays.* The Contractor shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of the Contractor and without its fault or negligence such as, acts of God or the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. The Contractor shall notify the Contracting Officer in writing as soon as it is reasonably possible after the commencement of any excusable delay, setting forth the full particulars in connection therewith, shall remedy such occurrence with all reasonable dispatch, and shall promptly give written notice to the Contracting Officer of the cessation of such occurrence.

(g) *Invoice.* The Contractor shall submit an original invoice and three copies (or electronic invoice, if authorized,) to the address designated in the contract to receive invoices. An invoice must include—

(1) Name and address of the Contractor;

(2) Invoice date;

(3) Contract number, contract line item number and, if applicable, the order number;

(4) Description, quantity, unit of measure, unit price and extended price of the items delivered;

(5) Shipping number and date of shipment including the bill of lading number and weight of shipment if shipped on Government bill of lading;

(6) Terms of any prompt payment discount offered;

(7) Name and address of official to whom payment is to be sent; and

(8) Name, title, and phone number of person to be notified in event of defective invoice.

Invoices will be handled in accordance with the Prompt Payment Act (31 U.S.C. 3903) and Office of Management and Budget (OMB) Circular A–125, Prompt Payment.

(h) *Patent indemnity.* The Contractor shall indemnify the Government and its officers, employees and agents against liability, including costs, for actual or alleged direct or contributory infringement of, or inducement to infringe, any United States or foreign patent, trademark or copyright, arising out of the performance of this contract, provided the Contractor is reasonably notified of such claims and proceedings.

(i) *Payment.* Payment shall be made for items accepted by the Government that have been delivered to the delivery destinations set forth in this contract. The Government will make payment in accordance with the Prompt Payment Act (31 U.S.C. 3903) and Office of Management and Budget (OMB) Circular A–125, Prompt Payment. Payments under this contract may be made by the Government either by check, electronic funds transfer, or the Automated Clearing House, at the option of the Government.

In connection with any discount offered for early payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the date on which an electronic funds transfer was made.

(j) *Risk of loss.* Unless the contract specifically provides otherwise, risk of loss or damage to the supplies provided under this contract shall remain with the Contractor until, and shall pass to the Government upon:

(1) Delivery of the supplies to a carrier, if transportation is f.o.b. origin; or

(2) Delivery of the supplies to the Government at the destination specified in the contract, if transportation is f.o.b. destination.

(k) *Taxes.* The contract price includes all applicable Federal, State, and local taxes and duties.

(l) *Termination for the Government's convenience.* The Government reserves the right to terminate this contract, or any part hereof, for its sole convenience. In the event of such termination, the Contractor shall immediately stop all work hereunder and shall immediately cause any and all of its suppliers and subcontractors to cease work. Subject to the terms of this contract, the Contractor shall be paid a percentage of the contract price reflecting the percentage of the work performed prior to the notice of termination, plus reasonable charges the Contractor can demonstrate to the satisfaction of the Government using its standard record keeping system, have resulted from the termination. The Contractor shall not be required to comply with the cost accounting standards or contract cost principles for this purpose. This paragraph does not give the Government any right to audit the Contractor's records. The Contractor shall not be paid for any work performed or costs incurred which reasonably could have been avoided.

(m) *Termination for cause.* The Government may terminate this contract, or any part hereof, for cause in the event of any default by the Contractor, or if the Contractor fails to comply with any contract terms and conditions, or fails to provide the Government, upon request, with adequate assurances of future performance. In the event of termination for cause, the Government shall not be liable to the Contractor for any amount for supplies or services not accepted, and the Contractor shall be liable to the Government for any and all rights and remedies provided by law. If it is determined that the Government improperly terminated this contract for default, such termination shall be deemed a termination for convenience.

(n) *Title.* Unless specified elsewhere in this contract, title to items furnished under this contract shall pass to the Government upon acceptance, regardless of when or where the Government takes physical possession.

(o) *Warranty.* The Contractor warrants and implies that the items delivered hereunder are merchantable and fit for use for the particular purpose described in this contract.

(p) *Limitation of liability.* Except as otherwise provided by an express or implied warranty, the Contractor will not be liable to the Government for consequential damages resulting from any defect or deficiencies in accepted items.

(q) *Other compliances.* The Contractor shall comply with all applicable Federal, State and local laws, executive orders, rules

and regulations applicable to its performance under this contract.

(r) *Compliance with laws unique to Government contracts.* The Contractor agrees to comply with 31 U.S.C. 1352 relating to limitations on the use of appropriated funds to influence certain Federal contracts; 18 U.S.C. 431 relating to officials not to benefit; 40 U.S.C 327, *et seq.*, Contract Work Hours and Safety Standards Act; 41 U.S.C. 51–58, Anti-Kickback Act of 1986; 41 U.S.C. 251 related to whistle blower protections; and 49 U.S.C 40118, Fly American.

(s) *Order of precedence.* Any inconsistencies in this solicitation or contract shall be resolved by giving precedence in the following order: (1) the schedule of supplies/services; (2) the Assignments, Disputes, Payments, Invoice, Other Compliances, and Compliance with Laws Unique to Government Contracts paragraphs of this clause; (3) the clause at 52.212–5; (4) addenda to this solicitation or contract, including any license agreements for computer software; (5) solicitation provisions if this is a solicitation; (6) other paragraphs of this clause; (7) the Standard Form 1449; (8) other documents, exhibits, and attachments; and (9) the specification.

(End of clause)

52.212-5 Contract Terms and Conditions Required to Implement Statutes or Executive Orders—Commercial Items.

As prescribed in 12.301(b)(4), insert the following clause:

Contract Terms and Conditions Required to Implement Statutes or Executive Orders—Commercial Items (Oct 1995)

(a) The Contractor agrees to comply with the following FAR clauses, which are incorporated in this contract by reference, to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

(1) 52.222–3, Convict Labor (E.O. 11755); and

(2) 52.233–3, Protest After Award (31 U.S.C 3553 and 40 U.S.C. 759).

(b) The Contractor agrees to comply with the FAR and FIRMR clauses in this paragraph (b) which the contracting officer has indicated as being incorporated in this contract by reference to implement provisions of law or executive orders applicable to acquisitions of commercial items or components:

(Contracting Officer shall check as appropriate.)

________ (1) 52.203–6, Restrictions on Subcontractor Sales to the Government, with Alternate I (41 U.S.C. 253g and 10 U.S.C. 2402).

________ (2) 52.203–10, Price or Fee Adjustment for Illegal or Improper Activity (41 U.S.C. 423).

________ (3) 52.219–8, Utilization of Small Business Concerns and Small Disadvantaged Business Concerns (15 U.S.C. 637 (d) (2) and (3));

________ (4) 52.219–9, Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan (15 U.S.C. 637 (d)(4));

________ (5) 52.219–14, Limitation on Subcontracting (15 U.S.C. 637(a)(14)).

________ (6) 52.222–26, Equal Opportunity (E.O. 11246).

________ (7) 52.222–35, Affirmative Action for Special Disabled and Vietnam Era Veterans (38 U.S.C. 4212).

________ (8) 52.222–36, Affirmative Action for Handicapped Workers (29 U.S.C. 793).

________ (9) 52.222–37, Employment Reports on Special Disabled Veterans and Veterans of the Vietnam Era (38 U.S.C. 4212).

________ (10) 52.225–3, Buy American Act—Supplies (41 U.S.C. 10).

________ (11) 52.225–9, Buy American Act—Trade Agreements Act—Balance of Payments Program (41 U.S.C. 10, 19 U.S.C. 2501–2582).

________ (12) 52.225–17, Buy American Act—Supplies Under European Community Sanctions for End Products (E.O. 12849).

________ (13) 52.225–18, European Community Sanctions for End Products (E.O. 12849).

________ (14) 52.225–19, European Community Sanctions for Services (E.O. 12849).

________ (15) 52.225–21, Buy American Act—North American Free Trade Agreement Implementation Act—Balance of Payments Program (41 U.S.C 10, Pub. L. 103–187).

________ (16) 52.247–64, Preference for Privately Owned U.S.-Flag Commercial Vessels (46 U.S.C. 1241).

________ (17) 201–39.5202–3, Procurement Authority (FIRMR).

(This acquisition is being conducted under ____________ delegation of GSA's exclusive procurement authority for FIP resources. The specific GSA DPA case number is ____________).

(c) The Contractor agrees to comply with the FAR clauses in this paragraph (c), applicable to commercial services, which the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or executive orders applicable to acquisitions of commercial items or components:

(Contracting Officer check as appropriate.)

________ (1) 52.222–41, Service Contract Act of 1965, As amended (41 U.S.C. 351, *et seq.*).

________ (2) 52.222–42, Statement of Equivalent Rates for Federal Hires (29 U.S.C. 206 and 41 U.S.C. 351, *et seq.*).

________ (3) 52.222–43, Fair Labor Standards Act and Service Contract Act—Price Adjustment (Multiple Year and Option Contracts) (29 U.S.C. 206 and 41 U.S.C. 351, *et seq.*).

________ (4) 52.222–44, Fair Labor Standards Act and Service Contract Act—Price Adjustment (29 U.S.C. 206 and 41 U.S.C. 351, *et seq.*).

________ (5) 52.222–47, SCA Minimum Wages and Fringe Benefits Applicable to Successor Contract Pursuant to Predecessor Contractor Collective Bargaining Agreement (CBA) (41 U.S.C. 351, *et seq.*).

(d) *Comptroller General Examination of Record.* The Contractor agrees to comply with the provisions of this paragraph (d) if this contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215–2, Audit and Records—Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(e) Notwithstanding the requirements of the clauses in paragraphs (a), (b), (c) or (d) of this clause, the Contractor is not required to include any FAR clause, other than those listed below (and as may be required by an addenda to this paragraph to establish the reasonableness of prices under Part 15), in a subcontract for commercial items or commercial components—

(1) 52.222–26, Equal Opportunity (E.O. 11246);

(2) 52.222–35, Affirmative Action for Special Disabled and Vietnam Era Veterans (38 U.S.C. 2012(a)); and

(3) 52.222–36, Affirmative Action for Handicapped Workers (29 U.S.C. 793).

(4) 52.247–64, Preference for Privately Owned U.S.-Flagged Commercial Vessels (46 U.S.C. 1241) (flow down not required for subcontracts awarded beginning May 1, 1996).

(End of clause)

83. In the list of newly designated sections below, for each clause or provision indicated in the left column, remove the reference listed in the middle column and insert the reference listed in the right column:

Clause/provision	Remove	Insert
52.211–1	10.011(a)	11.203(a)
52.211–2	10.011(b)	11.203(b)
52.211–3	10.011(c)	11.203(c)
52.211–4	10.011(d)	11.203(d)
52.211–5	10.011(e)	11.203(e)
52.211–6	10.011(f)	11.203(f)
52.211–7	10.011(g)	11.203(g)
52.211–8	12.104(a)(2)	11.404(a)(2)
52.211–9	12.104(a)(3)	11.404(a)(3)
52.211–10	12.104(b)	11.404(b)
52.211–11	12.204(a)	11.504(a)
52.211–11	12.202	11.502(b)
52.211–12	12.202	11.502(b)
52.211–12	12.204(b)	11.504(b)
52.211–13	12.204(c)	11.504(c)
52.211–14	12.304(a)	11.604(a)
52.211–15	12.304(b)	11.604(b)
52.211–16	12.403(a)	11.703(a)
52.211–17	12.403(b)	11.703(b)
52.211–18	12.403(c)	11.703(c)
52.242–14	12.505(a)	42.1305(a)
52.242–15	12.505(b)	42.1305(b)
52.242–16	12.505(c)	42.1305(c)
52.242–17	12.505(d)	42.1305(d)

84. Section 52.244–6 is added to read as follows:

52.244–6 Subcontracts for Commercial Items and Commercial Components.

As prescribed in 44.403, insert the following clause:

Subcontracts for Commercial Items and Commercial Components (Oct 1995)

(a) *Definition.*

Commercial item, as used in this clause, has the meaning contained in the clause at 52.202–1, Definitions.

Subcontract, as used in this clause, includes a transfer of commercial items between divisions, subsidiaries, or affiliates of the Contractor or subcontractor at any tier.

(b) To the maximum extent practicable, the Contractor shall incorporate, and require its subcontractors at all tiers to incorporate, commercial items or nondevelopmental items as components of items to be supplied under this contract.

(c) Notwithstanding any other clause of this contract, the Contractor is not required to include any FAR provision or clause, other than those listed below to the extent they are applicable and as may be required to establish the reasonableness of prices under Part 15, in a subcontract at any tier for commercial items or commercial components:

(1) 52.222–26, Equal Opportunity (E.O. 11246);

(2) 52.222–35, Affirmative Action for Special Disabled and Vietnam Era Veterans (38 U.S.C. 4212(a));

(3) 52.222–36, Affirmative Action for Handicapped Workers (29 U.S.C. 793); and

(4) 52.247–64, Preference for Privately Owned U.S.-Flagged Commercial Vessels (46 U.S.C. 1241) (flow down not required for subcontracts awarded beginning May 1, 1996).

(d) The Contractor shall include the terms of this clause, including this paragraph (d), in subcontracts awarded under this contract.

(End of clause)

52.246–11 [Amended]

85. & 86. Section 52.246–11 is amended in the introductory text by removing "46.202–3" and inserting "46.202–4" in its place.

52.246–17 and 52.246–18 [Amended]

87. Sections 52.246–17 and 52.246–18 are amended by removing and reserving Alternate I.

PART 53—FORMS

88. Section 53.212 is added to read as follows:

53.212 Acquisition of commercial items.

SF 1449 (OCT 1995), Solicitation/Contract/Order for Commercial Items. SF 1449 is prescribed for use in solicitations and contracts for commercial items. Agencies may prescribe additional detailed instructions for use of the form.

89. Section 53.301–1449 is added to read as follows:

53.301–1449 (OCT 1995), Solicitation/Contract/Order for Commercial Items

Federal Acquisition Regulation; Whistleblower Protections for Contractor Employees (Ethics)

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Technical amendment to final rule.

SUMMARY: At 60 FR 37774, July 21, 1995, a final rule was issued pursuant to the Federal Acquisition Streamlining Act of 1994, Public Law 103–355 (the Act). The Federal Acquisition Regulatory Council is now issuing an *Applicability Date*, in addition to the *Effective Date*, of the regulation.

DATES: Effective Date: September 19, 1995.

Applicability Date: This regulation will apply to contracts in existence as of September 19, 1995, for reprisals to Government contractor employees occurring on or after that date. The remedy provided by this regulation does not apply to contracts otherwise covered by provisions of 10 U.S.C. 2409a.

FOR FURTHER INFORMATION CONTACT: Mr. Julius Rothlein, Ethics Team Leader, at (703) 697–4349 in reference to this FAR case.

SUPPLEMENTARY INFORMATION:

Background:

FAC 90–30, FAR case 94–803, implemented Sections 6005 and 6006 of the Act, Whistleblower Protections for Contractor Employees. These protections are now virtually identical for contractors employed by both DOD and civilian agencies.

The rule as originally published did not specifically discuss the extent of retroactivity. The rule did not require a contract clause. To clarify this, the FAR Council is establishing the extent of the rule's retroactivity.

Some existing Department of Defense contracts contain a contractor employee whistleblower clause, based on prior statute (10 U.S.C. 2409a). That law was narrower in scope and only applied to certain DoD contracts.

Dated: September 7, 1995.

Edward C. Loeb,

Deputy Project Manager for the Implementation of the Federal Acquisition Streamlining Act of 1994.

RIN 9000–AG37

Federal Acquisition Regulation; Small Business

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Federal Acquisition Regulatory Council has agreed on a final rule to amend the Federal Acquisition Regulation (FAR) to implement sections 7101(a) and 7106 and to augment regulation implementation of Section 10004 of the Federal Acquisition Streamlining Act of 1994 (Pub. L. 103–355), dated October 13, 1994. Section 7101(a) of FASA deletes sections 15(e) and (f) from the Small Business Act. Those sections established the priority for award of set-asides and provided the statutory basis for a procurement preference for concerns located in Labor Surplus Areas (LSA). Based on this deletion, this rule removes the LSA set-aside program and LSA subcontracting program from the FAR.

Section 7106 of FASA revises sections 8 and 15 of the Small Business Act to accommodate a Governmentwide goal of 5 percent for women-owned small businesses. This rule deletes existing, separate coverage relating to women-owned businesses and revises existing coverage to place women-owned small businesses on an equal footing with small disadvantaged businesses. In connection with this revision, the Standard Forms 294 and 295 are revised and streamlined.

Section 10004 of FASA, which requires the collection of specified data through the Federal Procurement Data System, is being implemented by FAR case 94–701. This rule augments that coverage by providing a solicitation provision to collect the information on women-owned businesses as required by that FAR case.

This regulatory action was subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

EFFECTIVE DATE: October 1, 1995.

FOR FURTHER INFORMATION CONTACT: Ms. Victoria Moss, Small Business Team Leader, at (202) 501–4764 in reference to this FAR case. For general information, contact the FAR Secretariat, Room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–32, FAR case 94–780.

SUPPLEMENTARY INFORMATION:

A. Background

The Federal Acquisition Streamlining Act of 1994 (the Act), Pub. L. 103–355, provides authorities that streamline the acquisition process and minimize burdensome Government-unique requirements. The following sections of the Federal Acquisition Streamlining Act are implemented by this final rule;

Section 7101, Repeal of Certain Requirements, paragraph (a), deletes sections 15(e) and (f) from the Small Business Act. These sections established the priority for the award of contracts and subcontracts in carrying out the set-aside programs.

Section 7106, Procurement Goals for Small Business Concerns Owned by Women, establishes a Governmentwide goal for participation by women-owned small business concerns in prime and subcontracts and revises sections 8 and 15 of the Small Business Act to accommodate the goal.

Section 10004, Data Collection through the Federal Procurement Data System, has been implemented in FAR case 94–701. This rule augments that implementation.

These sections are implemented in this final rule by way of the following substantial changes:

Elimination of the Labor Surplus Area (LSA) set-aside program;

Development of coverage giving women-owned small businesses equal standing with small and small disadvantaged business in subcontracting plans;

Issuance of an abbreviated provision to allow firms to represent their status as small, small disadvantaged and/or women-owned small business in one place;

Simplification and streamlining of the Standard Form (SF) 294, Subcontract for Individual Contracts, and SF 295, Summary Subcontract Report;

Inclusion of a solicitation provision collecting information on women-owned businesses.

B. Regulatory Flexibility Act

The changes may have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule requires large business contractors to submit and negotiate a subcontracting plan addressing subcontracting with women-owned small businesses. The rule further provides for imposition of liquidated damages on those firms which do not make a good faith effort to comply with that subcontracting plan. A Final Regulatory Flexibility Analysis (FRFA) has been prepared and will be provided to the Chief Counsel for Advocacy for the Small Business Administration. A copy of the FRFA may be obtained from the FAR Secretariat.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) applies because the final rule contains information collection requirements. Requests for approval of the revised information collection requirements concerning OMB Control Numbers 9000–0006, Subcontracting Plans/Subcontracting Report for Individual Contracts, and 9000–0007, Summary Subcontract Report, were submitted to the Office of Management and Budget under 44 U.S.C. 3501, *et seq.* The information collections were approved through March 31, 1998. Public comments concerning this request were invited through a **Federal Register** notice published on January 6, 1995. Based on the comments received concerning these information collection requirements, substantial changes were made to SFs 294 and 295. The most significant changes include removal of blocks which collect information not essential to program management, changing the reporting frequency for the SF 295 from quarterly to semi-annually (DOD only), removing signature blocks from the SF 294 (to facilitate electronic submittal) and clarifying the instructions on the reverse.

D. Public Comments

On January 6, 1995, a proposed rule was published in the **Federal Register** (60 FR 2302). In response to the notice of proposed rulemaking, 114 public comments were received. In order to more effectively implement those sections of the Act addressed in the proposed rule, the proposed rule has been divided into distinguishable segments. Section 4004, Small Business Reservation, has been added to FAR Case 94–770. Section 7102, Contracting Program for Certain Small Business Concerns, remains under consideration in light of the Supreme Court's recent decision in *Adarand Constructors, Inc.* v. *Pena*, 115 S. Ct. 2097 (1995), which set forth a new standard for evaluating the constitutionality of race-based affirmative action programs, and the President's directive of July 19, 1995, that executive agencies review such programs under that standard. Section 7102 has been assigned FAR case 94–781. The comments of all respondents were considered in developing this final rule. As a result, the following changes have been made:

Requirements for acquisition plans were revised to include consideration of women-owned small business concerns.

Use of the provision entitled "Priority for Labor Surplus Area Concerns" was limited to sealed bids.

The Standard Forms 294 and 295 were simplified and streamlined.

List of Subjects in 48 CFR Parts 4, 5, 6, 9, 14, 15, 16, 17, 19, 20, 25, 26, 42, 44, 52 and 53

Government procurement.

Dated: September 7, 1995.

Edward C. Loeb,

Deputy Project Manager for the Implementation of the Federal Acquisition Streamlining Act of 1994.

Therefore, 48 CFR Parts 4, 5, 6, 9, 14, 15, 16, 17, 19, 20, 25, 26, 42, 44, 52 and 53 are amended as set forth below:

1. The authority citation for 48 CFR Parts 4, 5, 6, 9, 14, 15, 16, 17, 19, 20, 25, 26, 42, 44, 52 and 53 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 4—ADMINISTRATIVE MATTERS

2. Section 4.602 is amended by revising paragraph (a)(2) to read as follows:

4.602 Federal Procurement Data System.

(a) * * *

(2) A means of measuring and assessing the impact of Federal contracting on the Nation's economy and the extent to which small, small disadvantaged and women-owned small business concerns are sharing in Federal contracts; and

* * * * *

3. Section 4.603 is added to read as follows:

4.603 Solicitation provision.

The contracting officer shall insert the provision at 52.204–5, Women-Owned Business, in all solicitations that are not set aside for small business concerns and that exceed the simplified acquisition threshold in Part 13, when the contract is to be performed inside the United States, its territories or possessions, Puerto Rico, the Trust Territory of the Pacific Islands, or the District of Columbia.

PART 5—PUBLICIZING CONTRACT ACTIONS

5.002 [Amended]

4. Section 5.002 is amended in paragraph (c) by removing "labor surplus area" and inserting "women-owned small business" in its place.

5.207 [Amended]

5. Section 5.207 is amended in paragraph (c)(2)(xiii) by removing "and labor surplus area concerns", and in paragraph (d) by removing "or labor surplus area (LSA)".

5.404–1 [Amended]

6. Section 5.404–1 is amended in paragraph (b)(6)(ii) by removing "or LSA".

7. Section 5.503 is amended by revising the second sentence of paragraph (a) to read as follows:

5.503 Procedures.

(a) * * * Contracting officers shall give small, small disadvantaged and women-owned small business concerns maximum opportunity to participate in these acquisitions.

* * * * *

PART 6—COMPETITION REQUIREMENTS

8. Section 6.203 is revised to read as follows:

6.203 Set-asides for small business concerns.

(a) To fulfill the statutory requirements relating to small business concerns, contracting officers may set aside solicitations to allow only such business concerns to compete. This includes contract actions conducted under the Small Business Innovation Research Program established under Pub. L. 97–219.

(b) No separate justification or determination and findings is required under this part to set aside a contract action for small business concerns.

(c) Subpart 19.5 prescribes policies and procedures that shall be followed with respect to set-asides.

6.501 [Amended]

9. Section 6.501 is amended in paragraph (c) by removing "and disadvantaged".

PART 9—CONTRACTOR QUALIFICATIONS

10. Section 9.104–3 is amended by revising the last sentence of paragraph (c) to read as follows:

9.104–3 Application of standards.

* * * * *

(c) * * * If the pending contract requires a subcontracting plan pursuant to Subpart 19.7, Subcontracting with Small, Small Disadvantaged Business and Women-Owned Small Business Concerns, the contracting officer shall also consider the prospective contractor's compliance with subcontracting plans under recent contracts.

* * * * *

PART 14—SEALED BIDDING

14.205–1 [Amended]

11. Section 14.205–1(e) is amended in the last sentence after the word "Disadvantaged" by inserting "and women-owned".

14.205–4 [Amended]

12. Section 14.205–4 is amended in the fourth sentence of paragraph (b) by inserting after the word "small" the phrase ", small disadvantaged and women-owned small"; and removing "and labor surplus areas (see 20.104(e) and (f))"; and in the last sentence of paragraph (b) by removing "parts 19 and 20" and inserting in its place "part 19".

13. Section 14.206 is revised to read as follows:

14.206 Small business set-asides.

(See Part 19.)

14.408–6 [Amended]

14. Section 14.408–6 is amended by removing paragraph (a)(3) and redesignating paragraph (a)(4) as paragraph (a)(3).

14.502 [Amended]

15. Section 14.502(b)(3) is amended by removing the text following the word "business" and inserting in its place "set-aside (see 19.502–2)."

PART 15—CONTRACTING BY NEGOTIATION

15.705 [Amended]

16. Section 15.705 is amended in paragraph (b) by removing "business and labor surplus area" and inserting in its place ", small disadvantaged and women-owned small business".

15.706 [Amended]

17. Section 15.706 is amended at the end of the first sentence of paragraph (b) by removing "and disadvantaged business utilization" and inserting in its place "business"; and in paragraph (d)(4) by removing "labor surplus area" and inserting in its place "women-owned small business".

15.905–1 [Amended]

18. Section 15.905–1 is amended in the first sentence of paragraph (c) by inserting after the word "individuals," the phrase "women-owned small businesses,"; and removing the phrase "labor surplus areas,".

PART 16—TYPES OF CONTRACTS

16.103 [Amended]

19. Section 16.103 is amended in paragraph (d)(3) by removing the words "or labor surplus area concerns".

16.505 [Amended]

20. Section 16.505 is amended in paragraphs (d)(4) and (d)(5)(ii) by removing the phrase "or labor surplus area".

PART 17—SPECIAL CONTRACTING METHODS

17.104–1 [Amended]

21. Section 17.104–1 is amended—

a. In paragraph (a) by removing the phrase "or labor surplus area",

b. In paragraph (b) by removing the phrase "or labor surplus area"; and

c. In paragraph (b)(2) by removing "(Partial labor surplus area set-asides are only authorized for DOD activities at this time.)".

PART 19—SMALL BUSINESS PROGRAMS

22. The heading of Part 19 is revised to read as set forth above.

* * * * *

23. Section 19.001 is amended by adding, in alphabetical order, the definitions *Labor surplus area, Labor surplus area concern, and Women-owned small business concern* to read as follows:

19.001 Definitions.

* * * * *

Labor surplus area means a geographical area identified by the Department of Labor in accordance with 20 CFR Part 654, Subpart A, as an area of concentrated unemployment or underemployment or an area of labor surplus.

Labor surplus area concern means a concern that together with its first-tier subcontractors will perform substantially in labor surplus areas. Performance is substantially in labor surplus areas if the costs incurred under the contract on account of manufacturing, production, or performance of appropriate services in labor surplus areas exceed 50 percent of the contract price.

* * * * *

Women-owned small business concern means a small business concern—

(a) Which is at least 51 percent owned by one or more women; or, in the case of any publicly owned business, at least 51 percent of the stock of which is owned by one or more women; and

(b) Whose management and daily business operations are controlled by one or more women.

24. Section 19.201 is amended by revising paragraphs (a), (b), (c)(9), and (d) to read as follows:

19.201 General policy.

(a) It is the policy of the Government to provide maximum practicable opportunities in its acquisitions to small business concerns, small disadvantaged business concerns, and women-owned small business concerns. Such concerns shall also have the maximum practicable opportunity to participate as subcontractors in the contracts awarded by any executive agency, consistent with efficient contract performance. The Small Business Administration (SBA) counsels and assists small business concerns and assists contracting personnel to ensure that a fair proportion of contracts for supplies and services is placed with small business.

(b) Heads of contracting activities are responsible for effectively implementing the small business programs within their activities, including achieving program goals. They are to ensure that contracting and technical personnel maintain knowledge of small, small disadvantaged and women-owned small business program requirements and take all reasonable action to increase participation in their activities' contracting processes by these businesses.

(c) * * *

(9) Make recommendations in accordance with agency regulations as to whether a particular acquisition should be awarded under Subpart 19.5 as a set-aside, or under Subpart 19.8 as a Section 8(a) award.

(d) Small Business Specialists shall be appointed and act in accordance with agency regulations.

25. Section 19.202 is amended by revising the first sentence to read as follows:

19.202 Specific policies.

In order to further the policy in 19.201(a), contracting officers shall comply with the specific policies listed

in this section and shall consider recommendations of the agency Director of Small and Disadvantaged Business Utilization, or the Director's designee, as to whether a particular acquisition should be awarded under Subpart 19.5 or 19.8. * * *

26. Section 19.202–3 is revised to read as follows:

19.202–3 Equal low bids.

In the event of equal low bids (see 14.408–6), awards shall be made first to small business concerns which are also labor surplus area concerns, and second to small business concerns which are not also labor surplus area concerns.

27. Section 19.202–5 is amended by revising paragraphs (a) and (b) to read as follows:

19.202–5 Data collection and reporting requirements.

* * * * *

(a) Require each prospective contractor to represent whether it is a small business, small disadvantaged business or women-owned small business (see the provision at 52.219–1, Small Business Program Representations).

(b) Accurately measure the extent of participation by small, small disadvantaged, and women-owned small businesses in Government acquisitions in terms of the total value of contracts placed during each fiscal year, and report data to the SBA at the end of each fiscal year (see Subpart 4.6).

* * * * *

28. Section 19.301 is amended by revising the first sentence of paragraph (d) to read as follows:

19.301 Representation by the offeror.

(d) If the SBA determines that the status of a concern as a "small business," a "small disadvantaged business" or a "women-owned small business" has been misrepresented in order to obtain a set-aside contract, an 8(a) subcontract, a subcontract that is to be included as part or all of a goal contained in a subcontracting plan, or a prime or subcontract to be awarded as a result, or in furtherance of any other provision of Federal law that specifically references Section 8(d) of the Small Business Act for a definition of program eligibility, the SBA may take action as specified in Section 16(d) of the Act. * * *

* * * * *

29. Section 19.304 is revised to read as follows:

19.304 Solicitation provision and contract clause.

(a) The contracting officer shall insert the provision at 52.219–1, Small Business Program Representations, in solicitations exceeding the micro-purchase threshold when the contract is to be performed inside the United States, its territories or possessions, Puerto Rico, the Trust Territory of the Pacific Islands, or the District of Columbia.

(b) When contracting by sealed bidding, the contracting officer shall insert the provision at 52.219–2, Equal Low Bids, in solicitations and contracts when the contract is to be performed inside the United States, its territories or possessions, Puerto Rico, the Trust Territory of the Pacific Islands, or the District of Columbia.

19.401 [Amended]

30. Section 19.401 is amended in paragraph (a) by removing the phrase "and small disadvantaged business".

31. Section 19.402 is amended by revising paragraph (c)(1)(ii) to read as follows:

19.402 Small Business Administration procurement center representatives.

* * * * *

(c) * * *

(1) * * *

(ii) New qualified small, small disadvantaged and women-owned small business sources, and

* * * * *

32. Section 19.501 is amended in the third sentence of paragraph (a) by removing "or, except for the Department of Defense, restricted to small businesses located in labor surplus areas"; and by revising the first sentence of paragraph (h) to read as follows:

19.501 General.

* * * * *

(h) Section 305 of Public Law 103–403 authorizes public and private organizations for the handicapped to participate for fiscal year 1995 in acquisitions set-aside for small business concerns. * * *

* * * * *

19.504 [Reserved]

33. Section 19.504 is removed and reserved.

34. Section 19.505 is revised to read as follows:

19.505 Rejecting Small Business Administration recommendations.

(a) If the contracting officer rejects a recommendation of the SBA procurement center representative or breakout procurement center representative, written notice shall be furnished to the appropriate SBA center representative within 5 working days of the contracting officer's receipt of the recommendation.

(b) The SBA procurement center representative may appeal the contracting officer's rejection to the head of the contracting activity (or designee) within 2 working days after receiving the notice. The head of the contracting activity (or designee) shall render a decision in writing, and provide it to the SBA representative within 7 working days. Pending issuance of a decision to the SBA procurement center representative, the contracting officer shall suspend action on the acquisition.

(c) If the head of the contracting activity agrees that the contracting officer's rejection was appropriate, the SBA procurement center representative may—

(1) Within 1 working day, request the contracting officer to suspend action on the acquisition until the SBA Administrator appeals to the agency head (see paragraph (f) of this section); and

(2) The SBA shall be allowed 15 working days after making such a written request, within which the Administrator of SBA

(i) May appeal to the Secretary of the Department concerned, and

(ii) Shall notify the contracting officer whether the further appeal has, in fact, been taken.

If notification is not received by the contracting officer within the 15-day period, it shall be deemed that the SBA request to suspend contracting action has been withdrawn and that an appeal to the Secretary was not taken.

(d) When the contracting officer has been notified within the 15-day period that the SBA has appealed to the agency head, the head of the contracting activity (or designee) shall forward justification for its decision to the agency head. The contracting officer shall suspend contract action until notification is received that the SBA appeal has been settled.

(e) The agency head shall reply to the SBA within 30 working days after receiving the appeal. The decision of the agency head shall be final.

(f) A request to suspend action on an acquisition need not be honored if the contracting officer determines that proceeding to contract award and performance is in the public interest. The contracting officer shall include in the contract file a statement of the facts justifying the determination, and shall promptly notify the SBA representative of the determination and provide a copy of the justification.

35. Section 19.506 is revised to read as follows:

19.506 Withdrawing or modifying set-asides.

(a) If, before award of a contract involving a set-aside, the contracting officer considers that award would be detrimental to the public interest, (*e.g.*, payment of more than a fair market price), the contracting officer may withdraw the set-aside determination whether it was unilateral or joint. The contracting officer shall initiate a withdrawal of an individual set-aside by giving written notice to the agency small business specialist and the SBA procurement center representative, if one is assigned, stating the reasons. In a similar manner, the contracting officer may modify a unilateral or joint class set-aside to withdraw one or more individual acquisitions.

(b) If the agency small business specialist does not agree to a withdrawal or modification, the case shall be promptly referred to the SBA representative (if one is assigned) for review. If an SBA representative is not assigned, disagreements between the agency small business specialist and the contracting officer shall be resolved using agency procedures. However, the procedures are not applicable to automatic dissolutions of set-asides (see 19.507) or dissolution of set-asides under $100,000.

(c) The contracting officer shall prepare a written statement supporting any withdrawal or modification of a set-aside and include it in the contract file.

19.508 [Amended]

36. Section 19.508 is amended by removing and reserving paragraph (b).

Subpart 19.7—Subcontracting With Small Business, Small Disadvantaged Business and Women-Owned Small Business Concerns

37. The heading of Subpart 19.7 is revised to read as set forth above.

38. Section 19.702 is amended by revising the introductory text and paragraph (b)(4) to read as follows:

19.702 Statutory requirements.

Any contractor receiving a contract for more than the simplified acquisition threshold in Part 13 shall agree in the contract that small business concerns, small disadvantaged business concerns and women-owned small business concerns shall have the maximum practicable opportunity to participate in contract performance consistent with its efficient performance. It is further the policy of the United States that its prime contractors establish procedures to ensure the timely payment of amounts due pursuant to the terms of their subcontracts with small business concerns, small disadvantaged business concerns and women-owned small business concerns.

* * * * *

(b) * * *

(4) For modifications to contracts that do not contain the clause at 52.219–8, Utilization of Small, Small Disadvantaged and Women-Owned Small Business Concerns (or equivalent prior clauses).

* * * * *

39. Section 19.703 is amended by revising paragraph (a) introductory text, (a)(1), and (b) to read as follows:

19.703 Eligibility requirements for participating in the program.

(a) To be eligible as a subcontractor under the program, a concern must represent itself as a small business concern, small disadvantaged business concern or a woman-owned small business concern.

(1) To represent itself as a small business concern or a women-owned small business concern, a concern must meet the appropriate definition in 19.001.

* * * * *

(b) A contractor acting in good faith may rely on the written representation of its subcontractor regarding the subcontractor's status. The contractor, the contracting officer, or any other interested party can challenge a subcontractor's size status representation by filing a protest, in accordance with 13 CFR 121.1601 through 121.1608. Protests challenging a subcontractor's disadvantaged status representation shall be filed in accordance with 13 CFR 124.601 through 124.610. Protests challenging a subcontractor's status as a women-owned small business concern shall be filed in accordance with Small Business Administration procedures.

40. Section 19.704 is amended by revising paragraphs (a)(1), (a)(3), (a)(4), (a)(6), and (b) to read as follows:

19.704 Subcontracting plan requirements.

(a) * * *

(1) Separate percentage goals for using small business concerns, small disadvantaged business concerns and women-owned small business concerns as subcontractors;

* * * * *

(3) A description of the efforts the offeror will make to ensure that small business concerns, small disadvantaged business concerns and women-owned small business concerns will have an equitable opportunity to compete for subcontracts;

(4) Assurances that the offeror will include the clause at 52.219–8, Utilization of Small, Small Disadvantaged and Women-Owned Small Business Concerns (see 19.708(b)), in all subcontracts that offer further subcontracting opportunities, and that the offeror will require all subcontractors (except small business concerns) that receive subcontracts in excess of $500,000 ($1,000,000 for construction) to adopt a plan similar to the plan required by the clause at 52.219–9, Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan (see 19.708(c));

* * * * *

(6) A recitation of the types of records the offeror will maintain to demonstrate procedures adopted to comply with the requirements and goals in the plan, including establishing source lists; and a description of the offeror's efforts to locate small, small disadvantaged and women-owned small business concerns and to award subcontracts to them.

(b) Contractors may establish, on a plant or division-wide basis, a master subcontracting plan which contains all the elements required by the clause at 52.219–9, Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan, except goals. Master plans shall be effective for a 1-year period after approval by the contracting officer; however, a master plan when incorporated in an individual plan shall apply to that contract throughout the life of the contract.

* * * * *

19.705–1 [Amended]

41. Section 19.705–1 is amended in the first sentence by removing the phrase "for Small and Small Disadvantaged Business Concerns".

19.705–2 [Amended]

42. Section 19.705–2 is amended in the first sentence of paragraph (d) introductory text by removing the words "small business and small disadvantaged" and inserting in their place, "small, small disadvantaged and women-owned small".

43. Section 19.705–4 is amended by revising the last sentence of paragraph (b), the second and last sentences of paragraph (c); the first sentence of paragraphs (d)(1) and (d)(5); and paragraphs (d)(4) and (d)(6) to read as follows:

19.705–4 Reviewing the subcontracting plan.

* * * * *

(b) * * * If the plan, although responsive, evidences the bidder's intention not to comply with its obligations under the clause at 52.219–8, Utilization of Small, Small Disadvantaged and Women-Owned Small Business Concerns, the contracting officer may find the bidder nonresponsible.

(c) * * * Subcontracting goals should be set at a level that the parties reasonably expect can result from the offeror expending good faith efforts to use small, small disadvantaged and women-owned small business subcontractors to the maximum practicable extent. * * * An incentive subcontracting clause (see 52.219–10, Incentive Subcontracting Program), may be used when additional and unique contract effort, such as providing technical assistance, could significantly increase subcontract awards to small, small disadvantaged or women-owned small businesses.

(d) * * *

(1) Evaluate the offeror's past performance in awarding subcontracts for the same or similar products or services to small, small disadvantaged and women-owned small business concerns. * * *

* * * * *

(4) Evaluate subcontracting potential, considering the offeror's make-or-buy policies or programs, the nature of the products or services to be subcontracted, the known availability of small, small disadvantaged and women-owned small business concerns in the geographical area where the work will be performed, and the potential contractor's long-standing contractual relationship with its suppliers.

(5) Advise the offeror of available sources of information on potential small, small disadvantaged and women-owned small business subcontractors, as well as any specific concerns known to be potential subcontractors. * * *

(6) Obtain advice and recommendations from the SBA procurement center representative (if any) and the agency small business specialist.

19.705–7 [Amended]

44. Section 19.705–7 is amended—

a. In the first sentence of paragraph (a) by removing the word "and" the first time it appears and inserting a comma in its place; and adding the phrase "and women-owned small" after the word "disadvantaged";

b. In the third sentence of paragraph (d) by removing the words "business and" and replacing them with a comma; and adding the phrase "and women-owned small" after the word "disadvantaged";

c. In the fourth sentence of paragraph (d) by removing the phrase "business or" and inserting a comma in its place; and adding the phrase "or woman-owned small" after the word "disadvantaged";

d. In paragraph (f) by removing the words "Business and" and replacing them with a comma; and adding the phrase "and Women-Owned Small" after the word "Disadvantaged".

45. Section 19.706 is amended by revising paragraphs (a)(2) and (a)(3) to read as follows:

19.706 Responsibilities of the cognizant administrative contracting officer.

(a) * * *

(2) Information on the extent to which the contractor is meeting the plan's goals for subcontracting with eligible small, small disadvantaged and women-owned small business concerns;

(3) Information on whether the contractor's efforts to ensure the participation of small, small disadvantaged and women-owned small business concerns are in accordance with its subcontracting plan;

* * * * *

46. Section 19.708 is amended by revising paragraph (a) introductory text, (b) and (c) to read as follows:

19.708 Solicitation provisions and contract clauses.

(a) The contracting officer shall insert the clause at 52.219–8, Utilization of Small, Small Disadvantaged and Women-Owned Small Business Concerns, in solicitations and contracts when the contract amount is expected to be over the simplified acquisition threshold in Part 13 unless—

* * * * *

(b)(1) The contracting officer shall, when contracting by negotiation, insert the clause at 52.219–9, Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan, in solicitations and contracts that

(i) Offer subcontracting possibilities,

(ii) Are expected to exceed $500,000 ($1,000,000 for construction of any public facility), and

(iii) Are required to include the clause at 52.219–8, Utilization of Small, Small Disadvantaged and Women-Owned Small Business Concerns, unless the acquisition has been set aside or is to be accomplished under the 8(a) program. When contracting by sealed bidding rather than by negotiation, the contracting officer shall use the clause with its Alternate I.

(2) The contracting officer shall insert the clause at 52.219–16, Liquidated Damages—Subcontracting Plan, in all solicitations and contracts containing the clause at 52.219–9, Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan, or its Alternate I.

(c)(1) The contracting officer may, when contracting by negotiation, insert in solicitations and contracts a clause substantially the same as the clause at 52.219–10, Incentive Subcontracting Program, when a subcontracting plan is required (see 19.702(a)(1)), and inclusion of a monetary incentive is, in the judgment of the contracting officer, necessary to increase subcontracting opportunities for small, small disadvantaged and women-owned small business concerns, and is commensurate with the efficient and economical performance of the contract; unless the conditions in paragraph (c)(3) of this section are applicable. The contracting officer may vary the terms of the clause as specified in paragraph (c)(2) of this section.

(2) Various approaches may be used in the development of small, small disadvantaged and women-owned small business concerns' subcontracting incentives. They can take many forms, from a fully quantified schedule of payments based on actual subcontract achievement to an award fee approach employing subjective evaluation criteria (see paragraph (c)(3) of this section). The incentive should not reward the contractor for results other than those that are attributable to the contractor's efforts under the incentive subcontracting program.

(3) As specified in paragraph (c)(2) of this section, the contracting officer may include small, small disadvantaged and women-owned small business subcontracting as one of the factors to be considered in determining the award fee in a cost-plus-award-fee contract; in such cases, however, the contracting officer shall not use the clause at 52.219–10, Incentive Subcontracting Program.

19.811–3 [Amended]

47. Section 19.811–3(d)(3) is amended by removing the citation "19.502–2(b)" and inserting "19.502–2(c)" in its place.

Subpart 19.9 [Remove and Reserved]

48. Subpart 19.9, consisting of sections 19.901 and 19.902, is removed and reserved.

PART 20 [REMOVED AND RESERVED]

49. Part 20 is removed and reserved.

PART 25—FOREIGN ACQUISITION

25.105 [Amended]

50. Section 25.105 is amended in paragraph (a)(1) by removing the phrase "that is not a labor surplus area concern"; and in paragraph (a)(2) by

removing the phrase "or any labor surplus area concern".

25.404 [REMOVED AND RESERVED]

51. Section 25.404 is removed and reserved.

PART 26—OTHER SOCIOECONOMIC PROGRAMS

52. The Note to Part 26 is amended by removing "20,".

26.104 [Amended]

53. Section 26.104 is amended in paragraphs (a) and (b) by removing "Business and" and inserting a comma in its place; and inserting after the word "Disadvantaged" the phrase "and Women-Owned Small".

PART 42—CONTRACT ADMINISTRATION

54. Section 42.302 is amended by revising paragraphs (a)(52) through (a)(55) to read as follows:

42.302 Contract administration functions.

* * * * *

(a) * * *

(52) Review, evaluate, and approve plant or division-wide small, small disadvantaged and women-owned small business master subcontracting plans.

(53) Obtain the contractor's currently approved company- or division-wide plans for small, small disadvantaged and women-owned small business subcontracting for its commercial products, or, if there is no currently approved plan, assist the contracting officer in evaluating the plans for those products.

(54) Assist the contracting officer, upon request, in evaluating an offeror's proposed small, small disadvantaged and women-owned small business subcontracting plans, including documentation of compliance with similar plans under prior contracts.

(55) By periodic surveillance, ensure the contractor's compliance with small, small disadvantaged and women-owned small business subcontracting plans and any labor surplus area contractual requirements; maintain documentation of the contractor's performance under and compliance with these plans and requirements; and provide advice and assistance to the firms involved, as appropriate.

* * * * *

42.501 [Amended]

55. Section 42.501 is amended in paragraph (b) by removing the word "and" and inserting a comma in its place; and inserting after the word "disadvantaged" the phrase "and women-owned small".

56. Section 42.502 is amended by revising paragraphs (i) and (j) to read as follows:

42.502 Selecting contracts for postaward orientation.

* * * * *

(i) Contractor's status, if any, as a small business, small disadvantaged or women-owned small business concern;

(j) Contractor's performance history with small, small disadvantaged and women-owned small business subcontracting programs;

* * * * *

PART 44—SUBCONTRACTING POLICIES AND PROCEDURES

44.202–2 [Amended]

57. Section 44.202–2 is amended in paragraph (a)(4) by removing the phrase "labor surplus area or"; removing the phrase "business concerns and" and inserting a comma in its place; and inserting after the word "disadvantaged" the phrase "and women-owned small".

44.303 [Amended]

58. Section 44.303 is amended in paragraph (e) by removing the phrase "labor surplus area concerns and"; and inserting after the word "disadvantaged" the phrase "and women-owned small".

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

59. Section 52.204–5 is added to read as follows:

52.204–5 Women-Owned Business.

As prescribed in 4.603, insert the following provision:

Women-Owned Business (Oct 1995)

(a) *Representation.* The offeror represents that it ☐ is, ☐ is not a women-owned business concern.

(b) *Definition.* "Women-owned business concern," as used in this provision, means a concern which is at least 51 percent owned by one or more women; or in the case of any publicly owned business, at least 51 percent of the stock of which is owned by one or more women; and whose management and daily business operations are controlled by one or more women.

(End of provision)

52.216–21 [Amended]

60. Section 52.216–21 is amended by revising the clause date to read (OCT 1995), in Alternates III and IV by revising the dates to read "(OCT 1995)" and by removing the phrase "or labor surplus area" from the introductory texts.

61. Section 52.219–1 is revised to read as follows:

52.219–1 Small Business Program Representations.

As prescribed in 19.304(a), insert the following provision:

Small Business Program Representations (Oct 1995)

(a)(1) The standard industrial classification (SIC) code for this acquisition is ________ *(insert SIC code).*

(2) The small business size standard is ________ *(insert size standard).*

(3) The small business size standard for a concern which submits an offer in its own name, other than on a construction or service contract, but which proposes to furnish a product which it did not itself manufacture, is 500 employees.

(b) *Representations.* (1) The offeror represents and certifies as part of its offer that it ☐ is, ☐ is not a small business concern.

(2) (Complete only if offeror represented itself as a small business concern in block (b)(1) of this section.) The offeror represents as part of its offer that it ☐ is, ☐ is not a small disadvantaged business concern.

(3) (Complete only if offerer represented itself as a small business concern in block (b)(1) of this section.) The offeror represents as part of its offer that it ☐ is, ☐ is not a women-owned small business concern.

(c) *Definitions. Small business concern,* as used in this provision, means a concern, including its affiliates, that is independently owned and operated, not dominant in the field of operation in which it is bidding on Government contracts, and qualified as a small business under the criteria in 13 CFR Part 121 and the size standard in paragraph (a) of this provision.

Small disadvantaged business concern, as used in this provision, means a small business concern that (1) is at least 51 percent unconditionally owned by one or more individuals who are both socially and economically disadvantaged, or a publicly owned business having at least 51 percent of its stock unconditionally owned by one or more socially and economically disadvantaged individuals, and (2) has its management and daily business controlled by one or more such individuals. This term also means a small business concern that is at least 51 percent unconditionally owned by an economically disadvantaged Indian tribe or Native Hawaiian Organization, or a publicly owned business having at least 51 percent of its stock unconditionally owned by one or more of these entities, which has its management and daily business controlled by members of an economically disadvantaged Indian tribe or Native Hawaiian Organization, and which meets the requirements of 13 CFR Part 124.

Women-owned small business concern, as used in this provision, means a small business concern—

(1) Which is at least 51 percent owned by one or more women or, in the case of any publicly owned business, at least 51 percent of the stock of which is owned by one or more women; and

(2) Whose management and daily business operations are controlled by one or more women.

(d) *Notice.* (1) If this solicitation is for supplies and has been set aside, in whole or in part, for small business concerns, then the clause in this solicitation providing notice of the set-aside contains restrictions on the source of the end items to be furnished.

(2) Under 15 U.S.C. 645(d), any person who misrepresents a firm's status as a small or small disadvantaged business concern in order to obtain a contract to be awarded under the preference programs established pursuant to sections 8(a), 8(d), 9, or 15 of the Small Business Act or any other provision of Federal law that specifically references section 8(d) for a definition of program eligibility, shall—

(i) Be punished by imposition of fine, imprisonment, or both;

(ii) Be subject to administrative remedies, including suspension and debarment; and

(iii) Be ineligible for participation in programs conducted under the authority of the Act.

(End of provision)

52.219–2 [Removed]

52.220–1 [Redesignated as 52.219]

62. Section 52.219–2 is removed and 52.220–1 is redesignated in its place and is revised to read as follows:

52.219–2 Equal Low Bids.

As prescribed in 19.304(b), insert the following provision:

Equal Low Bids (Oct 1995)

(a) This provision applies to small business concerns only.

(b) The bidder's status as a labor surplus area (LSA) concern may affect entitlement to award in case of tie bids. If the bidder wishes to be considered for this priority, the bidder must identify, in the following space, the LSA in which the costs to be incurred on account of manufacturing or production (by the bidder or the first-tier subcontractors) amount to more than 50 percent of the contract price.

____

____

(c) Failure to identify the labor surplus areas as specified in paragraph (b) of this provision will preclude the bidder from receiving priority consideration. If the bidder is awarded a contract as a result of receiving priority consideration under this provision and would not have otherwise received award, the bidder shall perform the contract or cause the contract to be performed in accordance with the obligations of an LSA concern.

(End of provision)

52.219–3 and 52.219–5 [Removed and reserved]

63. Sections 52.219–3 and 52.219–5 are removed and reserved.

64. Section 52.219–6 is amended by revising Alternate I to read as follows:

52.219–6 Notice of Total Small Business Set-Aside.

* * * * *

Alternate I (OCT 1995). When the acquisition is for a product in a class for which the Small Business Administration has determined that there are no small business manufacturers or processors in the Federal market in accordance with 19.502–2(c), delete paragraph (c).

65. Section 52.219–7 is amended by revising the date of the clause; in paragraph (a) by removing the definitions *Labor surplus area, Labor surplus area concern,* and *Perform substantially in labor surplus areas*; and by revising paragraphs (b)(4) and (c) and Alternate I to read as follows:

52.219–7 Notice of Partial Small Business Set-Aside.

* * * * *

Notice of Partial Small Business Set-Aside (Oct 1995)

* * * * *

(b) * * *

(4) The contractor(s) for the set-aside portion will be selected from among the small business concerns that submitted responsive offers on the non-set-aside portion. Negotiations will be conducted with the concern that submitted the lowest responsive offer on the non-set-aside portion. If the negotiations are not successful or if only part of the set-aside portion is awarded to that concern, negotiations will be conducted with the concern that submitted the second-lowest responsive offer on the non-set-aside portion. This process will continue until a contract or contracts are awarded for the entire set-aside portion.

* * * * *

(c) *Agreement.* For the set-aside portion of the acquisition, a manufacturer or regular dealer submitting an offer in its own name agrees to furnish, in performing the contract, only end items manufactured or produced by small business concerns inside the United States, its territories and possessions, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, or the District of Columbia. However, this requirement does not apply in connection with construction or service contracts.

(End of clause)

Alternate I (OCT 1995). When the acquisition is for a product in a class for which the Small Business Administration has determined that there are no small business manufacturers or processors in the Federal market in accordance with 19.502–2(c), delete paragraph (c).

66. Section 52.219–8 is amended by revising the section heading; the clause heading and date; paragraph (a); redesignating paragraph (d) as (e) and revising it; and adding a new paragraph (d) to read as follows:

52.219–8 Utilization of Small, Small Disadvantaged and Women-Owned Small Business Concerns.

* * * * *

Utilization of Small, Small Disadvantaged and Women-Owned Small Business Concerns (Oct 1995)

(a) It is the policy of the United States that small business concerns, small business concerns owned and controlled by socially and economically disadvantaged individuals and small business concerns owned and controlled by women shall have the maximum practicable opportunity to participate in performing contracts let by any Federal agency, including contracts and subcontracts for subsystems, assemblies, components, and related services for major systems. It is further the policy of the United States that its prime contractors establish procedures to ensure the timely payment of amounts due pursuant to the terms of their subcontracts with small business concerns, small business concerns owned and controlled by socially and economically disadvantaged individuals and small business concerns owned and controlled by women.

* * * * *

(d) The term "small business concern owned and controlled by women" shall mean a small business concern (i) which is at least 51 percent owned by one or more women, or, in the case of any publicly owned business, at least 51 percent of the stock of which is owned by one or more women, and (ii) whose management and daily business operations are controlled by one or more women; and

(e) Contractors acting in good faith may rely on written representations by their subcontractors regarding their status as a small business concern, a small business concern owned and controlled by socially and economically disadvantaged individuals or a small business concern owned and controlled by women.

(End of clause)

67. Section 52.219–9 is amended by revising—

a. The section heading;

b. The clause heading and date;

c. The first two sentences of paragraph (c);

d. Paragraphs (d), (e), (i), and Alternate I to read as follows:

52.219–9 Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan.

* * * * *

Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan (Oct 1995)

* * * * *

(c) The offeror, upon request by the Contracting Officer, shall submit and negotiate a subcontracting plan, where applicable, which separately addresses subcontracting with small business concerns, with small disadvantaged business concerns and with women-owned small business concerns. If the offeror is submitting an individual contract plan, the plan must separately address subcontracting with small business concerns, small disadvantaged business concerns, and women-owned small business concerns with a separate part for the basic contract and separate parts for each option (if any). * * *

(d) The offeror's subcontracting plan shall include the following:

(1) Goals, expressed in terms of percentages of total planned subcontracting dollars, for the use of small business concerns, small disadvantaged business concerns and women-owned small business concerns as subcontractors. The offeror shall include all subcontracts that contribute to contract performance, and may include a proportionate share of products and services that are normally allocated as indirect costs.

(2) A statement of—

(i) Total dollars planned to be subcontracted;

(ii) Total dollars planned to be subcontracted to small business concerns;

(iii) Total dollars planned to be subcontracted to small disadvantaged business concerns; and

(iv) Total dollars planned to be subcontracted to women-owned small business concerns.

(3) A description of the principal types of supplies and services to be subcontracted, and an identification of the types planned for subcontracting to (i) small business concerns, (ii) small disadvantaged business concerns and (iii) women-owned small business concerns.

(4) A description of the method used to develop the subcontracting goals in paragraph (d)(1) of this clause.

(5) A description of the method used to identify potential sources for solicitation purposes (*e.g.*, existing company source lists, the Procurement Automated Source System (PASS) of the Small Business Administration, the National Minority Purchasing Council Vendor Information Service, the Research and Information Division of the Minority Business Development Agency in the Department of Commerce, or small, small disadvantaged and women-owned small business concerns trade associations). A firm may rely on the information contained in PASS as an accurate representation of a concern's size and ownership characteristics for purposes of maintaining a small business source list. A firm may rely on PASS as its small business source list. Use of the PASS as its source list does not relieve a firm of its responsibilities (*e.g.*, outreach, assistance, counseling, publicizing subcontracting opportunities) in this clause.

(6) A statement as to whether or not the offeror included indirect costs in establishing subcontracting goals, and a description of the method used to determine the proportionate share of indirect costs to be incurred with (i) small business concerns, (ii) small disadvantaged business concerns, and (iii) women-owned small business concerns.

(7) The name of the individual employed by the offeror who will administer the offeror's subcontracting program, and a description of the duties of the individual.

(8) A description of the efforts the offeror will make to assure that small, small disadvantaged and women-owned small business concerns have an equitable opportunity to compete for subcontracts.

(9) Assurances that the offeror will include the clause in this contract entitled "Utilization of Small, Small Disadvantaged and Women-Owned Small Business Concerns" in all subcontracts that offer further subcontracting opportunities, and that the offeror will require all subcontractors (except small business concerns) who receive subcontracts in excess of $500,000 ($1,000,000 for construction of any public facility) to adopt a plan similar to the plan agreed to by the offeror.

(10) Assurances that the offeror will (i) cooperate in any studies or surveys as may be required, (ii) submit periodic reports in order to allow the Government to determine the extent of compliance by the offeror with the subcontracting plan, (iii) submit Standard Form (SF) 294, Subcontracting Report for Individual Contracts, and/or SF 295, Summary Subcontract Report, in accordance with the instructions on the forms, and (iv) ensure that its subcontractors agree to submit Standard Forms 294 and 295.

(11) A recitation of the types of records the offeror will maintain to demonstrate procedures that have been adopted to comply with the requirements and goals in the plan, including establishing source lists; and a description of its efforts to locate small, small disadvantaged and women-owned small business concerns and award subcontracts to them. The records shall include at least the following (on a plant-wide or company-wide basis, unless otherwise indicated):

(i) Source lists (e.g., PASS), guides, and other data that identify small, small disadvantaged and women-owned small business concerns.

(ii) Organizations contacted in an attempt to locate sources that are small, small disadvantaged or women-owned small business concerns.

(iii) Records on each subcontract solicitation resulting in an award of more than $100,000, indicating (A) whether small business concerns were solicited and if not, why not, (B) whether small disadvantaged business concerns were solicited and if not, why not, (C) whether women-owned small business concerns were solicited and if not, why not, and (D) if applicable, the reason award was not made to a small business concern.

(iv) Records of any outreach efforts to contact (A) trade associations, (B) business development organizations, and (C) conferences and trade fairs to locate small, small disadvantaged and women-owned small business sources.

(v) Records of internal guidance and encouragement provided to buyers through (A) workshops, seminars, training, etc., and (B) monitoring performance to evaluate compliance with the program's requirements.

(vi) On a contract-by-contract basis, records to support award data submitted by the offeror to the Government, including the name, address, and business size of each subcontractor. Contractors having company or division-wide annual plans need not comply with this requirement.

(e) In order to effectively implement this plan to the extent consistent with efficient contract performance, the Contractor shall perform the following functions:

(1) Assist small, small disadvantaged and women-owned small business concerns by arranging solicitations, time for the preparation of bids, quantities, specifications, and delivery schedules so as to facilitate the participation by such concerns. Where the contractor's lists of potential small, small disadvantaged and women-owned small business subcontractors are excessively long, reasonable effort shall be made to give all such small business concerns an opportunity to compete over a period of time.

(2) Provide adequate and timely consideration of the potentialities of small, small disadvantaged and women-owned small business concerns in all "make-or-buy" decisions.

(3) Counsel and discuss subcontracting opportunities with representatives of small, small disadvantaged and women-owned small business firms.

(4) Provide notice to subcontractors concerning penalties and remedies for misrepresentations of business status as small, small disadvantaged or women-owned small business for the purpose of obtaining a subcontract that is to be included as part or all of a goal contained in the Contractor's subcontracting plan.

* * * * *

(l) The failure of the Contractor or subcontractor to comply in good faith with (1) the clause of this contract entitled "Utilization Of Small, Small Disadvantaged and Women-Owned Small Business Concerns," or (2) an approved plan required by this clause, shall be a material breach of the contract.

(End of clause)

Alternate I (OCT 1995). When contracting by sealed bidding rather than by negotiation, substitute the following paragraph (c) for paragraph (c) of the basic clause:

(c) The apparent low bidder, upon request by the Contracting Officer, shall submit a subcontracting plan, where applicable, which separately addresses subcontracting with small business concerns, with small disadvantaged business concerns and with women-owned small business concerns. If the bidder is submitting an individual contract plan, the plan must separately address subcontracting with small business concerns, small disadvantaged business concerns and women-owned small business concerns, with a separate part for the basic contract and separate parts for each option (if any). The plan shall be included in and made a part of the resultant contract. The subcontracting plan shall be submitted within the time specified by the Contracting Officer. Failure to submit the subcontracting plan shall make the bidder ineligible for the award of a contract.

52.219–10 [Amended]

68. Section 52.219–10 is amended in—

(a) The section heading and clause heading by removing "for Small and Small Disadvantaged Business Concerns" and revising the clause date to read "Oct. 1995".

(b) The introductory text by removing the text following "19.708(c)(1)," and

inserting in its place "insert the following clause:"; and

(c) Paragraph (a) of the clause by removing "and", inserting a comma, and removing the period at the end of the sentence and inserting "and a certain percentage to women-owned small business concerns."

52.219–13 [Removed and reserved]

69. Section 52.219–13 is removed and reserved.

70. Section 52.219–16 is amended by revising the section heading, clause heading and date; paragraph (a); the first sentence of paragraph (b); and paragraphs (d) and (f) to read as follows:

52.219–16 Liquidated Damages—Subcontracting Plan.

* * * * *

Liquidated Damages—Subcontracting Plan (Oct 1995)

(a) *Failure to make a good faith effort to comply with the subcontracting plan*, as used in this clause, means a willful or intentional failure to perform in accordance with the requirements of the subcontracting plan approved under the clause in this contract entitled "Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan," or willful or intentional action to frustrate the plan.

(b) If, at contract completion, or in the case of a commercial product plan, at the close of the fiscal year for which the plan is applicable, the Contractor has failed to meet its subcontracting goals and the Contracting Officer decides in accordance with paragraph (c) of this clause that the Contractor failed to make a good faith effort to comply with its subcontracting plan, established in accordance with the clause in this contract entitled "Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan," the Contractor shall pay the Government liquidated damages in an amount stated. * * *

* * * * *

(d) With respect to commercial product plans; *i.e.*, company-wide or division-wide subcontracting plans approved under paragraph (g) of the clause in this contract entitled "Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan," the Contracting Officer of the agency that originally approved the plan will exercise the functions of the Contracting Officer under this clause on behalf of all agencies that awarded contracts covered by that commercial product plan.

* * * * *

(f) Liquidated damages shall be in addition to any other remedies that the Government may have.

(End of clause)

71. Section 52.219–18 is amended by revising Alternate III to read as follows:

52.219–18 Notification of Competition Limited to Eligible 8(a) Concerns.

* * * * *

Alternate III (OCT 1995). When the acquisition is for a product in a class for which the Small Business Administration has determined that there are no small business manufacturers or processors in the Federal market in accordance with 19.502–2(c), delete paragraph (d).

52.219–22 [Removed and reserved]

72. Section 52.219–22 is removed and reserved.

52.220–2, 52.220–3, and 52.220–4 [Removed]

73. Sections 52.220–2, 52.220–3, and 52.220–4 are removed.

PART 53—FORMS

74. Section 53.219 is revised to read as follows:

53.219 Small business programs.

The following standard forms are prescribed for use in reporting small, small disadvantaged and women-owned small business subcontracting data, as specified in Part 19:

(a) *SF 294 (REV OCT 1995), Subcontracting Report for Individual Contracts.* (See 19.704(a)(5).)

(b) *SF 295 (REV OCT 1995), Summary Subcontract Report.* (See 19.704(a)(5).) SF 295 is authorized for local reproduction and a copy is furnished for this purpose in Part 53 of the loose-leaf edition of the FAR.

75. Sections 53.301–294 and 53.301–295 are revised to read as follows:

BILLING CODE 6820-EP-P

53.301–294 Subcontracting Report for Individual Contracts.

SUBCONTRACTING REPORT FOR INDIVIDUAL CONTRACTS

(See instructions on reverse)

OMB No.: 9000-0006
Expires: 03/31/98

Public reporting burden for this collection of information is estimated to average 3 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the FAR Secretariat (VRS), Office of Federal Acquisition Policy, GSA, Washington, DC 20405.

STANDARD FORM 294 (REV. 10-96)
Prescribed by GSA-FAR (48 CFR) 53.219(a)

GENERAL INSTRUCTIONS

1. This report is not required from small businesses.

2. This report is not required for commercial products for which a company-wide annual plan (i.e., a Commercial Products Plan) has been approved, nor from large businesses in the Department of Defense (DOD) Test Program for Negotiation of Comprehensive Subcontracting Plans. The Summary Subcontract Report (SF 295) is required for contractors operating under one of these two conditions and should be submitted to the Government in accordance with the instructions on that form.

3. This form collects subcontract award data from prime contractors/subcontractors that: (a) hold one or more contracts over $500,000 (over $1,000,000 for construction of a public facility); and (b) are required to report subcontracts awarded to Small Business (SB), Small Disadvantaged Business (SDB), and Women-Owned Small Business (WOSB) concerns under a subcontracting plan. For the Department of Defense (DOD), the National Aeronautics and Space Administration (NASA), and the Coast Guard, this form also collects subcontract award data for Historically Black Colleges and Universities (HBCUs) and Minority Institutions (MIs).

4. This report is required for each contract containing a subcontracting plan and must be submitted to the administrative contracting officer (ACO) or contracting officer if no ACO is assigned, semi-annually during contract performance for the periods ended March 31st and September 30th. A separate report is required for each contract at contract completion. Reports are due 30 days after the close of each reporting period unless otherwise directed by the contracting officer. Reports are required when due, regardless of whether there has been any subcontracting activity since the inception of the contract or since the previous report.

5. Only subcontracts involving performance within the U.S., its possessions, Puerto Rico, and the Trust Territory of the Pacific Islands should be included in this report.

6. Purchases from a corporation, company, or subdivision that is an affiliate of the prime/subcontractor are not included in this report.

7. Subcontract award data reported on this form by prime contractors/subcontractors shall be limited to awards made to their immediate subcontractors. Credit cannot be taken for awards made to lower tier subcontractors.

SPECIFIC INSTRUCTIONS

BLOCK 2: Enter the nine-position Contractor Establishment Code (CEC) that identifies the specific contractor establishment. (The CEC consists of eight digits followed by one letter. It is the responsibility of the contracting activity to obtain the CEC for a company that does not have one. The CEC is to coincide with the address in Block 1.)

BLOCK 4: Check only one. Note that all subcontract award data reported on this form represents activity since the inception of the contract through the date indicated in this block.

BLOCK 5: Check whether this report is a "Regular," "Final," and/or "Revised" report. A "Final" report should be checked only if the contractor has completed the contract or subcontract reported in Block 7. A "Revised" report is a change to a report previously submitted for the same period.

BLOCK 6: Identify the department or agency administering the majority of subcontracting plans.

BLOCK 7: Indicate whether the reporting contractor is submitting this report as a prime contractor or subcontractor and the prime contract or subcontract number.

BLOCK 8: Enter the name and address of the Federal department or agency awarding the contract or the prime contractor awarding the subcontract.

BLOCK 9: Check the appropriate block to indicate whether indirect costs are included in the dollar amounts in blocks 10a through 12. To ensure comparability between the goal and actual columns, the contractor may include indirect costs in the actual column only if the subcontracting plan included indirect costs in the goal.

BLOCKS 10a through 12: Under "Current Goal," enter the dollar and percent goals in each category (SB, SDB, and, WOSB) from the subcontracting plan approved for this contract. (If the original goals agreed upon at contract award have been revised as a result of contract modifications, enter the original goals in Block 13. The amounts entered in Blocks 10a through 12 should reflect the revised goals.) Under "Actual Cumulative," enter actual subcontract achievements (dollar and percent) from the inception of the contract through the date of the report shown in Block 4. In cases where indirect costs are included, the amounts should include both direct awards and an appropriate prorated portion of indirect awards.

BLOCK 10a: Report all subcontracts awarded to SBs including subcontracts to SDBs and WOSBs. For DOD, NASA, and Coast Guard contracts, include subcontracting awards to HBCUs and MIs.

BLOCK 10b: Report all subcontracts awarded to large businesses (LBs).

BLOCK 10c: Report on this line the total of all subcontracts awarded under this contract (the sum of lines 10a and 10b).

BLOCKS 11 and 12: Each of these items is a subcategory of Block 10a. Note that in some cases the same dollars may be reported in both Block 11 and Block 12 (i.e., SDBs owned by women).

BLOCK 11: Report all subcontracts awarded to SDBs (including women-owned SDBs). For DOD, NASA, and Coast Guard contracts, include subcontract awards to HBCUs and MIs.

BLOCK 12: Report all subcontracts awarded to Women-Owned firms (including SDBs owned by women).

BLOCK 13: Enter a short narrative explanation if (a) SB, SDB, or WOSB accomplishments fall below that which would be expected using a straight-line projection of goals through the period of contract performance; or (b) if this is a final report, any one of the three goals was not met.

SPECIAL INSTRUCTIONS FOR COMMERCIAL PRODUCTS PLANS

DEFINITIONS

1. Commercial products means products sold in substantial quantities to the general public and/or industry at established catalog or market prices.

2. Subcontract means a contract, purchase order, amendment, or other legal obligation executed by the prime contractor/subcontractor calling for supplies or services required for the performance of the original contract or subcontract.

3. Direct Subcontract Awards are those that are identified with the performance of one or more specific Government contract(s).

4. Indirect costs are those which, because of incurrence for common or joint purposes, are not identified with specific Government contracts; these awards are related to Government contract performance but remain for allocation after direct awards have been determined and identified to specific Government contracts.

DISTRIBUTION OF THIS REPORT

For the Awarding Agency or Contractor:

The original copy of this report should be provided to the contracting officer at the agency or contractor identified in Block 8. For contracts with DOD, a copy should also be provided to the Defense Logistics Agency (DLA) at the cognizant Defense Contract Management Area Operations (DCMAO) office.

For the Small Business Administration (SBA):

A copy of this report must be provided to the cognizant Commerical Market Representative (CMR) at the time of a compliance review. It is NOT necessary to mail the SF 294 to SBA unless specifically requested by the CMR.

STANDARD FORM 295 (REV. 10-95)
Prescribed by GSA - FAR (48 CFR) 53.219(a)

GENERAL INSTRUCTIONS

1. This report is not required from small businesses.

2. This form collects subcontract award data from prime contractors/subcontractors that: (a) hold one or more contracts over $500,000 (over $1,000,000 for construction of a public facility); and (b) are required to report subcontracts awarded to Small Business (SB), Small Disadvantaged Business (SDB), and Women-Owned Small Business (WOSB) concerns under a subcontracting plan. For the Department of Defense (DOD), the National Aeronautics and Space Administration (NASA), and the Coast Guard, this form also collects subcontract award data for Historically Black Colleges and Universities (HBCUs) and Minority Institutions (MIs).

3. This report must be submitted semi-annually (for the six months ended March 31st and the twelve months ended September 30th) for contracts with the Department of Defense (DOD) and annually (for the twelve months ended September 30th) for contracts with civilian agencies, except for contracts covered by an approved Commercial Products Plan (see special instructions in right-hand column). Reports are due 30 days after the close of each reporting period.

4. This report may be submitted on a corporate, company, or subdivision (e.g., plant or division operating on a separate profit center) basis, unless otherwise directed by the agency awarding the contract.

5. If a prime contractor/subcontractor is performing work for more than one Federal agency, a separate report shall be submitted to each agency covering only that agency's contracts, provided at least one of that agency's contracts is over $500,000 (over $1,000,000 for construction of a public facility) and contains a subcontracting plan. (Note that DOD is considered to be a single agency; see next instruction.)

6. For DOD, a consolidated report should be submitted for all contracts awarded by military departments/agencies and/or subcontracts awarded by DOD prime contractors. However, DOD contractors involved in construction and related maintenance and repair must submit a separate report for each DOD component.

7. Only subcontracts involving performance within the U.S., its possessions, Puerto Rico, and the Trust Territory of the Pacific Islands should be included in this report.

8. Purchases from a corporation, company, or subdivision that is an affiliate of the prime/subcontractor are not included in this report.

9. Subcontract award data reported on this form by prime contractors/subcontractors shall be limited to awards made to their immediate subcontractors. Credit cannot be taken for awards made to lower tier subcontractors.

10. See special instructions in right-hand column for Commercial Products Plans.

SPECIFIC INSTRUCTIONS

BLOCK 2: Enter the nine-position Contractor Establishment Code (CEC) that identifies the specific contractor establishment. (The CEC consists of eight digits followed by one letter. It is the responsibility of the contracting activity to obtain the CEC for a company that does not have one. The CEC is to coincide with the address in Block 1.)

BLOCK 4: Check only one. Note that March 31 represents the six months from October 1st and that September 30th represents the twelve months from October 1st. Enter the year of the reporting period, (i.e., Mar 31 or Sept 30).

BLOCK 5: Check whether this report is a "Regular," "Final," and/or "Revised" report. A "Final" report should be checked only if the contractor has completed all the contracts containing subcontracting plans awarded by the agency to which it is reporting. A "Revised" report is a change to a report previously submitted for the same period.

BLOCK 6: Identify the department or agency administering the majority of subcontracting plans.

BLOCK 7: This report encompasses all contracts with the Federal Government for the agency to which it is submitted, including subcontracts received from other large businesses that have contracts with the same agency. Indicate in this block whether the contractor is a prime contractor, subcontractor, or both (check only one).

BLOCK 8: Check only one. Check "Commercial Products Plan" only if this report is under an approved Commercial Products Plan. For a Commercial Products Plan, the contractor must specify the percentage of dollars in Blocks 10a through 13 attributable to the agency to which this report is being submitted.

BLOCK 9: Identify the major product or service lines of the reporting organization.

BLOCKS 10a through 13: These entries should include all subcontract awards resulting from contracts or subcontracts, regardless of dollar amount, received from the agency to which this report is submitted. If reporting as a subcontractor, report all subcontracts awarded under prime contracts. Amounts should include both direct awards and an appropriate prorated portion of indirect awards. (The indirect portion is based on the percentage of work being performed for the organization to which the report is being submitted in relation to other work being performed by the prime contractor/subcontractor.) Do not include awards made in support of commercial business unless "Commercial Products" is checked in Block 8 (see Special Instructions for Commercial products Plans in right hand column).

Report only those dollars subcontracted this fiscal year for the period indicated in Block 4.

BLOCK 10a: Report all subcontracts awarded to SBs including subcontracts to SDBs and WOSBs. For DOD, NASA, and Coast Guard contracts, include subcontracting awards to HBCUs and MIs.

BLOCK 10b: Report all subcontracts awarded to large businesses (LBs).

BLOCK 10c: Report on this line the grand total of all subcontracts (the sum of lines 10a and 10b).

BLOCKS 11 and 12: Each of these items is a subcategory of Block 10a. Note that in some cases the same dollars may be reported on both Block 11 and Block 12 (i.e., SDBs owned by women). Likewise subcontracts to HBCUs or MIs should be reported on both Block 11 and 13.

BLOCK 11: Report all subcontracts awarded to SDBs (including women-owned SDBs). For DOD, NASA, and Coast Guard contracts, include subcontract awards to HBCUs and MIs.

BLOCK 12: Report all subcontracts awarded to Women-Owned Small Business firms (including SDBs owned by women).

BLOCK 13 (For contracts with DOD, NASA, and Coast Guard): Enter the dollar value of all subcontracts with HBCUs/MIs.

SPECIAL INSTRUCTIONS FOR COMMERCIAL PRODUCTS PLANS

1. This report is due on October 30th each year for the previous fiscal year ended September 30th.

2. The annual report submitted by reporting organizations that have an approved company-wide annual subcontracting plan for commercial products shall include all subcontracting activity under commercial products plans in effect during the year and shall be submitted in addition to the required reports for other-than-commercial products, if any.

3. Enter in Blocks 10a through 13 the total of all subcontract awards under the contractor's Commercial Products Plan. Show in Block 8 the percentage of this total that is attributable to the agency to which this report is being submitted. This report must be submitted to each agency from which contracts for commercial products covered by an approved Commercial Products Plan were received.

DEFINITIONS

1. Commercial products means products sold in substantial quantities to the general public and/or industry at established catalog or market prices.

2. Subcontract means a contract, purchase order, amendment, or other legal obligation executed by the prime contractor/subcontractor calling for supplies or services required for the performance of the original contract or subcontract.

3. Direct Subcontract Awards are those that are identified with the performance of one or more specific Government contract(s).

4. Indirect Subcontract Awards are those which, because of incurrence for common or joint purposes, are not identified with specific Government contracts; these awards are related to Government contract performance but remain for allocation after direct awards have been determined and identified to specific Government contracts.

SUBMITTAL ADDRESSES FOR ORIGINAL REPORT

For DOD Contractors, send reports to the cognizant contract administration office as stated in the contract.

For Civilian Agency Contractors, send reports to awarding agency:

1. NASA: Forward reports to NASA, Office of Procurement (HC), Washington, DC 20546

2. OTHER FEDERAL DEPARTMENTS OR AGENCIES: Forward report to the OSDBU Director unless otherwise provided for in instructions by the Department or Agency.

FOR ALL CONTRACTORS:

SMALL BUSINESS ADMINISTRATION (SBA): Send "info copy" to the cognizant Commercial Market Representative (CMR) at the address provided by SBA. Call SBA Headquarters in Washington, DC at (202) 205-6475 for correct address if unknown..

Federal Acquisition Regulation; Publicizing Contract Actions

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed to a final rule to revise FAR section 5.207(b)(4), Preparation and transmittal of synopses. The revision deletes the requirement for the Federal Information Processing Standard (FIPS) Number in Commerce Business Daily synopses and, in lieu thereof, requests Government Printing Office (GPO) Billing Account Code information.

EFFECTIVE DATE: October 1, 1995.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph De Stefano at (202) 501–1758 in reference to this FAR case. For general information, contact the FAR Secretariat, Room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–32, FAR case 95–606, Publicizing Contract Actions.

SUPPLEMENTARY INFORMATION:

A. Background

For approximately 45 years, the Commerce Business Daily (CBD) has provided free printing services to the agencies. During this period, printing expenses were paid with appropriated funds. Beginning October 1, 1995, the CBD will no longer receive appropriated funds for this purpose, and the Department of Commerce will be required to charge agencies a fee for printing services. The cost will be a flat rate of $18 per notice and bills will be sent to the agency that issues the notice. The Government Printing Office (GPO) has agreed to provide billing and collection services and, in order to facilitate this, agencies will need to include their GPO account number in all CBD notices. The proposed changes to the FAR will enable GPO to properly bill and collect from the individual agency that has placed a CBD notice.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comment is not required. Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected FAR subpart will be considered in accordance with 5 U.S.C. 610 of the Act. Such comments must be submitted separately and cite FAR case 95–606 in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because this final rule imposes no new reporting requirements or collections of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq*.

List of Subjects in 48 CFR Part 5

Government procurement.

Dated: September 7, 1995.

C. Allen Olson,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR Part 5 is amended as set forth below:

1. The authority citation for 48 CFR Part 5 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 5—PUBLICIZING CONTRACT ACTIONS

2. Section 5.207 is amended by revising paragraph (b)(4), Item 4, and paragraph (b)(6), Item 4, to read as follows:

5.207 Preparation and transmittal of synopses.

* * * * *

(b)(4) * * *

* * * * *

4. GOVERNMENT PRINTING OFFICE (GPO) BILLING ACCOUNT CODE.

(The originating office's account number used by the GPO for billing and collection purposes. The field length is nine alpha-numeric characters. The first three characters entered are "GPO" and then the following six characters are the numeric account number. Agencies should contact the GPO's Office of Comptroller for additional information. Enter N/A if an account number has not been assigned.)

RIN 9000–AG35

Federal Acquisition Regulation; Subcontractor Payments

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: This final rule is issued pursuant to the Federal Acquisition Streamlining Act of 1994, Public Law 103–355 (the Act). The Federal Acquisition Regulatory Council is amending the Federal Acquisition Regulation (FAR) to implement Sections 2091 and 8105 of the Act which address subcontractor payments, requests for information, and bonds. This regulatory action was subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

EFFECTIVE DATE: October 1, 1995.

FOR FURTHER INFORMATION CONTACT: Mr. John S. Galbraith, Finance/Payment Team Leader, at (703) 697–6710, in reference to this FAR case. For general information, contact the FAR Secretariat, Room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–32, FAR case 94–762.

SUPPLEMENTARY INFORMATION:

A. Background

The Federal Acquisition Streamlining Act of 1994, Pub. L. 103–355 (the Act), provides authorities that streamline the acquisition process and minimize burdensome government-unique requirements.

This notice announces revisions developed under FAR case 94–762. The following sections of the Federal Acquisition Streamlining Act are implemented by this final rule:

Section 2091 of the Act changed section 806, subsection (c), of the Fiscal Years 1992 and 1993 Defense Authorization Act by striking the existing subsection (c) and inserting a

new subsection (c). The stricken words had permitted the FAR Council to substitute FAR coverage for coverage otherwise required from the Secretary of Defense. The substituted words require the FAR Council to place in the FAR, for Government-wide applicability, the coverage required of the Secretary of Defense.

Additionally, Section 8105 of the Act changed section 806 of the Fiscal Years 1992 and 1993 Defense Authorization Act by striking the existing subsection (b) and inserting a new subsection (b). The stricken words dealt with deadlines for the implementation in regulations of the statutory requirements, and that coverage is no longer pertinent. The substituted language creates an exemption from the requirements of the statute for the acquisition of commercial items. Therefore, the clause prescription at FAR 28.106–4(b) has been revised to reflect this exemption.

The final rule is, except for minor adjustments, the same language which was previously in the Defense Federal Acquisition Regulation Supplement, at 228.106–4–70, 228.106–6, 232.970, and 252.228–7006 and proposed in the **Federal Register** on February 2, 1995.

It should be noted that Section 4104(b) of the Act concerning subcontractor payments under smaller construction contracts is being addressed in a separate case. This case, 94–762, addresses only the changes required by Sections 2091 and 8105. It should also be noted that the duplication of responsibilities for furnishing copies of bonds in 28.106–6(d)(3) and the clause in 52.228–12 is intentional. The statute assigns this responsibility to both the Government and contractor. Finally, the language in 32.112–1(c) concerning "administrative and other remedial action" deliberately does not go into detail as to what these actions are. The specifics of these areas and especially the regulations and procedures are peculiar to each agency. The wording is derived from the underlying statute.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because it merely requires the contracting officer or the contractor to furnish bonding information to subcontractors upon request, and provides for remedies which only apply to contractors who fail to make payment to subcontractors.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) is deemed to apply because the final rule contains information collection requirements. Accordingly, a request for approval of a new information collection requirement concerning Subcontractor Payments was submitted to the Office of Management and Budget and approved through March 31, 1998, OMB Control No. 9000–0135. Public comments concerning this request were invited through a **Federal Register** notice at 60 FR 6526, February 2, 1995.

D. Public Comments

A proposed rule was published in the **Federal Register** at 60 FR 6602, February 2, 1995. During the public comment period, six comments were received. For the most part, these comments raised editorial and cross-reference points, which have been corrected. One commentor expressed concern about the use of the term "non-commercial", and suggested, as an alternative, the term "other-than-commercial." While the suggested term may be logically more accurate, the term "non-commercial" has been used throughout all the new Part 32 coverage, and appears to be correctly understood. It was concluded that this change in terminology would not significantly improve the coverage, so the suggestion was not adopted.

List of Subjects in 48 CFR Parts 28, 32, and 52

Government procurement.

Dated: September 7, 1995.

Edward C. Loeb,

Deputy Project Manager for the Implementation of the Federal Acquisition Streamlining Act of 1994.

Therefore, 48 CFR Parts 28, 32, and 52 are amended as set forth below:

1. The authority citation for 48 CFR Parts 28, 32, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 28—BONDS AND INSURANCE

2. Section 28.106–4 is amended by designating the existing text as paragraph (a) and adding (b) to read as follows:

28.106–4 Contract clause.

* * * * *

(b) In accordance with Section 806(a)(3) of Pub. L. 102–190, as amended by Sections 2091 and 8105 of Pub. L. 103–355, the contracting officer shall insert the clause at 52.228–12, Prospective Subcontractor Requests for Bonds, in solicitations and contracts with respect to which a payment bond will be furnished pursuant to the Miller Act (see 28.102–1), except for contracts for the acquisition of commercial items as defined in Subpart 2.1.

3. Section 28.106–6 is amended by adding paragraph (d) to read as follows:

28.106–6 Furnishing information.

* * * * *

(d) Section 806(a)(2) of Pub. L. 102–190, as amended by Sections 2091 and 8105 of Pub. L. 103–355, requires that the Federal Government provide information to subcontractors on payment bonds under contracts for other than commercial items as defined in Subpart 2.1. Upon the written or oral request of a subcontractor/supplier, or prospective subcontractor/supplier, under a contract with respect to which a payment bond has been furnished pursuant to the Miller Act, the contracting officer shall promptly provide to the requester, either orally or in writing, as appropriate, any of the following:

(1) Name and address of the surety or sureties on the payment bond.

(2) Penal amount of the payment bond.

(3) Copy of the payment bond. The contracting officer may impose reasonable fees to cover the cost of copying and providing a copy of the payment bond.

PART 32—CONTRACT FINANCING

4. Sections 32.112, 32.112–1 and 32.112–2 are added to read as follows:

32.112 Payment of subcontractors under contracts for non-commercial items.

32.112–1 Subcontractor assertions of nonpayment.

(a) In accordance with Section 806(a)(4) of Pub. L. 102–190, as amended by Sections 2091 and 8105 of Pub. L. 103–355, upon the assertion by a subcontractor or supplier of a Federal contractor that the subcontractor or supplier has not been paid in accordance with the payment terms of the subcontract, purchase order, or other agreement with the prime contractor, the contracting officer may determine—

(1) For a construction contract, whether the contractor has made—

(i) Progress payments to the subcontractor or supplier in compliance with Chapter 39 of Title 31, United States Code (Prompt Payment Act); or

(ii) Final payment to the subcontractor or supplier in compliance with the terms of the subcontract, purchase order, or other agreement with the prime contractor;

(2) For a contract other than construction, whether the contractor has made progress payments, final payments, or other payments to the subcontractor or supplier in compliance with the terms of the subcontract, purchase order, or other agreement with the prime contractor; or

(3) For any contract, whether the contractor's certification of payment of a subcontractor or supplier accompanying its payment request to the Government is accurate.

(b) If, in making the determination in paragraphs (a)(1) and (2) of this section, the contracting officer finds the prime contractor is not in compliance, the contracting officer may—

(1) Encourage the contractor to make timely payment to the subcontractor or supplier; or

(2) If authorized by the applicable payment clauses, reduce or suspend progress payments to the contractor.

(c) If the contracting officer determines that a certification referred to in paragraph (a)(3) of this section is inaccurate in any material respect, the contracting officer shall initiate administrative or other remedial action.

32.112–2 Subcontractor requests for information.

(a) In accordance with Section 806(a)(1) of Pub. L. 102–190, as amended by Sections 2091 and 8105 of Pub. L. 103–355, upon the request of a subcontractor or supplier under a Federal contract for a non-commercial item, the contracting officer shall promptly advise the subcontractor or supplier as to—

(1) Whether the prime contractor has submitted requests for progress payments or other payments to the Federal Government under the contract; and

(2) Whether final payment under the contract has been made by the Federal Government to the prime contractor.

(b) In accordance with 5 U.S.C. 552(b)(1), this subsection does not apply to matters that are—

(1) Specifically authorized under criteria established by an Executive order to be kept classified in the interest of national defense or foreign policy; and

(2) Properly classified pursuant to such Executive order.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

6. Section 52.228–12 is added to read as follows:

52.228–12 Prospective Subcontractor Requests for Bonds.

As prescribed in 28.106–4(b), use the following clause:

Prospective Subcontractor Requests For Bonds (Oct 1995)

In accordance with Section 806(a)(3) of Pub. L. 102–190, as amended by Sections 2091 and 8105 of Pub. L. 103–355, upon the request of a prospective subcontractor or supplier offering to furnish labor or material for the performance of this contract for which a payment bond has been furnished to the Government pursuant to the Miller Act, the Contractor shall promptly provide a copy of such payment bond to the requester.

(End of clause)

Federal Acquisition Regulation; Reimbursement of Protest Costs

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Federal Acquisition Regulatory Council is promulgating this final rule to allow the Government to seek reimbursement for protest costs it has paid a protester where the protest has been sustained based upon the awardee's misrepresentation. In addition to any other remedies available, the Government may collect this debt by offsetting the amount against any payment due the awardee under any Government contract the awardee might have. This regulatory action was subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

EFFECTIVE DATE: October 1, 1995.

FOR FURTHER INFORMATION CONTACT: Mr. Craig Hodge, Protests/Disputes Team Leader at (703) 274–8940 in reference to this FAR case. For general information, contact the FAR Secretariat, Room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–32, FAR case 94–731, Reimbursement of Protest Costs.

SUPPLEMENTARY INFORMATION:

A. Background

The Federal Acquisition Streamlining Act of 1994 (the Act), Pub. L. 103–355, provides authorities that streamline the acquisition process and minimize burdensome Government-unique requirements.

This case presents FAR amendments developed under FAR Case 94–731, Reimbursement of Protest Costs. Sections 1016, 1403, and 1435 of the Act provide that agencies may be required to pay protest and offer preparation costs to protesters under certain circumstances. Often as the result of discovery during a protest, misrepresentations may be detected that could not have been reasonably known to the agency's evaluators. A protest may be sustained where the award has been induced by a material misrepresentation by the awardee. Such situations often involve proposed "key personnel."

The agency is without effective remedy in such cases. Theoretically, the agency could ask the Department of Justice to file a lawsuit against the offeror making the misrepresentations. However, due to the heavy workload of the Justice attorneys, this is not a practical alternative. This FAR change will not adversely affect any substantive right of an offeror. Under the language, the Government remedy is to offset such costs on the same or an unrelated contract. If the offeror believes that the offset is not justified, it may appeal the action to the agency, or under the Contract Disputes Act to either a Board of Contract Appeals or the Court of Federal Claims.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the vast majority of contracts do not involve protests where misrepresentation is detected through discovery.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

D. Public Comments

A proposed rule was published in the **Federal Register** at 60 FR 15450, March 23, 1995. During the public comment period, seven comments were received. Some commenters were concerned that the proposed rule might be in conflict with the Debt Collection Act. However, based on *Cecile Ind.* v. *Department of Defense*, 995 F.2d 1052 (Fed. Cir. 1993), we do not believe that the Debt Collection Act applies. If it does, the final rule would comply with the Debt Collection Act. Some commenters felt the clause lacked adequate due process. In response, more procedural guidance has been supplied. In particular, the rule provides for a review by the head of the contracting activity, if requested, before there is any final decision. In addition, actions taken under the clause in this rule may be reviewed by courts or boards under the Contract Disputes Act, like any other contract administration decision.

Several commenters suggested the clause was not necessary because the Government already has adequate remedies for contractor misrepresentation. The drafting team agreed that there are additional remedies. For example, the rule now provides that the contracting officer should consider referring contractor misrepresentations to the agency debarring official. However, these remedies do not always prove adequate in the context of misrepresentations discovered as the result of bid protests.

One commenter recommended clarification of whether the agency head or the contracting officer is responsible for issuing the demand letter. The final rule states that this is the responsibility of the contracting officer.

List of Subjects in 48 CFR Parts 32, 33, and 52

Government procurement.

Dated: September 7, 1995.

Edward C. Loeb,

Deputy Project Manager for the Implementation of the Federal Acquisition Streamlining Act of 1994.

Therefore, 48 CFR Parts 32, 33, and 52 are amended as set forth below:

1. The authority citation for 48 CFR Parts 32, 33, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 32—CONTRACT FINANCING

2. Section 32.602 is amended by adding paragraph (h) to read as follows:

§ 32.602 General.

* * * * *

(h) Reimbursement of costs, as provided in 33.102(b), 33.104(h)(1), and 33.105(g)(1), paid by the Government where a postaward protest is sustained as a result of an awardee's misstatement, misrepresentation, or miscertification.

3. Section 32.603 is revised to read as follows:

§ 32.603 Applicability.

Except as otherwise specified, this subpart applies to all debts to the Government arising in connection with contracts and subcontracts for the acquisition of supplies or services, and debts arising from the Government's payment of costs, as provided in 33.102(b), 33.104(h)(1), and 33.105(g)(1), where a postaward protest is sustained as a result of an awardee's misstatement, misrepresentation, or miscertification.

4. Section 32.605(b) is amended by inserting the phrase "including reimbursement of protest costs," between the words "contract debts," and "the contracting officer".

PART 33—PROTESTS, DISPUTES, AND APPEALS

5. Section 33.102 is amended by adding paragraph (b)(3) to read as follows:

§ 33.102 General.

* * * * *

(b) * * *

(3) Require the awardee to reimburse the Government's costs, as provided in this paragraph, where a postaward protest is sustained as the result of an awardee's intentional or negligent misstatement, misrepresentation, or miscertification. In addition to any other remedy available, and pursuant to the requirements of Subpart 32.6, the Government may collect this debt by offsetting the amount against any payment due the awardee under any contract between the awardee and the Government.

(i) When a protest is sustained by GAO or GSBCA under circumstances that may allow the Government to seek reimbursement for protest costs, the contracting officer will determine whether the protest was sustained based on the awardee's negligent or intentional misrepresentation. If the protest was sustained on several issues, protest costs shall be apportioned according to the costs attributable to the awardee's actions.

(ii) The contracting officer shall review the amount of the debt, degree of the awardee's fault, and costs of collection, to determine whether a demand for reimbursement ought to be made. If it is in the best interests of the Government to seek reimbursement, the contracting officer shall notify the contractor in writing of the nature and amount of the debt, and the intention to collect by offset if necessary. Prior to issuing a final decision, the contracting officer shall afford the contractor an opportunity to inspect and copy agency records pertaining to the debt to the extent permitted by statute and regulation, and to request review of the matter by the head of the contracting activity.

(iii) When appropriate, the contracting officer shall also refer the matter to the agency debarment official for consideration under Subpart 9.4.

* * * * *

6. Section 33.104 is amended by adding paragraph (h)(7) to read as follows:

33.104 Protests to GAO.

* * * * *

(h) * * *

(7) If the Government pays costs, as provided in paragraph (h)(1) of this section, where a postaward protest is sustained as the result of an awardee's intentional or negligent misstatement, misrepresentation, or miscertification, the Government may require the awardee to reimburse the Government the amount of such costs. In addition to any other remedy available, and pursuant to the requirements of Subpart 32.6, the Government may collect this debt by offsetting the amount against any payment due the awardee under any contract between the awardee and the Government.

7. Section 33.105 is amended by adding paragraph (g)(5) to read as follows:

33.105 Protests to GSBCA.

* * * * *

(g) * * *

(5) If the Government pays costs, as provided in paragraph (g)(1) of this section, where a postaward protest is sustained as the result of an awardee's intentional or negligent misstatement, misrepresentation, or miscertification, the Government may require the awardee to reimburse the Government the amount of such costs. In addition to any other remedy available, and pursuant to the requirements of Subpart 32.6, the Government may collect this debt by offsetting the amount against any payment due the awardee under any contract between the awardee and the Government.

* * * * *

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

8. Section 52.233–3 is amended by adding paragraph (f) to read as follows:

52.233-3 Protest after Award.

* * * * *

Protest After Award (Oct 1995)

* * * * *

(f) If, as the result of the Contractor's intentional or negligent misstatement, misrepresentation, or miscertification, a protest related to this contract is sustained, and the Government pays costs, as provided in FAR 33.102(b)(2), 33.104(h)(1), or 33.105(g)(1), the Government may require the Contractor to reimburse the Government the amount of such costs. In addition to any other remedy available, and pursuant to the requirements of Subpart 32.6, the Government may collect this debt by offsetting the amount against any payment due the Contractor under any contract between the Contractor and the Government.

(End of clause)

Part III

Department of Housing and Urban Development

Office of the Secretary

24 CFR Part 888

Fair Market Rents for Section 8 Housing Assistance Payments Program—Fiscal Year 1996; Final Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 888

[Docket No. FR–3933–N–02]

Fair Market Rents for Section 8 Housing Assistance Payments Program—Fiscal Year 1996

AGENCY: Office of the Secretary, HUD.

ACTION: Final fiscal year (FY) 1996 fair market rents (FMRs).

SUMMARY: Section 8(c)(1) of the United States Housing Act of 1937 requires the Secretary to publish FMRs annually to be effective on October 1 of each year. FMRs are used for the Section 8 Rental Certificate program (including space rentals by owners of manufactured homes under that program); the Moderate Rehabilitation Single Room Occupancy program; housing assisted under the Loan Management and Property Disposition programs; payment standards for the Rental Voucher program; and any other programs whose regulations specify their use.

On March 2, 1995 (60 FR 11870), HUD published a proposed rule to revise 24 CFR part 888 to change the FMR rent standard from the 45th to 40th percentile rent level. That change was published in the **Federal Register** on August 15, 1995 (60 FR 42222), and made effective on September 14, 1995.

HUD also published proposed FY 1996 FMRs on August 15, 1995 (60 FR 42290). Because of the delay in publishing the proposed FMRs, the public comment period will extend beyond the October 1 statutory date for publishing final FMRs. Therefore, there will be two notices of final FMRs. Today's document provides final FY 1996 FMRs at the level of the proposed FMRs, except for the small number of areas with proposed FMR reductions that will have their FMRs held at the FY 1995 40th percentile level pending evaluation of public comments. The second publication of final FY 1996 FMRs, which will announce revised FMRs for the areas that submitted successful public comments, will occur early next year.

EFFECTIVE DATE: October 1, 1995.

FOR FURTHER INFORMATION CONTACT: Gerald J. Benoit, Rental Assistance Division, Office of Public and Indian Housing, telephone (202) 708–0477. (TDD: (202) 708–0850). For technical information on the development of schedules for specific areas or the method used for the rent calculations, contact Michael R. Allard, Economic and Market Analysis Division, Office of Economic Affairs, telephone (202) 708–0577 (TDD: (202) 708–0770). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

I. Background

Section 8 of the United States Housing Act of 1937 (the Act) (42 U.S.C. 1437f) authorizes housing assistance to aid lower income families in renting decent, safe, and sanitary housing. Assistance payments are limited by FMRs established by HUD for different areas. In general, the FMR for an area is the amount that would be needed to pay the gross rent (shelter rent plus utilities) of privately owned, decent, safe, and sanitary rental housing of a modest (non-luxury) nature with suitable amenities.

II. Publication of FMRs

Section 8(c) of the Act requires the Secretary of HUD to publish FMRs periodically, but not less frequently than annually. The Department's regulations provide that HUD will develop FMRs by publishing proposed FMRs for public comment and after evaluating the public comments, publish the final FMRs (see 24 CFR 888.115). The final FY 1996 FMR schedules at the end of this document list the FMR levels for the Rental Certificate program (Schedule B) and for the areas where modifications have been approved for the manufactured home space FMRs (Schedule D).

III. Method Used to Develop FMRs

FMR Standard

The FMRs are gross rent estimates; they include shelter rent and the cost of utilities, except telephone. HUD sets FMRs to assure that a sufficient supply of rental housing is available to program participants. To accomplish this objective, FMRs must be both high enough to permit a selection of units and neighborhoods and low enough to serve as many families as possible. The level at which FMRs are set is expressed as a percentile point within the rent distribution of standard quality rental housing units. The current definition used is the 40th percentile rent, the dollar amount below which 40 percent of the standard quality rental housing units rent. The 40th percentile rent is drawn from the distribution of rents of units which are occupied by recent movers (renter households who moved into their unit within the past 15 months). Newly built units less than two years old are excluded, and adjustments have been made to correct for the below market rents of public housing units included in the data base.

Data Sources

HUD uses the most accurate and current data available to develop the FMR estimates. The sources of survey data used for the base-year estimates are:

(1) the 1990 Census, which provides statistically reliable rent data for all FMR areas;

(2) the Bureau of the Census' American Housing Surveys (AHSs), which are used to develop between-Census revisions for the largest metropolitan areas and which have accuracy comparable to the decennial Census; and

(3) the Random Digit Dialing (RDD) telephone surveys of individual FMR areas, which are based on a sampling procedure that uses computers to select statistically random samples of rental housing.

The base-year FMRs are updated using trending factors based on Consumer Price Index (CPI) data for rents and utilities or HUD regional rent change factors developed from RDD surveys. Annual average CPI data are available individually for 102 metropolitan FMR areas. RDD Regional rent change factors are developed annually for the metropolitan and nonmetropolitan parts of each of the 10 HUD regions. The RDD factors are used to update the base year estimates for all FMR areas that do not have their own local CPI survey.

FY 1996 FMRs

This document makes effective revised FMRs that reflect estimated 40th percentile rent levels trended to April 1, 1996. The FMRs have been calculated separately for each bedroom size category based on 1990 Census data. For most FMR areas, the ratios developed from the Census for that area were applied to the two-bedroom FMR estimate to derive the FMRs for the other bedroom size categories. Exceptions have been made for areas with local bedroom size rent intervals below an acceptable range. For those areas the bedroom size intervals selected were the minimums determined after outliers had been excluded from the distribution of bedroom ratios for all metropolitan areas. Higher ratios continue to be used for three-bedroom and larger size units than would result from using the actual market relationships. This is done to assist the largest, most difficult to house families in finding program-eligible units.

FMR Areas With Proposed Reductions

In the August 15, 1995, notice of proposed FMRs, HUD announced that the FMRs for 31 areas were being proposed with reduced FMRs as the result of recent RDD and AHS surveys. Until the affected PHAs have had the opportunity to submit public comments, these areas will continue to use the FY 1995 40th percentile FMRs (included in Schedule B of this notice). The reductions in the FMRs, or any revisions resulting from public comments, for these areas will be made effective in the second publication of final FY 1996 FMRs.

RDD Areas With Proposed FMR Reductions

Atlantic-Cape May, NJ
Bergen-Passaic, NJ

Boston, MA–NH
Oakland, CA
San Jose, CA
San Francisco, CA
Tampa-St. Petersburg-Clearwater, FL
Washington, DC–MD–VA–WV

FMRs for Puerto Rico

The August 15, notice of proposed FMRs also announced that HUD was in the process of re-benchmarking the FMRs for Puerto Rico. Specially designed RDD surveys have been, or are in the process of being, conducted of each of the metropolitan FMR areas and of the nonmetropolitan area of Puerto Rico. These surveys were modified by adding housing quality questions to account for the high incidence of substandard rental housing in Puerto Rico. Based on the survey results, today's notice makes effective higher FMRs for Mayaguez. The FMRs for the San Juan-Bayamon and the Caguas FMR areas will remain at the FY 1995 40th percentile levels pending evaluation of any public comments received concerning the reductions proposed for FY 1996.

The FMRs for Arecibo, Ponce, and for the nonmetropolitan areas remain at their FY 1995 40th percentile levels. The slight increase proposed in the FMRs for Aguadilla is being made effective in this notice. Results of the RDD surveys now underway for the Aguadilla, Arecibo, and Ponce metropolitan FMR areas and for the nonmetropolitan FMR areas of Puerto Rico will be announced in the **Federal Register** notice of proposed FY 1997 FMRs.

State Minimum FMRs

Today's document implements HUD's new minimum FMR policy, which establishes FMRs at the higher of the local FMR or the State-wide average FMR of nonmetropolitan counties, subject to a ceiling rent cap of $450 on the nonmetropolitan State averages. HUD adopted this procedure in recognition of the difficulty that small PHAs in lightly populated rural areas were having in developing valid FMR surveys and the concern that their FMRs may be affected by small sample sizes and a higher incidence of substandard housing and assisted housing with below market rents. The new policy raises the FMRs for many of the nonmetropolitan counties. HUD also has decided to apply the policy to a small number of metropolitan areas that otherwise would have had FMRs below the State-wide nonmetropolitan county average. The new State minimum policy may be subject to change, based on further analysis and public comment.

Manufactured Home Space FMRs

Manufactured home space FMRs are 30 percent of the applicable Section 8 Rental Certificate program FMR for a two-bedroom unit. HUD accepts public comments requesting modifications of these FMRs where they are thought to be inadequate to run the program. In order to be accepted as a basis for revising the FMRs, such comments must contain statistically valid survey data that show the 40th percentile space rent (excluding the cost of utilities) for the entire FMR area. This program uses the same FMR area definitions as the Section 8 Rental Certificate program. Manufactured home space FMR revisions are published as final FMRs in Schedule D. Once approved, the revised manufactured home space FMRs establish new base year estimates that are updated annually using the same data used to update the Rental Certificate program FMRs.

New Metropolitan FMR Areas

This publication makes final the definitions of three new metropolitan FMR areas based on the most recent OMB changes. The Grand Junction CO FMR area (Mesa County) is the same as the MSA definition. HUD has decided, however, not to use the Flagstaff, AZ-UT MSA definition as a FMR area because Kane County, UT is not considered to be part of the Flagstaff housing market area. The Flagstaff metropolitan FMR area, therefore, is defined to include only Coconino County, AZ, while Kane County, UT is identified as a separate metropolitan FMR area under the State of Utah listing.

IV. HUD Rental Housing Survey Guides

HUD recommends use of professionally-conducted Random Digit Dialing (RDD) telephone surveys to test the accuracy of FMRs for areas where there is a sufficient number of Section 8 units to justify the survey cost of $10,000–$15,000. Areas with 500 or more program units usually meet this criterion, and areas with fewer units may meet it if the actual two-bedroom FMR rent standard is significantly different than that proposed by HUD. In addition, HUD has developed a simplified version of the RDD survey methodology for smaller, nonmetropolitan PHAs. This methodology is designed to be simple enough to be done by the PHA itself, rather than by professional survey organizations, at a cost of around $5,000 or less.

PHAs in nonmetropolitan areas may, in certain circumstances, do surveys of groups of counties. All grouped surveys must be approved in advance by HUD. PHAs are cautioned that the resultant FMRs will not be identical within the group; each individual FMR area will have a separate FMR based on its relationship to the combined rent of the group of FMR areas.

PHAs that plan to use the RDD survey technique may obtain a copy of the appropriate survey guide by calling HUD USER on 1–800–245–2691. Larger PHAs should request "Random Digit Dialing Surveys; A Guide to Assist Larger Public Housing Agencies in Preparing Fair Market Rent Comments." Smaller PHAs should obtain "Rental Housing Surveys; A Guide to Assist Smaller Public Housing Agencies in Preparing Fair Market Rent Comments."

HUD prefers but does not mandate the use of RDD telephone surveys or the more traditional method described in the small PHA survey guide. Other survey methodologies are acceptable as long as they provide statistically reliable, unbiased estimates of the 40th percentile gross rent. Survey samples should preferably be randomly drawn from a complete list of rental units for the FMR area. If this is not feasible, the selected sample must be drawn so as to be statistically representative of the entire rental housing stock of the FMR area. In particular surveys must include units of all rent levels and be representative by structure type (including single-family, duplex and other small rental properties), age of housing unit, and geographic location. All survey results must be fully documented.

V. FMRs for Federal Disaster Areas

Under the authority granted in 24 CFR part 899, the Secretary finds good cause to waive the regulatory requirements that govern requests for geographic area FMR exceptions for areas that are declared disaster areas by the Federal Emergency Management Agency (FEMA) during FY 1996. HUD is prepared to grant disaster-related exceptions up to 10 percent above the applicable FMRs. HUD field offices are authorized to approve such exceptions for: (1) single-county FMR areas and for individual county parts of multi-county FMR areas that qualify as disaster areas under the Robert T. Stafford Disaster Relief and Emergency Assistance Act; if (2) the PHA certifies that damage to the rental housing stock as a result of the disaster is so substantial that it has increased the prevailing rent levels in the affected area. Such exceptions must be requested in writing by the responsible PHAs. Once approved by HUD, they will remain in effect until superseded by the publication of the final FY 1998 FMRs.

VI. Other Matters

A Finding of No Significant Impact with respect to the environment as required by the National Environmental Policy Act (42 U.S.C. 4321–4374) is unnecessary, since the Section 8 Rental Certificate program is categorically excluded from the Department's National Environmental Policy Act procedures under 24 CFR 50.20(d).

The undersigned, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), hereby certifies that this Notice does not have a significant economic impact on a substantial number of small entities, because FMRs do not change the rent from that which would be charged if the unit were not in the Section 8 program.

The General Counsel, as the Designated Official under Executive Order No. 12606, The Family, has determined that this Notice will not have a significant impact on family formation, maintenance, or well-being. The Notice amends Fair Market Rent schedules for various Section 8 assisted housing programs, and does not affect the amount of rent a family receiving rental assistance pays, which is based on a percentage of the family's income.

The General Counsel, as the Designated Official under section 6(a) of Executive Order No. 12611, Federalism, has determined that this Notice will not involve the preemption of State law by Federal statute or regulation and does not have Federalism implications. The Fair Market Rent schedules do not have any substantial direct impact on States, on the relationship between the Federal government and the States, or on the distribution of power and responsibility among the various levels of government.

The Catalog of Federal Domestic Assistance program number is 14.156, Lower-Income Housing Assistance Program (section 8).

Accordingly, the Fair Market Rent Schedules, which will be codified in 24 CFR Part 888, are amended as follows:

Dated: August 30, 1995.

Henry G. Cisneros,

Secretary.

Fair Market Rents for the Section 8 Housing Assistance Payments Program

Schedules B and D—General Explanatory Notes

1. Geographic Coverage

a. The FMRs shown in Schedule B incorporate the Office of Management and Budget's (OMB) most current definitions of metropolitan areas (with the exceptions discussed in paragraph b). HUD uses the OMB Metropolitan Statistical Area (MSA) and Primary Metropolitan Statistical Area (PMSA) definitions for FMR areas because they closely correspond to housing market area definitions. FMRs are housing market-wide rent estimates that are intended to provide housing opportunities throughout the geographic area in which rental housing units are in direct competition.

b. The exceptions are counties deleted from metropolitan areas whose revised OMB definitions were determined by HUD to be larger than the housing market areas. The FMRs for the following counties (shown by the metropolitan area) are calculated separately and are shown in Schedule B within their respective States under the "Metropolitan FMR Areas" listing:

Metropolitan Area and Counties Deleted

Atlanta, GA—Carroll, Pickens, and Walton Counties
Chicago, IL—DeKalb, Grundy and Kendall Counties
Cincinnati-Hamilton, OH–KY–IN—Brown County, Ohio; Gallatin, Grant and Pendleton Counties in Kentucky; and Ohio County, Indiana
Dallas, TX—Henderson County
Flagstaff, AZ–UT—Kane County, UT
Lafayette, LA—St. Landry and Acadia Parishes
New Orleans, LA—St. James Parish
Washington, DC–MD–VA–WV—Berkeley and Jefferson Counties in West Virginia; and Clarke, Culpeper, King George and Warren counties in Virginia

c. FMRs also are established for nonmetropolitan counties and for county equivalents in the United States, for nonmetropolitan parts of counties in the New England states and for FMR areas in Puerto Rico, the Virgin Islands, and the Pacific Islands.

d. FMRs for the areas in Virginia shown in the table below were established by combining the Census data for the nonmetropolitan counties with the data for the independent cities that are located within the county borders. Because of space limitations, the FMR listing in Schedule B includes only the name of the nonmetropolitan county. The complete definitions of these areas including the independent cities are as follows:

VIRGINIA NONMETROPOLITAN COUNTY FMR AREA AND INDEPENDENT CITIES INCLUDED

County	Cities
Allegheny	Clifton Forge and Covington.
Augusta	Staunton and Waynesboro.
Carroll	Galax.
Frederick	Winchester.
Greensville	Emporia.
Henry	Martinsville.
Montgomery	Radford.
Rockbridge	Buena Vista and Lexington.
Rockingham	Harrisonburg.
Southhampton	Franklin.
Wise	Norton.

e. FMRs for Section 8 manufactured home spaces are 30 percent of the two-bedroom Section 8 Rental Certificate program FMRs, with the exception of the areas listed in Schedule D whose manufactured home space FMRs have been revised on the basis of public comments. Once approved, the revised manufactured home space FMRs establish new base-year estimates that

are updated annually using the same data used to estimate the Rental Certificate program FMRs. The FMR area definitions used for manufactured home spaces are the same as for the Section 8 Certificate program.

2. Arrangement of FMR Areas and Identification of Constituent Parts

a. The FMR areas in Schedule B are listed alphabetically by metropolitan FMR area and by nonmetropolitan county within each State. The exception FMRs for manufactured home spaces in Schedule D are listed alphabetically by State.

b. The constituent counties (and New England towns and cities) included in each metropolitan FMR area are listed immediately following the listings of the FMR dollar amounts. All constituent parts of a metropolitan FMR area that are in more than one State can be identified by consulting the listings for each applicable State.

c. Two nonmetropolitan counties are listed alphabetically on each line of the nonmetropolitan county listings.

d. The New England towns and cities included in a nonmetropoliten part of a county are listed immediately following the county name.

e. The FMRs are listed by dollar amount on the first line beginning with the FMR area name.

Department of Housing and Urban Development

Office of the Secretary

Statutorily Mandated Designation of Difficult Development Areas for Section 42 of the Internal Revenue Code of 1986; Notice

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. FR–3956–N–01]

Statutorily Mandated Designation of Difficult Development Areas for Section 42 of the Internal Revenue Code of 1986

AGENCY: Office of the Secretary, HUD.

ACTION: Notice.

SUMMARY: This document provides revised designations of "Difficult Development Areas" for purposes of the Low-Income Housing Tax Credit ("LIHTC") under section 42 of the Internal Revenue Code of 1986, and provides the methodology used by the United States Department of Housing and Urban Development ("HUD"). The new Difficult Development Areas are based on FY 1995 Fair Market Rents ("FMRs"), FY 1995 income limits and 1990 census population counts as explained below. The corrected designations of "Qualified Census Tracts" under section 42 of the Internal Revenue Code published May 1, 1995, at 60 FR 21246 remain in effect.

FOR FURTHER INFORMATION CONTACT: Harold J. Gross, Senior Tax Attorney, Office of the General Counsel, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410, telephone (202) 708–3260, or Kurt G. Usowski, Economist, Division of Economic Development and Public Finance, Office of Policy Development and Research, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410, telephone (202) 708–0426, e-mail Kurt—G.—Usowski@hud.gov. A telecommunications device for deaf persons (TDD) is available at (202) 708–9300. (These are not toll-free telephone numbers.)

Additional copies of this notice are available through HUDUSER at (800) 245–2691 for a small fee to cover duplication and mailing costs. This notice is available electronically on the Internet (World Wide Web) at: gopher://huduser.aspensys.com:73/11/2/d in both downloadable and screen-readable formats.

SUPPLEMENTARY INFORMATION:

Background

The U.S. Treasury Department and the Internal Revenue Service are authorized to interpret and enforce the provisions of the Internal Revenue Code of 1986 (the "Code"), including the Low-Income Housing Tax Credit ("LIHTC") found at section 42 of the Code, as enacted by the Tax Reform Act of 1986 [Pub. L. 99–514], as amended by the Technical and Miscellaneous Revenue Act of 1988 [Pub. L. 100–647]; the Omnibus Budget Reconciliation Act of 1989 [Pub. L. 101–239]; the Omnibus Budget Reconciliation Act of 1990 [Pub. L. 101–508]; the Tax Extension Act of 1991 [Pub. L. 102–227]; and as amended and made permanent by the Omnibus Budget Reconciliation Act of 1993 [Pub. L. 103–66]. The Secretary of HUD is required to designate Difficult Development Areas by section 42(d)(5)(C) of the Code.

In order to assist in understanding HUD's mandated designation of Difficult Development Areas for use in administering section 42 of the Code, a summary of section 42 is provided. The following summary does not purport to bind the Treasury or the IRS in any way, nor does it purport to bind HUD as HUD has no authority to interpret or administer the Code, except in those instances where it has a specific delegation.

Summary of Low Income Housing Tax Credit

The LIHTC is a tax incentive intended to increase the availability of low income housing. Section 42 provides an income tax credit to owners of newly constructed or substantially rehabilitated low-income rental housing projects. The dollar amount of the LIHTC available for allocation by each state (the "credit ceiling") is limited by population. Each state is allocated credit based on $1.25 per resident. Also, states may carry forward unused or returned credit for one year; if not used by then, credit goes into a national pool to be allocated to states as additional credit. State and local housing agencies allocate the state's credit ceiling among low income housing buildings whose owners have applied for the credit.

The credit allocated to a building is based on the cost of units placed in service as low-income units under certain minimum occupancy and maximum rent criteria. In general, a building must meet one of two thresholds to be eligible for the LIHTC: either 20 percent of units must be rent-restricted and occupied by tenants with incomes no higher than 50 percent of the Area Median Gross Income ("AMGI"), or 40 percent of units must be rent restricted and occupied by tenants with incomes no higher than 60 percent of AMGI. The term "rent-restricted" means that gross rent, including an allowance for utilities, cannot exceed 30 percent of the tenant's imputed income limitation (i.e., 50 percent or 60 percent of AMGI). The rent and occupancy thresholds remain in effect for at least 15 years, and building owners are required to enter into agreements to maintain the low income character of the building for an additional 15 years.

The LIHTC reduces income tax liability dollar for dollar. It is taken annually for a term of ten years and is intended to yield a present value of either (1) 70 percent of the "qualified basis" for new construction or substantial rehabilitation expenditures that are not federally subsidized (i.e., financed with tax-exempt bonds or below-market federal loans), or (2) 30 percent of the qualified basis for the acquisition of existing projects or projects that are federally subsidized. The actual credit rates are adjusted monthly for projects placed in service after 1987 under procedures specified in section 42. Individuals can use the credit up to a deduction equivalent of $25,000. This equals $9,900 at the 39.6 percent maximum marginal tax rate. Individuals cannot use the credit against the alternative minimum tax. Corporations, other than S or professional service corporations, can use the credit against ordinary income tax. They cannot use the credit against the alternative minimum tax. These corporations can also deduct the losses from the project.

The qualified basis represents the product of the "applicable fraction" of the building and the "eligible basis" of the building. The applicable fraction is based on the number of low income units in the building as a percentage of the total number of units, or based on the floor space of low income units as a percentage of the total floor space in the building. The eligible basis is the adjusted basis attributable to acquisition rehabilitation, or new construction costs (depending on the type of LIHTC involved). These costs include amounts chargeable to capital account incurred prior to the end of the first taxable year in which the qualified low income building is placed in service. In the case of buildings located in designated Qualified Census Tracts or designated Difficult Development Areas, eligible basis can be increased up to 130 percent of what it would otherwise be. This means that the available credit also can be increased by up to 30 percent. For example, if the 70 percent credit is available, it effectively could be increased up to 91 percent.

Under section 42(d)(5)(C) of the Code, a Qualified Census Tract is any census tract (or equivalent geographic area defined by the Bureau of the Census) in which at least 50 percent of households have an income less than 60 percent of the AMGI. There is a limit on the Qualified Census Tracts in any Metropolitan Statistical Area ("MSA") or Primary Metropolitan Statistical Area ("PMSA") that may be designated to receive an increase in eligible basis: all of the designated census tracts within a given MSA/PMSA may not together contain more than 20 percent of the total population of the MSA/PMSA. For purposes of HUD designations of Qualified Census Tracts, all non-metropolitan areas in a state are treated as if they constituted a single metropolitan area. This Notice does not redesignate Qualified Census Tracts. The corrected designation of Qualified Census Tracts published May 1, 1995, at 60 FR 21246 remains in effect. Qualified Census Tracts will not be redesignated until year 2000 census data become available.

Section 42 defines a Difficult Development Area as any area designated by the Secretary of HUD as an area that has high construction, land, and utility costs relative to the AMGI. Again, limits apply. All designated Difficult Development Areas in MSAs/PMSAs may not contain more than 20 percent of the aggregate population of all MSAs/PMSAs, and all designated areas not in metropolitan areas may not contain more than 20 percent of the aggregate population of all non-metropolitan counties.

Explanation of HUD Designation Methodology

A. Difficult Development Areas

In developing the list of Difficult Development Areas, HUD compared incomes with housing costs. HUD used 1990 Census data and the MSA/PMSA definitions as published by the Office of Management and Budget ("OMB") in OMB Bulletin No. 94–07 on July 5, 1994, *with the exceptions described in section C., below*. The basis for these comparisons was the fiscal year ("FY") 1995 HUD income limits for Very Low Income households ("VLILs") and Fair Market Rents ("FMRs") used for the section 8 Housing Assistance Payments Program. The procedure used in making these calculations follows (Note that while the description of HUD's selection methodology differs from previous designations of Difficult Development Areas, the methodology is mathematically equivalent):

1. For each MSA/PMSA and each non-metropolitan county, a ratio was calculated. This calculation used the FY 1995 two-bedroom FMR and the FY 1995 four-person VLIL. The numerator of the ratio was the area's FY 1995 FMR. The denominator of the ratio was the monthly LIHTC income-based rent limit calculated as $1/12$ of 30 percent of 120 percent of the area's VLIL (where 120 percent of the VLIL was rounded to the nearest $50 and not allowed to exceed 80 percent of the AMGI in areas where the VLIL is adjusted upward from its 50 percent of AMGI base).

2. The ratios of the FMR to the LIHTC income-based rent limit were arrayed in descending order, separately, for MSAs/PMSAs and for non-metropolitan counties.

3. The Difficult Development Areas are those with the highest ratios cumulative to 20 percent of the 1990 population of all metropolitan areas and of all non-metropolitan counties.

B. Application of Population Caps to Difficult Development Area Determinations

In identifying Difficult Development Areas, HUD applied various caps, or limitations, as noted above. The cumulative population of metropolitan Difficult Development Areas cannot exceed 20 percent of the cumulative population of all metropolitan areas and the cumulative population of nonmetropolitan Difficult Development Areas cannot exceed 20 percent of the cumulative population of all nonmetropolitan counties.

In applying these caps, HUD established procedures to deal with how to treat small overruns of the caps. The remainder of this section explains the procedure. In general, HUD stops selecting areas when it is impossible to choose another area without exceeding the applicable cap. The only exceptions to this policy are when the next eligible excluded area contains either a large absolute population or a large percentage of the total population, or the next excluded area's ranking ratio as described above was identical (to three decimal places) to the last area selected, *and* its inclusion resulted in only a minor overrun of the cap. Thus for both the designated metropolitan and non-metropolitan Difficult Development Areas there are minimal overruns of the caps. HUD believes the designation of these additional areas is consistent with the intent of the legislation. Some latitude is justifiable because it is impossible to determine whether the 20 percent cap has been exceeded, as long as the apparent excess is small, due to measurement error. Despite the care and effort involved in a decennial census, it is recognized by the Census Bureau, and all users of the data, that the population counts for a given area and for the entire country are not precise. The extent of the measurement error is unknown. Thus, there can be errors in both the numerator and denominator of the ratio of populations used in applying a 20 percent cap. In circumstances where a strict application of a 20 percent cap results in an anomalous situation, recognition of the unavoidable imprecision in the census data justifies accepting *small* variances above the 20 percent limit.

C. Exceptions to OMB Definitions of MSAs/PMSAs and Other Geographic Matters

As stated in OMB Bulletin 94–07 defining metropolitan areas: OMB establishes and maintains the definitions of the [Metropolitan Areas] MAs solely for statistical purposes * * * OMB does not take into account or attempt to anticipate any nonstatistical uses that may be made of the definitions * * * We recognize that some legislation specifies the use of metropolitan areas for programmatic purposes, including allocating Federal funds.

HUD makes exceptions to OMB definitions in calculating FMRs by deleting counties from metropolitan areas whose OMB definitions are determined by HUD to be larger than their housing market areas. In addition, HUD is required by statute to calculate a separate FMR and VLIL for Westchester County, New York, which OMB includes as part of the New York, NY PMSA. Thus the following counties are assigned their own FMRs and VLILs and evaluated as if they were separate metropolitan areas for purposes of designating Difficult Development Areas.

Metropolitan Area and Counties Deleted

Atlanta, GA—Carrol, Pickens, and Walton Counties.
Chicago, IL—DeKalb, Grundy, and Kendall Counties.
Cincinnati-Hamilton, OH-KY-IN—Brown County, Ohio; Gallatin, Grant, and Pendleton Counties in Kentucky; and Ohio County, Indiana.
Dallas, TX—Henderson County.
Lafayette, LA—St. Landry and Acadia Parishes.
New York, NY—Westchester County.
New Orleans, LA—St. James Parish.
Washington, DC-MD-VA-WV—Clarke, Culpeper, King George, and Warren Counties in Virginia; and Berkeley and Jefferson Counties in West Virginia.
Affected MSAs/PMSAs are assigned the indicator "(part)" in the list of Metropolitan Difficult Development Areas.

Finally, in the New England states (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont) OMB defines MSAs/PMSAs according to county subdivisions or Minor Civil Divisions ("MCDs") rather than county boundaries. Thus, when a

New England county is designated as a Nonmetropolitan Difficult Development Area, only that part of the county (the group of MCDs) not included in any MSA/PMSA is the Nonmetropolitan Difficult Development Area. Geographic definitions of the nonmetropolitan parts of New England counties can be found in HUD's Rule establishing FY 1995 FMRs at 60 FR 42230 or 24 CFR Part 888. Affected counties are assigned the indicator "(part)" in the list of Nonmetropolitan Difficult Development Areas.

Future Designations

Difficult Development Areas are designated annually as updated income and FMR data become available. Qualified Census Tracts will not be redesignated until year 2000 census data become available.

Effective Date

The list of Difficult Development Areas is effective for allocations of credit made after December 31, 1995. In the case of a building described in Internal Revenue Code section 42(h)(4)(B), the list is effective if the bonds are issued and the building is placed in service after December 31, 1995. The corrected designations of Qualified Census Tracts published May 1, 1995, at 60 FR 21246 remain in effect.

Other Matters

Environmental Impact

In accordance with 40 CFR 1508.4 of the CEQ regulations and 24 CFR 50.20 of the HUD regulations, the policies and actions in this document are determined not to have the potential of having a significant impact on the quality of the human environment and therefore further environmental review under the National Environmental Policy Act is not necessary.

Regulatory Flexibility Act

In accordance with 5 U.S.C. § 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this notice does not have a significant economic impact on a substantial number of small entities. The notice involves the designation of "Difficult Development Areas" for use by political subdivisions of the States in allocating the LIHTC as required by section 42 of the Code, as amended. This notice places no new requirements on the States, their political subdivisions, or the applicants for the credit. This notice also details the technical methodology used in making such designations.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that the policies contained in this notice will not have any substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, the notice is not subject to review under the order. The notice merely designates "Difficult Development Areas" for use by political subdivisions of the States in allocating the LIHTC as required by section 42 of the Code, as amended. The notice also details the technical methodology used in making such designations.

Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive Order 12606, *The Family*, has determined that this notice does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. The notice involves the designation of "Difficult Development Areas" for use by political subdivisions of the States in allocating the LIHTC as required by section 42 of the Code, as amended. The notice also details the technical methodology used in making such designations.

Dated: September 11, 1995.

Henry G. Cisneros,

Secretary.

Part V

Department of the Interior

Bureau of Indian Affairs

Power Rate Adjustment; Mission Valley Power Utility, Montana; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Power Rate Adjustment: Mission Valley Power Utility, Montana

ACTION: Notice of Proposed Rate Increase.

SUMMARY: The Bureau of Indian Affairs is proposing to increase the cost of electric power (energy) to customers of Mission Valley Power (MVP), the entity operating the power facility of the Flathead Indian Irrigation Project of the Flathead Reservation. The Bureau of Indian Affairs (BIA) has been informed that the Montana Power Company (MPC), which sells electric power to MVP, has raised its wholesale power rates by approximately 2.0 percent. The MPC increase went into effect on September 5, 1995, and is based on adjustments in the Consumer Price index pursuant to the Federal Energy Regulatory Commission license for MPC's Kerr Dam Hydroelectric Facility. Accordingly, the BIA is proposing to adjust the local retail power rates charged by MVP to reflect the increased cost of purchased power.

DATES: Comments must be submitted on or before October 18, 1995.

ADDRESSES: Written comments on rate changes should be sent to: Assistant Secretary—Indian Affairs, Bureau of Indian Affairs, Attn: Branch of Irrigation and Power, MS#4559–MIB, 1849 "C" Street NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Area Director, Bureau of Indian Affairs, Portland Area Office, 911 N.E. 11th Avenue, Portland, Oregon 97232–4169, telephone (503) 231–6702; or, General Manager, Mission Valley Power, P.O. Box 890, Polson, Montana 59860–0890. Telephone (406) 883–5361 or 1–800–823–3758 (in-State Watts).

SUPPLEMENTARY INFORMATION: The authority to issue this document is vested in the Secretary of the Interior by 5 U.S.C. 301; the Act of August 7, 1946, c. 802, Section 3 (60 Stat. 895; 25 U.S.C. 385c); the Act of May 25, 1948 (62 Stat. 269); and the Act of December 23, 1981, section 112 (95 Stat. 1404). The Secretary has delegated this authority to the Assistant Secretary—Indian Affairs pursuant to part 209 Departmental Manual, Chapter 8. 1A and Memorandum dated January 25, 1994, from Chief of Staff, Department of the Interior, to Assistant Secretaries, and Heads of Bureaus and Offices. The approximate 2.0 percent MPC increase causes the BIA to raise its retail rates to recover $28,000 which is the approximate annual financial impact of that increase. This proposed adjustment is the result of an increase in the electric power rates charged by MPC, one of three sources of electric power marketed by MVP. The MPC increase, which went into effect on September 5, 1995, is based on adjustments in the Consumer Price index pursuant to the Federal Energy Regulatory Commission license for MPC's Kerr Dam Hydroelectric Facility. The following table illustrates the financial impact of the new retail rates on each rate class:

Rate class	Present rate	New rate
Residential:		
Basic Charge	$11.00/mo. (includes 125kwh)	No Change
Energy Charge	0.04817/kwh (over 122 kwh)	$0.04828
#2 General:		
Basic Charge	11.00/mo. (includes 107 kwh)	No Change
Energy Charge	0.05604/kwh (over 107 kwh)	0.05615
Irrigation:		
Horsepower Charge	11.25/HP	11.30/HP
Energy Charge	0.03638/kwh	0.03642
Minimum Seasonal Charge	132.00 or $6.00/HP, whichever is greater	No Change
Small and Large Commercial:		
Basic Charge	None	No Change
Monthly Minimum	38.00	No Change
Demand Rate	4.50/KW of billing demand	4.51/KW
Energy Rate	0.04305/kwh—First 18,000 kwh	0.04345
	0.03588/kwh—Over 18,000 kwh	0.03592
Area Lights:		
Area light installed on existing pole or structure:		
7,000 lumen unit, M.V.*	7.00	7.00
20,000 lumen unit, M.V.*	10.00	10.00
9,000 lumen unit, H.P.S.	6.50	6.50
22,000 lumen unit, H.P.S.	8.75	8.75
Area light installed with new pole:		
7,000 lumen unit, M.V.*	8.75	8.75
20,000 lumen unit, M.V.*	11.50	11.50
9,000 lumen unit, M.V.*	8.25	8.25
22,000 lumen unit, H.P.S*	10.50	10.50
Street Lighting (metered):		
Basic Charge	11.00/mo (includes 107kwh)	11.00
Energy Charge	0.0560/kwh (over 107 kwh)	0.05615
Street Lighting (Unmetered)	This rate class applies to municipalities or communities where there are ten or more lighting units billed in a group. This rate schedule is subject to a negotiated contract with MVP.	No Change

*Continuing service only.

Dated: September 12, 1995.

Ada E. Deer,

Assistant Secretary, Indian Affairs.

Part VI

Department of Transportation

Federal Aviation Administration

14 CFR Part 71
Alteration of the Salt Lake City Class B Airspace; Final Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 93–AWA–11]

RIN 2120–AF56

Alteration of the Salt Lake City Class B Airspace Area, Salt Lake City, Utah

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Salt Lake City Class B airspace area, Salt Lake City, Utah. This rule will maintain the ceiling of the Salt Lake City Class B airspace area at 10,000 feet mean sea level (MSL); subdivide and redefine existing subareas by altering its floors and boundaries except for Area B; and create additional Areas E, F, G, H, I, J, K, L, and M. This rule will improve the flow of aviation traffic and enhance safety in the Salt Lake City area, while accommodating the concerns of the airspace users.

EFFECTIVE DATE: 0701 UTC, November 9, 1995.

FOR FURTHER INFORMATION CONTACT: Norman W. Thomas, Airspace and Obstruction Evaluation Branch (ATP–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; Telephone: (202) 267–9230.

SUPPLEMENTARY INFORMATION:

Background

Airspace reclassification, effective September 16, 1993, discontinued the use of the term "Terminal Control Area" (TCA) and replaced it with the designation "Class B Airspace." This change in terminology is reflected in this rule. On May 21, 1970, the FAA published Amendment No. 91–78 to part 91 of Title 14 Code of Federal Aviation Regulations (CFR) that provided for the establishment of Class B airspace areas (35 FR 7782). The Class B airspace area program was developed to reduce the midair collision potential in the congested airspace surrounding airports with high density air traffic by providing an area in which all aircraft will be subject to certain operating rules and equipment requirements.

The density of traffic and the type of operations being conducted in the airspace surrounding major terminals increase the probability of midair collisions. In 1970, an extensive study found that the majority of midair collisions occurred between a general aviation (GA) aircraft and an air carrier, military, or another GA aircraft. The basic causal factor common to these conflicts was the mix of uncontrolled aircraft operating under visual flight rules (VFR) and controlled aircraft operating under instrument flight rules (IFR). Class B airspace areas provides a method to accommodate the increasing number of IFR and VFR operations. The regulatory requirements of Class B airspace areas afford the greatest protection for the greatest number of people by providing air traffic control (ATC) increased capability to provide aircraft separation service, this minimizes the mix of controlled and uncontrolled aircraft. To date, the FAA has established a total of 29 Class B airspace areas.

On June 21, 1988, the FAA published a final rule which required aircraft to have Mode C equipment when operating within 30 nautical miles of any designated Class B airspace area primary airport from the surface up to 10,000 feet MSL, excluding those aircraft not certificated with an engine-driven electrical system, balloons, or gliders (53 FR 23356).

Discussions of Comments

The proposed changes to the SLC Class B airspace area were published in a Notice of Proposed Rulemaking (NPRM) on August 4, 1995 (60 FR 40020). The FAA did not receive any written comments regarding the proposed alteration of the SLC Class B airspace area. However, the FAA placed two documents in the docket to memorialize communication between the FAA and one user group that occurred during the comment period.

The FAA has determined that alterations to the SLC Class B airspace area, as contained herein, will promote the safe and efficient use of the airspace and will meet users' concerns.

The Rule

This amendment to 14 CFR part 71 modifies Class B airspace area around Salt Lake City International Airport. The Class B airspace area utilizes the Runway 17 ILS/DME antenna, latitude and longitude points, and landmarks. The upper limits of the Salt Lake City Class B airspace area remain at 10,000 feet mean sea level (MSL); however, the subareas within the area are modified. Area A is reduced to the west and northeast of the Salt Lake City International Airport. Modifying Area A enhances the utilization of the airspace for northeast-bound and west-bound VFR traffic transiting over the Skypark Airport. Area C is revised to provide more transition routes for VFR operations, particularly for aircraft not equipped with the required flotation equipment to fly over the Greater Salt Lake. Additionally, this area will relieve the potential for traffic congestion around the Tooele Valley Airport. Areas D and E are subdivided and retain the original floor altitudes of 6,000 and 7,000 feet MSL respectively. The floor of Area F is raised from 6,000 to 7,000 feet MSL to provide more airspace for the VFR aircraft transiting the area of Point of the Mountain. The floor of Area G is raised from 7,000 to 8,000 feet MSL. Area H is altered to provide controlled airspace for the new instrument approach procedures to the new parallel instrument runway 16R/34L at the Salt Lake City International Airport. A new area, Area M, is established north of the Salt Lake City International airport to include the airspace from 9,000 to 10,000 feet MSL to provide controlled airspace for the new instrument approach procedures to the new parallel instrument runway 16R/34L at the Salt Lake City International Airport. All alterations of the Salt Lake City Class B airspace area are depicted on the chart found in the attached appendix.

Class B airspace designations are published in Paragraph 3000 of FAA Order 7400.9C, dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR part 71.1. The Class B airspace area listed in this airspace alteration will be published subsequently in the Order. The coordinates for this airspace docket are based on North American Datum 83.

Regulatory Evaluation

This section summarized the regulatory evaluation prepared by the FAA on the amendment to 14 CFR part 71 to alter the SLC Class B airspace. This summary and the full regulatory evaluation quantify, to the extent practicable, estimated costs to the private sector, consumers, and Federal, State, and local governments as well as anticipated benefits.

The FAA has determined that this rulemaking is not "a significant rulemaking action," as defined by Executive Order (EO) 12866, Regulatory Planning and Review, and therefore, no Regulatory Impact Analysis is required. Nevertheless, in accordance with the Department of Transportation policies and procedures, the FAA has evaluated the anticipated costs and benefits associated with this final rule and are summarized below. A detailed discussion of costs and benefits is contained in the full evaluation in the docket for this final rule.

Benefit-Cost Analysis

This regulatory evaluation analyzes the potential costs and benefits of the modifications to the Salt Lake City International Airport, Utah, Class B airspace area. These modifications will raise the floor of the Class B airspace in Areas A, C, and D and reduce the lateral boundaries east of the airport in Area E to enhance safe and efficient VFR traffic operations. The new floor altitudes will be raised by as much as 500 to 6,000 feet MSL in areas A, C, and D without changing the original lateral boundaries. The original areas of the Class B airspace will be subdivided and renamed as A, K, and L (from A); C, D, and F (from C); E and G (from D); H (from F); and I (from E). These modifications will provide additional airspace for VFR traffic operations. Also, an area of controlled airspace (Area M) will be added to the north, and the lateral boundaries of Area H will be expanded to the south with floor and ceiling altitudes of 9,000 and 10,000 feet MSL respectively. These two modifications are designed to provide additional controlled airspace for new IFR procedures to the new parallel instrument runway that is scheduled to open in the latter part of 1995. The Salt Lake City Tower/Tracon (SLC ATCT) has determined that the above modifications will not adversely impact their ability to monitor and control IFR and VFR traffic in the Class B airspace.

The rule will enhance aviation safety and operational efficiency by lowering the risk of midair collisions, while accommodating the legitimate concerns of system users. The modifications to the Salt Lake City Class B airspace will provide VFR traffic with more operating room, aid controllers vectoring IFR traffic to and from the new parallel instrument runway, and improve the SLC ATCT's ability to separate controlled and uncontrolled aircraft near the floor and lateral boundaries of the airspace.

Cost

The FAA has determined that the implementation of the rule will not impose any additional cost of either the agency or aircraft operators for the reasons discussed below.

In terms of the FAA, the rule will not impose any additional administrative costs for personnel, facilities, or equipment. This assessment is based on the fact that the modification will not increase the volume of air traffic using the Salt Lake City Class B airspace. The simultaneous contraction and expansion of the Class B airspace will not dramatically change the overall size of the airspace and will not impose additional workloads on current personnel and equipment resources. Required revisions to aeronautical charts will be accomplished during normal charting cycles. Therefore, no additional costs beyond routine operating expenses will be imposed.

Costs to Aircraft Operators

The modifications should impose little, if any, additional cost for items such as required avionics equipment, installation, or circumnavigation. Many affected GA aircraft operators are assumed to already have the types of avionic equipment (such as an operable two-way radio and very high frequency omni-directional range receiver) required for entering a Class B airspace area. The only aircraft without Mode C transponders would be aircraft not originally certified with an engine-driven electrical system or not subsequently certified with such a system installed. These potential costs to aircraft operators without Mode C transponders have already been accounted for by the Mode C rule.

Similarly, the modifications should not adversely impact aircraft operators who routinely operate under IFR, primarily large air carriers, business jets, commuters and air taxis, nor should the proposed modifications impose substantial cost to VFR users as most are assumed to have the required avionics equipment.

Benefits

The modifications are expected to generate benefits primarily in the form of safety enhancements to the aviation community and the flying public. Such benefits include reduced aviation fatalities and property damages as a result of a lowered risk of midair collisions. The changes to the airspace will enable VFR aircraft to circumnavigate the Salt Lake City Class B airspace area operations, thereby enhancing operational efficiency.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by Federal regulations. The RFA requires a Regulatory Flexibility Analysis if a rule will have "a significant economic impact on a substantial number of small entities." FAA Order 2100.14A outlines the FAA's procedures and criteria for implementing the RFA. A substantial number of small entities is defined as a number that is 11 or more and which is more than one-third of the small entities subject to the NPRM. The only potentially affected small entities will be unscheduled air taxis owning nine or fewer aircraft and flight training schools around the Oquirrh Mountains and none meet the applicable definition. The rule will maintain aviation safety and operational efficiency for VFR traffic while imposing negligible additional costs or requirements. Therefore, the regulation will not have a significant economic impact on a substantial number of small entities.

International Trade Impact Assessment

The rule will neither have an effect on the sale of foreign aviation products or services in the United States, nor the sale of United States' products or services in foreign countries. The regulation will impose negligible costs on aircraft operators or aircraft manufacturers (United States or foreign).

Federalism Implications

This rule will not have substantial direct effects on the States, the relationship between the national government and the States, or the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612 (52 FR 41695; October 30, 1987), it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Paperwork Reduction Act

This rule contains no information collection requests requiring approval of the Office of Management and Budget pursuant to the Paperwork Reduction Act (44 U.S.C. 3507 et seq.).

International Civil Aviation Organization (ICAO) and Joint Aviation Regulations (JAR)

The FAA has determined that this regulation will not conflict with any international agreements of the United States.

Conclusion

For reasons discussed in the preamble, and based on the findings in the Regulatory Flexibility Determination and the International Trade Impact Assessment, the FAA has determined that this regulation is not a "significant regulatory action" under Executive Order 12866. In addition, the FAA certifies that this regulation will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

This regulation is not considered significant under DOT Order 2100.5, Policies and Procedures for Simplification, Analysis and Review of Regulations. A final regulatory evaluation of the regulation, including a final Regulatory Flexibility Determination and International Trade Impact Analysis has been placed in the docket.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p389; 14 CFR 11.69.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR part 71.1 of the Federal Aviation Administration Order 7400.9C, Airspace Designations and Reporting Points, dated August 17, 1995, and effective September 16, 1995, is amended as follows:

Paragraph 3000—Subpart B–Class B Airspace

* * * * *

ANM UT B Salt Lake City, UT [Revised]

Salt Lake City International Airport (Primary Airport)
(Lat. 40°47′12″N, long. 111°58′08″W).
Salt Lake City International Airport Runway 17 ILS (I–BNT) ILS/DME Antenna
(Lat. 40°46′10″N, long. 111°57′44″W).

Area A. That airspace extending upward from the surface to and including 10,000 feet MSL beginning at a point where the 13-mile arc of the Salt Lake City International Airport Runway 17 ILS (I–BNT) instrument landing system/distance measuring equipment (ILS/DME) antenna intercepts Interstate 15 (I–15), extending south on I–15 until intercepting a 4.3-mile arc from the Salt Lake City International Airport, extending south along the 4.3-mile arc from the Salt Lake City International Airport until intercepting I–15, extending south on I–15 until intercepting 11-mile arc of the I–BNT ILS/DME antenna clockwise until intercepting the Union Pacific railroad tracks, extending southwest on the Union Pacific railroad tracks until intercepting the 13-mile arc of the I–BNT ILS/DME antenna clockwise until the point of beginning, excluding Areas C, D, K, and L described hereinafter.

Area B. That airspace extending upward from 7,600 feet MSL to and including 10,000 feet MSL between the 13-mile radius and the 25-mile radius of the I–BNT ILS/DME antenna, excluding that airspace south of the Union Pacific railroad tracks and that airspace east of where the 25-mile arc intercepts the Ogden-Hinckley Airport, UT, Class D airspace area and the Ogden, Hill AFB, UT, Class D airspace area until intercepting U.S. Highway 89, extending south on U.S. Highway 89 until intercepting the 11-mile arc of the I–BNT ILS/DME antenna.

Area C. That airspace extending upward from 6,500 feet MSL to and including 10,000 feet MSL beginning at a point where the 11-mile arc of the I–BNT ILS/DME antenna intercepts the Union Pacific railroad tracks extending southwest on the Union Pacific railroad tracks until intercepting the 13-mile arc of the I–BNT ILS/DME antenna clockwise until a point at lat. 40°46′30″N, long. 112°14′50″W, extending east to a bend on interstate 80 (I–80) at lat. 40°46′30″N, long. 112°08′48″W, then southeast to the drive-in theater north of the city of Magna at lat. 40°43′00″N, long. 112°04′48″W, then southeast to the water tank at lat. 40°40′00″N, long. 112°03′33″W, extending southeast to a point at lat. 40°39′20″N, long. 112°02′33″W, extending south along long. 112°02′33″W, until intercepting the 11-mile arc of the I–BNT ILS/DME antenna then northwest on the 11-mile arc of the I–BNT ILS/DME antenna clockwise to the point of beginning.

Area D. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL beginning at a point at lat. 40°39′20″N, long. 112°02′33″W, extending east to a point at lat. 40°39′20″N, long. 111°58′13″W, extending south along long. 111°58′13″W, until intercepting the 11-mile arc of the I–BNT ILS/DME antenna, then counterclockwise until intercepting I–15, extending south on I–15 until intercepting a line at lat. 40°31′05″N, extending west on lat. 40°31′05″N, until a point at lat. 40°31′05″N, long. 112°00′33″W, then north along long. 112°00′33″W, to intercept the 11-mile arc of the I–BNT ILS/DME antenna at lat. 40°35′22″N, long. 112°00′33″W, then clockwise on the 11-mile arc of I–BNT ILS/DME antenna to long. 112°02′33″N, then to the point of beginning.

Area E. That airspace extending upward from 7,000 feet MSL to and including 10,000 feet MSL beginning at a point where the 11-mile arc of the I–BNT ILS/DME antenna intercepts a line at long. 112°09′03″W, bounded on the west by long. 112°09′03″W, on the south by a line at lat. 40°31′05″N, to a point at lat. 40°31′05″N, long. 112°00′33″W, extending north to lat. 40°35′22″N, long. 112°00′33″W, then clockwise on the 11-mile arc of the I–BNT ILS/DME antenna to the point of beginning.

Area F. That airspace extending upward from 7,000 feet MSL to and including 10,000 feet MSL beginning at a point where a line at lat. 40°31′05″N, intercepts I–15 extending west on lat. 40°31′05″N, to long. 112°00′33″W, then south on long. 112°00′33″W, to lat. 40°27′30″N, then east along lat. 40°27′30″N, to I–15, then north to the point of beginning.

Area G. That airspace extending upward from 8,000 feet MSL to and including 10,000 feet MSL beginning at the Bingham Copper Mine at lat. 40°31′05″N, long. 112°09′03″W, extending south to lat. 40°27′30″N, long. 112°09′03″W, then east to lat. 40°27′30″N, long. 112°00′33″W, then north to lat. 40°31′05″N, extending west to the point of beginning.

Area H. That airspace extending upward from 9,000 feet MSL to and including 10,000 feet MSL beginning at a point where a line at lat. 40°27′30″N intercepts the I–15 freeway, extending south along I–15 to lat. 40°23′30″N, extending west along lat. 40°23′30″N to long. 111°54′00″W thence south along long. 111°54′00″W, until intercepting the 30-mile arc of the I–BNT ILS/DME, then clockwise along the 30-mile arc until intercepting long. 112°06′00″W then north along long. 112°06′00″W until intercepting lat. 40°23′30″N, extending west along lat. 40°23′30″N, until along long. 112°09′06″W, then north along long. 112°09′06″W until intercepting lat. 40°27′30″N extending east to the point of beginning, excluding that airspace contained in Restricted Areas R–6412A and R–6412B when active.

Area I. That airspace extending upward from 9,000 feet MSL to and including 10,000 feet MSL beginning at a point where a line at long. 111°45′03″W, intercepts Interstate 84 (I–84), extending south on long. 111°45′03″W, until intercepting lat. 40°31′05″N, extending west until intercepting I–15, then north along I–15 until intercepting the Salt Lake City International Airport 4.3-mile arc, extending north along the Salt Lake City International Airport 4.3-mile arc until intercepting I–15, then north along I–15 until intercepting U.S. Highway 89, extending north along U.S. Highway 89 until intercepting the Ogden, Hill AFB, UT, Class D airspace area, then north along the Ogden, Hill AFB, UT, Class D airspace area until intercepting I–84, extending east along I–84 until the point of beginning, excluding that block of airspace east of Salt Lake City International Airport between lat. 40°52′16″N, and lat. 40°42′00″N.

Area J. That airspace extending upward from 7,800 feet MSL to and including 10,000 feet MSL beginning at a point where the 25-mile arc of the I–BNT ILS/DME antenna intercepts the Ogden-Hinckley Airport, UT, Class D airspace area counterclockwise along the Ogden-Hinckley Airport, UT, Class D airspace area and the Ogden, Hill AFB, UT, Class D airspace area until intercepting the 25-mile arc of the I–BNT ILS/DME antenna to the point of beginning.

Area K. That airspace extending upward from 6,000 feet MSL to and including 10,000 feet MSL beginning at a point on the 13-mile arc of the I–BNT ILS/DME antenna at lat. 40°46′30″N, long. 111°14′50″W, extending east to the bend on I–80 at lat. 40°46′30″N, long. 112°08′48″W, then north along long. 112°08′48″W, until intercepting the 13-mile arc of the I–BNT ILS/DME antenna, then counterclockwise along the 13-mile arc of the I–BNT ILS/DME antenna to the point of beginning.

Area L. That airspace extending upward from 7,000 feet MSL to and including 10,000 feet MSL west of I–15 bounded on the south by Cudahy Lane, on the west by Redwood Road until intercepting the Utah Power Transmission lines, extending northeast

along the power transmission lines until intercepting the 13-mile arc of the I–BNT ILS/DME antenna to the point of beginning.

Area M. That airspace extending upward from 9,000 MSL to and including 10,000 feet MSL beginning at a point where the 25-mile arc of the I–BNT ILS/DME intersects the I–15 freeway south of the Ogden Municipal Airport extending north along the I–15 freeway to the 30-mile arc of the I–BNT ILS/DME, thence counterclockwise along the 30-mile arc to long. 112°10′00″W, then south along long. 112°10′00″W to the 25-mile arc of the I–BNT ILS/DME, then clockwise along the 25-mile arc to the point of beginning.

The President

Proclamation 6823—National Hispanic Heritage Month, 1995

Executive Order 12970—Further Amendment to Executive Order No. 12864

Federal Register
Vol. 60, No. 180
Monday, September 18, 1995

Presidential Documents

Title 3—

The President

Proclamation 6823 of September 14, 1995

National Hispanic Heritage Month, 1995

By the President of the United States of America

A Proclamation

America has always drawn strength from the extraordinary diversity of its people. The earliest settlers came to this great land seeking opportunity, bringing with them an abundant wealth of traditions from countries the world over. Thus the vibrant Hispanic culture has long been entwined with our Nation's heritage, and people of Latin American and Spanish ancestry have infused our national life with energy and vision. In the arts, the sciences, the business world, academia, and government, Hispanic Americans have added immeasurably to our progress.

Later this month, I will proudly bestow on the late Willie Velasquez our Nation's highest civilian honor, the Presidential Medal of Freedom. His landmark work to register Hispanic voters helped to bring these Americans into the mainstream of American public life, and the Southwest Voter Registration Education Project that he founded continues to thrive today.

Last year, I was pleased to sign an Executive order creating the President's Advisory Commission and White House Initiative on Educational Excellence for Hispanic Americans. Recognizing the vital importance of providing every one of our children with fundamental knowledge and skills, the Commission was charged with creating an agenda to increase educational opportunities for Hispanic Americans.

Today, as we stand on the threshold of a new century, we look to the outstanding contributions of Hispanic Americans for inspiration and leadership. Let us join in support of Hispanic children and families as they strive to fulfill the American Dream.

To pay tribute to the achievements of Hispanic citizens and to honor the importance of Latin American and Spanish traditions in our national culture, the Congress, by Public Law 100–402, has authorized and requested the President to issue annually a proclamation designating September 15 through October 15 as "National Hispanic Heritage Month."

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, do hereby proclaim September 15 through October 15, 1995, as National Hispanic Heritage Month. I call upon government officials, educators, and all the people of the United States to honor this observance with appropriate programs, ceremonies, and activities, and encourage all Americans to rededicate themselves to the pursuit of equality.

IN WITNESS WHEREOF, I have hereunto set my hand this fourteenth day of September, in the year of our Lord nineteen hundred and ninety-five, and of the Independence of the United States of America the two hundred and twentieth.

William J. Clinton

Executive Order 12970 of September 14, 1995

Further Amendment to Executive Order No. 12864

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to extend the United States Advisory Council on the National Information Infrastructure, it is hereby ordered that section 4(b) of Executive Order No. 12864, as amended, is further amended by deleting "for a period of two years from the date of this order, unless the Council's charter is subsequently extended prior to the aforementioned date" and inserting in lieu thereof "until June 1, 1996, unless otherwise extended."

William J Clinton

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $883.00 domestic, [illegible]0.75 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at (202) 512-1800 from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to (202) 512-2233.

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar. 31, 1995. The CFR volume issued April 1, 1990, should be retained.

[5] No amendments to this volume were promulgated during the period July 1, 1991 to June 30, 1995. The CFR volume issued July 1, 1991, should be retained.

[6] No amendments to this volume were promulgated during the period January 1, 1993 to December 31, 1994. The CFR volume issued January 1, 1993, should be retained.

[7] No amendments to this volume were promulgated during the period October 1, 1993, to September 30, 1994. The CFR volume issued October 1, 1993, should be retained.

[8] No amendments to this volume were promulgated during the period April 1, 1994 to March 31, 1995. The CFR volume issued April 1, 1994, should be retained.

[9] Note: Title 19, CFR Parts 141-199, revised 4-1-95 volume is being republished to restore inadvertently omitted text.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Atlanta, GA, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to swais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial-in users should use communications software and modem to call (202) 512–1661 and login as swais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

Rules and Regulations

Federal Register
Vol. 60, No. 181
Tuesday, September 19, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 955

[Docket No. FV95–955–2IFR]

Vidalia Onions Grown in Georgia; Expenses and Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This interim final rule authorizes expenditures and establishes an assessment rate under Marketing Order No. 955 for the 1995–96 fiscal period. Authorization of this budget enables the Vidalia Onion Committee (Committee) to incur expenses that are reasonable and necessary to administer the program. Funds to administer this program are derived from assessments on handlers.

DATES: Effective September 16, 1995, through September 15, 1996. Comments received by October 19, 1995, will be considered prior to issuance of a final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this action. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2523–S, Washington, DC 20090–6456. Comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Martha Sue Clark, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2523–S, Washington, DC 20090–6456, telephone 202–720–9918, or Aleck J. Jonas, Southeast Marketing Field Office, Fruit and Vegetable Division, AMS, USDA, P.O. Box 2276, Winter Haven, FL 33883–2276, telephone 941–299–4770.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 955 (7 CFR part 955), regulating the handling of Vidalia onions grown in Georgia. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

The Department of Agriculture (Department) is issuing this rule in conformance with Executive Order 12866.

This interim final rule has been reviewed under Executive Order 12778, Civil Justice Reform. Under the provisions of the marketing order now in effect, Vidalia onions are subject to assessments. It is intended that the assessment rate as issued herein will be applicable to all assessable onions handled during the 1995–96 fiscal period, which begins September 16, 1995, and ends September 15, 1996. This interim final rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 250 producers of Georgia Vidalia onions under this marketing order, and approximately 145 handlers. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000. The majority of Vidalia onion producers and handlers may be classified as small entities.

The budget of expenses for the 1995–96 fiscal period was prepared by the Vidalia Onion Committee, the agency responsible for local administration of the marketing order, and submitted to the Department of Agriculture for approval. The members of the Committee are producers and handlers of Vidalia onions. They are familiar with the Committee's needs and with the costs of goods and services in their local area and are thus in a position to formulate an appropriate budget. The budget was formulated and discussed in a public meeting. Thus, all directly affected persons have had an opportunity to participate and provide input.

The assessment rate recommended by the Committee was derived by dividing anticipated expenses by expected shipments of Vidalia onions. Because that rate will be applied to actual shipments, it must be established at a rate that will provide sufficient income to pay the Committee's expenses.

The Committee met July 20, 1995, and unanimously recommended a 1995–96 budget of $343,000, $11,000 more than the previous year. Budget items for 1995–96 which have increased compared to those budgeted for 1994–95 (in parentheses) are: Dues and subscriptions, $2,500 ($2,000), equipment maintenance, $1,600 ($750), office overhead, $6,000 ($3,000), office supplies, $3,500 ($3,000), telephone, $5,000 ($4,000), printing, $2,200 ($2,000), postage and courier, $6,000 ($5,000), employee salaries, $65,000

($60,000), miscellaneous general and administrative, $1,700 ($1,000), marketing, $146,500 ($132,000), $6,500 for retirement, which was included in the employee benefits category last year, and $25,400 for a newly created compliance category. Items which have decreased compared to those budgeted for 1994–95 (in parentheses) are: Equipment purchases, $2,000 ($3,000), FICA employer, $3,100 ($4,250), employee benefits (health and dental), $7,000 ($13,500), research, $48,500 ($80,000), and ($8,000) for contract outside labor, for which no funding was recommended this year.

The Committee also unanimously recommended an assessment rate of $0.10 per 50-pound bag or equivalent of Vidalia onions, the same as last year. This rate, when applied to anticipated shipments of 3,017,500 50-pound bags or equivalents of Vidalia onions, would yield $301,750. The Committee also anticipates shipments of 50,000 50-pound bags of previously unassessed Vidalia onions which have been in storage, which will yield an additional $5,000 in assessment income. This, along with $4,250 in interest income and $32,000 from the Committee's authorized reserve, will be adequate to cover budgeted expenses. Funds in the Committee's authorized reserve of $167,766 are within the maximum permitted by the order of three fiscal periods' expenses.

While this rule will impose some additional costs on handlers, the costs are in the form of uniform assessments on handlers. Some of the additional costs may be passed on to producers. However, these costs will be offset by the benefits derived by the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this rule will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, including the information and recommendations submitted by the Committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined upon good cause that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) The Committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis; (2) the fiscal period begins on September 16, 1995, and the marketing order requires that the rate of assessment for the fiscal period apply to all assessable onions handled during the fiscal period; (3) handlers are aware of this action which was unanimously recommended by the Committee at a public meeting and is similar to other budget actions issued in past years; and (4) this interim final rule provides a 30-day comment period, and all comments timely received will be considered prior to finalization of this action.

List of Subjects in 7 CFR Part 955

Marketing agreements, Onions, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 955 is amended as follows:

PART 955—VIDALIA ONIONS GROWN IN GEORGIA

1. The authority citation for 7 CFR part 955 is revised to read as follows:

Authority: 7 U.S.C. 601–674.

2. A new § 955.208 is added to read as follows:

Note: This section will not appear in the Code of Federal Regulations.

§ 955.208 Expenses and assessment rate.

Expenses of $343,000 by the Vidalia Onion Committee are authorized, and an assessment rate of $0.10 per 50-pound bag or equivalent of Vidalia onions is established for the fiscal period ending September 15, 1996. Unexpended funds may be carried over as a reserve.

Dated: September 13, 1995.

Sharon Bomer Lauritsen,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410–02–P

Animal and Plant Health Inspection Service

9 CFR Parts 50, 51, 77, 78, and 80

[Docket No. 95–006–2]

Tuberculosis, Brucellosis, and Paratuberculosis in Cattle and Bison; Identification Requirements

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the tuberculosis, brucellosis, and paratuberculosis regulations by requiring brands for certain cattle and bison to be placed on the hip rather than the jaw. This action will reduce distress to cattle and bison that need to be identified with a brand by moving the brand to a location that is less sensitive, but that is still clearly visible. We are also allowing certain cattle and bison to be moved interstate to slaughter without branding if they are accompanied directly to slaughter by an Animal and Plant Health Inspection Service or State representative or are moved in vehicles closed with official seals. These actions respond to increasing public concern that branding on the jaw causes unnecessary distress to cattle and bison.

EFFECTIVE DATE: October 19, 1995.

FOR FURTHER INFORMATION CONTACT: Dr. J.D. Kopec, Senior Staff Veterinarian, Cattle Diseases and Surveillance, VS, APHIS, Suite 3B08, 4700 River Road Unit 36, Riverdale, MD 20737–1231; (301) 734–6188.

SUPPLEMENTARY INFORMATION:

Background

In accordance with the regulations in 9 CFR parts 50, 51, 77, and 78 (referred to below as the regulations), the Animal and Plant Health Inspection Service (APHIS) administers programs designed to control and eradicate tuberculosis and brucellosis in cattle and bison. As part of these programs, hot-iron branding on the jaw and on the tailhead has been used to identify certain cattle and bison. Specifically, hot-iron branding on the jaw has been required or allowed in the following cases: (1) To identify cattle or bison that have contracted or been exposed to tuberculosis or brucellosis; (2) to identify certain cattle or bison to be moved interstate to slaughter because of tuberculosis or brucellosis; and (3) to identify adult cattle or bison that have been immunized against brucellosis.

There has been increasing public concern that hot-iron branding on the jaw may cause undue distress to cattle and bison. A number of animal rights groups and other members of the public have requested that APHIS remove hot-iron branding on the jaw from our regulatory programs.

On May 17, 1995, we published in the **Federal Register** (60 FR 26377–26381, Docket No. 95–006–1) a proposal to remove hot-iron branding on the jaw from the regulations in 9 CFR parts 50, 51, 77, and 78. In places where branding has been required to be on the jaw, we proposed to move the required location of the brand to high on the hip near the tailhead. In places where the regulations have offered an owner the option of branding either on the jaw or on the hip, we proposed to remove the option of

branding on the jaw, but retain the brand on the hip. We also proposed several alternatives to branding certain cattle and bison that are to be moved interstate for slaughter. We proposed to allow brucellosis reactor and exposed cattle or bison moving directly to slaughter to be moved without branding if they are accompanied directly to slaughter by an APHIS or State representative. We proposed to allow tuberculosis reactor and exposed cattle or bison moving interstate directly to slaughter to be moved without branding if they are moved in vehicles closed with official seals applied and removed by an APHIS representative, a State representative, an accredited veterinarian; or an individual authorized for this purpose by an APHIS representative. We proposed to allow brucellosis reactor and exposed cattle or bison moving interstate in slaughter channels (e.g, to a specifically approved stockyard or an approved intermediate handling facility, and then to slaughter) and brucellosis exposed cattle and bison moving interstate to quarantined feedlots to be moved without branding if they are moved in vehicles closed with official seals applied and removed by an APHIS representative, a State representative, an accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. We also proposed that tuberculosis reactor cattle and bison would have to be identified by a permanent and legible "TB" tattooed in the left ear, and by spraying the left ear with yellow paint, in order to be moved interstate without branding.

We solicited comments concerning our proposal for 30 days ending June 16, 1995. We received 11 comments by that date. They were from livestock associations, animal welfare organizations, veterinarians, and members of Congress. Three commenters opposed the proposed rule; four commenters supported the proposed rule completely; and the remaining four commenters supported the proposed rule but asked APHIS to consider making some additions and changes. We carefully considered all of the comments we received. They are discussed below by topic.

Several commenters supported the proposed amendments to the tuberculosis and brucellosis regulations, but asked that we make the same amendments to the regulations in 9 CFR part 80, "Paratuberculosis in Domestic Animals," which have required a "T" brand on the left jaw for paratuberculosis reactor cattle. We have chosen to make this amendment in our final rule. The amendment is in keeping with the intent of the proposal to remove branding on the jaw from all APHIS disease control programs, and our failure to include part 80 in the proposed rule was an oversight. In addition, we are making a change to require that paratuberculosis reactors be branded with the letter "J" instead of the letter "T". Paratuberculosis is also commonly known as Johne's disease. A "J" brand would distinguish paratuberculosis reactors from bovine tuberculosis reactors (which are branded with the letter "T"). We are therefore amending 9 CFR part 80 to require that paratuberculosis reactors be branded with the letter "J" high on the left hip near the tailhead. We are also adding the option for paratuberculosis reactor cattle moving interstate directly to slaughter to be moved without branding if they are accompanied by an APHIS or State representative; and for paratuberculosis reactor cattle moving interstate in slaughter channels to be moved without branding if they are moved in vehicles closed with official seals applied and removed by an APHIS representative, a State representative, an accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. We are also making another change to part 80. Section 80.4 currently states that the inscription on the metal eartags for paratuberculosis reactors must read "U.S.B.A.I. Reacted" or "U.S. Reacted." These inscriptions are out of date, so we are amending § 80.4 to require that the inscription read "U.S. Reactor." This inscription is consistent with the inscriptions required by the regulations for other disease reactors.

One commenter was opposed to the proposed options for moving tuberculosis and brucellosis reactor and exposed cattle and bison to slaughter without branding. The commenter argued that branding ensures that such animals are slaughtered, and said that the agency will be unable to accomplish its goals of disease eradication if identification requirements are weakened. We have made no changes based on this comment. As discussed in the proposed rule, we believe that the provisions under which we would allow disease-affected animals to be moved without branding will provide owners with an alternative to branding without negatively affecting APHIS' ability to conduct its disease eradication activities.

Two commenters stated that the location of the brands should either remain on the jaw or be moved to the neck or high on the shoulder. They argue that some State livestock agencies have set aside the jaw for brands used in State and Federal animal disease control programs. They also argue that a Federal brand on the hip may be confused or conflict with registered ownership brands on the hip—a number of which are similar to the "S", "T", "B", and "V" brands called for in the proposed rule. We have made no changes based on these comments. The same location specified in the proposed rule for all brands required by 9 CFR parts 50, 51, 77, and 78 has been used by APHIS for the placement of "S" and "V" brands under the regulations in 9 CFR part 78 since 1983, and for "M" brands under 9 CFR part 92 since the beginning of this year. We are unaware of any identification problems resulting from those existing brands. Further, the proposed location of "high on the hip near the tailhead" is a different location on the hip from where registered ownership brands are placed, and we therefore do not believe that any confusion will result.

One commenter stated that it is unnecessary to require tuberculosis reactors moved without branding in sealed vehicles to be tattooed and spray-painted on the ear. The commenter believes that properly sealed vehicles, eartags, accompanying shipping permits, and good communication with meat inspection personnel would provide adequate assurance that tuberculosis reactors are not diverted from slaughter. Conversely, another commenter stated that the proposed requirement to tattoo and spray-paint tuberculosis reactors should also be applied to tuberculosis exposed animals and brucellosis reactors and exposed animals that are moved interstate to slaughter without branding. The latter commenter argues there are numerous opportunities to divert cattle and bison from slaughter—for example, in slaughter pens, or when cattle and bison must be transferred from one truck to another due to equipment failure—and that for this reason it is important that all cattle and bison moving to slaughter because of tuberculosis or brucellosis be permanently identified.

We have made no changes to the rule based on these comments. We recognize that there may be incentives to divert valuable, but diseased, cattle or bison from slaughter channels in order to avoid the monetary loss from the slaughter of the animal. We stated in the proposed rule that we believe this incentive is significantly greater for tuberculosis reactors than for other diseased cattle or bison, because unlike tuberculosis exposed or brucellosis reactor and exposed cattle or bison, tuberculosis reactors can only be sold for consumption if the meat is cooked.

Currently, there are only four slaughtering facilities in the United States that have established markets for meat required to be cooked, so this option is not available to the majority of cattle and bison owners. Consequently, most tuberculosis reactor cattle and bison sent to slaughter constitute an average monetary loss of $400 or more to the owner, creating an incentive to divert valuable animals that are tuberculosis reactors from slaughter to be used for some other purpose. Since tuberculosis exposed animals and brucellosis reactor and exposed animals do not have to be cooked before they can be sold for consumption, their slaughter value is potentially greater, and the incentive to divert is not as significant. In light of this, we believe that the precautions we proposed for moving tuberculosis exposed animals and brucellosis reactor and exposed animals to slaughter without branding are adequate to prevent diversion of the animals and dissemination of the diseases they carry. Perhaps more importantly, the post-mortem examination and specific disposition of tuberculosis reactor carcasses required by the United States Department of Agriculture's Food Safety and Inspection Service (FSIS) regulations is more stringent than that required of tuberculosis exposed and brucellosis reactor and exposed carcasses. It is imperative that tuberculosis reactors are identified at slaughter to ensure they are properly examined and disposed of in accordance with FSIS requirements.

One commenter stated that APHIS should consider eliminating the need for branding altogether by requiring that all brucellosis and tuberculosis reactor and exposed cattle and bison moved interstate to slaughter be accompanied by an APHIS or State representative or be moved in vehicles closed with official seals applied and removed by an APHIS representative, a State representative, an accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. We have made no changes based on this comment.

It is our belief that most cattle and bison owners will choose to move their animals to slaughter without branding using one of the options provided in the proposed rule. Branding a herd of cattle or bison is time-consuming, difficult, and costly because of the effort and personnel needed to restrain each animal. It is far easier to simply herd the animals into a truck which is then sealed by the APHIS representative, State representative, or accredited veterinarian who identified the herd. However, there are always circumstances under which it is impractical or unfeasible for owners to move their animals in this manner, such as lack of a proper vehicle, unavailability of APHIS or State personnel, or inability to market the animals immediately. Under such circumstances, it would be necessary for owners to have the cattle or bison branded.

The same commenter also asked that we amend numerous paragraphs in § 78.9 of the brucellosis regulations, "Cattle from herds not known to be affected," to allow such cattle to be moved interstate without branding if they are accompanied directly to slaughter by an APHIS or State representative. Section 78.9 concerns movement of cattle from brucellosis Class Free, Class A, Class B, and Class C States and areas to quarantined feedlots, specifically approved stockyards, or approved intermediate handling facilities, and then to slaughter. Section 78.9 requires certain cattle moving from Class B and Class C States and areas to be branded. We proposed to amend this section to allow those cattle which are required to be branded to be moved without branding if they are moved in vehicles closed with official seals applied and removed by an APHIS representative, a State representative, an accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. We have made no changes based on this comment.

We did not propose the option which the commenter requests because, given the large number of movements under § 78.9 to feedlots, stockyards, and handling facilities, and given the limited number of APHIS and State personnel available to accompany such shipments, it would be impractical, if not impossible, to offer this option. It is for this reason that we proposed to allow reactor and exposed cattle and bison to be moved without branding and accompanied by an APHIS or State representative only if they are moving directly to slaughter. We believe that allowing cattle that would otherwise be branded to be moved without branding in slaughter channels if they are moved in a sealed vehicle is adequate to allow owners to move their animals without branding if they so choose. Further, there are currently no Class B or Class C States or areas. Therefore, no cattle are branded under the regulations in § 78.9.

One commenter asked that APHIS allow owners to mark their cattle in some way other than with a hot iron, such as freeze-branding. The commenter said that, according to previous APHIS policy, a mark for a disease-affected animal must be "permanent, distinct, and legible"; APHIS' assertion in the proposed rule that a mark must also be "instantly recognizable" is a novel criteria. Relative to this, the commenter said that "(c)learly what APHIS intends here is not that all letter marks be instantaneously readable, but, rather, that letter marks be readable *at the time animals begin their interstate journeys to slaughter*." Accordingly, even though freeze-branding takes a minimum of 18 to 21 days to become readable, and in order to claim indemnity for cattle and bison destroyed because of tuberculosis or brucellosis the owner must destroy the animals within 15 days, APHIS should allow identification options such as freeze-branding for cattle and bison owners who do not wish to claim indemnity. We have made no changes based on this comment.

In the past, APHIS has set forth its criteria that a mark for identifying cattle and bison must be permanent, distinct, and legible. In a recent rulemaking, which is cited by the commenter, we offered these criteria as justification for allowing marking methods such as freeze-branding to be employed when identifying certain cattle from Mexico for importation into the United States (Docket No. 93–006–3, 59 FR 65893–65897). The Mexican cattle of concern in that rulemaking are not known to be diseased. We require that such animals be identified by a distinct, permanent, and legible mark for traceback purposes, in the event that they are diseased and U.S. livestock are exposed to them. The mark must be visible at the time the Mexican cattle are presented for importation, but the owner may brand them at any time prior to the importation, making branding methods that take several weeks to become visible a viable option.

This rulemaking, in contrast, concerns cattle and bison which are known to be affected with tuberculosis or brucellosis, or are known to have been exposed to an animal that is affected with tuberculosis or brucellosis. It is imperative that animals known to be affected with a disease as destructive as brucellosis or tuberculosis be either identified immediately or moved to slaughter in such a manner that there is no significant risk the animals will be diverted from their destination. For this reason we did not propose to allow marking methods that are not instantly recognizable for identifying brucellosis and tuberculosis reactor and exposed cattle and bison.

As we stated in the proposal, the necessity for an instantly recognizable mark is so that the animals are not unknowingly commingled with healthy animals after they leave the premises where they were identified for slaughter. Even if the "instantly recognizable" requirement were to be waived to allow freeze-branding, the owners of reactor or exposed cattle and bison would have to keep those animals under quarantine for the 18–21 days that it takes for a freeze-brand to become visible. That extra time on the farm would increase the chances that healthy animals might become exposed or infected. A central goal of the brucellosis and tuberculosis eradication programs is to identify diseased animals and get them away from other animals before the disease can spread. To require the animals to be kept on the farm runs counter to that goal. The owners of the quarantined cattle and bison would also be subject to economic losses associated with feeding and caring for the animals, potential decreases in market prices, and animals dying before sale.

The same commenter asked that we allow a tattoo and paint as an alternative to hot-iron branding. Since we say in the proposal that we believe a tattoo and yellow paint would be permanent and legible, the commenter asserts that it follows that it would be distinct as well, and would therefore fulfill the three criteria of distinct, permanent, and legible. We have made no changes based on this comment. We proposed that tuberculosis reactor cattle and bison that are moved to slaughter without branding be moved in a sealed vehicle or accompanied by an APHIS or State representative, and also be marked in the left ear with a tattoo and the ear be sprayed with yellow paint. Marking the ear with a permanent and legible tattoo will help eliminate the possibility that a tuberculosis reactor could be sold for any purpose other than slaughter, because the seller would risk a civil lawsuit should the buyer discover the tattoo in the reactor's ear. We proposed this type of mark as an alternative to branding in this case because we needed to provide an alternative, but did not believe we could safely allow tuberculosis reactors to move to slaughter without some sort of permanent mark.

There are problems with tattooing that prevent us from offering it as a general alternative for all disease-affected animals. One is that the tattoo must be on skin (not hair) in order to be legible. We have chosen the inside of the ear as the most accessible and reliable area on which to place a tattoo. Further, the animal's head must be restrained in order to tattoo the ear, and in order to see the tattoo at a later time. Yellow paint on the ear can help identify an animal which has a "TB" tattoo, but it is not foolproof, as paint can wear or rub off. Tuberculosis reactor animals are moved directly to slaughter, making it less likely that this will occur. Brucellosis exposed animals are often shipped through feedlots and other slaughter channels, increasing the possibility that the paint will have worn off by the time the animal reaches the slaughtering facility. For these reasons, we have chosen to confine the use of a tattoo as disease identification to tuberculosis reactors that are moved to slaughter without branding.

One commenter asked that we state in the regulations that the proposed shipments in sealed vehicles for unmarked cattle and bison would be subject to the requirements of the Twenty-Eight Hour Law. In conjunction with this, the commenter asked that we add to the regulations definitions for "moved directly" and "sealed vehicle" to clarify that these stipulations do not conflict with the requirements of the Twenty-Eight Hour Law. We have made no changes based on this comment.

The commenter is referring to a statute at 45 U.S.C 71–74, which requires, among other things, that animals may not be confined during transport for a period longer than 28 consecutive hours without unloading them in a humane manner for rest, water, and feeding. The regulations in 9 CFR part 89, "Statement of Policy Under the Twenty-Eight Hour Law," set forth APHIS policy concerning the authorizing statute at 45 U.S.C. 71–74, and are written to apply only to transport by railcar. Virtually no transportation of tuberculosis and brucellosis affected cattle and bison is done today by railcar, as nearly all such transport today is by truck. The Twenty-Eight Hour Law does not apply to transport by truck.

In our proposal, we state that the official seals on a sealed vehicle must be "applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative." The operator of the conveyance in which the animals are being transported will have been furnished with the telephone numbers of APHIS representatives in the States of origin and destination prior to his or her departure from the State of origin. If, for any reason, the operator is unable to reach the slaughtering establishment as planned, or otherwise determines that it is necessary to unload the animals from the sealed vehicle, the operator will be able to contact an APHIS representative, who will make the necessary arrangements for APHIS or State personnel to travel to the location of the conveyance in order to remove the seal, apply a new seal when the animals are reloaded, and take whatever precautions are necessary in the interim to ensure that the animals are maintained in isolation sufficient to prevent dissemination of the diseases they carry. This practice is standard, and we do not believe it is necessary to describe it in the regulations.

The same commenter suggested that APHIS create an incentive for cattle and bison owners to ship their tuberculosis- and brucellosis-affected cattle and bison to slaughter without branding by awarding certificates of recognition to owners who regularly opt to ship their animals in sealed vehicles or under APHIS or State escort as an alternative to branding. The commenter said that APHIS should publicize the award of these certificates periodically through agency press releases and reports. The commenter reasons that most cattle producers and brokers will continue to brand their disease-affected animals despite the alternative offered in the proposed rule, and that if APHIS is committed to reducing distress to cattle and bison, some further incentive will need to be offered.

We are making no changes based on this comment. As stated in response to a previous comment, it is our belief that most cattle and bison owners will choose to move their animals to slaughter without branding using one of the options provided in this rule. Branding a herd of cattle or bison is time-consuming, difficult, and costly because of the effort and personnel needed to restrain each animal. It is far easier to simply herd the animals into a truck which is then sealed. Regardless of this belief, the primary concern of APHIS is to move these animals to slaughter without disseminating the diseases they carry to healthy animals. While we are attempting to achieve this in the most humane manner possible, there are circumstances under which we would advise branding over the other alternatives we proposed, such as if the cattle or bison cannot be moved immediately to slaughter. For this reason, we are not promoting the consistent use of one alternative over another. Further, it is likely that most owners of tuberculosis or brucellosis affected herds would not elect to publicize the fact that their animals were slaughtered because of these diseases. We are offering owners several options for moving their animals, and we are available to advise them about which option would be most appropriate, and safe, given the circumstances under which their animals will be moved. If a private entity wishes to award such certificates of recognition, and they find that cattle and bison owners are willing to accept such recognition, they may feel free to do so.

One commenter pointed out that, although the Supplementary Information in the proposal states that "(w)e would allow brucellosis reactor and exposed cattle or bison moving directly to slaughter to be moved without branding if they are accompanied directly to slaughter by an APHIS or State representative," we do not include this allowance in the regulatory amendments to part 78. Our failure to make the change was an oversight, as it was clearly our intention to allow exposed cattle and bison to be moved directly to slaughter without branding if they are accompanied directly to slaughter by an APHIS or State representative, and we did make the necessary changes to part 51 to allow for that. We are, therefore, in this final rule amending § 78.8(a)(2)(iii)(D) to allow brucellosis exposed cattle and bison to be moved directly to slaughter without branding if they are accompanied directly to slaughter by an APHIS or State representative.

Therefore, based on the rationale set forth in the proposed rule and in this document, we are adopting the provisions of the proposal as a final rule, with the changes discussed in this document.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

We do not anticipate that this rule will have an economic impact on any entities, large or small. Cattle and bison that have contracted or been exposed to tuberculosis, brucellosis, or paratuberculosis, or that have been immunized against brucellosis, are already required to be identified by a brand; this rule will simply change the location of the brand. Under the tuberculosis, brucellosis, and paratuberculosis eradication programs, the Animal and Plant Health Inspection Service and cooperating States bear the costs of branding cattle and bison, and changing the location of the brand will not result in any change in costs to APHIS or the States. Further, although branding is generally done on the ranch or farm where the cattle or bison are located, no new equipment will be necessary for branding the cattle or bison on the hip, so there will be no new costs to the owner of the animals.

This rule will also allow certain cattle and bison to be moved interstate to slaughter without branding if they are accompanied directly to slaughter by an APHIS or State representative, or if they are moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. Such movement will be a voluntary alternative to branding, and will not impose any additional costs to owners of cattle or bison that are to be moved interstate.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12778

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are in conflict with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

List of Subjects

9 CFR Part 50

Animal diseases, Bison, Cattle, Hogs, Indemnity payments, Reporting and recordkeeping requirements, Tuberculosis.

9 CFR Part 51

Animal diseases, Cattle, Hogs, Indemnity payments, Reporting and recordkeeping requirements.

9 CFR Part 77

Animal diseases, Bison, Cattle, Reporting and recordkeeping requirements, Transportation, Tuberculosis.

9 CFR Part 78

Animal diseases, Bison, Cattle, Hogs, Quarantine, Reporting and recordkeeping requirements, Transportation.

9 CFR Part 80

Animal diseases, Livestock, Transportation.

Accordingly, 9 CFR parts 50, 51, 77, 78, and 80 are amended as follows:

PART 50—ANIMALS DESTROYED BECAUSE OF TUBERCULOSIS

1. The authority citation for part 50 continues to read as follows:

Authority: 21 U.S.C. 111–113, 114, 114a, 114a–1, 120, 121, 125, and 134b; 7 CFR 2.17, 2.51, and 371.2(d).

2. In § 50.6, paragraphs (a) and (b) are revised to read as follows:

§ 50.6 Identification of animals to be destroyed because of tuberculosis.

* * * * *

(a) *Reactor cattle and bison.* Reactor cattle and bison shall be identified by branding the letter "T," at least 5 by 5 centimeters (2 by 2 inches) in size, high on the left hip near the tailhead and by attaching to the left ear an approved metal eartag bearing a serial number and the inscription "U.S. Reactor", or a similar State reactor tag. Reactor cattle and bison may be moved interstate to slaughter without branding if they are permanently identified by the letters "TB" tattooed legibly in the left ear, they are sprayed on the left ear with yellow paint, and they are either accompanied by an APHIS or State representative or moved directly to slaughter in vehicles closed with official seals. Such official seals must be applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative.

(b) *Exposed cattle and bison.* Exposed cattle and bison shall be identified by branding the letter "S," at least 5 by 5 centimeters (2 by 2 inches) in size, high on the left hip near the tailhead and by attaching to the left ear an approved metal eartag bearing a serial number. Exposed cattle and bison may be moved interstate to slaughter without branding if they are either accompanied by an APHIS or State representative or moved directly to slaughter in vehicles closed with official seals. Such official seals must be applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative.

* * * * *

PART 51—ANIMALS DESTROYED BECAUSE OF BRUCELLOSIS

3. The authority citation for part 51 continues to read as follows:

Authority: 21 U.S.C. 111–113, 114, 114a, 114a–1, 120, 121, 125, and 134b; 7 CFR 2.17, 2.51, and 371.2(d).

4. In § 51.5, paragraph (b) is revised to read as follows:

§ 51.5 Identification of animals to be destroyed because of brucellosis.

* * * * *

(b) Except as provided in paragraph (b)(4) of this section, cattle and bison to be destroyed because of brucellosis shall be individually identified prior to moving interstate by attaching to the left ear a metal tag bearing a serial number and the inscription "U.S. Reactor," or a similar State reactor tag, and must be:

(1) "B" branded (as defined in § 78.1); or

(2) Accompanied directly to slaughter by an APHIS or State representative; or

(3) Moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying permit.

(4) Reactor and exposed cattle and bison in herds scheduled for herd depopulation may be moved interstate without eartagging or branding if they are identified by USDA approved backtags and either accompanied directly to slaughter by an APHIS or State representative or moved directly to slaughter in vehicles closed with official seals. Such official seals must be applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative.

* * * * *

PART 77—TUBERCULOSIS

5. The authority citation for part 77 continues to read as follows:

Authority: 21 U.S.C. 111, 114, 114a, 115–117, 120, 121, 134b, and 134f; 7 CFR 2.17, 2.51, and 371.2(d).

6. In § 77.5, the heading is amended by removing the word "comtaining" and adding the word "containing" in its place, and paragraphs (a)(1) and (b)(1) are revised to read as follows:

§ 77.5 Interstate movement of cattle and bison that are exposed, reactors, or suspects, or from herds containing suspects.

(a) *Reactor cattle and bison.* * * *

(1) Reactor cattle and bison must be individually identified by attaching to the left ear an approved metal eartag bearing a serial number and the inscription "U.S. Reactor", or a similar State reactor tag, and must be:

(i) Branded with the letter "T," at least 5 by 5 centimeters (2 by 2 inches) in size, high on the left hip near the tailhead; or

(ii) Permanently identified with the letters "TB" tattooed legibly in the left ear and sprayed with yellow paint on the left ear, and either accompanied directly to slaughter by an APHIS or State representative or moved directly to slaughter in vehicles closed with official seals. Such official seals must be applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative.

* * * * *

(b) *Exposed cattle and bison.* * * *

(1) Exposed cattle and bison must be individually identified by attaching to the left ear an approved metal eartag bearing a serial number, and must be:

(i) Branded with the letter "S," at least 5 by 5 centimeters (2 by 2 inches) in size, high on the left hip near the tailhead; or

(ii) Accompanied directly to slaughter by an APHIS or State representative; or

(iii) Moved directly to slaughter in vehicles closed with official seals. Such official seals must be applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative.

* * * * *

PART 78—BRUCELLOSIS

7. The authority citation for part 78 continues to read as follows:

Authority: 21 U.S.C. 111–114a–1, 114g, 115, 117, 120, 121, 123–126, 134b, and 134f; 7 CFR 2.17, 2.51, and 371.2(d).

Subpart A—General Provisions

§ 78.1 [Amended]

8. Section 78.1 is amended as follows:

a. In the definition for *"B" branded,* the phrase "at least 5 sq. cm. (2X2 inches) in size on the left jaw" is removed and "high on the left hip near the tailhead and at least 5 by 5 centimeters (2 by 2 inches) in size" is added in its place.

b. In the definition for *Official adult vaccinate,* paragraph (b)(1) is amended by removing "on the right jaw or" and by adding "at least 5 by 5 centimeters (2 by 2 inches) in size" immediately after "tailhead".

c. In the definition for *"S" branded,* the phrase "at least 5 sq. cm. (2X2 inches) in size on the left jaw or high on the tailhead (over the fourth to the seventh coccygeal vertebrae)" is removed and "high on left hip near the tailhead and at least 5 by 5 centimeters (2 by 2 inches) in size" is added in its place.

Subpart B—Restrictions on Interstate Movement of Cattle Because of Brucellosis

9. In § 78.7, paragraph (b) is revised to read as follows:

§ 78.7 Brucellosis reactor cattle.

* * * * *

(b) *Identification.* Brucellosis reactor cattle must be individually identified prior to moving interstate by attaching to the left ear a metal tag bearing a serial number and the inscription "U.S. Reactor," or a metal tag bearing a serial number designated by the State animal health official for identifying brucellosis reactors, and must be:

(1) "B" branded (as defined in § 78.1); or

(2) Accompanied directly to slaughter by an APHIS or State representative; or

(3) Moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying permit.

* * * * *

10. Section 78.8 is amended as follows:

a. Paragraph (a)(2)(iii)(D) is redesignated as paragraph (a)(2)(iii)(E); and a new paragraph (a)(2)(iii)(D) is added to read as set forth below.

b. The period at the end of paragraphs (a)(3)(iii)(C), (a)(5)(iii)(C), and (b)(3)(ii) is removed, and "; or" is added in its place; and new paragraphs (a)(3)(iii)(D), (a)(5)(iii)(D), and (b)(3)(iii) are added to read as set forth below.

§ 78.8 Brucellosis exposed cattle.

* * * * *

(a) * * *

(2) * * *

(iii) * * *

(D) Accompanied directly to slaughter by an APHIS or State representative; or

* * * * *

(3) * * *

(iii) * * *

(D) Moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying permit or "S" brand permit.

* * * * *

(5) * * *

(iii) * * *

(D) Moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying permit or "S" brand permit.

* * * * *

(b) * * *

(3) * * *

(iii) Moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying permit or "S" brand permit.

* * * * *

11. Section 78.9 is amended by removing the period and adding "; or" in its place at the end of the following paragraphs:

a. (c)(1)(v)(C).
b. (c)(1)(vii)(C).
c. (c)(2)(i)(C).
d. (c)(2)(ii)(B).
e. (d)(1)(v)(C).
f. (d)(1)(vii)(C).
g. (d)(2)(i)(C).
h. (d)(2)(ii)(B).

12. Section 78.9 is amended by adding new paragraphs (c)(1)(v)(D), (c)(1)(vii)(D), (c)(2)(i)(D), (c)(2)(ii)(C), (d)(1)(v)(D), (d)(1)(vii)(D), (d)(2)(i)(D), and (d)(2)(ii)(C) to read as follows:

§ 78.9 Cattle from herds not known to be affected.

* * * * *

(c) * * *

(1) * * *

(v) * * *

(D) They are accompanied by an "S" brand permit and moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying "S" brand permit.

* * * * *

(vii) * * *

(D) They are accompanied by an "S" brand permit and moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying "S" brand permit.

(2) * * *

(i) * * *

(D) A quarantined feedlot, a specifically approved stockyard and then directly to a quarantined feedlot, or an approved intermediate handling facility and then directly to a quarantined feedlot if the cattle are accompanied by an "S" brand permit and moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying "S" brand permit.

(ii) * * *

(C) They are accompanied by an "S" brand permit and moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying "S" brand permit.

* * * * *

(d) * * *

(1) * * *

(v) * * *

(D) They are accompanied by an "S" brand permit and moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying "S" brand permit.

* * * * *

(vii) * * *

(D) They are accompanied by an "S" brand permit and moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying "S" brand permit.

(2) * * *

(i) * * *

(D) A quarantined feedlot, a specifically approved stockyard and then directly to a quarantined feedlot, or an approved intermediate handling facility and then directly to a quarantined feedlot if the cattle are accompanied by an "S" brand permit and moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying "S" brand permit.

(ii) * * *

(C) They are accompanied by an "S" brand permit and moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying "S" brand permit.

* * * * *

Subpart C—Restrictions on Interstate Movement of Bison Because of Brucellosis

13. In § 78.22, paragraph (b) is revised to read as follows:

§ 78.22 Brucellosis reactor bison.

* * * * *

(b) *Identification.* Brucellosis reactor bison must be individually identified prior to moving interstate by attaching to the left ear a metal tag bearing a serial number and the inscription "U.S. Reactor," or a metal tag bearing a serial number designated by the State animal health official for identifying brucellosis reactors, and must be:

(1) "B" branded (as defined in § 78.1); or

(2) Accompanied directly to slaughter by an APHIS or State representative; or

(3) Moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative. The official seal numbers must be recorded on the accompanying permit.

* * * * *

PART 80—PARATUBERCULOSIS IN DOMESTIC ANIMALS

14. The authority citation for part 80 is revised to read as follows:

Authority: 21 U.S.C. 111–113, 114a–1, 115, 117, 120, 121, and 125; 7 CFR 2.17, 2.51, and 371.2(d).

15. In § 80.4, paragraph (a) is revised to read as set forth below.

§ 80.4 Movement of paratuberculosis reactors.

* * * * *

(a) Cattle and other domestic animals that have reacted to such a test must be individually identified by attaching to

the left ear an approved metal eartag bearing a serial number and the inscription "U.S. Reactor", or a similar State reactor tag. Cattle must also be:

(1) Branded with the letter "J," at least 5 by 5 centimeters (2 by 2 inches) in size, high on the left hip near the tailhead; or

(2) Accompanied directly to slaughter by an APHIS or State representative; or

(3) Moved in vehicles closed with official seals applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative.

* * * * *

Done in Washington, DC, this 13th day of September 1995.

Patricia Jensen,

Acting Assistant Secretary, Marketing and Regulatory Programs.

[FR Doc. 95–23191 Filed 9–18–95; 8:45 am]

BILLING CODE 3410–34–P

NUCLEAR REGULATORY COMMISSION

10 CFR Part 21

RIN 3150–AF01

Procurement of Commercial Grade Items by Nuclear Power Plant Licensees

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations to provide added flexibility in procuring commercial grade items for safety-related service by nuclear power plant licensees. This action provides the requirements for the procurement of basic components, which will be procured initially as commercial grade items with subsequent dedication for safety-related service, in a manner that avoids unnecessary delay and expense while maintaining an adequate level of plant safety.

EFFECTIVE DATE: October 19, 1995.

ADDRESSES: Copies of the public record, including the final regulatory analysis and any public comments received on the proposed rule, may be examined and copied for a fee in the Commission's Public Document Room at 2120 L Street, NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: M. L. Au, P.E., Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 415–6181; E-mail MLA@nrc.gov.

SUPPLEMENTARY INFORMATION:

Background

On October 24, 1994 (59 FR 53372), the NRC published a proposed rule in the **Federal Register** that would clarify and add flexibility to 10 CFR Part 21 requirements for the procurement of commercial grade items for safety-related service by nuclear power plant licensees. This action was in response to a petition for rulemaking (PRM–21–2) from the Nuclear Management and Resources Council (NUMARC), which has been incorporated into the Nuclear Energy Institute (NEI). The notice of receipt of the petition for rulemaking was published on October 14, 1993 (58 FR 53159). The petitioner contended that many of the manufacturers and suppliers of original equipment no longer maintain programs that meet the requirements of Appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants," to 10 CFR Part 50, "Domestic Licensing of Production and Utilization Facilities," because of the high cost of maintaining and implementing these programs relative to the diminishing demand for plant parts. Thus, according to NEI, an increasing number of safety-related items are being purchased as commercial grade items from manufacturers and suppliers who no longer maintain quality assurance programs required by Appendix B to 10 CFR Part 50. Because this is a relatively small market, the petitioner stated that many vendors are unwilling to develop and maintain evaluation and notification procedures that meet the reporting requirements in 10 CFR Part 21. With fewer vendors agreeing to comply with these requirements, the petitioner claimed that it is becoming increasingly difficult for nuclear power plant licensees to procure items for safety-related applications.

The petitioner believed that the sections in 10 CFR Part 21 that relate to procurement of commercial grade items, the dedication of these items for use in safety-related applications, and the reporting requirements associated with these items are unworkable and ineffective and consequently may adversely affect safety. Furthermore, the petitioner believed that the effect of these provisions has been to discourage vendors from maintaining programs that meet NRC requirements and to even refuse to provide parts to licensees. To alleviate these problems, the petitioner proposed the following three changes to 10 CFR Part 21:

First, the petitioner suggested that the NRC broaden the definition of "commercial grade item" in 10 CFR 21.3 to read as follows: "Commercial grade item means any item that has not been dedicated for use as a basic component." Essentially this definition would cover any item obtained on the open market. The petitioner believed that allowing commercially available items to qualify as commercial grade items would result in more reasonable prices and delivery times with no adverse impacts on safe plant operations.

Second, the petitioner suggested a more flexible generic definition of "dedication" in 10 CFR 21.3 to read as follows: "Dedication is the evaluation process undertaken to provide reasonable assurance that a commercial grade item to be used as a basic component will perform its intended function." According to the petitioner, dedication methods could include testing, inspection, surveying the commercial grade supplier to determine that the appropriate quality control is in place, observing the manufacturing process, and analyzing the historical record of the item for acceptable performance. The petitioner also proposed that the dedicating entity maintain documentation of the dedication process for an audit or inspection.

The petitioner believed that the benefits of establishing this approach would be that the licensee or third-party performing the dedication:

(1) Understands the safety significance and function of the proposed component;

(2) Is able to identify the characteristics necessary to perform its intended function better than the manufacturer; and

(3) Is responsible for the quality of the commercial grade item.

This would require the party performing the dedication to determine the suitability of the component by analyzing its ability to perform successfully in a safety-related application.

Third, the petitioner suggested that the responsibility for reporting defects and failures to comply for commercial grade items that have been dedicated should reside with the entity responsible for performing the dedication process. The petitioner suggested that the following language be added to 10 CFR 21.21(b): "The entity that performs the dedication is responsible for identifying, evaluating and reporting the deviations and failures to comply associated with substantial safety hazards of a commercial grade item." Since the manufacturers, suppliers, and sub-tier suppliers of commercial grade items do not necessarily know whether the item is destined for a safety-related application, the petitioner believes it is appropriate to clarify that the responsibility for reporting defects and failures to comply found in commercial grade items falls on the entity performing the dedication process.

To sum up, the petitioner requested that 10 CFR Part 21 be amended to:

(1) Replace the existing definition of commercial grade item with a more inclusive definition;

(2) Include a flexible generic process for dedication of commercial grade items for safety-related use; and

(3) Clarify that the entity performing the dedication of a commercial grade item is responsible for discovering and evaluating deviations and for reporting defects and failures to comply as required by 10 CFR Part 21.

The rule grants in part and denies in part the petition for rulemaking (PRM–21–2) from the NEI and completes action on the petition.

Public Comment

The NRC received 23 letters of public comments in response to the **Federal Register** notice announcing the receipt of the petition for rulemaking. All but one letter supported the petition and called for a revision of the NRC's regulations consistent with the proposal set forth in the petition. The NRC considered these comments in the development of the proposed rule that was published in October 1994.

The NRC received 19 letters of comment in response to the proposed rule. The NRC considered these comments in developing the final rule, the objective of which is to provide requirements for the procurement of basic components, initially procured as commercial grade items and subsequently dedicated for safety-related service, in a timely and cost effective manner that avoids unnecessary delay and expense to the licensee while maintaining an adequate level of plant safety.

The 19 letters of comment received in response to the proposed rule can be categorized as follows: 1 from an interested individual, 1 from an individual in a citizen's group, 1 from the Nuclear Energy Institute (NEI) with a supplemental letter re-emphasizing comments important to NEI, 1 from a law firm, 14 from nuclear power plant licensees, and 1 from a nuclear power plant supplier. Many of the letters contained comments that were similar in nature. The majority of the commenters were supportive of the proposed rule. Only one commenter, an individual from a citizens group, objected to the proposed rule. The following section summarizes the public comments received and provides NRC's responses to the concerns expressed.

Comment. The proposed rule contains changes developed by NRC staff which differ from the proposal originally submitted by NEI (formerly NUMARC), and in addition, codifies new prescriptive requirements for the dedication process.

Response. Part 21 currently does not contain a regulatory definition of "dedication," indicating only the time when dedication occurs; however, the NEI petition sought, among other matters, to define and establish by rulemaking a standard for the dedication process. As such, it was appropriate for the Commission to consider the elements of a dedication process for commercial grade items which assure the protection of the health and safety of the public rather than limit this standard to the industry's proposal. Therefore, it is not inappropriate for the NRC to consider "provisions not sought by the petitioner." The NRC has never interpreted, nor has it implemented, the 10 CFR 2.802 rulemaking petition process in a manner which requires either the wholesale acceptance or rejection of specific rulemaking proposals contained in a 10 CFR 2.802 petition.

Comment. Amendments to the definitions are ambiguous and do not provide a clear demarcation between basic components and commercial grade items. The definition of "basic component" raises two problems involving wording. The definition states that it "includes" two categories of items, i.e., those designed "or" manufactured under Appendix B to 10 CFR Part 50 quality assurance programs, and commercial grade items successfully dedicated as basic components. The first problem is the use of the term "includes" in the definition of basic component. This opens the possibility that other categories of items could also exist which is not the intent. The second problem is the use of the word "or" between "design" and "manufactured." An item designed under an Appendix B quality assurance program, but manufactured commercial grade should not be categorized as a basic component. It requires dedication to be categorized as a basic component.

Response. The NRC agrees with the commenter's observation that the Commission's intent was for the definition of basic component to be limited to only two categories of items: (1) those designed and manufactured under 10 CFR Part 50, Appendix B quality assurance programs, and (2) those commercial grade items successfully dedicated as basic components. The definition of "basic component" has been revised to address the commenter's concern.

Comment. The proposed definition of "Commercial Grade Items" appears to be unnecessarily restrictive and could give rise to interpretational difficulties that could limit or preclude options available to the licensee, rather than enhance the flexibility of licensees or utilities in dedicating commercial grade items for safety-related applications. The difficulty with the proposed definition of commercial grade item is that it would force utilities to always purchase a product as nuclear grade if a manufacturer with an Appendix B to 10 CFR Part 50 quality assurance program exists, which would result in a monopoly or a "captive market."

Response. The new definition is not intended to restrict the licensee from purchasing commercial grade items for subsequent dedication for safety-related applications even though a basic component designed and manufactured under an Appendix B to 10 CFR Part 50 quality assurance program is currently available. The commercial grade item, when properly and successfully dedicated, is deemed by the NRC to be equivalent in its safety function performance to the same or a similar item designed and manufactured under an Appendix B to Part 50 quality assurance program.

Comment. The phrase "or part of a basic component" should be deleted from the definition of commercial grade items because it could be interpreted to mean that all commercial grade items used in basic components are required to be dedicated for safety-related use.

Response. To address this comment, the NRC has modified the definition of "commercial grade item" to clarify that a commercial grade item that is part of a basic component but does not affect a safety-related function need not be dedicated. Therefore, a commercial grade item which is part of a basic component is considered to be a basic component after it has been dedicated prior to installation only if it affects a safety function.

Comment. The proposed new definition of "commercial grade item" and other changes to Part 21 should not be limited to only nuclear power plant licensees under Part 50, and their vendors, since these entities hold other licenses and would benefit from changes to Part 21.

Response. Proposed changes to Part 21 regulatory requirements for

nonreactor licensees are currently being considered.

Comment. The definition of the term "dedication" needs to be clarified as it lacks flexibility for dedication of a commercial grade item for safety-related applications. The graded approach should be used for applying Appendix B to 10 CFR Part 50.

Response. The dedication process must be performed using the applicable quality assurance criteria of Appendix B to 10 CFR Part 50. Appendix B already allows the level of quality assurance implemented to be consistent with the item's importance to safety (i.e., the graded approach).

Comment. The complexity of an item's design or manufacturing process should not be a criterion for excluding commercial grade items from eligibility to undergo a dedication process.

Response. To the extent the term "complexity" has caused confusion, the language of the rule has been modified to remove that term. The NRC maintains that if the design of an item and its manufacturing process are such that the dedication process cannot reasonably ensure the absence of a defect or failure to comply that affects one or more critical characteristics of the item, then the item cannot be dedicated, and must be designed and manufactured as a basic component. Included are items for which the manufacturing process requires in-process inspections and verifications to ensure that defects are identified and corrected. Typical examples include, but are not limited to, fuel assemblies, control rod assemblies, and reactor coolant pressure boundary components.

Comment. In the definition of term "dedication," the example of "pressure vessels" does not meet the specific nuclear-unique requirement since pressure vessels are used widely outside the nuclear industry and should be considered a potential candidate for dedication.

Response. The example is no longer included in the definition. In the Statement of Considerations, "pressure vessel" has been replaced with "reactor coolant pressure boundary components" since the NRC believes such components, due to their importance to safety, should continue to be designed and manufactured as basic components under an Appendix B quality assurance program.

Comment. In the definition of "dedicating entity," the word "qualify" should be replaced with the word "accept" to ensure that the dedication process is differentiated from equipment qualification.

Response. The NRC agrees that the word "qualify" could lead to misinterpretation. The definition of "dedicating entity" has been revised.

Comment. The proposed definition of "critical characteristics" should not be codified for two reasons. First, it is not necessary or beneficial to codify the processes. Second, the term was originally developed by industry to support improved dedication and procurement programs under NUMARC procurement initiatives. There are fundamental differences in the interpretation of the term "critical characteristics" between the NRC and much of the nuclear industry.

Response. The NRC believes it is important to define and codify "critical characteristics" because this term represents a subject of importance in the dedication process for commercial grade items. The Commission is aware that in the Electric Power Research Institute's (EPRI) "Guideline for the Utilization of Commercial Grade Items in Nuclear Safety Related Applications," EPRI NP–5652, "critical characteristics" is defined primarily in procurement terms, i.e., that the item received is the item specified as verified by part number. However, in the Commission's view, this is an appropriate term by which to convey the intent of this rulemaking that the dedication process specify those characteristics important to the design, material, and performance of an item so that the verification of those characteristics will provide reasonable assurance that the item will perform its intended safety function.

Comment. One utility commented that a backfit analysis should be required because new requirements for dedication are being specified.

Response: The current Part 21 regulation already provides for the dedication of commercial grade items to be used in safety-related applications. The final rule provides for a broadening of the definition of commercial grade items and their subsequent dedication for safety-related service. The rule does not impose a more restrictive requirement upon any licensee or dedicating entity; therefore, it does not constitute a backfit as defined in 10 CFR 50.109(a)(1), and no backfit analysis is necessary.

Comment. Part 21 does not clearly address the responsibilities for reporting defects and failures to comply associated with the purchase and subsequent transfer of a basic component by one utility to another. A provision should be included in the rulemaking allowing one utility to accept an item as a basic component when the utility supplying the item is unwilling to accept the Part 21 responsibilities associated with this kind of transaction. The utility purchasing the item should document the qualification of the vendor during the time of original manufacture and sale of the item.

Response: The NRC does not agree with the position set forth in this comment. The Part 21 regulation specifies the responsibilities of any individual or corporation and each director and responsible officer of such organization that supplies basic components. Those responsibilities are also applicable to utilities which supply basic components to other utilities. Nothing in the regulation prevents a utility from contacting the original supplier or manufacturer for the direct transfer of information regarding the item.

Basis for Commission's Decision

The NRC has reviewed the public comments that were submitted on the proposed rule. The final rule has taken into consideration many of the suggested changes as indicated in this Statement of Considerations.

When Part 21 was first issued in 1977, the suppliers of all parts making up a basic component were subject to the reporting requirements under Part 21. However, recognizing that the Commission lacked experience in implementing a reporting program of this scope, the Commission also pointed out in the Statement of Considerations accompanying this part that it would examine closely the implementation of Part 21 as the Commission gained experience. Following the issuance of Part 21, the NRC received many requests for clarification of the regulations. The NRC examined the issue of how far down the procurement chain Part 21 should be applicable and on October 19, 1978 (43 FR 4862), amended Part 21 to exempt commercial grade items from the reporting requirements of Part 21 until the items were dedicated for use as a basic component. The NRC held that the October 1978 rule was needed for safety reasons. Problems such as the inability to obtain needed parts and services were all cited as detriments to safety. The NRC was challenged on this amendment and the court of appeals upheld the Commission's interpretation of section 206 of the ERA requiring the Commission to "draw a line somewhere to demarcate the outer boundaries of the duty to report" (*Natural Resources Council* v. *NRC,* 666 F.2d 595 (D.C. Cir. 1981)).

Problems such as the inability to obtain parts and services from the most qualified suppliers and excessive delays in procurements were all cited as detriments to safety. With the development of increased confidence in licensee implementation of dedication activities through NRC inspection and experience, and because the availability of basic components has further declined, the NRC believes that the current definition of commercial grade items has become unnecessarily restrictive.

The petitioner proposed that a commercial grade item be defined as any item that has not been dedicated for use as a basic component. Thus, any commercial grade item could be subject to a dedication process to verify its qualification as a basic component. The Commission maintains that not all commercial grade items can be properly dedicated for safety-related use after the manufacturing process is completed. In fact several commenters agreed that there is a limited category of components for which quality assurance is an integral part of the manufacturing process and that their critical characteristics cannot be attested to after-the-fact. The Commission believes that if the design or manufacturing process of an item is such that dedication cannot reasonably assure the absence of a defect that could affect one or more critical characteristics of the item, the item must be designed and manufactured as a basic component in accordance with 10 CFR Part 50, Appendix B requirements. There are components in this limited category that generally have requirements and applications in which the design and manufacturing processes require in-process inspections and verifications to ensure that defects and failures to comply are identified and corrected. Thus, the NRC believes that commercial grade items cannot encompass the full spectrum of items envisioned by the petitioner.

Part 21 currently defines a commercial grade item as an item that is (1) Not subject to nuclear-unique design or specification requirements; (2) used in applications outside the nuclear industry; and (3) ordered on the basis of specifications set forth in the manufacturer's published product description. This set of conditions resulted in very limited use of the commercial grade item designation. To provide added flexibility in using commercial grade items for safety-related service by nuclear power plant licensees, the NRC is replacing the set of conditions and adopted a new definition for commercial grade item. Under this new definition, a "commercial grade item," when applied to nuclear power plants, means a structure, system, or component, or part thereof that affects its safety function, that was not designed and manufactured as a basic component. The definition makes clear that a commercial grade item that is part of a basic component but does not affect a safety-related function need not be dedicated and that item is not considered a basic component. Commercial grade items do not include items in which their design and manufacturing process require in-process inspections and verifications to ensure that defects or failures to comply are identified and corrected (i.e., one or more critical characteristics of the item cannot be verified). Typical examples include, but are not limited to, fuel assemblies, control rod assemblies, and reactor coolant pressure boundary components. Thus the definition of "commercial grade item" does not include items whose quality assurance is an integral part of the manufacturing process and whose acceptance is based primarily on the vendor's certification of compliance with specific design requirements. For facilities and activities licensed pursuant to 10 CFR Parts 30, 40, 50 (other than nuclear power plants), 60, 61, 70, 71, or 72, the existing definition is retained, although proposed revisions to Part 21 for application to these facilities and activities (including those certified under 10 CFR Part 76) are under consideration in a separate rulemaking.

The new definition is not intended to restrict the licensee from purchasing commercial grade items for subsequent dedication for safety-related applications even though a basic component designed and manufactured under an Appendix B to 10 CFR Part 50 quality assurance program is currently available. The commercial grade item, when properly and successfully dedicated, is deemed by the NRC to be equivalent in its safety function performance to the same or a similar item designed and manufactured under an Appendix B to Part 50 quality assurance program.

Sections 21.6, 21.21, 21.31, 21.41, and 21.51 contain the NRC's requirements for posting, notification, inspection, records, and maintenance and inspection of records, respectively. The NRC is clarifying these sections to point out that dedicating entities are subject to the regulations in these sections. In addition, minor editorial changes have been made in § 21.51(b).

Section 21.61 has been amended to clarify the scope of this section. NRC licensees and their employees subject to Part 21 are also subject to the normal enforcement process and sanctions. In addition, Section 206 of the Energy Reorganization Act of 1974, as amended, and implemented by 10 CFR Part 21, imposes an obligation on firms and organizations that are involved in the nuclear industry, and further, imposes these obligations as a direct liability on certain individuals in these firms and organizations. The "knowingly and consciously" standard specified in § 21.61 applies only to non-licensees.

Environmental Impact: Categorical Exclusion

The NRC has determined that this regulation is the type of action described in the categorical exclusion in 10 CFR 51.22(c)(1). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this regulation.

Paperwork Reduction Act Statement

This rule does not contain a new information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). Existing requirements were approved by the Office of Management and Budget approval number 3150–0035.

Regulatory Analysis

The Commission has prepared a regulatory analysis on this regulation. The analysis examines the costs and benefits of the alternatives considered by the Commission. The analysis is available for inspection in the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC. Single copies may be obtained from (See FOR FURTHER INFORMATION CONTACT.)

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980 (5 U.S.C. 605(b)), the Commission certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. The rule primarily impacts nuclear power plant licensees because they are expected to assume a greater role in the dedication process. The companies that own these plants do not fall within the scope of the definition of "small entities" set forth in the Regulatory Flexibility Act or the size standards established by the NRC (10 CFR 2.810). In addition, the rule, when promulgated, will allow small entities to more effectively compete in providing components and services to nuclear power plants, and to the extent this occurs, the rule is advantageous to them.

Backfit Analysis

The Commission has determined that the backfit rule, 10 CFR 50.109, does not apply to this rule. These amendments do not involve any provision that would impose additional requirements requiring a backfit analysis as defined in 10 CFR 50.109(a)(1).

List of Subjects in 10 CFR Part 21

Nuclear power plants and reactors, Penalties, Radiation protection, Reporting and recordkeeping requirements.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 as amended, and 5 U.S.C. 552 and 553, the NRC is adopting the following amendments to 10 CFR Part 21.

PART 21—REPORTING OF DEFECTS AND NONCOMPLIANCE

1. The authority citation for Part 21 continues to read as follows:

Authority: Sec. 161, 68 Stat. 948, as amended; sec. 234, 83 Stat. 444, as amended; sec. 1701, 106 Stat. 2951, 2953 (42 U.S.C. 2201, 2282, 2297f); secs. 201, as amended, 206, 88 Stat. 1242, as amended, 1246 (42 U.S.C. 5841, 5846).

Section 21.2 also issued under secs. 135, 141, Pub. L. 97–425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161).

§ 21.2 [Amended]

2. Section 21.2 (d) is amended by revising the reference reading "(see § 21.3(a–1)" to read "(as defined in § 21.3)," and in the third sentence of this section, change the word "five" to "four."

3. Section 21.3 is amended by removing the paragraph designations from each of the defined terms and arranging the definitions in alphabetical order, removing the words "paragraph (d)(1) of" in paragraph (2) of the term *Defect*, removing the parenthetical references in the terms *Defect* and *Deviation*, revising the terms *Basic component, Commercial grade item*, and *Dedication*, and adding the terms *Critical characteristics* and *Dedication entity* to read as follows:

§ 21.3 Definitions.

Basic component. (1)(i) When applied to nuclear power plants licensed pursuant to 10 CFR Part 50 of this chapter, basic component means a structure, system, or component, or part thereof that affects its safety function necessary to assure:

(A) The integrity of the reactor coolant pressure boundary;

(B) The capability to shut down the reactor and maintain it in a safe shutdown condition; or

(C) The capability to prevent or mitigate the consequences of accidents which could result in potential offsite exposures comparable to those referred to in § 100.11 of this chapter.

(ii) Basic components are items designed and manufactured under a quality assurance program complying with 10 CFR Part 50, Appendix B, or commercial grade items which have successfully completed the dedication process.

(2) When applied to other facilities and when applied to other activities licensed pursuant to 10 CFR Parts 30, 40, 50 (other than nuclear power plants), 60, 61, 70, 71, or 72 of this chapter, basic component means a structure, system, or component, or part thereof that affects their safety function, that is directly procured by the licensee of a facility or activity subject to the regulations in this part and in which a defect or failure to comply with any applicable regulation in this chapter, order, or license issued by the Commission could create a substantial safety hazard.

(3) In all cases, basic component includes safety-related design, analysis, inspection, testing, fabrication, replacement of parts, or consulting services that are associated with the component hardware whether these services are performed by the component supplier or others.

Commercial grade item. (1) When applied to nuclear power plants licensed pursuant to 10 CFR Part 50, commercial grade item means a structure, system, or component, or part thereof that affects its safety function, that was not designed and manufactured as a basic component. Commercial grade items do not include items where the design and manufacturing process require in-process inspections and verifications to ensure that defects or failures to comply are identified and corrected (i.e., one or more critical characteristics of the item cannot be verified).

(2) When applied to facilities and activities licensed pursuant to 10 CFR Parts 30, 40, 50 (other than nuclear power plants), 60, 61, 70, 71, or 72, commercial grade item means an item that is:

(i) Not subject to design or specification requirements that are unique to those facilities or activities;

(ii) Used in applications other than those facilities or activities; and

(iii) To be ordered from the manufacturer/supplier on the basis of specifications set forth in the manufacturer's published product description (for example, a catalog).

* * * * *

Critical characteristics. When applied to nuclear power plants licensed pursuant to 10 CFR Part 50, critical characteristics are those important design, material, and performance characteristics of a commercial grade item that, once verified, will provide reasonable assurance that the item will perform its intended safety function.

Dedication. (1) When applied to nuclear power plants licensed pursuant to 10 CFR Part 50, dedication is an acceptance process undertaken to provide reasonable assurance that a commercial grade item to be used as a basic component will perform its intended safety function and, in this respect, is deemed equivalent to an item designed and manufactured under a 10 CFR Part 50, Appendix B, quality assurance program. This assurance is achieved by identifying the critical characteristics of the item and verifying their acceptability by inspections, tests, or analyses performed by the purchaser or third-party dedicating entity after delivery, supplemented as necessary by one or more of the following: commercial grade surveys; product inspections or witness at holdpoints at the manufacturer's facility, and analysis of historical records for acceptable performance. In all cases, the dedication process must be conducted in accordance with the applicable provisions of 10 CFR Part 50, Appendix B. The process is considered complete when the item is designated for use as a basic component.

(2) When applied to facilities and activities licensed pursuant to 10 CFR Parts 30, 40, 50 (other than nuclear power plants), 60, 61, 70, 71, or 72, dedication occurs after receipt when that item is designated for use as a basic component.

Dedicating entity. When applied to nuclear power plants licensed pursuant to 10 CFR Part 50, dedicating entity means the organization that performs the dedication process. Dedication may be performed by the manufacturer of the item, a third-party dedicating entity, or the licensee itself. The dedicating entity, pursuant to § 21.21(c) of this part, is responsible for identifying and evaluating deviations, reporting defects and failures to comply for the dedicated item, and maintaining auditable records of the dedication process.

* * * * *

3. In § 21.6, paragraph (a) is revised to read as follows:

§ 21.6 Posting requirements.

(a) (1) Each individual, partnership, corporation, dedicating entity, or other entity subject to the regulations in this part shall post current copies of—

(i) The regulations in this part;

(ii) Section 206 of the Energy Reorganization Act of 1974; and

(iii) Procedures adopted pursuant to the regulations in this part.

(2) These documents must be posted in a conspicuous position on any premises within the United States where the activities subject to this part are conducted.

* * * * *

4. In § 21.21, the introductory text of paragraph (a) is revised, paragraphs (c) and (d) are redesignated as paragraphs (d) and (e), and a new paragraph (c) is added to read as follows:

§ 21.21 Notification of failure to comply or existence of a defect and its evaluation.

(a) Each individual, corporation, partnership, dedicating entity, or other entity subject to the regulations in this part shall adopt appropriate procedures to—

* * * * *

(c) A dedicating entity is responsible for—

(1) Identifying and evaluating deviations and reporting defects and failures to comply associated with substantial safety hazards for dedicated items; and

(2) Maintaining auditable records for the dedication process.

* * * * *

5. Section 21.31 is revised to read as follows:

§ 21.31 Procurement documents.

Each individual, corporation, partnership, dedicating entity, or other entity subject to the regulations in this part shall ensure that each procurement document for a facility, or a basic component issued by him, her or it on or after January 6, 1978, specifies, when applicable, that the provisions of 10 CFR Part 21 apply.

6. Section 21.41 is revised to read as follows:

§ 21.41 Inspections.

Each individual, corporation, partnership, dedicating entity, or other entity subject to the regulations in this part shall permit the Commission to inspect records, premises, activities, and basic components as necessary to accomplish the purposes of this part.

7. In § 21.51 the introductory text of paragraph (a) and paragraph (b) are revised to read as follows:

§ 21.51 Maintenance and inspection of records.

(a) Each individual, corporation, partnership, dedicating entity, or other entity subject to the regulations in this part shall prepare and maintain records necessary to accomplish the purposes of this part, specifically—

* * * * *

(b) Each individual, corporation, partnership, dedicating entity, or other entity subject to the regulations in this part shall permit the Commission the opportunity to inspect records pertaining to basic components that relate to the identification and evaluation of deviations, and the reporting of defects and failures to comply, including any advice given to purchasers or licensees on the placement, erection, installation, operation, maintenance, modification, or inspection of a basic component.

8. Section 21.61 is revised to read as follows:

§ 21.61 Failure to notify.

(a) Any director or responsible officer of an entity (including dedicating entity) that is not otherwise subject to the deliberate misconduct provisions of this chapter but is subject to the regulations in this part who knowingly and consciously fails to provide the notice required as by § 21.21 shall be subject to a civil penalty equal to the amount provided by section 234 of the Atomic Energy Act of 1954, as amended.

(b) Any NRC licensee subject to the regulations in this part who fails to provide the notice required by § 21.21 or otherwise fails to comply with the applicable requirements of this part shall be subject to a civil penalty as provided by section 234 of the Atomic Energy Act of 1954, as amended.

(c) The dedicating entity, pursuant to § 21.21(c) of this part, is responsible for identifying and evaluating deviations, reporting defects and failures to comply for the dedicated item, and maintaining auditable records of the dedication process. NRC enforcement action can be taken for failure to identify and evaluate deviations, failure to report defects and failures to comply, or failure to maintain auditable records.

Dated at Rockville, Maryland, this 8th day of September 1995.

For the Nuclear Regulatory Commission.

James M. Taylor,

Executive Director for Operations.

Food and Drug Administration

21 CFR Parts 1000 and 1002

[Docket No. 82N–0273]

RIN 0905–AD78

Records and Reports Regulations for Radiation Emitting Electronic Products

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending its regulations regarding the requirements for recordkeeping and reporting of adverse experiences and other information relating to radiation emitting electronic products. This rule reduces recordkeeping and reporting requirements for some products, requires only abbreviated reporting for other products, and clarifies certain requirements. The timing and content of certain reports will be revised to enhance the usefulness of the information. These amendments will improve protection of the public health while reducing regulatory burdens on manufacturers, dealers, and distributors of radiation emitting electronic products.

EFFECTIVE DATE: October 19, 1995.

FOR FURTHER INFORMATION CONTACT: Joanne Barron, Center for Devices and Radiological Health (HFZ–300), Food and Drug Administration, 2094 Gaither Rd., Rockville, MD 20850, 301–594–4654.

SUPPLEMENTARY INFORMATION:

I. Background

The Regulatory Flexibility Act (5 U.S.C. 601) and Executive Order 12866 require FDA to periodically conduct a comprehensive review of existing regulations. This review is to analyze alternative regulatory approaches and to identify regulations that need to be revised or revoked because they impose an unnecessary burden on specific segments of the public, such as manufacturers, dealers, small businesses, or the general public. In the **Federal Register** of July 2, 1982 (47 FR 29004), FDA announced its plan to review the records and reports regulations in part 1002 (21 CFR part 1002). FDA recognized that, although part 1002 does not appear to have a major impact on the overall radiation emitting electronic products industry, its impact on small manufacturers

should not be overly burdensome and should be determined.

FDA recognizes that, for some products, meeting the full recordkeeping and reporting requirements is not necessary to protect the public health. Therefore, in the final rule, FDA has reduced the recordkeeping and reporting requirements for some products and determined that an abbreviated report is sufficient regulatory monitoring for other products. FDA also recognizes that some sections of the regulations need additional clarification to be more meaningful and reduce regulatory burdens. Thus, FDA has adopted certain amendments to clarify its regulations.

On October 25, 1990, FDA published in the **Federal Register** (55 FR 43066) a proposed rule amending its regulations regarding the requirements for recordkeeping, reporting, and other information relating to radiation emitting electronic products. FDA invited interested parties to comment on the proposed rule by January 22, 1991. The comment period was later extended until March 25, 1991 (56 FR 7316). FDA received 11 comments. A summary of these comments and FDA's responses to them are set forth below. FDA is finalizing the proposed rule at this time and incorporating changes that are the result of the agency's review of the comments.

FDA is also amending references to statutory citations to reflect changes in the law. On November 28, 1990, the President signed into law the Safe Medical Devices Act of 1990 (the SMDA), which amended the Federal Food, Drug, and Cosmetic Act (the act). Section 19 of the SMDA transferred the Radiation Control for Health and Safety Act of 1968 from the Public Health Service Act (the PHS Act) into the act as subchapter C. Thus, all references to the PHS Act in parts 1000 and 1002 (21 CFR parts 1000 and 1002) are being revised to reflect this change. Additionally, the agency is changing all references to the "Office of Compliance and Surveillance" throughout parts 1000 and 1002 to the "Office of Compliance" to reflect an organizational change within the Center for Devices and Radiological Health (CDRH). The agency is also changing references to "the Secretary" and to "the Director" of CDRH in order to reflect the delegation of the Secretary's authority in accordance with 21 CFR 5.90.

II. Highlights of the Final Rule

To reduce the regulatory burden on the industry, FDA is amending regulations regarding the recordkeeping and reporting requirements for certain radiation emitting electronic products.

First, the reporting requirements in § 1002.12 (reports of model changes) have been consolidated with the requirements of § 1002.10 (initial reports), and the name "initial report" has been changed to "product report."

Second, FDA has developed two new categories of reports, "supplemental reports" in § 1002.11, and "abbreviated reports" in § 1002.12. New § 1002.11 (supplemental reports), which requires manufacturers to provide information on product safety and testing, applies to a smaller subset of manufacturers, and reduces the number of required reports by approximately 40 percent. New § 1002.12 (abbreviated reports) requires manufacturers to report abbreviated information on product safety and testing and replaces the existing requirements for many initial reports and model change reports. Although the total combined number of product reports and abbreviated reports will remain about the same as the former initial reports and model change reports, the time necessary to complete the reports will be reduced by approximately 60 percent.

Finally, FDA has limited the applicability of the records requirements in §§ 1002.30 and 1002.40. These changes have reduced the number of records to be maintained by manufacturers and by dealers/distributors by 50 percent and 99 percent, respectively.

Overall, this final rule will reduce the annual reporting and recordkeeping burden hours on the industry by 81 percent, without reducing public health protection.

III. Comments

The following is a summary of the comments and the agency's responses to them.

A. Reporting Requirements

1. One comment stated that there are no relevant changes in the content or format of the initial report to warrant a name change to "product report." The comment states that the name change would result in unnecessary additional costs because personnel, particularly nonregulatory staff, who are familiar with the term initial report, would need to be reeducated.

FDA recognizes that, as with any new requirement, the affected parties may need some training in order to appreciate and understand the changes. In this case, the change is intended to lessen the burden of this requirement by clearly describing the reports that are required, and the filing and content requirements of such reports. For example, FDA has deleted the reference to a 90-day due date for filing an initial report (see revised § 1002.10) because that requirement was applicable only to newly listed products. FDA believes that the long-term benefits of such changes—clearer regulatory requirements, a reduced regulatory burden on industry, and improved cost effectiveness and efficiency—outweigh its short-term training costs. Because FDA and the industry have used the previous term for 20 years, it is expected that there will be a period of transition to the new term over the next year for both the industry and FDA personnel.

2. One comment stated that industrial x-ray systems should not be included in the list of products for which abbreviated reports, rather than initial reports (to be called "product reports"), are required. The comment expressed the belief that industrial x-ray systems should follow the same reporting requirements as diagnostic x-ray and other x-ray systems.

FDA included analytical and industrial x-ray equipment in the list of products for which abbreviated reports are required because there is no FDA radiation performance standard for these products and, unlike diagnostic x-ray systems, any exposure of people to radiation would be unintentional. In addition, the users of such equipment are trained to be more aware of precautions necessary to reduce or eliminate exposures. In the event that a public health concern arises, however, the regulation would permit FDA to request additional safety information from the manufacturer.

3. One comment asked whether FDA will exempt linear accelerators and low-energy therapy x-ray devices from annual reporting requirements.

Linear accelerators and low-energy therapy x-ray equipment are included in § 1002.1, Table 1, under the category of "Products Intended to Produce Particulate Radiation or X-rays Other Than Diagnostic or Cabinet X-ray." The format of Table 1 has been modified to make clear that the requirements are the same for all medical, analytical, and industrial systems that fall within this product category. Specifically, manufacturers are required to submit abbreviated and annual reports and to maintain test and distribution records for these products.

4. One comment expressed the concern that, unlike television receivers, video display terminals (VDT's) are not specifically delineated by FDA under the reporting and recordkeeping provisions of the regulations. The comment stated that there is little

difference between television receivers and VDT screens and monitors and, therefore, these products should be treated similarly in these provisions. The comment stated that recent investigations of VDT use have shown that low levels of electromagnetic radiation are emitted from certain brands and models. The comment stated that the health and safety effects of these emissions are unknown, but the nature of most VDT work suggests that the effects may be detrimental. Given the health concerns, and the fact that such emissions have generally not been examined, the comment recommended that manufacturers be required to provide product reports, supplemental reports, annual reports, and test records to VDT purchasers, who in turn should be required to relay such information to their employees and representatives. The comment suggested that the hazard communication standard under the Occupational Safety and Health Act (29 CFR 1910.1200) would provide a model for FDA in constructing radiation recordkeeping requirements for VDT's.

FDA has used the designation "television products" in § 1002.1, Table 1, to reflect the scope of the product category that is the subject of the performance standard for television receivers at 21 CFR 1020.10. The intent of that standard has been to reduce unnecessary x-ray exposure to persons from any electronic product that can display a viewable picture on a cathode ray tube (CRT). FDA agrees that there are a number of clarifications that need to be made regarding this category of products. FDA anticipates issuing a notice of proposed rulemaking to amend the television receiver standard to address the issues raised in this comment and other issues concerning VDT's. FDA will propose the appropriate changes to part 1002 when the performance standard for television receivers is amended.

With respect to the suggestion that manufacturers be required to provide reports and records to users of VDT's, amended § 1002.3 will provide the mechanism for FDA to require manufacturers to provide the ultimate purchaser of the product with necessary performance and technical data.

5. One comment stated that a 25 kilovolt (kV) criterion should be established for television receivers to differentiate between television receivers that will be subject to relatively moderate reporting requirements (abbreviated reports and annual reports) and those that will be subject to more substantial reporting requirements (product reports, supplemental reports, and annual reports).

FDA agrees with this comment and adopted a 25 kV criterion in the rule. See § 1002.1, Table 1.

6. One comment stated that television receivers with less than 25 kV and less than 0.1 milliroentgen per hour (mR/hr) should be relieved of the annual report requirement of 1002.13 and the preservation and inspection of records provisions of § 1002.31. The comment asserted that exemptions from these provisions already apply to receivers with less than 25 kV pursuant to a 1987 letter to industry which stated that only status identification is required for annual reports on these products.

Consistent with the November 16, 1987, letter to manufacturers of television receiver products from the Director of CDRH (Ref. 1), television receivers which, when tested under phase III conditions, will not equal or exceed 25 kV and for which the chassis power curve will not reach or exceed the 0.1 mR/hr isoexposure rate limit curve (IRLC) are relieved of the annual report requirement of § 1002.13 and the preservation and inspection of records provisions of § 1002.31. Section 1002.1, Table 1, has been revised accordingly.

7. One comment noted discrepancies between the preamble language and Table 1 of the proposed rule. The preamble states that abbreviated reports will replace initial and supplemental reports for "certain television products." The text further states that product reports, but not supplemental reports, will be required for television receivers emitting less than 0.1 mR/hr. However, Table 1 of the proposed rule states that television receivers with less than 25 kV and less than 0.1 mR/hr will require abbreviated reports and television receivers emitting greater than 0.1 mR/hr will require only product reports (not supplemental reports). The comment supports the requirements as set forth in Table 1, but recommends, consistent with the preamble, that the requirement for supplemental reports be deleted for television receivers with greater than 25 kV and less than 0.1 mR/hr.

FDA has corrected the errors appearing in Table 1. Since November 16, 1987, the policy at CDRH has been that certain categories of television products may be exempt from some of the reporting and recordkeeping requirements, depending on the maximum high voltage on the picture tube and the possibility of emission of x-rays at or above 0.1 mR/hr. Manufacturers were given the responsibility to conduct phase III tests and inform CDRH, through annual reports, which models qualify for such exemptions. The agency's intention was to maintain the same level of requirements under the amended reporting and recordkeeping regulations that has previously been in effect for products that may operate at or above 25 kV and products that may emit x-rays at a rate of 0.1 mR/hr or above. The agency believes that these products represent different levels of risks and that different levels of recordkeeping and reporting requirements continue to be appropriate for each category.

Therefore, any television product that contains a CRT or other component capable of producing x-rays, and which, when tested under phase III conditions, will not equal or exceed 25 kV and for which the chassis power curve will not reach or exceed the 0.1 mR/hr IRLC, will require only abbreviated reports. A television product containing a CRT, which, when tested under phase III conditions, may equal or exceed 25 kV but for which the chassis power curve does not reach or exceed the 0.1 mR/hr IRLC, will require product reports, supplemental reports, and annual reports. A television product containing a CRT, for which, when tested under phase III conditions, the chassis power curve reaches or exceeds the 0.1 mR/hr IRLC, will require product reports, supplemental reports, annual reports, and maintenance of the records of test results and distribution of products for 5 years.

Manufacturers must continue to conduct an adequate quality control and testing program to ensure continued compliance of all models with the performance standard. Products for which there is no requirement that test results be kept for 5 years must, nevertheless, be tested adequately and the results should be reviewed by a quality control manager. These products should be rejected at a maximum limit of 0.1 mR/hr when tested under phase III conditions.

The agency retains the authority to inspect all documents supporting the adequacy of the manufacturer's quality control and testing program, including programs for these products for which it is not necessary to retain test results for 5 years. The final rule has added a footnote to Table 1 (footnote 1) to clarify this point.

8. One comment stated that FDA should codify its existing practice concerning importation of products for compliance testing and other related purposes to reduce the potential for confusion about the precise terms and conditions surrounding these activities. The comment stated that bulletins sent by FDA to the industry have stated, at

least with respect to television receivers and laser products, that FDA performance standards do not apply to products "that are imported for purpose of research, investigations, studies, demonstrations, or training, and that consist of 10 or fewer units per shipment," so long as certain administrative safeguards are observed.

The scope of this rule is limited to the reporting andrecordkeeping requirements in part 1002 and is not intended to amend FDA practices and regulations regarding the scope of the applicability of performance standards. Under current policies, FDA allows exemptions from performance standards for 10 or fewer units of certain products (i.e., television products, microwave ovens, and certain laser products), that are imported for test and evaluation and remain under the importer's control, if such products are properly labeled. These exemptions are referenced in FDA Compliance Program 7382.007 which is available from the Division of Small Manufacturers Assistance, Center for Devices and Radiological Health (HFZ–220), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 800–638–2041 or 301–443–6597. These policies will be continued but this rule does not expand the scope of that exemption to all products. However, the rule codifies procedures that allow manufacturers to apply for special exemptions from the reporting and recordkeeping requirements of part 1002 or the Director of CDRH to grant such exemptions on his or her own. See §§ 1002.50(a)(3) and 1002.50(b).

9. One comment requested that FDA clarify the distinctionbetween television receivers and CRT's and explain whether there are differences in the regulations that apply to the products that fall within these two categories. The comment noted that the majority of television receivers use CRT's to display video images (a small minority of receivers use liquid crystal displays), and the comment was uncertain why television receivers remain subject to various reporting requirements while CRT's will be generally exempt from reporting requirements, with the exception of § 1002.20. The comment further stated that FDA's distinction apparently depends on whether a device is limited by design to display only alphanumeric characters (CRT) or whether it can also display other video images (television receiver). The comment stated that FDA's distinction does not appear to be based on public health considerations, and that confusion and potential compliance problems would be avoided by adopting a definition of television that is more consistent with that of the affected industry. The comment suggests that FDA consider adopting the definition used by the FCC, which defines television receiver as a "device designed to receive television pictures that are broadcast simultaneously with sound on the television channels authorized under part 73 of the FCC's rules." (See 47 CFR 15.3(w)(1990)).

Previously, the regulations required manufacturers to submit initial, model change, and annual reports for television receivers and to submit initial and model change reports for CRT's. A CRT is an electronic product component and, as such, is subject to the general radiation safety requirements, but not subject to a performance standard. FDA has determined that the Joint Electron Device Engineering Council/Tube Engineering Panel Advisory Council (JEDEC/TEPAC) data on CRT's that is available from the Electronic Industries Association is sufficient for FDA to assess the potential radiation hazards for CRT's; therefore, any additional reports on the CRT's are not necessary. However, the monitors and video display products that contain the CRT's and associated electronics are subject to the television receiver standard. Accordingly, manufacturers are required to demonstrate that these products, including the CRT's contained in them, meet the standard and to report how the products are tested for compliance. FDA currently is reviewing whether to change the performance standard for television receivers to clarify the definitions of products to which the standard is applicable. This comment will be included in that review.

B. Exemptions

10. One comment proposed that manufacturers of products forwhich there is no applicable performance standard under 21 CFR part 1020 and for which a 510(k) premarket notification (510(k)) has been submitted and cleared in accordance with part 807, subpart E, be exempt from submitting all reports listed in Table 1 of proposed § 1002.1. The comment believes it would be appropriate to include manufacturers of these products in the exemption under proposed § 1002.50(e), because sufficient information regarding safety and effectiveness has been obtained through FDA review of the 510(k) submission. Alternatively, the comment suggests that the fact that any particular electronic product is also a medical device subject to 510(k) notifications should be included among the criteria for considering a special exemption under proposed § 1002.50(a).

Generally, a 510(k) notice on a medical device is submitted to FDA to demonstrate that a design specification is substantially equivalent to the specifications of a predicate device. The radiation safety reporting required by this part of the regulations is intended to provide information on actual production testing and quality control and on the actual product design as produced. If the two are redundant in any particular circumstance, the Director of CDRH can issue exemptions from the reporting and recordkeeping requirements in accordance with § 1002.50(b). FDA does not believe a general exemption from the reporting requirement is in the interest of public health.

11. One comment objected to the exemption of distributors and dealers from the recordkeeping requirement for microwave ovens. The comment states that if such an exemption is granted, these products would be much more difficult to locate to ensure their safety. The comment notes that customer warranty registrations are not sufficient to locate products because such registrations are returned by the customers at such a low rate. The comment states that if the dealer/distributor records are no longer required, the burden of locating the microwave oven shifts to the manufacturer who would have no other alternative but to launch an advertising campaign that would be more expensive, less effective, and slower than any recordkeeping on the part of distributors or dealers.

It has been FDA's experience that dealer and distributor records are rarely needed for the intended purpose of notifying purchasers of product noncompliance. In light of the fact that there have been limited recalls of microwave ovens in the past 10 years (due in part to prototype examinations by FDA), FDA believes that it would be overly burdensome to require distributors and dealers to comply with the recordkeeping requirement. When recalls are necessary, FDA believes that purchasers can be notified by other means, such as general media announcements.

12. One comment recommended that FDA exempt televisionreceivers whose voltage on the CRT is less than 5 kV at zero beam current from the recordkeeping and reporting requirements of part 1002, with the exception of § 1002.20. The comment stated that there is no evidence to suggest that products with such a low voltage (generally, videocamera

viewfinders and televisions with 2 or 3 inch screens) are capable of generating x-rays, which is the primary concern in part 1002. Another comment contended that it would be inappropriate to impose testing and reporting requirements on television receivers with less than 5 kV on the CRT, while CRT's with comparable or even greater voltages are exempted.

Under the amended reporting and recordkeeping requirements, television products whose voltage on the CRT is less than 5 kV will require only abbreviated reports and annual reports, and manufacturers may apply for special exemption from these requirements under the new regulations in § 1002.50. FDA will include these comments in the agency's review of possible amendments to the television performance standard.

13. One comment noted that the preamble to the proposed rule states that television receivers emitting less than 0.1 mR/hr will be exempt from the requirements of maintaining manufacturer's testing and distribution records. The preamble also notes that other products, including "television receivers," are already exempt from these requirements. In comparison, Table 1 of the proposed rule exempts all television receivers from the requirements to maintain manufacturer testing and distribution records. The comment supports the exemption for all television receivers as reflected in Table 1.

A similar concern about the discrepancy between the preamble and Table 1 was addressed above in comment 7. There was an error in the printing of Table 1 of the proposed rule. For television receivers for which the chassis power curve reaches or exceeds the 0.1 mR/hr IRLC, there should have been an X in the following columns: Supplemental reports, Test records, and Manufacturer distribution records. These reports and records are important for FDA to monitor the safety of those products which, by design, can emit radiation levels above background. Table 1 has been amended accordingly.

14. One comment noted an inadvertent error with respect tomanufacturer distribution recordkeeping requirements under § 1002.30(b). The comment stated that FDA has eliminated these requirements for class I lasers and products containing such lasers. Proposed Table 1 to § 1002.1, however, appears to state that class I lasers and products containing class I lasers will be subject to manufacturer distribution recordkeeping requirements under § 1002.30(b). The comment requested FDA to clarify, by amendment of proposed Table 1, that class I lasers and products containing such lasers will retain the exemptions that already apply, including the exemption for manufacturer's distribution records.

Table 1 has been amended to clarify that the exemption for these products from certain reporting requirements remains in effect. FDA has added to Table 1 a category for "Class I lasers and laser products containing such lasers," that will have X's in the columns for Product Reports, Annual Reports, Manufacturer's Test Records, but not for Supplemental Reports, Abbreviated Reports, Manufacturer's Distribution Records, or Dealer/Distributor Distribution Records.

FDA will determine which reporting category is applicable to a product that may have more than one class of laser on the basis of the worst-case hazard in the product. Thus, a class I laser product containing a class IV laser and a class II alignment laser will fall in the category "Class IIIb and IV lasers and products containing such lasers," because this represents the worst-case hazard within the product. Table 1 has been supplemented with a footnote to explain this policy (footnote 7).

15. One set of comments supported the agency's efforts to minimize the reporting and recordkeeping requirements for radiation emitting electronic products. Another comment disagreed with the intent to eliminate initial reports for diagnostic ultrasound equipment. Instead, that comment proposed that diagnostic ultrasound equipment be added to the category of products for which an abbreviated report is required, and that such products be exempt from annual reports. The comment stated that this proposal would reduce the burden on the industry from the medical device premarket clearance process.

Currently, diagnostic ultrasound devices are subject to initial reports but not annual reports. However, in a letter to all manufacturers of diagnostic ultrasound products from the CDRH Director dated February 24, 1986 (Ref. 2), these devices were exempted from the initial reports as long as a 510(k) was filed. CDRH issued this letter to reduce the burden and duplication of paperwork on the industry. The agency recognizes the increase in the timeframe necessary to gather all the information that must be submitted in the 510(k) notification, including production test information that otherwise would be contained in the initial report. Therefore, FDA has amended Table 1 to include abbreviated reports for diagnostic ultrasound equipment in order to retain its ability to obtain production test information about these products. However, CDRH intends to continue to exempt these products from the abbreviated (formerly initial) report requirement until documentation submitted for premarket clearance or for special controls is no longer duplicative of information that would be contained in the abbreviated report.

IV. Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

V. Analysis of Impacts

FDA has examined the impacts of the final rule under Executive Order 12866 and the Regulatory Flexibility Act (Pub. L. 96–354). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). The agency believes that this final rule is consistent with the regulatory philosophy and principles identified in the Executive Order. In addition, the final rule is not a significant regulatory action as defined by the Executive Order and so is not subject to review under the Executive Order.

The Regulatory Flexibility Act requires agencies to analyze regulatory options that would minimize any significant impact of a rule on small entities. Because the provisions of the final rule reduce or simplify the records and reporting requirements for manufacturers, dealers, and distributors of radiation emitting electronic products, the agency certifies that the final rule will not have a significant economic impact on a substantial number of small entities. Therefore, under the Regulatory Flexibility Act, no further analysis is required. A copy of the document supporting this determination, "Report of the CDRH Task Force for Retrospective Review of the Recordkeeping and Reporting Requirements of 21 CFR 1002," is on file at the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857, and may be seen by interested persons in

that office between 9 a.m. and 4 p.m., Monday through Friday.

VI. Paperwork Reduction Act of 1980

This final rule contains information collections which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35). The title, description, and respondent description of the information collection are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Title: Reporting and Recordkeeping Requirements for Electronic Products Under Pub. L. 90–602—General Requirements.

Description: The Food and Drug Administration is amending its regulations regarding the requirements for recordkeeping, reporting, and other information relating to radiation emitting electronic products. The timing and content of certain reports will be revised to enhance the usefulness of the information. The purpose of these changes is to improve the protection of the public health while also reducing the regulatory burden on manufacturers, dealers, and distributors of radiation emitting electronic products.

Description of Respondents: Businesses or other for profit organizations.

Estimated annual reporting and recordkeeping burden

Section	Annual number of reports and records	Average burden per response (hours)	Annual burden (hours)
1002.10, 1002.12			
Existing:			
Initial	320	34	10,880
Model Change	725	42	30,450
Supplements	2,520	0.5	1,260
Subtotal	3,565	avg 11.9	42,590
Amended:			
Product	850	24	20,400
Supplements	1,500	0.5	750
Abbreviated	150	5	750
Subtotal	2,500	avg 8.8	21,900
Total Reports Reduction			20,690
1002.30			
Existing:	4,000,000	0.12	480,000
Amended:	1,904,000	0.12	480,000
Reduction:			251,520
1002.40			
Existing:	17,000,000	0.048	816,000
Amended:	145,000	0.048	6,960
Reduction:			809,040
Total Records Reduction			1,060,560
Total existing annual burden hours			1,338,590
Total amended annual burden hours			257,340
Total difference in annual burden hours			1,081,250
			(81% reduction)

As required by section 3504(h) of the Paperwork Reduction Act of 1980, FDA has submitted a copy of this rule to OMB for its review of these information collection requirements. Other organizations and individuals desiring to submit comments regarding this burden estimate or any aspects of these information collection requirements, including suggestions for reducing the burden, should direct them to FDA's Dockets Management Branch (address above) and to the Office of Information and Regulatory Affairs, OMB, rm. 3208, New Executive Office Bldg., Washington, DC 20503, Attn: Desk Officer for FDA.

VII. References

The following references have been placed on display in the Dockets Management Branch (address above) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

1. Director, CDRH, FDA, letter to manufacturers of television receiver products, dated November 16, 1987.
2. Director, CDRH, FDA, letter to manufacturers of ultrasound products, dated February 24, 1986.

List of Subjects

21 CFR Part 1000

Electronic products, Radiation protection, Reporting and recordkeeping requirements, X-rays.

21 CFR Part 1002

Electronic products, Radiation protection, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act, the Radiation Control for Health and Safety Act, and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 1000 and 1002 are amended as follows:

PART 1000—GENERAL

1. The authority citation for 21 CFR part 1000 is revised to read as follows:

Authority: Secs. 530–542 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360hh–360ss).

2. Section 1000.3 is revised to read as follows:

§ 1000.3 Definitions.

As used in this Subchapter J:

(a) Accidental radiation occurrence means a single event or series of events that has/have resulted in injurious or potentially injurious exposure of any person to electronic product radiation as a result of the manufacturing, testing, or use of an electronic product.

(b) Act means the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360hh–360ss).

(c) Chassis family means a group of one or more models with all of the following common characteristics:

(1) The same circuitry in the high voltage, horizontal oscillator, and power supply sections;

(2) The same worst component failures;

(3) The same type of high voltage hold-down or safety circuits; and

(4) The same design and installation.

(d) Commerce means:

(1) Commerce between any place in any State and any place outside thereof, and

(2) Commerce wholly within the District of Columbia.

(e) Component, for the purposes of this part, means an essential functional part of a subassembly or of an assembled electronic product, and which may affect the quantity, quality, direction, or radiation emission of the finished product.

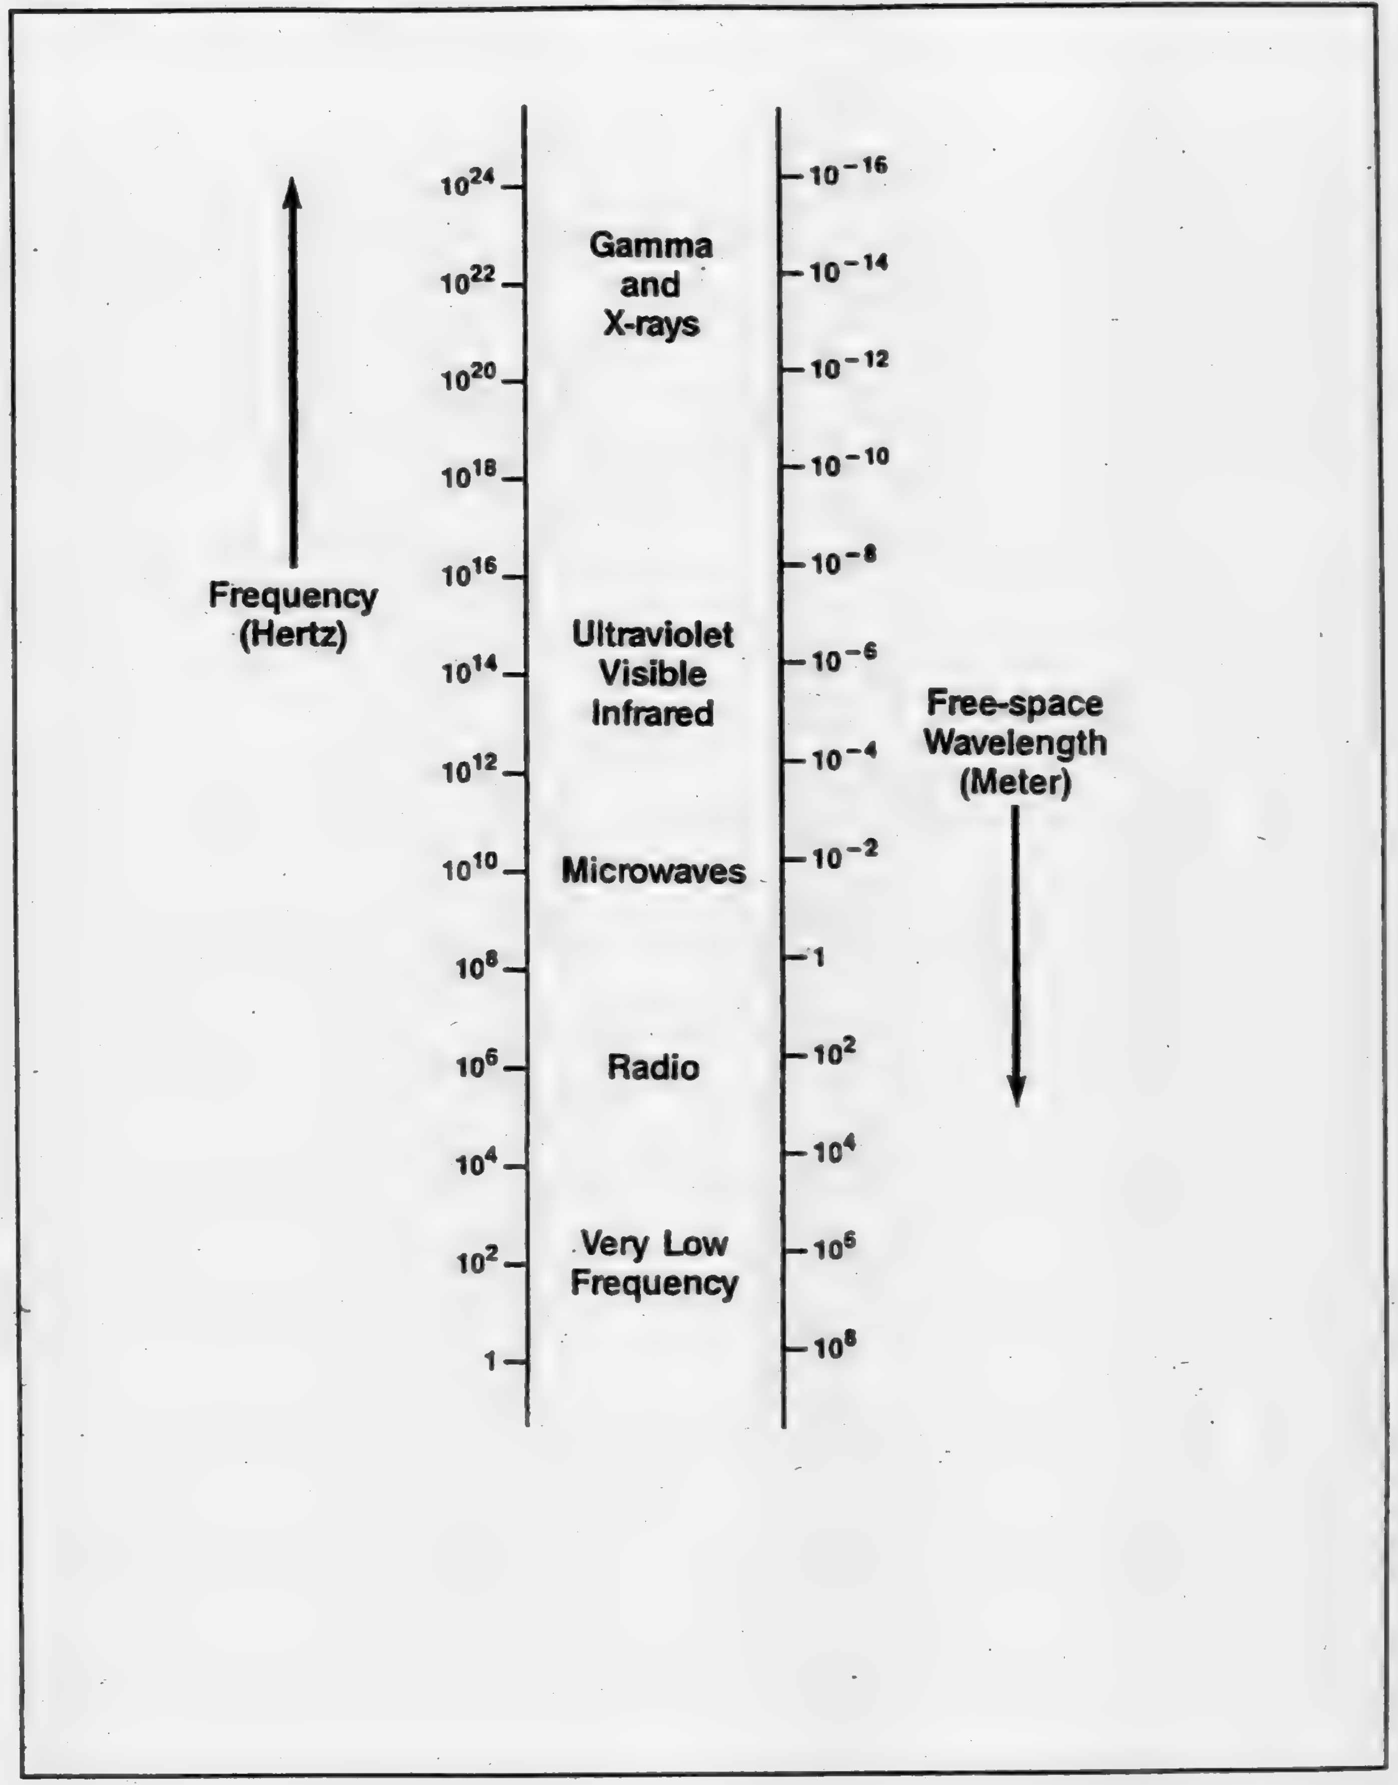
(f) Dealer means a person engaged in the business of offering electronic products for sale to purchasers, without regard to whether such person is or has been primarily engaged in such business, and includes persons who offer such products for lease or as prizes or awards.

(g) Director means the Director of the Center for Devices and Radioloical Health.

(h) Distributor means a person engaged in the business of offering electronic products for sale to dealers, without regard to whether such person is or has been primarily or customarily engaged in such business.

(i) Electromagnetic radiation includes the entire electromagnetic spectrum of radiation of any wavelength. The electromagnetic spectrum illustrated in Figure 1 includes, but is not limited to, gamma rays, x-rays, ultra-violet, visible, infrared, microwave, radiowave, and low frequency radiation.

Figure 1



BILLING CODE 4160-01-C

(j) Electronic product means:

(1) Any manufactured or assembled product which, when in operation:

(i) Contains or acts as part of an electronic circuit and

(ii) Emits (or in the absence of effective shielding or other controls would emit) electronic product radiation, or

(2) Any manufactured or assembled article that is intended for use as a component, part, or accessory of a product described in paragraph (j)(1) of this section and which, when in operation, emits (or in the absence of effective shielding or other controls would emit) such radiation.

(k) Electronic product radiation means:

(1) Any ionizing or nonionizing electromagnetic or particulate radiation, or

(2) Any sonic, infrasonic, or ultrasonic wave that is emitted from an electronic product as the result of the operation of an electronic circuit in such product.

(l) Federal standard means a performance standard issued pursuant to section 534 of the Federal Food, Drug, and Cosmetic Act.

(m) Infrasonic, sonic (or audible) and ultrasonic waves refer to energy transmitted as an alteration (pressure, particle displacement or density) in a property of an elastic medium (gas, liquid or solid) that can be detected by an instrument or listener.

(n) Manufacturer means any person engaged in the business of manufacturing, assembling, or importing electronic products.

(o) Model means any identifiable, unique electronic product design, and refers to products having the same structural and electrical design characteristics and to which the manufacturer has assigned a specific designation to differentiate between it and other products produced by that manufacturer.

(p) Model family means products having similar design and radiation characteristics but different manufacturer model numbers.

(q) Modified model means a product that is redesigned so that actual or potential radiation emission, the manner of compliance with a standard, or the manner of radiation safety testing is affected.

(r) Particulate radiation is defined as:

(1) Charged particles, such as protons, electrons, alpha particles, or heavy particles, which have sufficient kinetic energy to produce ionization or atomic or electron excitation by collision, electrical attractions or electrical repulsion; or

(2) Uncharged particles, such as neutrons, which can initiate a nuclear transformation or liberate charged particles having sufficient kinetic energy to produce ionization or atomic or electron excitation.

(s) Phototherapy product means any ultraviolet lamp, or product containing such lamp, that is intended for irradiation of any part of the living human body by light in the wavelength range of 200 to 400 nanometers, in order to perform a therapeutic function.

(t) Purchaser means the first person who, for value, or as an award or prize, acquires an electronic product for purposes other than resale, and includes a person who leases an electronic product for purposes other than subleasing.

(u) State means a State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa.

PART 1002—RECORDS AND REPORTS

3. The authority citation for 21 CFR part 1002 is revised to read as follows:

Authority: Secs. 502, 510, 519, 520, 531–542, 701, 704 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 352, 360, 360i, 360j, 360hh–360ss, 371, 374).

4. Section 1002.1 is revised to read as follows:

§ 1002.1 Applicability.

The provisions of this part are applicable as follows:

(a) All manufacturers of electronic products are subject to § 1002.20.

(b) Manufacturers, dealers, and distributors of electronic products are subject to the provisions of part 1002 as set forth in Table 1 of this section, unless excluded by paragraph (c) of this section, or unless an exemption has been granted under § 1002.50 or § 1002.51.

(c) The requirements of part 1002 as specified in Table 1 of this section are not applicable to:

(1) Manufacturers of electronic products intended solely for export if such product is labeled or tagged to show that the product meets all the applicable requirements of the country to which such product is intended for export.

(2) Manufacturers of electronic products listed in Table 1of this section if such product is sold exclusively to other manufacturers for use as components of electronic products to be sold to purchasers, with the exception that the provisions are applicable to those manufacturers certifying components of diagnostic x-ray systems pursuant to provisions of § 1020.30(c) of this chapter.

(3) Manufacturers of electronic products that are intended for use by the U.S. Government and whose function or design cannot be divulged by the manufacturer for reasons of national security, as evidenced by government security classification.

(4) Assemblers of diagnostic x-ray equipment subject to the provisions of § 1020.30(d) of this chapter, provided the assembler has submitted the report required by § 1020.30(d)(1) or (d)(2) of this chapter and retains a copy of such report for a period of 5 years from its date.

Table 1.—Record and Reporting Requirements By Product

	Manufacturer						
Products	Product reports § 1002.10	Supplemental reports § 1002.11	Abbreviated reports § 1002.12	Annual reports § 1002.13	Test records § 1002.30(a)[1]	Distribution records § 1002.309(b)[2]	Dealer Distributor—Distribution records §§ 1002.40 and 1002.41
DIAGNOSTIC X RAY[3] (1020,30, 1020,31, 1020.32, 1020.33)							
Computed tomography	X	X		X	X	X	X
X-ray system[4]	X	X		X	X	X	X
Tube housing assembly	X	X		X	X	X	
X-ray control	X	X		X	X	X	X
X-ray high voltage generator	X	X			X	X	X
X-ray table or cradle			X		X	X	X
X-ray film changer			X		X	X	X

[1] However, authority to inspect all appropriate documents supporting the adequacy of a manufacturer's compliance testing program is retained.

[2] The requirement includes §§ 1002.31 and 1002.42, if applicable.

[3] Report of Assembly (Form FDA 2579) is required for diagnostic x-ray components; see 21 CFR 1020.30(d)(1) through (d)(3).

[4] Systems records and reports are required if a manufacturer exercises the option and certifies the system as permitted in 21 CFR 1020.30(c).

[5] Determined using the isoexposure rate limit curve (IRLC) under phase III test conditions (1020.10(c)(3)(iii)).

[6] Annual report is for production status information only.

[7] Determination of the applicable reporting category for a laser product shall be based on the worst-case hazard present within the laser product.

§ 1002.2 [Removed]

5. Section 1002.2 Definitions is removed from subpart A.

6. Section 1002.3 is revised to read as follows:

§ 1002.3 Notification to user of performance and technical data.

As authorized by § 5.90 of this chapter, the Director and Deputy Director of the Center for Devices and Radiological Health may require a manufacturer of a radiation emitting electronic product, to provide to the ultimate purchaser at the time of original purchase, such performance data and other technical data related to safety of the product as the Director or Deputy Director finds necessary.

7. Section 1002.7 is amended by adding a new sentenceto the end of the introductory text, by revising the first sentence in paragraph (b), and by adding new paragraph (c) to read as follows:

§ 1002.7 Submission of data and reports.

* * * The submissions required by this part shall be addressed to the Center for Devices and Radiological Health, Electronic Product Reports, Office of Compliance (HFZ–307), 2098 Gaither Rd., Rockville, MD 20850.

* * * * *

(b) Where guides or instructions have been issued by the Director for the submission of material required by this part, such as test data, product reports, abbreviated reports, supplemental reports, and annual reports, the material submitted shall conform to the applicable reporting guides or instructions.

* * *

(c) Where the submission of quality control and testing information is common to more than one model, or model family of the same product category, a "common aspects report" consolidating similar information may be provided, if applicable.

8. Subpart B, consisting of §§ 1002.10 through 1002.13, is revised to read as follows:

Subpart B—Required Manufacturers' Reports for Listed Electronic Products

Sec.

1002.10 Product reports.
1002.11 Supplemental reports.
1002.12 Abbreviated reports.
1002.13 Annual reports.

Subpart B—Required Manufacturers' Reports for Listed Electronic Products

§ 1002.10 Product reports.

Every manufacturer of a product or component requiring aproduct report as set forth in Table 1 of § 1002.1 shall submit a product report to the Center for Devices and Radiological Health, Electronic Product Reports, Office of Compliance (HFZ–307), 2098 Gaither Rd., Rockville, MD 20850, prior to the introduction of such product into commerce. The report shall be distinctly marked "Radiation Safety Product Report of (name of manufacturer)" and shall:

(a) Identify which listed product is being reported.

(b) Identify each model of the listed product together with sufficient information concerning the manufacturer's code or other system of labeling to enable the Director to determine the place of manufacture.

(c) Include information on all components and accessories provided in, on, or with the listed product that may affect the quantity, quality, or direction of the radiation emissions.

(d) Describe the function, operational characteristics affecting radiation emissions, and intended and known uses of each model of the listed product.

(e) State the standard or design specifications, if any, for each model with respect to electronic product radiation safety. Reference may be made to a Federal standard, if applicable.

(f) For each model, describe the physical or electrical characteristics, such as shielding or electronic circuitry, incorporated into the product in order to meet the standards or specifications reported pursuant to paragraph (e) of this section.

(g) Describe the methods and procedures employed, if any, in testing and measuring each model with respect to electronic product radiation safety, including the control of unnecessary, secondary, or leakage electronic product radiation, the applicable quality control procedures used for each model, and the basis for selecting such testing and quality control procedures.

(h) For those products which may produce increased radiation with aging, describe the methods and procedures used, and frequency of testing of each model for durability and stability with respect to electronic product radiation safety. Include the basis for selecting such methods and procedures, or for determining that such testing and quality control procedures are not necessary.

(i) Provide sufficient results of the testing, measuring, and quality control procedures described in accordance with paragraphs (g) and (h) of this section to enable the Director to determine the effectiveness of those test methods and procedures.

(j) Report for each model all warning signs, labels, and instructions for installation, operation, and use that relate to electronic product radiation safety.

(k) Provide, upon request, such other information as the Director may reasonably require to enable him/her to determine whether the manufacturer has acted or is acting in compliance with the Act and any standards prescribed thereunder, and to enable the Director to carry out the purposes of the Act.

§ 1002.11 Supplemental reports.

Prior to the introduction into commerce of a new or modified model within a model or chassis family of a product listed in Table 1 of § 1002.1 for which a report under § 1002.10 is required, each manufacturer shall submit a report with respect to such new or modified model describing any changes in the information previously submitted in the product report. Reports will be required for changes that:

(a) Affect actual or potential radiation emission.

(b) Affect the manner of compliance with a standard or manner of testing for radiation safety.

§ 1002.12 Abbreviated reports.

Manufacturers of products requiring abbreviated reports as specified in Table 1 of § 1002.1 shall submit, prior to the introduction of such product, a report distinctly marked "Radiation Safety Abbreviated Report" which shall include:

(a) Firm and model identification.

(b) A brief description of operational characteristics that affect radiation emissions, transmission, or leakage or that control exposure.

(c) A list of applications or uses.

(d) Radiation emission, transmission, or leakage levels.

(e) If necessary, additional information as may be requested to determine compliance with the Act and this part.

§ 1002.13 Annual reports.

(a) Every manufacturer of products requiring an annual report as specified in Table 1 of § 1002.1 shall submit an annual report summarizing the contents of the records required to be maintained by § 1002.30(a) and providing the volume of products produced, sold, or installed.

(b) Reports are due annually by September 1. Such reports shall cover the 12-month period ending on June 30 preceding the due date of the report.

(c) New models of a model family that do not involve changes in radiation emission or requirements of a performance standard do not require supplemental reports prior to introduction into commerce. These model numbers should be reported in quarterly updates to the annual report.

9. Section 1002.20 is amended by adding a sentence at the end of paragraph (c) to read as follows:

§ 1002.20 Reporting of accidental radiation occurrences.

* * * * *

(c) * * * A manufacturer need not file a separate report under this section if an incident involving an accidental radiation occurrence is associated with a defect or noncompliance and is reported pursuant to § 1003.10 of this chapter.

10. Section 1002.30 is amended in the first sentence of paragraph (a) introductory text, by removing "paragraphs (b) and (c) of § 1002.61" and adding in its place "Table 1 of § 1002.1"; and adding new paragraph (a)(5) to read as follows:

§ 1002.30 Records to be maintained by manufacturers.

(a) * * *

(5) Data on production and sales volume levels if available.

* * * * *

§ 1002.31 [Amended]

11. Section 1002.31 Preservation and inspection of records is amended in paragraph (c) by removing "paragraph (c) of § 1002.61" and adding in its place "Table 1 of § 1002.1".

12. Section 1002.40 is amended by revising paragraph (a) to read as follows:

§ 1002.40 Records to be obtained by dealers and distributors.

(a) Dealers and distributors of electronic products for which there are performance standards and for which the retail price is $50 or more shall obtain such information as is necessary to identify and locate first purchasers if the product is subject to this section by virtue of Table 1 of § 1002.1.

* * * * *

13. Section 1002.50 is revised to read as follows:

§ 1002.50 Special exemptions.

(a) Manufacturers of electronic products may submit to the Director a request, together with accompanying justification, for exemption from any requirements listed in Table 1 of § 1002.1. The request must specify each requirement from which an exemption is requested. In addition to other information that is required, the justification must contain documented evidence showing that the product or product type for which the exemption is requested does not pose a public health risk and meets at least one of the following criteria:

(1) The products cannot emit electronic product radiation in sufficient intensity or of such quality, under any conditions of operation, maintenance, service, or product failure, to be hazardous;

(2) The products are produced in small quantities;

(3) The products are used by trained individuals and are to be used by the same manufacturing corporation or for research, investigation, or training.

(4) The products are custom designed and used by trained individuals knowledgeable of the hazards; or

(5) The products are produced in such a way that the requirements are inappropriate or unnecessary.

(b) The Director may, subject to any conditions that the Director deems necessary to protect the public health, exempt manufacturers from all or part of the record and reporting requirements of this part on the basis of information submitted in accordance with paragraph (a) of this section or such other information which the Director may possess if the Director determines that such exemption is in keeping with the purposes of the Act.

(c) The Director will provide written notification of the reason for any denial. If the exemption is granted, the Director will provide written notification of:

(1) The electronic product or products for which the exemption has been granted;

(2) The requirements from which the product is exempted; and

(3) Such conditions as are deemed necessary to protect the public health and safety. Copies of exemptions shall be available upon request from the Office of Compliance (HFZ–307), Center for Devices and Radiological Health, 2098 Gaither Rd., Rockville, MD 20850.

(d) The Director may, on the Director's own motion, exempt certain classes of products from the reporting requirements listed in Table 1 of § 1002.1, provided that the Director finds that such exemption is in keeping with the purposes of the act.

(e) Manufacturers of products for which there is no applicable performance standard under parts 1020 through 1050 of this chapter and for which an investigational device exemption has been approved under § 812.30 of this chapter or for which a premarket approval application has been approved in accordance with § 814.44(d) of this chapter are exempt from submitting all reports listed in Table 1 of § 1002.1.

Subpart G—[Removed]

14. Subpart G, consisting of § 1002.61 *List of specific product groups*, is removed.

Dated: September 11, 1995.

William B. Schultz,

Deputy Commissioner for Policy.

BILLING CODE 4160–01–F

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 1

RIN 2900–AG75

Organizational Contact for Missing Children Official Mail Program

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: This final rule amends the Department of Veterans Affairs (VA) regulations concerning the use of official mail in the location and recovery of missing children. This rule updates the Departmental contact person and organizational units, reflects current practices, and clarifies provisions.

EFFECTIVE DATE: This amendment is effective September 19, 1995.

FOR FURTHER INFORMATION CONTACT: Mrs. Roslynd R. Stewart, Information Management Service (045A4), Office of Policy and Program Assistance, Office of Information Resources Management, Office of Management, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420–0001, (202) 565–8949.

SUPPLEMENTARY INFORMATION:

Administrative Procedure Act

The changes made by this final rule constitute rules of agency organization. The remainder of the changes made by this final rule are nonsubstantive and there is good cause for concluding that notice and public procedure thereon are unnecessary and contrary to the public interest. Accordingly, pursuant to 5 U.S.C. 553, we are dispensing with prior notice and comment and with a 30-day delay of the effective date.

Regulatory Flexibility Act

The Secretary certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. The amendments made by this final rule will not have a substantial effect on any individuals or entities. Therefore, pursuant to 5 U.S.C. 605(b), this amendment is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

The Catalog of Federal Domestic Assistance number is 16.543.

List of Subjects in 38 CFR Part 1

Administrative practice and procedure, Archives and records, Cemeteries, Claims, Courts, Flags, Freedom of information, Government contracts, Government employees, Government property, Infants and children, Inventions and patents, Investigations, Parking, Penalties, Postal Service, Privacy, Reporting and recordkeeping requirements, Seals and insignia, Security measures, Veterans Affairs Department, Wages.

Approved: September 8, 1995.

Jesse Brown,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 1 is amended as follows:

PART 1—GENERAL PROVISIONS

1. The authority citation following the table of contents for part 1 is revised to read as follows:

Authority: 38 U.S.C. 501, except as otherwise noted.

2. Section 1.700 is revised to read as follows:

§ 1.700 Purpose.

Sections 1.700 through 1.705 of this title provide a Missing Children Official Mail Program in the Department of Veterans Affairs.

(Authority: 39 U.S.C. 3220(a)(2), 5 U.S.C. 301)

3. Section 1.701 is revised to read as follows:

§ 1.701 Contact person for missing children official mail program.

The Department of Veterans Affairs contact person for the Missing Children Official Mail Program is: Mrs. Roslynd R. Stewart, Information Management Service (045A4), Office of Policy and Program Assistance, Office of Information Resources Management, Office of Management, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420–0001. Telephone: (202) 565–8949.

(Authority: 39 U.S.C. 3220(a)(2), 5 U.S.C. 301)

§ 1.702 [Amended]

4. In § 1.702, paragraph (b) is amended by removing "If doing so would be cost effective, the Department of Veterans Affairs shall insert via automated insertion equipment" and adding, in its place, "The Department of Veterans Affairs will insert"; by removing "types of"; by removing "data processing" and adding, in its place, "automation"; and by removing "may be" and adding, in its place, "are".

5. In § 1.702, paragraph (c) is amended by removing "will be" in both places and adding, in its place in both places, "is"; and by removing "the Mail and Travel Policy Division" and adding, in its place, "Information Management Service".

6. In § 1.702, paragraph (d) is amended by removing "(i.e. use or destroy)"; by removing "will be" and adding, in its place, "is"; by removing "contract" and adding, in its place, "contact"; by removing "envelopes"; and by removing "as to" and adding, in its place, "as of".

7. In § 1.702, paragraph (h) is amended by removing "reguations" and adding, in its place, "regulations".

8. Section 1.703 is revised to read as follows:

§ 1.703 Percentage estimate.

It is the Department of Veterans Affairs objective that 20 percent of its first class official mail addressed to the public contain missing children photographs and information.

(Authority: 39 U.S.C. 3220(a)(2), 5 U.S.C. 301)

§ 1.705 [Amended]

9. In § 1.705, paragraph (a) is amended by removing "which are ordered and/or stocked in quantities which" and adding, in its place, "ordered and stocked in quantities that".

10. In § 1.705, paragraph (c) is amended by removing "and/or" and adding, in its place, "or".

11. In § 1.705, paragraph (e) is amended by removing "return, address areas" and adding, in its place, "return address area"; and by removing "OJJDP" and adding, in its place, "Office of Juvenile Justice and Delinquency Prevention".

BILLING CODE 8320-01-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 9 and 63

[AD-FRL-5272-8]

RIN 2060-AD02

Federal Standards for Marine Tank Vessel Loading Operations and National Emission Standards for Hazardous Air Pollutants for Marine Tank Vessel Loading Operations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This action promulgates standards under section 183(f) of the Clean Air Act (the Act) and requires reasonably available control technology (RACT) to limit air emissions of volatile organic compounds (VOC) and hazardous air pollutants (HAP) from new and existing marine tank vessel loading operations. VOC emissions, together with nitrogen oxides are precursors to the formation of tropospheric ozone, which can impair lung capacity, cause eye, nose and throat irritation, timber and other valuable crops such as soybeans and cotton. The health effects of exposure to HAPs can include cancer, respiratory irritation and damage to the nervous system. An additional set of standards promulgate national emission standards for hazardous air pollutants (NESHAP) under section 112 of the Act for marine tank vessel loading operations and require existing and new major sources to control emissions using maximum achievable control technology (MACT) to control HAP.

EFFECTIVE DATE: This regulation is effective September 19, 1995. See **SUPPLEMENTARY INFORMATION** section concerning judicial review.

ADDRESSES: *Technical Support Document.* The Technical Support Document (TSD) for the promulgated standards may be obtained from the U.S. Department of Commerce, National Technical Information Service (NTIS), Springfield, Virginia 22161, telephone number (703) 487–4650. Please refer to "Federal Standards for Marine Tank Vessel Loading Operations and National Emission Standards For Hazardous Air Pollutants For Marine Tank Vessel Loading Operations—Technical Support Document for Final Standards," Document Number PB95–234514. The TSD contains, (1) a summary of public comments made on the proposed standards and the Administrator's response to the comments and (2) a summary of the changes made to the standards since proposal.

Electronic versions of the promulgation TSD as well as this final rule are available for download from the EPA's Technology Transfer Network (TTN), a network of electronic bulletin boards developed and operated by the Office of Air Quality Planning and Standards (select "CAAA" "Title III"). The TTN provides information and technology exchange in various areas of air pollution control. The service is free, except for the cost of a phone call. Dial (919) 541–5742 for data transfer of up to a 14,400 bits per second (bps). If more information on TTN is needed, contact the systems operator at (919) 541–5384. A copy of the TSD has also been placed in the Docket at the address given below.

Docket. Docket No. A–90–44, containing supporting information used in developing the promulgated standards, is available for public inspection and copying from 8 a.m. to 4 p.m., Monday through Friday, at the EPA's Air and Radiation Docket and Information Center, Waterside Mall, Room M–1500, Ground Floor, 401 M Street SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: For information concerning the standards or technical aspects, contact Mr. David Markwordt at (919) 541–0837, Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION: Under section 307(b)(1) of the Act, judicial review of NESHAP is available only by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of today's publication of this rule. Under section 307(b)(2) of the Act, the requirements that are the subject of today's notice may not be challenged later in civil or criminal proceedings

brought by the EPA to enforce these requirements.

The information presented in this preamble is organized as follows:

I. The Standards
II. Summary of Impacts
III. Significant Changes to the Proposed Standards
  A. Public Participation
  B. Comments on the Proposed Standards
  C. Significant Changes
  D. Minor Changes
  E. Other Significant Issues
IV. Administrative Requirements
  A. Docket
  B. Paperwork Reduction Act
  C. Administrative Designation and Regulatory Analysis
  D. Regulatory Flexibility Act
  E. Unfunded Mandates Act

I. The Standards

A summary of today's final standards is listed in Table 1. Included in this table are applicability cutoffs based on annual throughput (under section 183(f)) and HAP emissions (under section 112), separation of marine tank vessel loading operations at petroleum refineries (which are now included under the petroleum refineries source category), and emission standards based on subcategory determinations for offshore terminals and the Alyeska Pipeline Service Company's (APSC's) Valdez Marine Terminal (VMT). The promulgated regulations allow for several alternative compliance technologies to allow owners or operators maximum compliance flexibility.

TABLE 1.—FINAL STANDARDS, NATIONAL COSTS, AND EMISSION REDUCTIONS

Section of act	Subcategory	Standard	Emission reduction, Mg/yr	Annual cost, $MM
183(f)	New and existing terminals having throughput of ≥1.6 billion liters per year (10 million barrels per year) of gasoline or ≥32 billion liters per year (200 million barrels per year) of crude oil.	98 percent reduction in emissions if using combustion techniques; 95 percent reduction in emissions if using recovery techniques.	13,000 (VOC), 900 (HAP).	20–40.
112	Existing major source terminals having emissions of hazardous air pollutants (HAP) of 10/25 tons per year or more from loading of marine tank vessels.	97 percent reduction in HAP emissions	7,000 (VOC), 750 (HAP).	20–40.
112	Existing major source terminals collocated at petroleum refineries having HAP emissions of 10/25 tons per year or more from loading of marine tank vessels; new major source terminals regardless of HAP emissions from marine tank vessel loading (both existing and new sources are regulated under the Gasoline Refineries NESHAP).	97 percent reduction in HAP emissions for existing sources, 98 percent reduction in HAP emissions for new sources; emissions averaging with petroleum refinery emissions points is allowed.	Impacts included in previous subcategory data.	Impacts included in previous subcategory data.
112	Existing major source terminals having HAP emissions of less than 10/25 tons per year from loading of marine tank vessels.	No control	None	None.
112	New major source terminals regardless of HAP emissions from marine tank vessel loading.	98 percent reduction in HAP emissions	None	None.
112 and 183(f)	Existing major source terminals located more than 0.8 kilometers (0.5 miles) offshore.	No control	None	None.
112	New major source terminals located more than 0.8 kilometers (0.5 miles) offshore.	95 percent reduction in HAP emissions	None	None.
112 and 183(f)	Alyeska Pipeline Service Company's Valdez Marine Terminal.	98 percent reduction in emissions with maximum throughput limits.	19,000 (VOC), 2,500 (HAP).	20.

Sources required to reduce emissions are also required to monitor the performance of control technology installed to achieve the required emissions reductions. Baseline parameters may be established by owners or operators during initial performance tests, or continuous emissions monitoring devices may be used to provide indicators of performance. The baseline parameters may be based on manufacturer's recommended operating parameters or other parameters selected by the source and approved by the Administrator. Sources are also required to develop and implement an operation and maintenance plan that describes a program of corrective action for varying (i.e., exceeding baseline parameters) air pollution control equipment and monitoring equipment used to comply with these emissions standards. This plan includes operating parameters that shall be monitored and recorded as indicators of proper operation of the air pollution control devices.

In developing these final monitoring requirements and compliance provisions, the Agency has provided significant flexibility to owners or operators of sources required to reduce emissions in regard to selecting monitoring protocols, yet has assured compliance with the standards. Compliance is assured through reporting and recordkeeping requirements that specify annual reports of system performance. This reporting interval is compressed to semi-annual for sources that experience excess emissions.

Owners or operators of all marine tank vessel loading operations subject to the federal standards promulgated under section 183(f) of the Act (RACT sources) are required to commence construction of its vapor collection system and air pollution control device(s) within 2 years from September 19, 1995. These RACT sources are required to complete the installation of the control technology needed to comply with the standards within 3 years from September 19, 1995. Owners or operators of new RACT sources with an initial startup after September 21, 1998 are required to comply with all requirements upon startup. A RACT source may request a waiver of final compliance for up to 1 year if it can prove that the additional time is necessary for the installation of controls.

Owners or operators of marine tank vessel loading operations subject only to the requirements promulgated under section 112(d) of the Act (MACT standards) are required to install the control technology needed to comply with the standards within 4 years from September 19, 1995. Owners or operators of new MACT-only sources with initial startup after September 20, 1999 are required to comply with all requirements upon startup.

The VMT owners or operators are required to install the control technology needed to comply with the standards within 30 months from September 19, 1995.

II. Summary of Impacts

These standards will reduce nationwide emissions of hazardous air pollutants (HAP) from marine tank vessel loading operations by approximately 4,150 Mg (4,565 tons) after 1999 compared to the emissions that would result in the absence of the standards. These standards will reduce emissions of volatile organic compounds (VOC) from marine tank vessel loading operations by approximately 39,000 Mg (42,900 tons) after 1999 compared to the emissions that would result in the absence of the standards. No significant adverse secondary air, water, solid waste, or energy impacts are anticipated from the promulgation of these standards.

The implementation of this regulation is expected to result in nationwide annualized costs for existing marine tank vessel loading operations of $60 million to $100 million beyond baseline based on an analysis of applying controls to all existing facilities not currently controlled to the level of the standards. Nationwide capital costs expected to result from these regulations are approximately $266 million to $440 million.

As discussed in this preamble under Regulatory Flexibility Act Compliance, the economic impact analysis performed for this rulemaking showed that the estimated maximum price increases for the affected products varied, but were not large (less than 1%). These price-increase estimates reflect the control cost increases for transporting crude and products. Because these increases are small and because the elasticities of demand for petroleum products are small, estimated percent output reductions were minimal. Correspondingly, estimated employment reductions were also relatively small.

Potentially significant economic impacts on some of the smaller affected terminal operations were identified, although the decision not to require emission controls for existing smaller operations greatly reduces the potential for adverse economic impacts on small terminal operations. These potential impacts would result from the high per barrel control cost differential between the smaller and larger terminal operations that would need to control emissions. Some of these smaller terminal operations, to the extent that they are competing with nearby larger or unaffected terminal operations, could have had difficulty raising prices to cover cost increases and could have been significantly adversely impacted by this rule.

The potential economic impact on marine tank vessel owners was substantially reduced because of the decision not to require emission controls on small existing terminals in this rulemaking. Because only a small percentage of U.S. marine transported volume of products will be impacted by the standard, only a relatively small percentage of U.S. marine tank vessels will need to retrofit. Thus, only the vessels that will need the least cost to retrofit (most likely the larger, newer, double-skin vessels) will do so, leading to some degree of dedicated service. It is expected that vessel owners that do retrofit will be able to pass most retrofit costs forward in terms of higher prices.

III. Significant Changes to the Proposed Standards

Proposed standards for marine tank vessel loading operations were published in the **Federal Register** on May 13, 1994 (59 FR 25004). Under section 183(f) of the Act, the proposed rule would have required a 98 percent reduction in emissions (or a 95 percent reduction, if recovery techniques were used) from marine tank vessel loading and unloading operations that load either 100 million barrels per year of crude oil or 5 million barrels per year of gasoline. Sources would have had 2 years to comply with these RACT standards. Under section 112(d) of the Act, the proposed rule also would have required owners or operators of major sources that emit 1 ton per year or more of HAP from marine tank vessel loading and unloading operations to reduce total HAP emissions by at least 93 percent. Sources would have had 3 years to comply with these MACT standards. The control devices used to meet these standards were required to be operated at 98 and 95 percent efficiencies for combustion and recovery control technologies respectively. The EPA also proposed to regulate emissions from ballasting.

Three alternatives were proposed to ensure vessel tightness: (1) Pressure test the vessel, (2) perform a leak test on all components using Method 21 of appendix A of 40 CFR part 60, or (3) load the vessel at less than atmospheric pressure.

Proposed monitoring requirements required owners or operators to monitor any valves that could divert flow from a control device if those bypass valves could not be secured. Monitoring criteria were also proposed for combustion devices, carbon adsorbers, condensers, absorbers, and flares. Owners or operators were generally required to establish operating parameters during an initial performance test and then monitor combustion temperature for combustion devices, VOC concentration in the exhaust stream for carbon adsorbers, exhaust stream temperature for condensers, VOC outlet concentration for absorbers, and continuous presence of a flame and the vent stream flow for flares. Criteria to apply for and obtain approval for alternative monitoring criteria (and for alternative monitoring devices) were also specified in the proposed rule.

Under the proposed rule, owners or operators of sources required to install controls would have had to fulfill the reporting and recordkeeping requirements of the part 63 General Provisions, including submittal of the following reports: (1) Initial notification that the source is subject to the standards, (2) notification of initial performance test, (3) initial notification of compliance status, (4) annual excess emissions and monitoring system performance report and/or summary report, and (5) an annual emissions estimation report. These sources would also have been required to maintain documentation that vessels loaded at the facility were vapor tight. All information was to have been made readily available to the Administrator or

delegated State authority for a minimum of 5 years.

In addition, the Agency requested comment on several issues, including the subcategorization of certain types of terminals. On August 31, 1994, the Agency published a notice reopening the comment period to request comment on amending the Marine Tank Vessel Loading and the Petroleum Refinery source categories to move marine terminals collocated at petroleum refineries to the Petroleum Refineries source category (59 FR 44955). On March 8, 1995, the Agency reopened the comment period to request comment on extending the proposed compliance dates (60 FR 12703).

A. Public Participation

Prior to proposal of the standards, interested parties were advised by public notice in the **Federal Register** (56 FR 1186) of a meeting of the National Air Pollution Control Techniques Advisory Committee to discuss the regulation of this source category. This meeting was held on January 31, 1991. The meeting was open to the public, and each attendee was given an opportunity to comment on the standards recommended for proposal.

The standards were proposed, and the preamble was published in the **Federal Register** on May 13, 1994 (59 FR 25004). The preamble to the proposed standards discussed the availability of the regulatory text and proposal TSD, which described the regulatory alternatives considered and the impacts of those alternatives. Public comments were solicited at the time of proposal, and copies of the regulatory text and TSD were distributed to interested parties. Electronic versions of the preamble, regulation, and TSD were made available to interested parties via the TTN (see **ADDRESSES** section of this preamble).

To provide interested persons the opportunity for oral presentation of data, views, or arguments concerning the proposed standards, a public hearing was held on June 15, 1994 in Research Triangle Park, North Carolina. The public comment period was from May 13 to July 18, 1994. The Agency also reopened the public comment period for specific comments on two occasions—August 31, 1994 (59 FR 44955) and March 8, 1995 (60 FR 12723). In all, over 150 comment letters were received (including seven duplicates). Additional information received from interested parties but not submitted directly to the docket was included in the docket as additional comments on the proposed regulation. Information submitted after the close of the comment period is also included in the docket and may appear on the docket index as public comments in docket category IV–D. The comments have been carefully considered, and changes have been made to the proposed standards when determined by the Administrator to be appropriate.

B. Comments on the Proposed Standards

Comments on the proposed standards were received from 143 commenters composed mainly of States, environmental groups, private citizens, control device vendors, industry, and trade associations. A detailed discussion of these comments and responses can be found in the promulgation TSD, which is referred to in the **ADDRESSES** section of this preamble. The summary of comments and responses in the TSD serves as the basis for the revisions that have been made to the regulations between proposal and promulgation. Most of the comment letters contained multiple comments. A summary of the revisions to the regulations along with discussion of the comments on the major issues is provided below. In the TSD, the comments have been divided into the following areas:

(1) Applicability of standards.

(2) Inclusion of certain terminals with the petroleum refinery source category.

(3) Subcategorization issues.

(4) RACT/MACT.

(5) Compliance schedule for Titles I and III standards.

(6) Compliance, performance testing, and monitoring requirements.

(7) Vapor tightness requirements.

(8) Leak detection and repair.

(9) Reporting and recordkeeping requirements.

(10) General provisions interaction.

(11) Wording of regulation.

(12) Administrative record/sources of information.

(13) Cost effectiveness/impacts.

(14) Miscellaneous.

(15) Comments on proposed appendices to 40 CFR part 64.

C. Significant Changes

Several changes have been made since the proposal of these standards. The majority of the changes have been made to clarify portions of the rule that were unclear to the commenters. A summary of the major changes is presented below.

(1) *Removal of unloading operations (ballasting) from the source category.* In the proposed rule, the Agency included regulations proscribing emissions from ballasting of vessels following unloading of vessels. Comments asserted that ballasting operations are performed by vessel operators, not by the regulated terminal sources. The Agency agrees with this interpretation of the affected source. The Agency also agrees that regulating ballasting operations would be difficult to enforce. The Agency's intent in prohibiting ballasting emissions in the proposed regulation was to provide a cross-reference with existing Coast Guard regulations addressing ballasting in vessels. The Coast Guard rules require vessels to have segregated ballast tanks for crude oil loadings. The Agency sees no benefit to restating Coast Guard requirements for ballasting. Moreover, EPA agrees that the relatively low amount of actual emissions associated with ballasting does not justify dual regulation of ballasting. As discussed in the proposal TSD, the total VOC emissions from crude oil tankship ballasting were estimated to be approximately 950 Mg/yr. Based on the portion of HAP in crude oil vapor, total HAP emissions from ballasting are less than 120 Mg/yr. Ballasting emissions will diminish in the future because tankships built since 1980 are required by domestic law and international agreement to use segregated ballast tanks that do not emit vapors during ballasting. Therefore, in order to prevent confusion in the regulated community, the Agency does not address ballasting or bunkering emissions in the final regulation. The Agency defers to the U.S. Coast Guard's existing standards (33 CFR parts 155 and 157; and 46 CFR parts 30 et al.).

(2) *Extension of the compliance schedule for section 183(f) ("Title I") and section 112 ("Title III") standards.* In the proposed rule, EPA proposed to establish compliance deadlines of 2 years for the section 183(f) standards, and 3 years for the section 112 standards. The Agency received numerous comments regarding these schedules that stated the length of the compliance periods was insufficient to comply with the standards. Commenters noted that facilities' abilities to install pollution control devices are constrained by several factors, including the following: (1) The limited number of contractors experienced in installing control equipment in marine loading facilities; (2) the numerous facilities that will need to meet the standards at the same time; and (3) the lead time needed to meet permitting and safety requirements from permitting authorities and the U.S. Coast Guard.

Commenters stated that EPA had discretion to extend the compliance period under section 183(f), noting the ambiguity of the term "effective date" and that the evidence indicated that the proposed emission control technologies would not be "reasonably available, considering costs, nonair-quality benefits, environmental impacts, energy requirements, and safety factors" within 2 years. Commenters also noted that EPA had the authority to provide for a waiver of compliance with MACT standards under section 112 for up to 1 year if certain findings were made.

On March 8, 1995, EPA reopened the comment period to receive more comments on the issue of whether the compliance periods for the RACT and MACT regulations should be extended. Numerous commenters indicated support for extending the compliance periods, generally reiterating the views expressed in earlier comments. Some commenters also pointed out that greater environmental benefits can sometimes be obtained by granting longer compliance periods, which can allow for better designed, more robust, safer and more advanced technologies, and in this instance, could result in greater use of recovery technologies (rather than incineration). Commenters also noted that previous attempts by States to regulate tank vessel loading in less than 3 years resulted in the need for numerous waivers as it became clear that the deadlines could not be met. One commenter provided a list of several marine loading terminals in California that had installed emission control equipment and indicated that almost all of these installation projects took at least 3 years to complete.

The Agency agrees with the commenters that permitting and safety approvals from permitting authorities and the Coast Guard, the dearth of skilled engineering and construction firms, and the history of facilities being unable to comply with existing regulations compels the Agency to extend the date for full compliance with the RACT and MACT rules. In these final standards, EPA allows sources regulated under section 183(f) 3 years to be in full compliance with the emission control requirements promulgated under section 183(f). In addition, RACT sources may request a waiver of up to 1 year to achieve full compliance with the requirements if they can show that the additional period is necessary for the installation of controls. The Agency believes that this result is consistent with section 183(f). Section 183(f) requires the application of "reasonably available" control technology, considering costs, any non-air quality benefits, environmental impacts, energy requirements, and safety factors. The overwhelming evidence received by the Agency indicates that most, if not all, sources that must install emission control devices cannot do so within 2 years. States that have attempted to enforce such a requirement have been forced to provide waivers to the regulated sources. Given the relative scarcity of qualified contractors and the permitting and other requirements necessary for such construction, it is clear that the emission control technologies required by this rule will not be "reasonably available" within 2 years of the promulgation of this rule. Moreover, the information provided to the Agency indicates that a 2-year deadline may force regulated sources to install equipment that is less reliable and that may cause safety concerns. Given the emphasis that Congress put on safety in these regulations and the fact that the Coast Guard will need to review such installations prior to operation, a 2-year deadline seems contrary to Congress' broad intent and may result in conflicts with Coast Guard requirements. The Agency has in the past provided sources with reasonable time to complete actions required by the Clean Air Act. *See* EPA rulemaking on fuel/fuel additives published on June 27, 1994 (59 FR 33042).

Moreover, EPA believes that the imprecision of the term "effective date" could also provide EPA with the ability to allow compliance after 2 years. The distinction between "effective dates" of regulations and "compliance dates" is important and has been a clear part of administrative procedure for many years. *See, e.g.*, section 112(i)(3); *Natural Resources Defense Council* v. *Environmental Protection Agency*, 22 F. 3d 1125, 1138 (D.C. Cir. 1994).

The Agency is requiring regulated RACT sources to provide proof that they have commenced construction of vapor collection systems and air pollution control devices within 2 years after promulgation of the final standards. The Agency believes that these actions can reasonably be achieved within 2 years of promulgation.

The Agency believes that most RACT terminals will be able to meet the emissions reduction requirements contained in the final standards within the 3 years following the promulgation date. The Agency estimates that only 8 terminals subject to the RACT requirements are not presently controlling emissions to the level specified in the standards. These terminals are among the largest terminals in the U.S., and can reasonably be expected to have in-house staff capable of assisting in the design and installation of control technology. Furthermore, the Agency is aware that some of these terminals are already designing control equipment in anticipation of these final RACT requirements.

The EPA shall allow existing sources regulated solely under section 112 four years to be in full compliance with the emission control requirements promulgated under section 112. Sources must generally comply with MACT standards under section 112 within 3 years of promulgation. However, section 112(i) of the Act specifically allows EPA to provide sources with a waiver of up to 1 year to achieve full compliance with the requirements if they can show that the additional period is necessary for installing the controls. Commenters stated that standards containing similar compliance dates for a large number of sources would result in numerous facilities competing for a limited number of experienced contractors in order to meet the standards at the same time. Commenters suggested a staggered compliance schedule for the sources affected by the standards. Commenters also stated that many sources would require more than 3 years to install the required control equipment given the limited number of contractors experienced in installing control equipment in marine loading facilities and the lead time needed to meet permitting and safety requirements from permitting authorities and the U.S. Coast Guard.

The Agency agrees with the commenters that many MACT sources would probably require 1-year waivers if there was a 3-year compliance date for MACT sources in the final rule. The Agency notes that these sources are typically smaller than the sources regulated under RACT, and would not be as likely to have in-house staff capable of assisting in the design and installation of control technology. Therefore, the Agency believes that the sources controlled under section 112 that are not controlled under section 183(f) should automatically receive a waiver of 1 year that will allow a total of four years from September 19, 1995 to comply with the MACT emission reduction requirements. The Agency believes that this total of 4 years is sufficient time for the estimated 20 sources presently uncontrolled to design and install control technologies sufficient to meet the MACT standards. The Agency believes that the staggered compliance schedule (i.e., 3 years for RACT terminals and 4 years for MACT terminals) coupled with the reduced number of terminals required to control emissions under the final rule should alleviate commenters' concerns about the scarcity of qualified installation consultants and vendors. This extended schedule is also expected to address concerns regarding permitting delays.

The Agency is providing the VMT with 30 months to be in full compliance with these regulations. The Agency believes, per its discussions with APSC, that this extension provides sufficient time to comply with the promulgated rule.

(3) *Addition of new subcategories under the section 112 regulations for offshore terminals and for the Alyeska Pipeline Service Corporation's Valdez Marine Terminal.* In the proposed rule, the Agency established two subcategories based on size for the section 112 MACT regulations. The Agency also solicited comments on whether additional subcategories should be established under the MACT regulations for specific types of terminals based on particular characteristics of those types of terminals of which the Agency had no information at that time. Based on information received in the public comments, the Agency has determined that two additional subcategories exist within the marine tank vessel loading operation source category.

(a) Subcategory for offshore terminals. As stated in the solicitation of comments in the proposed rule, the Agency does not believe that a facility at least one-half mile offshore is part of a land-based contiguous site. The Agency also stated that such offshore terminals present unique regulatory challenges such as costs, environmental impacts, and/or size constraints. The Agency requested information regarding the feasibility and costs of controlling emissions from offshore terminals. The Agency also requested comments on whether offshore terminals should be grouped into a separate subcategory and what the control status of terminals in such a subcategory should be. Comments in response to this request indicated that these types of vessel loading operations face significant challenges in controlling emissions that were different from land-based, contiguous loading operations. These challenges include high costs, technical complications, and permitting requirements that would result from requirements to construct new platforms to locate control equipment adjacent to the offshore terminal or additional subsea or surface lines to route loading vapors to onshore control equipment. Commenters noted that these challenges are either non-existent or not as pronounced for onshore, contiguous terminals. The Agency has therefore determined that a subcategory for these types of terminals is justified and has based its definition for offshore terminals on a minimum distance of one-half mile from the terminal's furthest loading point to the shore, regardless of the existence of subsea lines. [See the discussion in section 2.3.2 of the TSD for the rationale supporting the one-half mile limit].

Once the Agency determined that offshore terminals should be placed in a subcategory for the MACT standards, the MACT floor was determined (see Docket A–90–44, Item Number IV–B–2). Based on information received from commenters, (see Docket A–90–44, Item Number IV–D–136) the Agency estimates that there are fewer than 20 offshore terminals having subsea lines. None of these terminals presently control emissions from marine tank vessel loading. The Agency is also aware of additional offshore terminals that do not have subsea lines. Two of these terminals are known to presently control emissions (see Docket A–90–44, Item Number IV–D–80). Based on the information available to the Agency, the MACT floor for this subcategory is no control of HAP emissions (see MACT floor memorandum in Docket A–90–44, Item Number IV–B–2). Data submitted by commenters showed that the costs associated with the control of offshore terminals are between two and five times more expensive than comparable onshore control techniques (see Docket A–90–44, Item numbers IV–D–108 and IV–D–136). Because of the poor cost effectiveness resulting from these significantly higher costs, as well as the environmental, safety, and technical challenges associated with requiring control more efficient than the MACT floor, the Agency has selected the MACT floor level of no control for offshore marine tank vessel loading operations.

The Agency also determined that offshore terminals loading 10 million barrels or more per year of gasoline or 200 million barrels or more of crude oil should not be required to control VOC or HAP emissions under section 183(f) RACT requirements. Although one commenter (see Docket A–90–44, Item Number IV–D–80) noted two controlled offshore terminals, no information was submitted regarding the specific control techniques used at these two terminals. Since most of the other comments noted that the significantly higher costs and poor cost effectiveness shown by these sources (see previous paragraph) would make control requirements unreasonable for these offshore terminals, the Agency determined that requirement for controls at offshore RACT terminals would not be consistent with the requirements for the technology to be "reasonable."

(b) Subcategory for Alyeska Pipeline Service Company's Valdez Marine Terminal. In the proposed rule, the Agency solicited comment on the possibility of placing the VMT in a separate subcategory. Comments from APSC and several other commenters representing State and local governments, industry, private citizens, and environmental groups were considered by the Agency in developing this final rule.

The Agency has determined that the VMT should be placed in a separate subcategory for the following reasons: (1) The VMT is the largest (by a significant amount) crude oil loading operation in the U.S.; (2) special circumstances, including climatic and economic conditions, require keeping the oil moving through the pipeline; (3) severe meteorological conditions result in increased loading irregularity; (4) the VMT throughput projections show declining throughput over the next several years. Several comments from environmental groups, State and local agencies, and private citizens in the Valdez area did not object to placing VMT in a separate subcategory provided that emissions were controlled. Based on all of these factors, [illegible] Agency determined th[illegible] VMT should be placed in a separate subcategory.

Once the subcategory for VMT was established, the Agency determined the MACT floor for the subcategory (see Docket A–90–44, Item Number IV–B–2). The VMT presently does not control emissions, therefore the MACT floor is no control. However, the Agency noted that in all of the comments received concerning the establishment of this subcategory, the cost effectiveness associated with requiring controls more stringent than the MACT floor is not prohibitive. The annual emissions reductions anticipated from controlling VMT are expected to be approximately 19,000 Mg (20,900 tons) of VOC and approximately 2,500 Mg (2,750 tons) of HAP. The annual costs anticipated with today's regulation of VMT are expected to be $20 million. The resulting cost effectiveness is approximately $1,050 per megagram based on VOC or approximately $8,000 per megagram based on HAP. The Agency therefore selected a strategy for both MACT and RACT standards for VMT that requires a reduction in emissions by 98 percent efficiency of all throughput loaded from at least two of the terminal's loading berths. Maximum limits for total throughput and throughput at uncontrolled berths (above which all VMT loading berths would be required to reduce emissions by 98 percent) are included as part of these standards.

These throughput limits address the projected decreasing throughput that would necessitate the use of only two berths for routine loading after 2001. Provisions to allow for scheduled maintenance of the controlled berths are also established in the VMT standards.

Some commenters initially noted that the cost of controlling VOC may be high relative to the benefits of controlling VOC at a remote site in an Arctic ozone attainment area. Additionally, some commenters initially stated that the benefits of controlling HAP would not appear to justify the costs. However, the Agency has also considered later comments from the APSC, the State of Alaska, the Prince William Sound Regional Citizens Advisory Committee (a local citizens group) and private citizens in determining MACT/RACT for the VMT. These commenters agreed that a Federal rule mandating control of primary emissions at the APSC was acceptable. After careful consideration of the costs, the environmental impacts and the comments, the Agency decided that MACT for this subcategory was control beyond the level of the MACT floor (see Docket A–44–90, Item Number IV–B–2).

(4) *Expansion of the petroleum refineries source category to include marine tank vessel loading operations collocated at petroleum refinery operations.* The preamble to the proposed petroleum refinery NESHAP published in the **Federal Register** on July 15, 1994 (59 FR 36130) requested comments on whether marine tank vessel loading operations at refineries should be included in emissions averaging. On August 31, 1994, the EPA also reopened the comment period for the proposed NESHAP for Marine Tank Vessel Loading Operations (59 FR 44955) to request comment on whether marine terminals collocated at refineries should be moved to the petroleum refinery source category. During the comment period for the gasoline distribution NESHAP, commenters requested that bulk gasoline terminals contiguous to a refinery be regulated by the petroleum refinery NESHAP.

Several commenters responding to the marine tank vessel loading operations proposed NESHAP supported averaging of refinery process unit emissions with emissions from marine terminals and gasoline distribution operations that are located at refineries. The commenters cited more cost effective emission reduction as the advantage of including these emission points in emissions averaging and specifically commented that the costs per Mg emission reduction of the marine tank vessel loading emission controls are high. These commenters also claimed that emission calculation procedures for loading are well established and that adding marine loading to the averaging provisions will not appreciably increase the complexity of enforcement. Other commenters opposed including marine tank vessel loading and gasoline distribution in emissions averaging. Some commenters claimed that these are separate source categories, and the Act does not permit averaging across source categories. Others were concerned that including marine loading in averages could result in uncontrolled peak emissions.

In the final rules, emissions from marine tank vessel loading operations, bulk gasoline terminal or pipeline breakout station storage vessels, and bulk gasoline terminal loading racks at petroleum refineries are allowed to be included in emissions averages. The petroleum refinery source category and source definitions have been changed to include marine tank vessel loading operations, bulk gasoline terminal and pipeline breakout station storage vessels, equipment leaks, and bulk gasoline terminal loading racks classified under SIC codes 5171 (Petroleum Bulk Stations and Terminals) and 4613 (Refined Petroleum Pipelines) that are located at refinery plant sites. Note that these operations are closely connected with refinery process unit operations since they transfer products of the refinery process units.

A marine tank vessel loading operation or gasoline terminal or pipeline breakout station that is collocated at a petroleum refinery can be considered part of the same source as the refinery subject to this rule. Because these operations are redefined to be part of the source subject to the rule, the prohibition against intersource averaging is not violated. However, all terminals subject to section 183(f) regardless of location will not be allowed to average emissions with petroleum refinery sources.

In keeping with EPA's stated goal of increasing flexibility in rulemakings, this decision has been made to provide more opportunities to average. This decision optimizes the opportunities for refiners to find cost-effective emission reductions from overall facility operations on-site. Costs and cost effectiveness of controlling a particular kind of emission point, such as marine tank vessel loading, will vary depending on many site-specific factors. Emissions averaging allows the owner and operator to find the optimal control strategy for their particular situation.

Including emissions from marine tank vessel loading operations, bulk gasoline terminal or pipeline breakout station storage vessels, and bulk gasoline terminal loading racks in emissions averages will result in equivalent or greater overall HAP emission reduction at each refinery. The averaging provisions are structured such that "debits" generated by not controlling an emission point that otherwise would require control must be balanced by achieving extra control at other refinery emission points covered by the NESHAP.

With regard to commenter's concerns about peak emissions, the quarterly cap on the ratio of debits to credits is intended to limit the possibility of exposure peaks. Furthermore, because loading operations occur fairly frequently and emissions from an individual vessel filling or loading event are relatively small, such emissions are not expected to cause significant exposure peaks. Moreover, no evidence has been presented that emissions averaging would permit a very different mix of emissions to occur than would point-by-point compliance. That is, peaks of exposures from batch streams, storage, and loading operations should be equally likely under point-by-point compliance as under emissions averaging; therefore, emissions averaging does not represent a less effective control strategy. Furthermore, in order to receive approval for an emissions average, the owner or operator is required to demonstrate that the emissions average does not increase the risk or hazard relative to compliance without averaging.

(5) *Revision to the subcategories established based on annual HAP emissions from 1 ton per year to 10 tons per year of any single HAP or 25 tons per year of total HAP.* The proposed standards grouped major source terminals into two subcategories based on HAP emissions: Terminals with HAP emissions of 1 ton per year or more and terminals having HAP emissions of less than 1 ton per year. In the preamble of the proposed rule, the Agency requested comment on establishing these subcategories based on size (i.e., HAP emissions). In the public comments, the Agency found general, though not universal, agreement on establishing subcategories based on size for this source category. However, some of the comments encouraged the Agency to raise the HAP emissions level of the controlled subcategory. The final standards continue to group major source terminals into subcategories based on HAP emissions; however, these subcategories were changed to terminals with emissions of 10 tons per year or more of any single HAP or 25

tons per year or more of total HAP and terminals having HAP emissions of less than 10 tons per year of all single HAP or less than 25 tons per year of total HAP. The Agency based this decision on information found in the comments received. Commenters noted that prior state regulations generally (though not invariably) distinguished between large tank vessel loading facilities that are responsible for the vast majority of emissions and small tank vessel loading facilities that are substantially less cost effective to regulate. (As discussed below, the incremental cost effectiveness of moving from the 10/25 ton per year distinction to the 1-ton delineation is between $80,000 and $112,000 per megagram, while the cost effectiveness of the 10/25 ton delineation is between $14,500 and $24,000 per megagram.)

Though section 112 does not provide any language indicating the criteria for subcategorization, section 112(d)(1) of the Act states that EPA may distinguish among classes, types, and sizes of sources in establishing standards. EPA believes that division of this source category into two subcategories based on size is appropriate in this instance. (See section 2.3.1 of the promulgation TSD for additional discussion of the subcategories based on size.)

(6) *Incorporation of minimum vapor pressure limit.* The Agency received several comments regarding HAP having low vapor pressures. Most of these commenters stated that these low vapor pressure HAPs are not presently controlled under existing State regulations and that the control of these low vapor pressure compounds presents technical challenges and imposes significantly greater costs to the affected industry. The proposed rule enabled individual facilities to determine which products to control to achieve the 93 percent mass limit. Therefore, facilities would not have had to control low vapor pressure liquids under the proposed rule if higher vapor pressure liquids were available for control. Based on the comments received, the Agency altered the format of the MACT standards to explicitly exempt low vapor pressure liquids consistent with State requirements and recalculated the control requirement for liquids above the vapor pressure limit. Therefore, the MACT floor for existing sources is no control for liquids having a vapor pressure below 1.5 psia and 97 percent control for liquids having a vapor pressure 1.5 psia or greater. Because no low vapor pressure liquids are required to be controlled at any of the known existing sources, the MACT floor for new sources is also no control for liquids having a vapor pressure below 1.5 psia and 98 percent control for liquids having a vapor pressure 1.5 psia or greater. The format of the standard was changed to an efficiency format to reflect the new approach.

The issue of cost effectiveness to control emission streams from the loading of these low vapor pressure materials was also a realistic concern of the commenters. As the MACT floor for regulation of such activities is no control, EPA has discretion, based on section 112(d)'s criteria used for going beyond the floor, to institute a vapor pressure limit. Because of the high costs cited by commenters, the Agency elected not to require controls more stringent than the MACT floor for these low vapor pressure HAP. The Agency therefore selected a vapor pressure limit of 1.5 psia for determining the HAP emissions reduction for the final standards. Control of HAP having vapor pressures below this limit is not required to meet the standards.

(7) *Recalculation of the MACT floors.* The MACT floors determined for this final rulemaking are different than those in the proposed rule. These final rule MACT floors reflect changes in the Agency's regulation of marine tank vessel loading including: (1) The establishment of subcategories for offshore terminals and the VMT terminal; (2) the incorporation of a 1.5 psia minimum vapor pressure limit instead of the weighted average as was proposed; and (3) the increase of the levels of the subcategories based on size (i.e., HAP emissions) from 1 ton per year to 10/25 tons per year. The MACT floors for the final rule also reflect comments on the proposed rule. However, the Agency has not changed the way in which the MACT floors for the final rule have been calculated. With the exception of the MACT floor for VMT, the MACT floors for existing and new sources in the marine tank vessel loading source category are shown in Table 1.

Using the criteria established in section 112(d)(3) of the Act, and after inclusion of information supplied in the public comments, the MACT floors for existing source marine terminal subcategories subject to regulation under Title III of the Clean Air Act were determined. Additional information on the determination of these MACT floors is in the docket (Docket Number A–90–44, Item Number IV-A–2). There are approximately 44 major source terminals (not including the VMT) that emit 10 tons per year or more of any one hazardous air pollutant (HAP) or 25 tons per year or more of any combination of HAP. Twenty-three of these terminals are controlled. The resulting MACT floor level of control is a 97 percent reduction of HAP emissions. There are approximately 1,435 terminals that emit less than 10 tons per year of all individual HAP and less than 25 tons per year of combined HAP. Seventy-nine of these terminals reduce emissions from marine tank vessel loading. The resulting MACT floor level of control is no reduction in HAP emissions. The Agency estimated that there are less than 30 offshore terminals (i.e., loading terminals located 0.5 miles or more from shore). The Agency is aware of only 2 controlled offshore terminals. Therefore the resulting MACT floor level of control is no reduction in HAP emissions. The VMT is presently uncontrolled. Since this is the only terminal in the VMT source category, the MACT floor level of control is no control.

The MACT floors for new source marine terminal subcategories subject to regulation under Title III of the Act were also calculated following the criteria in section 112(d)(3) of the Act. For new major source onshore terminals (not including the VMT) regardless of the marine tank vessel loading HAP emissions, the best performing source achieves a 98 percent reduction of controlled emissions. Therefore, the resulting MACT floor for these sources is 98 percent reduction of HAP emissions. For new major source offshore terminals whose marine tank vessel loading HAP emissions exceed the limits for a major source (i.e., 10 tons of any one HAP, or 25 tons of total HAP), the best controlled similar source achieves a 95 percent reduction of controlled emissions. The resulting MACT floor for new offshore major sources is therefore a 95 percent reduction in HAP emissions. Since the VMT subcategory only contains a single source, and it is not possible for an additional source to be added to this subcategory, no new source MACT floor was calculated for the VMT subcategory.

(8) *Incorporation of additional flexibility to the monitoring requirements and compliance provisions.* The proposed rule required parametric monitoring or continuous emissions monitoring (CEM) as a means of showing compliance with the standards. Any exceedance of the parameters or concentration limits established during a performance test would have resulted in a violation of the standard. Comments indicated that this approach was too severe and warranted additional flexibility. Although the Agency continues to believe that parametric monitoring can be used to determine compliance given availability

of sufficient test data to establish the relationship between control performance and associated parameters, in consideration of the lack of test data establishing the relationship between marine tank vessel loading emissions control efficiency and parametric monitoring and because of the batch nature of marine tank vessel loading operations, the Agency has thoroughly revised the monitoring requirements and compliance provisions of the final rule. A requirement for an operation and maintenance (O & M) plan has been added to the final regulation to ensure proper operation of the air pollution control and monitoring equipment. The O & M plan contains an inspection schedule for each component of the control and monitoring equipment. The "compliance" language that appeared in § 63.563 of the proposed rule has been removed. In its place, the final rule contains provisions that require an unscheduled inspection and corrective actions when operating parameters exceed the applicable baseline parameters.

Flexibility has also been added to the methods for determining baseline parameters. Owners or operators of a source required to reduce emissions may establish baseline parameters during a performance test or may choose to set the applicable baseline based on a manufacturer's recommended baseline operating parameter.

Commenters on the proposed rule also requested that additional operating parameters be added to the regulation and that sources be allowed to apply for alternatives to the Administrator. Additional operating parameters have been added to the final regulation for several control devices. A cross reference to the general provisions found in 40 CFR part 63 (containing requirements for establishing alternative monitoring procedures) has been provided to assist sources seeking approval of alternative monitoring procedures. Commenters also requested that time intervals of the monitoring requirements be made consistent for each of the operating parameters. In the final rule, sources are required to monitor and record data points every 15 minutes for each operating parameter.

D. Minor Changes

(1) Revisions to definitions and phrasing have been made to clarify the regulation.

(2) Based on comments received and on changes to the monitoring and compliance provision requirements, the reporting requirements have been changed. Under today's final rule, the Agency is requiring the following one-time reports as specified in the general provisions found in 40 CFR part 63, subpart A: report of startup, construction or modification; notification and report of emissions tests and results and/or initial notification of compliance status; notification and report of physical/operational changes; notification and report of waiver applications; and an engineering report describing the vent system used to vent each vent stream to a control device.

The final rule also requires owners or operators to submit yearly summary reports and yearly reports of excess emissions and monitoring system performance reports. However, in order to provide relief from the reporting requirements to well-controlled sources while assuring compliance with the standards, the Agency has provided that sources whose exceedances have durations that total less than 5 percent of the total reporting time for that reporting period and whose CMS downtime for the reporting period is less than 10 percent of the total operating time for that reporting period may submit only the summary report found in 40 CFR part 63 subpart A instead of both the summary report and the full excess emissions and continuous monitoring system performance report found in § 63.567(d)(2).

The final rule does not require quarterly reports of excess emissions or monitoring parameter exceedances. The Agency agreed with commenters that quarterly reporting did not add sufficient compliance assurance to warrant the high costs associated with the quarterly reporting. Quarterly reporting also did not agree with the revised monitoring and compliance determination requirements found in the final rule (see section 3(c)(5) of this preamble and section 2.6 of the promulgation TSD for additional discussion of the revised monitoring requirements contained in the final rule).

(3) Several commenters requested clarification of the general provisions found in 40 CFR part 63 as they relate to this rule. A table identifying the relationship of the final General Provisions requirements has been added to the final regulation. Language similar to that in the General Provisions has been added to subpart Y in cases where a direct reference to the General Provisions was not appropriate.

(4) References to the proposed Performance Specifications 101 and 102 have been updated to incorporate the Agency's promulgation of Performance Specifications 8 and 9.

E. Other Significant Issues

(1) Regulation Under Sections 183(f) and 112

The EPA proposed to regulate tank vessel loading operations under both sections 183(f) and 112 of the Act. Some commenters suggested that regulation under section 112 was inappropriate because section 183(f) specifically provides for regulation of tank vessel loading operations, whereas section 112 is a more general standard. On the other hand, one commenter believed that regulation was more appropriate, at least for certain facilities, under section 112.

The Agency believes that the best interpretation of the Clean Air Act requires that standards be issued under both sections 183(f) and 112. The language of section 112 of the Act is clear. "[T]he Administrator shall publish * * * a list of *all* categories and subcategories of major sources and area sources of [HAP]." Clean Air Act section 112(c)(1), 42 U.S.C. § 7412(c)(1) [emphasis added]. Further, the Administrator "shall promulgate regulations establishing emission standards for each category or subcategory of major sources and area sources of hazardous air pollutants listed for regulation pursuant to subsection (c)." Clean Air Act section 112(d)(1), 42 U.S.C. § 7412(d)(1). The marine tank vessel loading operations source category is clearly a category of major sources, as defined in the Act. The Act is thus clear on its face that this source category should be regulated under section 112.

The fact that two separate sections of the Act regulate the same source category does not necessitate that one of the sections should be ignored. In fact, unless the regulations promulgated under one section would create an inescapable conflict with regulations promulgated under the other section, both must be followed. The regulations promulgated under section 112 are not in conflict with those promulgated under section 183(f). EPA believes that any source regulated under both sections would have no problem meeting the requirements of both standards at the same time.

Congress often provides for regulation of sources under two separate sections. The legislative history indicates that Congress was well aware that sources could be subject to dual regulation under section 112 and other sections of the Act. *See* page 167 of the Senate Committee Report (Report 101–228). In addition, where Congress wanted one section of the Clean Air Act to be exclusive of further regulation under

section 112(d), they said so explicitly; *see* sections 129(h)(2), 112(d)(9). Thus, Congress could have added specific language to section 183(f) preventing the Agency from regulating this source category under section 112; however, it did not do so.

In addition, neither the statute nor the legislative history indicates that Congress intended EPA regulations under section 183(f) to be the exclusive regulation of these sources. In fact, section 183(f) explicitly provides that states may regulate tank vessel loading processes and, in fact, *requires* that any such regulations be as stringent or *more* stringent than the Agency's regulations under section 183(f).

IV. Administrative Requirements

A. Docket

The Docket is an organized and complete file of all the information considered by the EPA in the development of this rulemaking. The Docket is a dynamic file, since material is added throughout the rulemaking development. The docketing system allows members of the public and industries to readily identify and locate documents so that they can effectively participate in the rulemaking process. Along with the statement of basis and purpose of the proposed and promulgated standards and the EPA responses to significant comments, the contents of the Docket will serve as the record in case of judicial review [section 307(d)(7)(A)].

B. Paperwork Reduction Act

The information collection requirements in this rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, and have been assigned OMB control number (2060–0289). An Information Collection Request (ICR) document has been prepared by the EPA (ICR No. 1679.02) to reflect the changed information requirements of the final rule.

This collection of information has an estimated burden per affected facility of about 685 hours for the first year. In subsequent years, the burden is approximately 280 hours per affected facility. These burden estimates include time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Director, Regulatory Information Division, EPA, 401 M St., S.W. (Mail Code 2136), Washington, DC 20460, and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA."

C. Administrative Designation and Regulatory Analysis

Under Executive Order 12866 [58 FR 51735 (October 4, 1993)], the EPA is required to judge whether a regulation is "significant" and therefore subject to Office of Management and Budget (OMB) review and the requirements of this Executive Order to prepare a regulatory impact analysis (RIA). The Order defines "significant regulatory action" as one that is likely to result in a rule that may: (1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising from legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, it has been determined that this rule is a "significant regulatory action" because it will have an annual effect on the economy of $100 million or more. As such, this action was submitted to OMB for review. Changes made in response to OMB suggestions or recommendations are documented in the public record (see Docket A–90–44, Item Number IV–H–2).

D. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires the EPA to consider potential impacts of proposed regulations on small business "entities," which are small businesses, small organizations, and small governments. It is EPA's current policy to perform a regulatory flexibility analysis whenever a regulation is anticipated to adversely affect any small entities. An economic impact and regulatory flexibility analysis for this regulation was performed and included within the regulatory impact analysis that has been submitted to the public docket (Docket Number A–90–44, Item Number IV–A–2).

The regulatory flexibility analysis identified two types of businesses that could incur adverse economic impacts from this standard, marine terminal operations and marine vessel operations. With regard to marine terminal operations, only the very largest terminal operations are expected to be affected by this standard. The decision not to require controls at existing smaller operations greatly reduces the potential for adverse economic impacts on small terminal operations. Nevertheless, some of the smaller terminal operations that will be affected by this regulation could be put under increased competitive pressure as a result of this rule. Of these terminals, however, it is expected that few or none are independently owned. The rest are part of large integrated petroleum operations. The number of small business terminal operations affected by this regulation is expected to be minimal.

With regard to marine vessel operations, the economic impact analysis considered the majority of these operations to be small businesses. However, the number of vessel operations significantly impacted from the proposed standard is not expected to be substantial. Only a relatively small percentage of U.S. marine transported throughput will be impacted by the standard. Excluding crude oil volume shipped by large tankers from the VMT, no more than one-third of the remaining U.S. marine transported throughput is expected be impacted by the standard. It is expected that an even smaller percentage of U.S. vessels will need to be retrofitted to accommodate the volume of affected products. Only the largest and newest vessels (i.e., those that will cost least to retrofit) will therefore need to be retrofitted. Moreover, it is expected that vessel owners will be able to pass forward most retrofit costs in the form of higher prices. Vessels that cannot retrofit cost effectively and that cannot pass through costs can be dedicated to transporting unregulated products.

Economic Impacts

The EPA performed an economic impact analysis of the regulatory requirements in this regulation. Potential price, output, and employment impacts for affected products and for the marine transport industry were examined. Detailed results from the analysis are included in the regulatory impact analysis for this rule that has been submitted to the public docket.

Estimated maximum price increases for the affected products varied but were not large (less than 1%). These price-increase estimates reflect the control cost increases for transporting crude and products. Because these increases are small and because the elasticities of demand for petroleum products are small, estimated percent output reductions were minimal. Correspondingly, estimated employment reductions were also relatively small.

Potentially significant economic impacts on some of the smaller affected terminal operations were identified, although the decision not to require emission controls for existing smaller operations greatly reduces the potential for adverse impacts on small terminal operations. These potential impacts would result from the high per barrel control cost differential between the smaller and larger terminal operations that would need to control emissions. Some of these smaller terminal operations, to the extent that they are competing with nearby larger or unaffected terminal operations, could have had difficulty raising prices sufficiently to cover cost increases and could have been significantly and adversely impacted by this rule if the rule were applicable to such operations.

The potential economic impact on marine vessel owners was substantially reduced because of the decision not to require emission controls for small terminals in this rulemaking. Because only a relatively small percentage of U.S. marine transported volume of products will be impacted by the standard, only a relatively small percentage of U.S. marine vessels will need to retrofit. Thus only the vessels that will cost least to retrofit (most likely the larger, newer, double-skin vessels) will do so, leading to some degree of dedicated service. Vessel owners that do retrofit probably will be able to pass most retrofit costs forward in terms of higher prices.

E. Unfunded Mandates Act

Under section 202 of the Unfunded Mandates Reform Act of 1995 (Unfunded Mandates Act), signed into law on March 22, 1995, the EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a Federal mandate that may result in estimated costs to State, local, or tribal governments in the aggregate; or to the private sector of $100 million or more. The budgetary impact statement must include: (1) An identification of the Federal law under which the rule is promulgated; (2) a qualitative and quantitative assessment of anticipated costs and benefits of the Federal mandate and an analysis of the extent to which such costs to State, local, and tribal governments may be paid with Federal financial assistance; (3) if feasible, estimates of the future compliance costs and any disproportionate budgetary effects of the mandate; (4) if feasible, estimates of the effect on the national economy; and (5) a description of the Agency's prior consultation with elected representatives of State, local, and tribal governments and a summary and evaluation of the comments and concerns presented. Section 203 provides that if any small governments may be significantly or uniquely impacted by the rule, the Agency must establish a plan for obtaining input from and informing, educating, and advising any such potentially affected small governments.

Under section 205 of the Unfunded Mandates Act, the Agency must identify and consider a reasonable number of regulatory alternatives before promulgating a rule for which a budgetary impact statement must be prepared. The Agency must select from those alternatives the least costly, most cost-effective, or least burdensome alternative for State, local, and tribal governments and the private sector, that achieves the objectives of the rule, unless the Agency explains why this alternative is not selected or unless the selection of this alternative is inconsistent with law.

Because this final rule is estimated to result in the expenditure by State, local, and tribal governments in aggregate or by the private sector of $60 million to $100 million per year starting in 2000, EPA has prepared a supplement to the Regulatory Impact Analysis (RIA) in compliance with the Unfunded Mandates Act. The EPA summarizes that supplement as follows:

This final rule is promulgated under section 112 and section 183(f) of the Clean Air Act. The analysis in the RIA developed in preparation of the proposed rule and revised in preparation of the final rule contains the information to be considered in response to the requirements of the Unfunded Mandates Act.

Total expenditures resulting from the final rule are estimated at between $60 million and $100 million (of which less than $75,000 is by State, local, and tribal governments) per year in 1997–2000; and $550,000 (of which $38,000 is by State, local, and tribal governments) per year starting in 2001. There are no federal funds available to assist State, local, and tribal governments in meeting these costs. There are important benefits from VOC and HAP emission reductions because these compounds have significant, adverse impacts on human health and welfare and on the environment. The rule does not have any disproportionate budgetary effects on any particular region of the nation, any State, local, or tribal government, or urban or rural or other type of community. On the contrary, the rule will result in only a minimal increase in the average product rates (less than 1 percent). Moreover, the rule will not have a material effect on the national economy.

Prior to issuing this rule, the EPA provided numerous opportunities (e.g., National Air Pollution Control Techniques Advisory Committee proceedings; public comment period; public hearing; meetings with industry, trade associations, state and local air pollution representatives; State, local, and tribal governments; and concerned citizens) for consultation with interested parties. In general, State and local environmental agencies advocated that EPA adopt more stringent environmental controls. The Agency evaluated the comments and concerns expressed, and the final rule reflects, to the extent consistent with sections 112 and 183(f) of the Act, those comments and concerns. While small governments are not significantly or uniquely affected by the rule, these procedures, as well as additional public conferences and meetings, gave small governments an opportunity to give meaningful and timely input and obtain information, education, and advice on compliance.

The Agency considered several regulatory options in developing the rule. As discussed above, the Agency has found that regulation solely under section 183(f) of the Act would not be consistent with the law. The options selected in the final rule for all subcategories of sources except the VMT subcategory are the least costly and least burdensome alternatives currently available for achieving the objectives of sections 112 and 183(f) of the Act. Regarding regulation of the VMT, the Agency notes that the cost effectiveness of controlling VOC at this terminal is approximately $1,050 per Mg and the cost effectiveness of controlling HAP is approximately $8,000 per Mg. The Agency initially received comments stating that the cost of controlling VOC at this terminal is high relative to the benefits of controlling VOC at a remote site in an Arctic ozone attainment area. Additionally, some commenters initially stated that the benefits of controlling HAP would not appear to justify the costs. However, the Agency has also considered later comments from the APSC, the State of Alaska, the Prince William Sound Regional Citizens Advisory Committee (a local citizens group) and private citizens in determining MACT/RACT for the VMT. These commenters agreed that a Federal rule mandating control of the primary emissions at the APSC was acceptable. After careful consideration of the costs, the environmental impacts and the comments, the Agency decided that MACT for this subcategory was control beyond the level of the MACT floor (see Docket A–44–90, Item Number IV–B–2).

List of Subjects in 40 CFR Parts 9 and 63

Environmental protection, Air pollution control, Intergovernmental relations, Reporting and recordkeeping requirements, Tank vessel standards.

Dated: July 28, 1995.

Carol M. Browner,

Administrator.

For reasons set out in the preamble, title 40, chapter I of the Code of Federal Regulations is amended as follows:

PART 9—[AMENDED]

1. The authority citation for part 9 continues to read as follows:

Authority: 7 U.S.C. 135 *et seq.*, 135–136y; 15 U.S.C. 2001, 2003, 2005, 2006, 2601–2671; 21 U.S.C. 331j, 346a, 348; 31 U.S.C. 9701; 33 U.S.C. 1251 *et seq.*, 1311, 1313d, 1314, 1321, 1326, 1330, 1344, 1345(d) and (e), 1361; E.O. 11735, 38 FR 21243, 3 CFR, 1971–1975 Comp. p. 973; 42 U.S.C. 241, 242b, 243, 246, 300f, 300g, 300g-1, 300g-2, 300g-3, 300g-4, 300g-5, 300g-6, 300j-1, 300j-2, 300j-3, 300j-4, 300j-9, 1857 *et seq.*, 6901–6992k, 7401–7671q, 7542, 9601–9657, 11023, 11048.

2. Section 9.1 is amended by adding a new entry to the table under the indicated heading in numerical order to read as follows:

§ 9.1 OMB approvals under the Paperwork Reduction Act.

* * * * *

40 CFR citation	OMB control No.
* * * * * * *	
National Emissions Standards for Hazardous Air Pollutants for Source Categories.	
* * * * * * *	
63.563–63.567	2060–0289
* * * * * * *	

PART 63—[AMENDED]

1. The authority citation for part 63 continues to read as follows:

Authority: 42 U.S.C. 7401 et seq.

2. By adding a new subpart Y consisting of §§ 63.560 through 63.567 to read as follows:

Subpart Y—National Emission Standards for Marine Tank Vessel Loading Operations

Sec.
63.560 Applicability and designation of affected source.
63.561 Definitions.
63.562 Standards.
63.563 Compliance and performance testing.
63.564 Monitoring requirements.
63.565 Test methods and procedures.
63.566 Construction and reconstruction.
63.567 Recordkeeping and reporting requirements.

Subpart Y—National Emission Standards for Marine Tank Vessel Tank Loading Operations

§ 63.560 Applicability and designation of affected source.

(a) *Maximum achievable control technology (MACT) standards.*

(1) The provisions of this subpart pertaining to the MACT standards in § 63.562(b) and (d) of this subpart are applicable to existing and new sources with emissions of 10 or 25 tons, as that term is defined in § 63.561, except as specified in paragraph (d) of this section, and are applicable to new sources with emissions less than 10 and 25 tons, as that term is defined in § 63.561, except as specified in paragraph (d) of this section.

(2) Existing sources with emissions less than 10 and 25 tons are not subject to the emissions standards in § 63.562(b) and (d).

(3) The recordkeeping requirements of § 63.567(j)(4) and the emission estimation requirements of § 63.565(l) apply to existing sources with emissions less than 10 and 25 tons.

(b) *Reasonably available control technology (RACT) standards.*

(1) The provisions of this subpart pertaining to RACT standards in § 63.562(c) and (d) of this subpart are applicable to sources with throughput of 10 M barrels or 200 M barrels, as that term is defined in § 63.561, except as specified in paragraph (d) of this section.

(2) Sources with throughput less than 10 M barrels and 200 M barrels, as that term is defined in § 63.561, are not subject to the emissions standards in § 63.562(c) and (d).

(c) *General Provisions applicability.* Owners or operators of affected sources, as that term is defined in § 63.561, of this subpart must comply with the requirements of subpart A of this part in accordance with the provisions for applicability of subpart A to this subpart in Table 1 of this section.

(d) *Exemptions from MACT and RACT standards.*

(1) This subpart does not apply to emissions resulting from marine tank vessel loading operations, as that term is defined in § 63.561, of commodities with vapor pressures less than 10.3 kilopascals (kPa) (1.5 pounds per square inch, absolute) (psia) at standard conditions, 20°C and 760 millimeters Hg (mm Hg).

(2) The provisions of this subpart pertaining to the MACT standards in § 63.562(b)(2), (3) and (4) and to the RACT standards in § 63.562(c)(3) and (4) do not apply to marine tank vessel loading operations where emissions are reduced by using a vapor balancing system, as that term is defined in § 63.561. The provisions pertaining to the vapor collection system, ship-to-shore compatibility, and vapor tightness of marine tank vessels in § 63.562(b)(1) and (c)(2) do apply.

(3) The provisions of this subpart pertaining to the MACT standards in § 63.562(b)(2), (3), and (4) do not apply to marine tank vessel loading operations that are contiguous with refinery operations at sources subject to and complying with subpart CC of this part, National Emissions Standards for Organic Hazardous Air Pollutants from Petroleum Refineries, except to the extent that any such provisions of this subpart are made applicable by subpart CC of this part.

(4) The provisions of this subpart pertaining to the MACT standards in § 63.562(b) and (d) do not apply to benzene emissions from marine tank vessel loading operations that are subject to and complying with 40 CFR part 61, subpart BB, National Emissions Standards for Benzene Emissions from Benzene Transfer Operations, except that benzene emissions or other HAP emissions (i.e., nonbenzene HAP emissions) from marine tank vessel loading operations that are not subject to subpart BB are subject to the provisions of this subpart.

(5) The provisions of this subpart pertaining to the MACT standards in § 63.562(b) and (d) do not apply to marine tank vessel loading operations at loading berths that only transfer liquids containing organic HAP as impurities, as that term is defined in § 63.561.

(6) The provisions of this subpart do not apply to marine tank vessel loading operations at existing offshore loading terminals, as that term is defined in § 63.561.

(7) The provisions of this subpart do not apply to ballasting operations, as that term is defined in § 63.561.

(e) *Compliance dates.*

(1) *MACT standards compliance dates, except the Valdez Marine Terminal (VMT) source.*

(i) A new or existing source with emissions of 10 or 25 tons, except the VMT source, and a new source with emissions less than 10 and 25 tons, except the VMT source, that has an initial startup date on or before September 20, 1999 shall comply with the provisions of this subpart pertaining to the MACT standards in § 63.562(b) no later than 4 years after the effective date.

(ii) A new source with emissions of 10 or 25 tons, except the VMT source, and a new source with emissions less than 10 and 25 tons, except the VMT source, that has an initial startup date after September 20, 1999 shall comply with provisions of this subpart pertaining to the MACT standards in § 63.562(b) immediately upon startup.

(iii) A source with emissions less than 10 and 25 tons that increases its emissions subsequent to September 20, 1999 such that it becomes a source with emissions of 10 or 25 tons shall comply with the provisions of this subpart pertaining to the MACT standards in § 63.562(b) within 3 years following the exceedance of the threshold level.

(2) *RACT standards compliance dates, except the VMT source.*

(i) A source with throughput of 10 M barrels or 200 M barrels, except the VMT source, with an initial startup date on or before September 21, 1998 shall comply with § 63.562(c)(1) no later than 2 years after the effective date.

(ii) A source with throughput of 10 M barrels or 200 M barrels, except the VMT source, with an initial startup date on or before September 21, 1998 shall comply with the provisions of this subpart pertaining to the RACT standards in § 63.562(c) other than § 63.562(c)(1), no later than 3 years after the effective date.

(iii) A source with throughput of 10 M barrels or 200 M barrels, except the VMT source, with an initial startup date after September 21, 1998 shall comply with the provisions of this subpart pertaining to the RACT standards in § 63.562(c) immediately upon startup.

(iv) A source with throughput less than 10 M barrels and 200 M barrels that increases its throughput subsequent to September 21, 1998 such that it becomes a source with throughput of 10 M barrels or 200 M barrels shall comply with the provisions of this subpart pertaining to the RACT standards in § 63.562(c) within 3 years following the exceedance of the threshold levels.

(v) A source with throughput of 10 M barrels or 200 M barrels may apply for approval from the Administrator for an extension of the compliance date of up to 1 year if it can demonstrate that the additional time is necessary for installation of the control device.

(3) *MACT and RACT compliance dates for the VMT source.*

The VMT source, as that term is defined in § 63.561, shall comply with the provisions of this subpart pertaining to the MACT and RACT standards in § 63.562(d) no later than 30 months after the effective date.

TABLE 1 OF § 63.560.—GENERAL PROVISIONS APPLICABILITY TO SUBPART Y

Reference	Applies to affected sources in subpart Y	Comment
63.1(a)(1)	Yes	Additional terms are defined in § 63.561; when overlap between subparts A and Y occurs, subpart Y takes precedence.
63.1(a)(2)	Yes	
63.1(a)(3)	Yes	
63.1(a)(4)	Yes	Subpart Y clarifies the applicability of each paragraph in subpart A to sources subject to subpart Y in this table.
.63.1(a)(5)	No	Reserved.
63.1(a)(6)	Yes	
63.1(a)(7)	Yes	
63.1(a)(8)	Yes	
63.1(a)(9)	No	Reserved.
63.1(a)(10)	Yes	
63.1(a)(11)	Yes	§ 63.567(a) also allows report submissions via facsimile and on electronic media.
63.1(a)(12)	Yes

§ 63.561 Definitions.

As used in this subpart, all terms not defined herein shall have the meaning given them in the Clean Air Act or in subpart A of this part.

Affected source means a source with emissions of 10 or 25 tons, a new source with emissions less than 10 and 25 tons, a new major source offshore loading terminal, a source with throughput of 10 M barrels or 200 M barrels, or the VMT source, that is subject to the emissions standards in § 63.562.

Air pollution control device or *control device* means a combustion device or vapor recovery device.

Ballasting operations means the introduction of ballast water into a cargo tank of a tankship or oceangoing barge.

Baseline operating parameter means a minimum or maximum value of a process parameter, established for a control device during a performance test where the control device is meeting the required emissions reduction or established as the manufacturer recommended operating parameter, that, if achieved by itself or in combination with one or more other operating parameters, determines if a control device is operating properly.

Boiler means a device that combusts any fuel and produces steam or heats water or any other heat transfer medium. This term includes any duct burner that combusts fuel and is part of a combined cycle system.

Car-seal means a seal that is placed on a device used to change the position of a valve (e.g., from open to closed) in such a way that the position of the valve cannot be changed without breaking the seal.

Combustion device means all equipment, including, but not limited to, thermal incinerators, catalytic incinerators, flares, boilers, and process heaters used for combustion or destruction of organic vapors.

Commenced means, with respect to construction of an air pollution control device, that an owner or operator has undertaken a continuous program of construction or that an owner or operator has entered into a contractual obligation to undertake and complete, within a reasonable time, a continuous program of construction.

Commodity means a distinct product that a source loads onto marine tank vessels.

Continuous means, with respect to monitoring, reading and recording (either in hard copy or computer readable form) of data values measured at least once every 15 minutes.

Crude oil means a naturally occurring mixture consisting predominantly of hydrocarbons and/or sulfur, nitrogen, and oxygen derivatives of hydrocarbons that is removed from the earth in a liquid state or is capable of being so removed.

Exceedance or *Variance* means, with respect to parametric monitoring, the operating parameter of the air pollution control device that is monitored as an indication of proper operation of the control device is outside the acceptable range or limits for the baseline parameter given in § 63.563(b)(4) through (9).

Excess emissions means, with respect to emissions monitoring, the concentration of the outlet stream of the air pollution control device is outside the acceptable range or limits for the baseline concentration given in § 63.563(b)(4) through (9).

Flow indicator means a device that indicates whether gas flow is present in a line or vent system.

Gasoline means any petroleum distillate or petroleum distillate/alcohol blend having a Reid vapor pressure of 27.6 kPa (4.0 psia) or greater, that is used as a fuel for internal combustion engines.

Impurity means HAP substances that are present in a commodity or that are produced in a process coincidentally with the primary product or commodity and that are 0.5 percent total HAP by weight or less. An impurity does not serve a useful purpose in the production or use of the primary product or commodity and is not isolated.

Leak means a reading of 10,000 parts per million volume (ppmv) or greater as methane that is determined using the test methods in Method 21, appendix A of part 60 of this chapter.

Lightering or *Lightering operation* means the offshore transfer of a bulk liquid cargo from one marine tank vessel to another vessel.

Loading berth means the loading arms, pumps, meters, shutoff valves, relief valves, and other piping and valves necessary to fill marine tank vessels. The loading berth includes those items necessary for an offshore loading terminal.

Loading cycle means the time period from the beginning of filling a single marine tank vessel until commodity flow to the marine tank vessel ceases.

Maintenance allowance means a period of time that an affected source is allowed to perform maintenance on the loading berth without controlling emissions from marine tank vessel loading operations.

Marine tank vessel loading operation means any operation under which a commodity is bulk loaded onto a marine tank vessel from a terminal, which may include the loading of multiple marine tank vessels during one loading operation. Marine tank vessel loading operations do not include refueling of marine tank vessels.

Marine vessel or *Marine tank vessel* means any tank ship or tank barge that transports liquid product such as gasoline or crude oil in bulk.

Nonvapor-tight means any marine tank vessel that does not pass the required vapor-tightness test.

Offshore loading terminal means a location that has at least one loading berth that is 0.81 km (0.5 miles) or more from the shore that is used for mooring a marine tank vessel and loading liquids from shore.

Primary fuel means the fuel that provides the principal heat input to the device. To be considered primary, the fuel must be able to sustain operation of the device without the addition of other fuels.

Process heater means a device that transfers heat liberated by burning fuel to fluids contained in tubes, including all fluids except water that are heated to produce steam.

Recovery device means an individual unit of equipment, including, but not limited to, a carbon adsorber, condenser/refrigeration unit, or absorber that is capable of and used for the purpose of removing vapors and recovering liquids or chemicals.

Routine loading means, with respect to the VMT source, marine tank vessel loading operations that occur as part of normal facility operation over a loading berth when no loading berths are inoperable due to maintenance.

Secondary fuel means any fuel other than the primary fuel. The secondary fuel provides supplementary heat in addition to the heat provided by the primary fuel and is generally fired through a burner other than the primary burner.

Source(s) means any location where at least one dock or loading berth is bulk loading onto marine tank vessels, except offshore drilling platforms and lightering operations.

Source(s) with emissions less than 10 and 25 tons means major source(s) having aggregate actual HAP emissions from marine tank vessel loading operations at all loading berths as follows:

(1) Prior to the compliance date, of less than 9.1 Mg (10 tons) of each individual HAP calculated on a 24-month annual average basis after September 19, 1997 and less than 22.7 Mg (25 tons) of all HAP combined calculated on a 24-month annual average basis after September 19, 1997, as determined by emission estimation in § 63.565(l) of this subpart; and

(2) After the compliance date, of less than 9.1 Mg (10 tons) of each individual HAP calculated annually after September 20, 1999 and less than 22.7 Mg (25 tons) of all HAP combined calculated annually after September 20, 1999, as determined by emission estimation in § 63.565(l) of this subpart.

Source(s) with emissions of 10 or 25 tons means major source(s) having aggregate actual HAP emissions from marine tank vessels loading operations at all loading berths as follows:

(1) Prior to the compliance date, emissions of 9.1 Mg (10 tons) or more of each individual HAP calculated on a 24-month annual average basis after September 19, 1997 or of 22.7 Mg (25 tons) or more of all HAP combined calculated on a 24-month annual average basis after September 19, 1997, as determined by emission estimation in § 63.565(l); or

(2) After the compliance date, emissions of 9.1 Mg (10 tons) or more of each individual HAP calculated annually after September 20, 1999 or of 22.7 Mg (25 tons) or more of all HAP combined calculated annually after September 20, 1999, as determined by emission estimation in § 63.565(l).

Source(s) with throughput less than 10 M barrels and 200 M barrels means source(s) having aggregate loading from marine tank vessel loading operations at all loading berths as follows:

(1) Prior to the compliance date, of less than 1.6 billion liters (10 million (M) barrels) of gasoline on a 24-month annual average basis and of less than 32 billion liters (200 M barrels) of crude oil on a 24-month annual average basis after September 19, 1996; and

(2) After the compliance date, of less than 1.6 billion liters (10 M barrels) of gasoline annually and of less than 32 billion liters (200 M barrels) of crude oil annually after September 21, 1998.

Source(s) with throughput of 10 M barrels or 200 M barrels means source(s) having aggregate loading from marine tank vessel loading operations at all loading berths as follows:

(1) Prior to the compliance date, of 1.6 billion liters (10 M barrels) or more of gasoline on a 24-month annual average basis or of 32 billion liters (200 M barrels) or more of crude oil on a 24-month annual average basis after September 19, 1996; or

(2) After the compliance date, of 1.6 billion liters (10 M barrels) or more of gasoline annually or of 32 billion liters (200 M barrels) or more of crude oil annually after September 21, 1998.

Terminal means all loading berths at any land or sea based structure(s) that loads liquids in bulk onto marine tank vessels.

Twenty-four-month (24-month) annual average basis means annual HAP emissions, with respect to MACT standards, or annual loading throughput, with respect to RACT standards, from marine tank vessel loading operations averaged over a 24-month period.

Valdez Marine Terminal (VMT) source means the major source that is permitted under the Trans-Alaska Pipeline Authorization Act (TAPAA) (43 U.S.C. § 1651 *et seq.*). The source is located in Valdez, Alaska in Prince William Sound.

Vapor balancing system means a vapor collection system or piping system that is designed to collect organic HAP vapors displaced from marine tank vessels during marine tank vessel loading operations and that is designed to route the collected organic HAP vapors to the storage vessel from which the liquid being loaded originated or to compress collected organic HAP vapors and commingle with the raw feed of a process unit.

Vapor collection system means any equipment located at the source, i.e., at the terminal, that is not open to the atmosphere, that is composed of piping, connections, and flow inducing devices, and that is used for containing and transporting vapors displaced during

the loading of marine tank vessels to a control device or for vapor balancing. This does not include the vapor collection system that is part of any marine vessel vapor collection manifold system.

Vapor-tight marine vessel means a marine tank vessel that has demonstrated within the preceding 12 months to have no leaks. A marine tank vessel loaded at less than atmospheric pressure is assumed to be vapor tight for the purpose of this standard.

Volatile organic compounds or *VOC* is as defined in 40 CFR 51.100(s) of this chapter.

§ 63.562 Standards.

(a) The emissions limitations in paragraphs (b), (c), and (d) of this section apply during marine tank vessel loading operations.

(b) *MACT standards, except for the VMT source.*

(1)(i) *Vapor collection system of the terminal.* The owner or operator of a new source with emissions less than 10 and 25 tons and an existing or new source with emissions of 10 or 25 tons shall equip each terminal with a vapor collection system that is designed to collect HAP vapors displaced from marine tank vessels during marine tank vessel loading operations and to prevent HAP vapors collected at one loading berth from passing through another loading berth to the atmosphere, except for those commodities exempted under § 63.560(d).

(ii) *Ship-to-shore compatibility.* The owner or operator of a new source with emissions less than 10 and 25 tons and an existing or new source with emissions of 10 or 25 tons shall limit marine tank vessel loading operations to those vessels that are equipped with vapor collection equipment that is compatible with the terminal's vapor collection system, except for those commodities exempted under § 63.560(d).

(iii) *Vapor tightness of marine vessels.* The owner or operator of a new source with emissions less than 10 and 25 tons and an existing or new source with emissions of 10 or 25 tons shall limit marine tank vessel loading operations to those vessels that are vapor tight and to those vessels that are connected to the vapor collection system, except for those commodities exempted under § 63.560(d).

(2) *MACT standards for existing sources with emissions of 10 or 25 tons.* The owner or operator of an existing source with emissions of 10 or 25 tons, except offshore loading terminals and the VMT source, shall reduce captured HAP emissions from marine tank vessel loading operations by 97 weight-percent, as determined using methods in § 63.565 (d) and (l).

(3) *MACT standards for new sources.* The owner or operator of a new source with emissions less than 10 and 25 tons or a new source with emissions of 10 or 25 tons, except offshore loading terminals and the VMT source, shall reduce HAP emissions from marine tank vessel loading operations by 98 weight-percent, as determined using methods in § 63.565 (d) and (l).

(4) *MACT standards for new major source offshore loading terminals.* The owner or operator of a new major source offshore loading terminal shall reduce HAP emissions from marine tank vessel loading operations by 95 weight-percent, as determined using methods in § 63.565 (d) and (l).

(5) *Prevention of carbon adsorber emissions during regeneration.* The owner or operator of a source subject to paragraph (b)(2), (3), or (4) shall prevent HAP emissions from escaping to the atmosphere from the regeneration of the carbon bed when using a carbon adsorber to control HAP emissions from marine tank vessel loading operations.

(6) *Maintenance allowance for loading berths.* The owner or operator of a source subject to paragraph (b)(2), (3) or (4), may apply for approval to the Administrator for a maintenance allowance for loading berths based on a percent of annual throughput or annual marine tank vessel loading operation time for commodities not exempted in § 63.560(d). The owner or operator shall maintain records for all maintenance performed on the air pollution control equipment. The Administrator will consider the following in approving the maintenance allowance:

(i) The owner or operator expects to be in violation of the emissions standards due to maintenance;

(ii) Due to conditions beyond the reasonable control of the owner or operator, compliance with the emissions standards during maintenance would result in unreasonable economic hardship;

(iii) The economic hardship cannot be justified by the resulting air quality benefit;

(iv) The owner or operator has given due consideration to curtailing marine vessel loading operations during maintenance;

(v) During the maintenance allowance, the owner or operator will endeavor to reduce emissions from other loading berths that are controlled as well as from the loading berth the owner or operator is seeking the maintenance allowance; and

(vi) During the maintenance allowance, the owner or operator will monitor and report emissions from the loading berth to which the maintenance allowance applies.

(c) *RACT standards, except the VMT source.*

(1) *Commencement of construction.* The owner or operator of a source with throughput of 10 M barrels or 200 M barrels, except the VMT source, with an initial startup date on or before September 21, 1998 shall provide the Agency no later than 2 years after the effective date with proof that it has commenced construction of its vapor collection system and air pollution control device.

(2) (i) *Vapor collection system of the terminal.* The owner or operator of a source with throughput of 10 M barrels or 200 M barrels shall equip each terminal with a vapor collection system that is designed to collect VOC vapors displaced from marine tank vessels during loading and to prevent VOC vapors collected at one loading berth from passing through another loading berth to the atmosphere, except for those commodities exempted under § 63.560(d).

(ii) *Ship-to-shore compatibility.* The owner or operator of a source with throughput of 10 M barrels or 200 M barrels shall limit marine tank vessel loading operations to those vessels that are equipped with vapor collection equipment that is compatible with the terminal's vapor collection system, except for those commodities exempted under § 63.560(d).

(iii) *Vapor tightness of marine vessels.* The owner or operator of a source with throughput of 10 M barrels or 200 M barrels shall limit marine tank vessel loading operations to those vessels that are vapor-tight and to those vessels that are connected to the vapor collection system, except for those commodities exempted under § 63.560(d).

(3) *RACT standard for sources with throughput of 10 M or 200 M barrels, except the VMT source.* The owner or operator of a source with throughput of 10 M barrels or 200 M barrels, except the VMT source, shall reduce captured VOC emissions from marine tank vessel loading operations by 98 weight-percent when using a combustion device or reduce captured VOC emissions by 95 weight-percent when using a recovery device, as determined using methods in § 63.565(d) and (l).

(4) The owner or operator of a source with throughput of 10 M barrels or 200 M barrels, except the VMT source, may meet the requirements of paragraph (c)(3) by reducing gasoline loading

emissions to, at most, 1,000 ppmv outlet VOC concentration.

(5) *Prevention of carbon adsorber emissions during regeneration.* The owner or operator of a source with throughput of 10 M barrels or 200 M barrels shall prevent HAP emissions from escaping to the atmosphere from the regeneration of the carbon bed when using a carbon adsorber to control HAP emissions from marine tank vessel loading operations.

(6) *Maintenance allowance for loading berths.* The owner or operator of a source with throughput of 10 M barrels or 200 M barrels may apply for approval to the Administrator for a maintenance allowance for loading berths based on a percent of annual throughput or annual marine tank vessel loading operation time for commodities not exempted in § 63.560(d). The owner or operator shall maintain records for all maintenance performed on the air pollution control equipment. The Administrator will consider the following in approving the maintenance allowance:

(i) The owner or operator expects to be in violation of the emissions standards due to maintenance;

(ii) Due to conditions beyond the reasonable control of the owner or operator, compliance with the emissions standards during maintenance would result in unreasonable economic hardship;

(iii) The economic hardship cannot be justified by the resulting air quality benefit;

(iv) The owner or operator has given due consideration to curtailing marine vessel loading operations during maintenance;

(v) During the maintenance allowance, the owner or operator will endeavor to reduce emissions from other loading berths that are controlled as well as from the loading berth the owner or operator is seeking the maintenance allowance; and

(vi) During the maintenance allowance, the owner or operator will monitor and report emissions from the loading berth to which the maintenance allowance applies.

(d) *MACT and RACT standards for the VMT source.*

(1) (i) *Vapor collection system of the terminal.* The owner or operator of the VMT source shall equip each terminal subject under paragraph (d)(2) with a vapor collection system that is designed to collect HAP vapors displaced from marine tank vessels during marine tank vessel loading operations and to prevent HAP vapors collected at one loading berth from passing through another loading berth to the atmosphere, except for those commodities exempted under § 63.560(d).

(ii) *Ship-to-shore compatibility.* The owner or operator of the VMT source shall limit marine tank vessel loading operations at berths subject under paragraph (d)(2) of this section to those vessels that are equipped with vapor collection equipment that is compatible with the terminal's vapor collection system, except for those commodities exempted under § 63.560(d).

(iii) *Vapor tightness of marine vessels.* The owner or operator of the VMT source shall limit marine tank vessel loading operations at berths subject under paragraph (d)(2) of this section to those vessels that are vapor-tight and to those vessels that are connected to the vapor collection system, except for those commodities exempted under § 63.560(d).

(2) The owner or operator of the VMT source shall reduce captured HAP and VOC emissions by 98 weight-percent, as determined using methods in § 63.565(d) and (l) for loading berths subject under this paragraph according to paragraphs (d)(2)(i), (ii), (iii), and (iv):

(i) The owner or operator of the VMT source shall equip at least two loading berths and any additional berths indicated pursuant to paragraph (d)(2)(iii) with a vapor collection system and air pollution control device and shall load marine tank vessels over loading berths equipped with a vapor collection system and control device to the maximum extent practicable. The owner or operator shall equip all loading berths that will be used for routine loading after March 19, 1998 with a vapor collection system and control device if the annual average daily loading rate for all loading berths exceeds the limits in paragraphs (d)(2)(i)(A), (B), and (C) of this section.

(A) For 1995, 1,630,000 barrels per day; and

(B) For 1996, 1,546,000 barrels per day; and

(C) For 1997, 1,445,000 barrels per day.

(ii) Maximum extent practicable means that the total annual average daily loading over all loading berths not equipped with a vapor collection system and control device shall not exceed the totals in paragraphs (d)(2)(ii)(A) and (B):

(A) *Loading allowances for marine tank vessel loading operations at loading berths not equipped with control devices.* The following maximum annual average daily loading rate for routine loading at loading berths not equipped with control devices in any of the following years shall not exceed:

(*a*) For 1998, 275,000 barrels per day;

(*b*) For 1999, 205,000 barrels per day;

(*c*) For 2000, 118,000 barrels per day;

(*d*) For 2001, 39,000 barrels per day; and

(*e*) For 2002 and subsequent years, no marine tank vessel loading operations shall be performed at berths not equipped with a vapor collection system and control device, except as allowed for maintenance under paragraph (B).

(B) *Maintenance allowances for loading berths subject under paragraph (d)(2)(i).* Beginning in the year 2000, the owner or operator of the VMT source may have a maximum of 40 calendar days per calendar year use of loading berths not equipped with a vapor collection system and control device, in accordance with the limits in paragraph (d)(2)(ii)(B)(*a*), (*b*), or (*c*), to allow for maintenance of loading berths subject to paragraph (d)(2)(i). Beginning in the year 2002, the total annual average daily loading of crude oil over all loading berths not equipped with a vapor collection system and control device shall not exceed the amount stated in paragraph (d)(2)(ii)(B)(*b*). The 40 days allowed for maintenance shall be converted into a compliance measure of annual average daily loading over the loading berths not equipped with a vapor collection system and control device as follows:

(*a*) If the total annual average daily volume of crude oil loaded at the facility was greater than or equal to 1,100,000 barrels per day in the prior calendar year, the maintenance allowance shall not exceed an annual average daily loading of 60,000 barrels per day.

(*b*) If the total annual average daily volume of crude oil loaded at the facility was less than 1,100,000 barrels per day and greater than or equal to 550,000 barrels per day in the prior calendar year, the maintenance allowance for the calendar year shall not exceed Q_m:

$$Q_m = \frac{(P-550{,}000)\times 40}{365}$$

Where:

Q_m = maintenance allowance, barrels per day

P = prior calendar year's average daily volume of crude oil loaded at the facility, barrels per day.

(*c*) If the total annual average daily volume of crude oil loaded at the facility was less than 550,000 barrels per day in the prior calendar year, there shall be no maintenance allowance.

(iii) If the average daily loading rate for the loading berths not equipped with a vapor collection system and control device is greater than the combined

amounts in any year listed in paragraphs (d)(2)(i)(A), (B), and (C) and (d)(2)(ii)(A) and (B), then the owner or operator of the VMT source shall equip all loading berths used for routine loading with a vapor collection system and control device within 2 years of the exceedance except that in an emergency situation the Administrator may, instead of requiring controls, approve an alternative plan to reduce loading over the unequipped berth(s) to a level which will ensure compliance with the applicable limit. Beginning in the year 2002, the owner or operator of the VMT source shall equip all uncontrolled loading berths used for marine tank vessel loading operations beyond the maintenance allowance in paragraph (d)(2)(ii)(B) with a vapor collection system and control device.

(iv) The owner or operator of the VMT source shall develop a program to communicate to relevant facility operations and marine transportation personnel and engage their active and consistent participation in honoring the intent and goal of minimizing loaded volumes over the unequipped berths and maximizing the loaded volumes at the berths equipped with a vapor collection system and control device to prevent exceedance of the load volume limits in paragraphs (d)(2)(ii)(A) and (B). This program is to be presented semi-annually during the first year of compliance and annually thereafter until the use of unequipped berths for routine loading is no longer required.

(3) The owner or operator of the VMT source shall submit annual reports on or before January 31 of each year to the Administrator certifying the annual average daily loading rate for the previous calendar year. Beginning on January 31, 1996, for the reported year 1995, the annual report shall specify the annual average daily loading rate over all loading berths. Beginning on January 31, 1999, for the reported year 1998, the annual report shall specify the annual average daily loading rate over all loading berths, over each loading berth equipped with a vapor collection system and control device, and over each loading berth not equipped with a vapor collection system and control device. The annual average daily loading rate under this section is calculated as the total amount of crude oil loaded during the calendar year divided by 365 days or 366 days, as appropriate.

(e) *Operation and maintenance requirements for air pollution control equipment and monitoring equipment for affected sources.* At all times, including periods of startup, shutdown, and malfunction, owners or operators of affected sources shall operate and maintain a source, including associated air pollution control equipment, in a manner consistent with safety and good air pollution control practices for minimizing emissions. Determination of whether acceptable operation and maintenance procedures are being used will be based on information available to the Administrator which may include, but is not limited to, monitoring results, review of operation and maintenance procedures, review of operation and maintenance records, and inspection of the source.

(1) The Administrator will determine compliance with design, equipment, work practice, or operational emission standards by evaluating an owner or operator's conformance with operation and maintenance requirements.

(2) The owner or operator of an affected source shall develop and implement a written operation and maintenance plan that describes in detail a program of corrective action for varying (i.e., exceeding baseline parameters) air pollution control equipment and monitoring equipment, based on monitoring requirements in § 63.564, used to comply with these emissions standards. The plan shall also identify all routine or otherwise predictable continuous monitoring system (thermocouples, pressure transducers, continuous emissions monitors (CEMS), etc.) variances.

(i) The plan shall specify procedures (preventive maintenance) to be followed to ensure that pollution control equipment and monitoring equipment functions properly and variances of the control equipment and monitoring equipment are minimal.

(ii) The plan shall identify all operating parameters to be monitored and recorded for the air pollution control device as indicators of proper operation and shall establish the frequency at which the parameters will be monitored (see § 63.564).

(iii) Owners or operators of affected sources shall incorporate a standardized inspection schedule for each component of the control device used to comply with the emissions standards in § 63.562(b), (c), and (d). To satisfy the requirements of this paragraph, the owner or operator may use the inspection schedule recommended by the vendor of the control system or any other technical publication regarding the operation of the control system.

(iv) Owners or operators shall develop and implement a continuous monitoring system (CMS) quality control program. The owner or operator shall develop and submit to the Administrator for approval upon request a site-specific performance evaluation test plan for the CMS performance evaluation required in § 63.8(e) of subpart A of this part. Each quality control program shall include, at a minimum, a written protocol that describes procedures for initial and any subsequent calibration of the CMS; determination and adjustment of the calibration drift of the CMS; preventive maintenance of the CMS, including spare parts inventory; data recording, calculations, and reporting; and accuracy audit procedures, including sampling and analysis methods. The owner or operation shall maintain records of the procedures that are part of the quality control program developed and implemented for CMS.

(3) Based on the results of the determination made under paragraph (e)(2), the Administrator may require that an owner or operator of an affected source make changes to the operation and maintenance plan for that source. Revisions may be required if the plan:

(i) Does not address a variance of the air pollution control equipment or monitoring equipment that has occurred that increases emissions;

(ii) Fails to provide for operation during a variance of the air pollution control equipment or the monitoring equipment in a manner consistent with safety and good air pollution control practices; or

(iii) Does not provide adequate procedures for correcting a variance of the air pollution control equipment or monitoring equipment as soon as reasonable.

(4) If the operation and maintenance plan fails to address or inadequately addresses a variance event at the time the plan was initially developed, the owner or operator shall revise the operation and maintenance plan within 45 working days after such an event occurs. The revised plan shall include procedures for operating and maintaining the air pollution control equipment or monitoring equipment during similar variance events and a program for corrective action for such events.

(5) The operation and maintenance plan shall be developed by the source's compliance date. The owner or operator shall keep the written operation and maintenance plan on record to be made available for inspection, upon request, by the Administrator for the life of the source. In addition, if the operation and maintenance plan is revised, the owner or operator shall keep previous (i.e., superseded) versions of the plan on record to be made available for inspection upon request by the Administrator for a period of 5 years after each revision to the plan.

(6) To satisfy the requirements of the operation and maintenance plan, the owner or operator may use the source's standard operating procedures (SOP) manual, an Occupational Safety and Health Administration (OSHA) plan, or other existing plans provided the alternative plans meet the requirements of this section and are made available for inspection when requested by the Administrator.

§ 63.563 Compliance and performance testing.

(a) The following procedures shall be used to determine compliance with the emissions limits under § 63.562(b)(1), (c)(2), and (d)(1):

(1) *Vent stream by-pass requirements for the terminal's vapor collection system.*

(i) In accordance with § 63.562(b)(1)(i), (c)(2)(i), and (d)(1)(i), each valve in the terminal's vapor collection system that would route displaced vapors to the atmosphere, either directly or indirectly, shall be secured closed during marine tank vessel loading operations either by using a car-seal or a lock-and-key type configuration, or the by-pass line from the valve shall be equipped with a flow indicator, except for those valves used for pressure/vacuum relief, analyzers, instrumentation devices, sampling, and venting for maintenance. Marine tank vessel loading operations shall not be performed with open by-pass lines.

(ii) Repairs shall be made to valves, car-seals, or closure mechanisms no later than 15 days after a change in the position of the valve or a break in the car-seal or closure mechanism is detected or no later than prior to the next marine tank vessel loading operation, whichever is later.

(2) *Ship-to-shore compatibility of vapor collection systems.* Following the date on which the initial performance test is completed, marine tank vessel loading operations must be performed only if the marine tank vessel's vapor collection equipment is compatible to the terminal's vapor collection system; marine tank vessel loading operations must be performed only when the marine tank vessel's vapor collection equipment is connected to the terminal's vapor collection system, as required in § 63.562(b)(1)(ii), (c)(2)(ii), and (d)(1)(ii).

(3) *Pressure/vacuum settings for the marine tank vessel's vapor collection equipment.* During the initial performance test required in paragraph (b)(1) of this section, the owner or operator of an affected source shall demonstrate compliance with operating pressure requirements of 33 CFR 154.814 using the procedures in § 63.565(b).

(4) *Vapor-tightness requirements of the marine vessel.* The owner or operator of an affected source shall use the procedures in paragraph (a)(4)(i), (ii), (iii), or (iv) of this section to ensure that marine tank vessels are vapor tight, as required in § 63.562(b)(1)(iii), (c)(2)(iii), and (d)(1)(iii).

(i) *Pressure test documentation for determining vapor tightness of the marine vessel.* The owner or operator of a marine tank vessel, who loads commodities containing HAP not determined to be exempt under § 63.560(d) at an affected source, shall provide a copy of the vapor-tightness pressure test documentation described in § 63.567(i) for each marine tank vessel prior to loading. The date of the test listed in the documentation must be within the preceding 12 months, and the test must be conducted in accordance with the procedures in § 63.565(c)(1). Following the date on which the initial performance test is completed, the affected source must check vapor-tightness pressure test documentation for marine tank vessels loaded at positive pressure.

(ii) *Leak test documentation for determining vapor tightness of the marine vessel.* If no documentation of the vapor tightness pressure test as described in paragraph (a)(4)(i) of this section is available, the owner or operator of a marine tank vessel, who loads commodities containing HAP not determined to be exempt under § 63.560(d) at an affected source, shall provide the leak test documentation described in § 63.567(i) for each marine tank vessel prior to loading. The date of the test listed in the documentation must be within the preceding 12 months, and the test must be conducted in accordance with the procedures in § 63.565(c)(2). If the marine tank vessel has failed its most recent vapor-tightness leak test at that terminal, the owner or operator of the non-vapor-tight marine tank vessel shall provide documentation that the leaks detected during the previous vapor-tightness test have been repaired and documented with a successful vapor-tightness leak test described in § 63.565(c)(2) conducted during loading. If the owner or operator of the marine tank vessel can document that repair is technically infeasible without cleaning and gas freeing or dry-docking the vessel, the owner or operator of the affected source may load the marine tank vessel. Following the date on which the initial performance test is completed, an affected source must check the vapor-tightness leak test documentation for marine tank vessels loaded at positive pressure.

(iii) *Leak test performed during loading using Method 21 for determining vapor tightness of the marine vessel.* If no documentation of vapor tightness as described in paragraphs (a)(4)(i) or (ii) of this section is available, the owner or operator of a marine tank vessel, who loads commodities containing HAP not determined to be exempt under § 63.560(d) at an affected source, shall perform a leak test of the marine tank vessel during marine tank vessel loading operation using the procedures described in § 63.565(c)(2).

(A) If no leak is detected, the owner or operator of a marine tank vessel shall complete the documentation described in § 63.567(i) prior to departure of the vessel.

(B) If a leak is detected, the owner or operator of the marine tank vessel shall document the vapor-tightness failure for the marine tank vessel prior to departure of the vessel. The leaking component shall be repaired prior to the next marine tank vessel loading operation at a controlled terminal unless the repair is technically infeasible without cleaning and gas freeing or dry-docking the vessel. If the owner or operator of the vessel provides documentation that repair of such equipment is technically infeasible without cleaning and gas freeing or dry-docking the vessel, the equipment responsible for the leak will be excluded from future Method 21 tests until repairs are effected. A copy of this documentation shall be maintained by the owner or operator of the affected source. Repair of the equipment responsible for the leak shall occur the next time the vessel is cleaned and gas freed or dry-docked. For repairs that are technically feasible without dry-docking the vessel, the owner or operator of the affected source shall not load the vessel again unless the marine tank vessel owner or operator can document that the equipment responsible for the leak has been repaired.

(iv) *Negative pressure loading.* The owner or operator of an affected source shall ensure that a marine tank vessel is loaded with the product tank below atmospheric pressure (i.e., at negative gauge pressure). The pressure shall be measured between the facility's vapor connection and its manual isolation valve, and the measured pressure must be below atmospheric pressure. Following the date on which the initial performance test is completed, marine tank vessel loading operations for nonvapor-tight vessels must be performed below atmospheric pressure

(i.e., at negative gauge pressure) in the product tank.

(b) *Compliance determination for affected sources.* The following procedures shall be used to determine compliance with the emissions limits under § 63.562(b), (c), and (d).

(1) *Initial performance test.* An initial performance test shall be conducted using the procedures listed in § 63.7 of subpart A of this part according to the applicability in Table 1 of § 63.560, the procedures listed in this section, and the test methods listed in § 63.565. The initial performance test shall be conducted within 180 days after the compliance date for the specific affected source. During this performance test, sources subject to MACT standards under § 63.562(b)(2), (3), (4), and (5) and (d)(2) shall determine the reduction of HAP emissions, as VOC, for all combustion or recovery devices other than flares. Sources subject to RACT standards under § 63.562(c)(3), (4), and (5) and (d)(2) shall determine the reduction of VOC emissions for all combustion or recovery devices other than flares.

(2) *Performance test exemptions.* An initial performance test required in this section and in § 63.565(d) and the continuous monitoring in § 63.564(e) is not required in the following cases:

(i) When a boiler or process heater with a design heat input capacity of 44 Megawatts or less is used to comply with § 63.562(b)(2), (3), or (4), (c)(3) or (4), or (d)(2) and the vent stream is used as the primary fuel or with the primary fuel;

(ii) When a boiler or process heater with a design heat input capacity of 44 Megawatts or greater is used to comply with § 63.562(b)(2), (3) or (4), (c)(3) or (4), or (d)(2); or

(iii) When a boiler subject to 40 CFR part 266, subpart H, "Hazardous Waste Burned in Industrial Furnaces," that has demonstrated 99.99 percent destruction or recovery efficiency is used to comply with § 63.562(b)(2), (3), or (4), (c)(3) or (4), or (d)(2).

(3) *Operation and maintenance inspections.* If the 3-hour or 3-cycle block average operating parameters in paragraphs (b)(4) through (9) of this section, outside the acceptable operating ranges, are measured and recorded, i.e., variances of the pollution control device or monitoring equipment, the owner or operator of the affected source shall perform an unscheduled inspection of the control device and monitoring equipment and review of the parameter monitoring data. The owner or operator of the affected source shall perform an inspection and review when total parameter variance time for the control device is greater than 10 percent of the operating time for marine tank vessel loading operations on a 30-day, rolling-average basis. The inspection and review shall be conducted within 24 hours after passing the allowable variance time of 10 percent. The inspection checklist from the requirements of § 63.562(e)(2)(iii) and the monitoring data from requirements in §§ 63.562(e)(2)(ii) and 63.564 should be used to identify any maintenance problems that may be associated with the variance. The unscheduled inspection should encompass all components of the control device and monitoring equipment that can be inspected while in operation. If any maintenance problem is identified during the inspection, the owner or operator of the affected source must take corrective action (e.g., adjustments to operating controls, etc.) as soon as practicable. If no immediate maintenance problems are identified from the inspection performed while the equipment is operating, a complete inspection in accordance with § 63.562(e)(2) must be conducted prior to the next marine tank vessel loading operation and corrective action (e.g., replacement of defective parts) must be taken as soon as practicable for any maintenance problem identified during the complete inspection.

(4) *Combustion device, except flare.* During the initial performance test required in paragraph (b)(1) of this section, the owner or operator shall determine the efficiency of and/or the outlet VOC concentration from the combustion device used to comply with § 63.562(b)(2), (3), and (4), (c)(3) and (4), and (d)(2) using the test methods in § 63.565(d). The owner or operator shall comply with paragraph (b)(4)(i) or (ii) of this section.

(i) *Outlet VOC concentration limit for required percent combustion efficiency.* The owner or operator shall establish as an operating parameter the baseline VOC concentration using the procedures described in § 63.565(g). Following the date on which the initial performance test is completed, the facility shall be operated with a block average outlet VOC concentration as determined in § 63.564(e)(1) no more than 20 percent above the baseline VOC concentration.

(ii) *Baseline temperature for required percent combustion efficiency.* The owner or operator shall establish as an operating parameter the baseline temperature using the procedures described in § 63.565(f). Following the date on which the initial performance test is completed, the facility shall be operated with the block average temperature as determined in § 63.564(e)(2) or (3) no more than 28°C (50°F) below the baseline temperature.

(5) *Flare.* During the initial performance test required in paragraph (b)(1) of this section, the owner or operator shall establish that the flare used to comply with the emissions standards in § 63.562(b)(2), (3), and (4), (c)(3) and (4), and (d)(2) is in compliance with the design requirements for flares cited in § 63.565(e). Following the date on which the initial determination of compliance is established, the facility shall operate with the presence of a pilot flame in the flare, as determined in § 63.564(f).

(6) *Carbon adsorber.* During the initial performance test required in paragraph (b)(1) of this section, the owner or operator shall determine the efficiency of and/or the outlet VOC concentration from the recovery device used to comply with § 63.562(b)(2), (3), (4), and (5), (c)(3), (4), and (5), and (d)(2) using the test methods in § 63.565(d). The owner or operator shall comply with paragraph (b)(6)(i) as well as either paragraph (b)(6)(ii) or (iii) of this section. The owner or operator of affected sources complying with paragraph (b)(6)(ii)(B) or (C) of this section shall conduct a performance test once each year.

(i) *Compliance determination for carbon bed regeneration.* Desorbed hydrocarbons from regeneration of the off-line carbon bed shall be vented to the on-line carbon bed.

(ii) *Baseline parameters for required percent recovery efficiency.* The owner or operator shall comply with paragraph (b)(6)(ii)(A), (B), or (C) of this section.

(A) *Outlet VOC concentration limit for required percent recovery efficiency.* The owner or operator shall establish as an operating parameter the baseline VOC concentration using the procedures described in § 63.565(g). Following the date on which the initial performance test is completed, the facility shall be operated with a block average outlet VOC concentration as determined in § 63.564(g)(1) no more than 20 percent above the baseline VOC concentration.

(B) *Carbon adsorbers with vacuum regeneration.* The owner or operator shall establish as operating parameters the baseline regeneration time for the vacuum stage of carbon bed regeneration using the procedures described in § 63.565(h) and shall establish the baseline vacuum pressure (negative gauge pressure) using the procedures described in § 63.565(i). Following the date on which the initial performance test is completed, the facility shall be operated with block average regeneration time of the vacuum stage of carbon bed regeneration as determined in § 63.564(g)(2) no more than 20 percent below the baseline regeneration time, and the facility shall be operated with the block average vacuum pressure (negative gauge pressure) as determined in § 63.564(g)(2) no more than 20 percent above the baseline vacuum pressure.

(C) *Carbon adsorbers with steam regeneration.* The owner or operator shall establish as operating parameters the baseline total stream flow using the procedures described in § 63.565(j) and a baseline carbon bed temperature after cooling of the bed using the procedures in § 63.565(f)(2). Following the date on which the initial performance test is completed, the facility shall be operated with the total stream flow, as determined in § 63.564(g)(3), no more than 20 percent below the baseline stream flow and with the carbon bed temperature (measured within 15 minutes after completion of the cooling cycle), as determined in § 63.564(g)(3), no more than 10 percent or 5.6°C (10°F) above the baseline carbon bed temperature, whichever is less stringent.

(iii) *Outlet VOC concentration of 1,000 ppmv for gasoline loading.* Following the date on which the initial performance test is completed, the facility shall operate with a block average outlet VOC concentration as determined in § 63.564(g)(1) of no more than 1,200 ppmv VOC.

(7) *Condenser/refrigeration unit.* During the initial performance test required in paragraph (b)(1) of this section, the owner or operator shall determine the efficiency of and/or the outlet VOC concentration from the recovery device used to comply with § 63.562(b)(2), (3), and (4), (c)(3) and (4), and (d)(2) using the test methods in § 63.565(d). The owner or operator shall comply with either paragraph (b)(7)(i), (ii), or (iii) of this section.

(i) *VOC outlet concentration limit for required percent recovery efficiency.* The owner or operator shall establish as an operating parameter the baseline VOC concentration using the procedures described in § 63.565(g). Following the date on which the initial performance test is completed, the facility shall be operated with a block average outlet VOC concentration as determined in § 63.564(h)(2) no more than 20 percent above the baseline VOC concentration.

(ii) *Baseline temperature for required percent recovery efficiency.* The owner or operator shall establish as an operating parameter the baseline temperature using the procedures described in § 63.565(f). Following the date on which the initial performance test is completed, the facility shall operate with a block average temperature, as determined in § 63.564(h)(1), no more than 28°C (50°F) above the baseline temperature.

(iii) *Baseline parameters for 1,000 ppmv VOC concentration limit for gasoline loading.* The owner or operator shall monitor either the outlet VOC concentration or the outlet temperature of the unit. For sources monitoring temperature, the owner or operator shall establish as an operating parameter the baseline temperature using the procedures described in § 63.565(f). Following the date on which the initial performance test is completed, the facility shall operate with a block average outlet VOC concentration, as determined in § 63.564(h)(2), of no more than 1,200 ppmv VOC or with a block average temperature, as determined in § 63.564(h)(1), no more than 28°C (50°F) above the baseline temperature.

(8) *Absorber.* During the initial performance test required in paragraph (b)(1) of this section, the owner or operator shall determine the efficiency of the absorber and/or the outlet VOC concentration from the recovery device used to comply with § 63.562(b)(2), (3), and (4), (c)(3) and (4), and (d)(2) using the test methods in § 63.565(d). The owner or operator shall comply with either paragraph (b)(8)(i) or (ii) of this section.

(i) *VOC outlet concentration limit for required percent recovery efficiency.* The owner or operator shall establish as an operating parameter the baseline VOC concentration using the procedures described in § 63.565(g). Following the date on which the initial performance test is completed, the facility shall be operated with a block average outlet VOC concentration as determined in § 63.564(i)(1) no more than 20 percent above the baseline VOC concentration.

(ii) *Baseline liquid-to-vapor ratio for required percent recovery efficiency.* The owner or operator shall establish as an operating parameter the baseline liquid flow to vapor flow (L/V) ratio using the procedures described in § 63.565(k). Following the date on which the initial performance test is completed, the facility shall operate with a block average L/V ratio, as determined in § 63.564(i)(2), no more than 20 percent below the baseline L/V ratio.

(9) *Alternative control devices.* For sources complying with § 63.562(b)(2), (3), and (4), (c)(3) and (4), and (d)(2) with the use of a control technology other than the devices discussed in paragraphs (b)(4) through (8) of this section, the owner or operator of an affected source shall provide to the Administrator information describing the design and operation of the air pollution control system, including recommendations for the operating parameter(s) to be monitored to indicate proper operation and maintenance of the air pollution control system. Based on this information, the Administrator shall determine the operating parameter(s) to be established during the performance test. During the initial performance test required in paragraph (b)(1) of this section, the owner or operator shall determine the efficiency of the air pollution control system using the test methods in § 63.565(d). The device shall achieve at least the percent destruction efficiency or recovery efficiency required under § 63.562(b)(2), (3), and (4), (c)(3) and (4), and (d)(2). The owner or operator shall establish the operating parameter(s) approved by the Administrator. Following the date on which the initial performance test is complete, the facility shall operate either above or below a maximum or minimum operating parameter, as appropriate.

(10) *Emission estimation.* The owner or operator of a source subject to § 63.562(b)(2), (3), and (4) shall use the emission estimation procedures in § 63.565(l) to calculate HAP emissions.

(c) *Leak detection and repair for vapor collection systems and control devices.* The following procedures are required for all sources subject to § 63.562(b), (c), or (d).

(1) *Annual leak detection and repair for vapor collection systems and control devices.* The owner or operator of an affected source shall inspect and monitor all ductwork and piping and connections to vapor collection systems and control devices once each calendar year using Method 21.

(2) *Ongoing leak detection and repair for vapor collection systems and control devices.* If evidence of a potential leak is found by visual, audible, olfactory, or any other detection method, all ductwork and piping and connections to vapor collection systems and control devices shall be inspected to the extent necessary to positively identify the potential leak and any potential leaks shall be monitored within 5 days by Method 21. Each detection of a leak shall be recorded, and the leak shall be tagged until repaired.

(3) When a leak is detected, a first effort to repair the vapor collection system and control device shall be made within 15 days or prior to the next marine tank vessel loading operation, whichever is later.

§ 63.564 Monitoring requirements.

(a) (1) The owner or operator of an affected source shall comply with the

monitoring requirements in § 63.8 of subpart A of this part in accordance with the provisions for applicability of subpart A to this subpart in Table 1 of § 63.560 and the monitoring requirements in this section.

(2) Each owner or operator of an affected source shall monitor the parameters specified in this section. All monitoring equipment shall be installed such that representative measurements of emissions or process parameters from the source are obtained. For monitoring equipment purchased from a vendor, verification of the operational status of the monitoring equipment shall include completion of the manufacturer's written specifications or recommendations for installation, operation, and calibration of the system.

(3) Except for system breakdowns, out-of-control periods, repairs, maintenance periods, calibration checks, and zero (low-level) and high-level calibration drift adjustments, all continuous parametric monitoring systems (CPMS) and CEMS shall be in continuous operation while marine tank vessel loading operations are occuring and shall meet minimum frequency of operation requirements. Sources monitoring by use of CEMS and CPMS shall complete a minimum of one cycle of operation (sampling, analyzing, and/or data recording) for each successive 15-minute period.

(4) The owner or operator of a CMS installed in accordance with these emissions standards shall comply with the performance specifications either in performance specification (PS) 8 in 40 CFR part 60, appendix B for CEMS or in § 63.7(c)(6) of subpart A of this part for CPMS.

(5) A CEMS is out of control when the measured values (i.e., daily calibrations, multipoint calibrations, and performance audits) exceed the limits specified in either PS 8 or in § 63.8(c)(7) of subpart A of this part. The owner or operator of a CEMS that is out of control shall submit all information concerning out of control periods, including start and end dates and hours and descriptions of corrective actions taken, in the excess emissions and continuous monitoring system performance report required in § 63.567(e).

(b) *Vapor collection system of terminal.* Owners or operators of a source complying with § 63.563(a)(1) that uses a vapor collection system that contains valves that could divert a vent stream from a control device used to comply with the provisions of this subpart shall comply with paragraph (b)(1), (2), or (3) of this section.

(1) Measure and record the vent stream flowrate of each by-pass line once every 15 minutes. The owner or operator shall install, calibrate, maintain, and operate a flow indicator and data recorder. The flow indicator shall be installed immediately downstream of any valve (i.e., entrance to by-pass line) that could divert the vent stream from the control device to the atmosphere.

(2) Measure the vent stream flowrate of each by-pass line once every 15 minutes. The owner or operator shall install, calibrate, maintain, and operate a flow indicator with either an audio or visual alarm. The flow indicator and alarm shall be installed immediately downstream of any valve (i.e., entrance to by-pass line) that could divert the vent stream from the control device to the atmosphere. The alarm shall be checked every 6 months to demonstrate that it is functioning properly.

(3) Visually inspect the seal or closure mechanism once during each marine tank vessel loading operation and at least once every month to ensure that the valve is maintained in the closed position and that the vent stream is not diverted through the by-pass line; record all times when the car seals have been broken and the valve position has been changed. Each by-pass line valve shall be secured in the closed position with a car-seal or a lock-and-key type configuration.

(c) *Pressure/vacuum settings for the marine tank vessel's vapor collection equipment.* Owners or operators of a source complying with § 63.563(a)(3) shall measure continuously the operating pressure of the marine tank vessel during loading.

(d) *Loading at negative pressure.* Owners or operators of a source complying with § 63.563(a)(4)(iv) that load vessels at less than atmospheric pressure (i.e., negative gauge pressure) shall measure and record the loading pressure. The owner or operator shall install, calibrate, maintain, and operate a recording pressure measurement device (magnehelic gauge or equivalent device) and an audible and visible alarm system that is activated when the pressure vacuum specified in § 63.563(a)(4)(iv) is not attained. The owner or operator shall place the alarm system so that it can be seen and heard where cargo transfer is controlled. The owner or operator shall verify the accuracy of the pressure device once each calendar year with a reference pressure monitor (traceable to National Institute of Standards and Technology (NIST) standards or an independent pressure measurement device dedicated for this purpose).

(e) *Combustion device, except flare.* For sources complying with § 63.563(b)(4), use of a combustion device except a flare, the owner or operator shall comply with paragraph (e)(1), (2), or (3) of this section. Owners or operators complying with paragraphs (e)(2) or (3) shall also comply with paragraph (e)(4) of this section.

(1) *Outlet VOC concentration.* Monitor the VOC concentrations at the exhaust point of the combustion device and record the output from the system. For sources monitoring the outlet VOC concentration established during the performance test, a data acquisition system shall record a concentration every 15 minutes and shall compute and record an average concentration each cycle (same time period or cycle as the performance test) and a 3-cycle block average concentration every third cycle. For sources monitoring the 1,000 ppmv VOC concentration for gasoline loading, a data acquisition system shall record a concentration every 15 minutes and shall compute and record an average concentration each hour and a 3-hour block average concentration every third hour. The owner or operator will install, calibrate, operate, and maintain a CEMS consistent with the requirements of PS 8 to measure the VOC concentration. The daily calibration requirements are required only on days when marine tank vessel loading operations occur.

(2) *Operating temperature determined during performance testing.* If the baseline temperature was established during the performance test, the data acquisition system shall record the temperature every 15 minutes and shall compute and record an average temperature each cycle (same time period or cycle of the performance test) and a 3-cycle block average every third cycle.

(3) *Manufacturer's recommended operating temperature.* If the baseline temperature is based on the manufacturer recommended operating temperature, the data acquisition system shall record the temperature every 15 minutes and shall compute and record an average temperature each hour and a 3-hour block average every third hour.

(4) *Temperature monitor.* The owner or operator shall install, calibrate, operate, and maintain a temperature monitor accurate to within ±5.6°C (±10°F) or within 1 percent of the baseline temperature, whichever is less stringent, to measure the temperature. The monitor shall be installed at the exhaust point of the combustion device but not within the combustion zone. The owner or operator shall verify the accuracy of the temperature monitor once each calendar year with a reference temperature monitor (traceable to National Institute of Standards and

Technology (NIST) standards or an independent temperature measurement device dedicated for this purpose). During accuracy checking, the probe of the reference device shall be at the same location as that of the temperature monitor being tested.

(f) *Flare.* For sources complying with § 63.563(b)(5), use of a flare, the owner or operator shall monitor and record continuously the presence of the flare pilot flame. The owner or operator shall install, calibrate, maintain, and operate a heat sensing device (an ultraviolet beam sensor or thermocouple) at the pilot light to indicate the presence of a flame during the entire loading cycle.

(g) *Carbon adsorber.* For sources complying with § 63.563(b)(6), use of a carbon adsorber, the owner or operator shall comply with paragraph (g)(1), (2), or (3) of this section.

(1) *Outlet VOC concentration.* Monitor the VOC concentrations at the exhaust point of each carbon adsorber unit and record the output from the system. For sources monitoring the outlet VOC concentration established during the performance test, a data acquisition system shall record a concentration every 15 minutes and shall compute and record an average concentration each cycle (same time period or cycle as the performance test) and a 3-cycle block average concentration every third cycle. For sources monitoring the 1,000 ppmv VOC concentration for gasoline loading, a data acquisition system shall record a concentration every 15 minutes and shall compute and record an average concentration each hour and a 3-hour block average concentration every third hour. The owner or operator will install, calibrate, operate, and maintain a CEMS consistent with the requirements of PS 8 to measure the VOC concentration. The daily calibration requirements are required only on days when marine tank vessel loading operations occur.

(2) *Carbon adsorbers with vacuum regeneration.* Monitor and record the regeneration time for carbon bed regeneration and monitor and record continuously the vacuum pressure of the carbon bed regeneration cycle. The owner or operator will record the time when the carbon bed regeneration cycle begins and when the cycle ends for a single carbon bed and will calculate a 3-cycle block average every third cycle. The owner or operator shall install, calibrate, maintain, and operate a recording pressure measurement device (magnehelic gauge or equivalent device). A data acquisition system shall record and compute a 3-cycle (carbon bed regeneration cycle) block average vacuum pressure every third cycle. The owner or operator shall verify the accuracy of the pressure device once each calendar year with a reference pressure monitor (traceable to National Institute of Standards and Technology (NIST) standards or an independent pressure measurement device dedicated for this purpose). During accuracy checking, the probe of the reference device shall be at the same location as that of the pressure monitor being tested.

(3) *Carbon adsorbers with steam regeneration.* Monitor and record the total stream mass flow and monitor and record the carbon bed temperature after regeneration (but within 15 minutes of completion of the cooling cycle). The owner or operator will install, calibrate, maintain, and operate an integrating stream flow monitoring device that is accurate within ±10 percent and that is capable of recording the total stream mass flow for each regeneration cycle. The owner or operator will install, calibrate, maintain, and operate a temperature monitor accurate to within ±5.6°C (10°F) or within 1 percent of the baseline carbon bed temperature, whichever is less stringent, to measure the carbon bed temperature. The monitor shall be installed at the exhaust point of the carbon bed. The data acquisition system shall record the carbon bed temperature after each cooling cycle (measured within 15 minutes of completion of the cooling cycle). The owner or operator shall verify the accuracy of the temperature monitor once each calendar year with a reference temperature monitor (traceable to National Institute of Standards and Technology (NIST) standards or an independent temperature measurement device dedicated for this purpose). During accuracy checking, the probe of the reference device shall be at the same location as that of the temperature monitor being tested.

(h) *Condenser/refrigeration unit.* For sources complying with § 63.563(b)(7), use of a condenser/refrigeration unit, the owner or operator shall comply with either paragraph (h)(1) or (2) of this section.

(1) *Baseline temperature.* Monitor and record the temperature at the outlet of the unit. The owner or operator shall install, calibrate, operate, and maintain a temperature monitor accurate to within ±5.6°C (±10°F) or within 1 percent of the baseline temperature, whichever is less stringent, to measure the temperature. The monitor shall be installed at the exhaust point of the condenser/refrigeration unit. For sources monitoring the temperature established during the performance test, the data acquisition system shall record the temperature every 15 minutes and shall compute and record an average temperature each cycle (same time period or cycle of the performance test) and a 3-hour block average every third cycle. For sources monitoring the manufacturer recommended temperature, the data acquisition system shall record the temperature every 15 minutes and shall compute and record an average temperature each hour and a 3-hour block average every third hour. The owner or operator shall verify the accuracy of the temperature monitor once each calendar year with a reference temperature monitor (traceable to National Institute of Standards and Technology (NIST) standards or an independent temperature measurement device dedicated for this purpose). During accuracy checking, the probe of the reference device shall be at the same location as that of the temperature monitor being tested.

(2) *Outlet VOC concentration.* Monitor the VOC concentrations at the outlet of the unit and record the output from the system. For sources monitoring the outlet VOC concentration established during the performance test, a data acquisition system shall record a concentration every 15 minutes and shall compute and record an average concentration each cycle (same time period or cycle as the performance test) and a 3-cycle block average concentration every third cycle. For sources monitoring the 1,000 ppmv VOC concentration for gasoline loading, a data acquisition system shall record a concentration every 15 minutes and shall compute and record an average concentration each hour and a 3-hour block average concentration every third hour. The owner or operator will install, calibrate, operate, and maintain a VOC CEMS consistent with the requirements of PS 8 to measure the VOC concentration. The daily calibration requirements are required only on days when marine tank vessel loading operations occur.

(i) *Absorber.* For sources complying with § 63.563(b)(8), use of an absorber, the owner or operator shall comply with either paragraph (i)(1) or (2) of this section.

(1) *Outlet VOC concentration.* Monitor the VOC concentrations at the outlet of the absorber and record the output from the system. For sources monitoring the outlet VOC concentration established during the performance test, a data acquisition system shall record a concentration every 15 minutes and shall compute and record an average concentration each cycle (same time period or cycle as the

performance test) and a 3-cycle block average concentration every third cycle. For sources monitoring the 1,000 ppmv VOC concentration for gasoline loading, a data acquisition system shall record a concentration every 15 minutes and shall compute and record an average concentration each hour and a 3-hour block average concentration every third hour. The owner or operator will install, calibrate, operate, and maintain a VOC CEMS consistent with the requirements of PS 8. The daily calibration requirements are required only on days when marine tank vessel loading operations occur.

(2) *L/V ratio.* Monitor and record the inlet liquid flowrate and the inlet gas flowrate to the absorber and record the calculated L/V ratio. The owner or operator shall install, calibrate, maintain, and operate liquid and gas flow indicators. For sources monitoring the L/V ratio established during the performance test, a data acquisition system shall record the flowrates and calculated ratio every 15 minutes and shall compute and record an average ratio each cycle (same time period or cycle as the performance test) and a 3-cycle block average ratio every third cycle. For sources monitoring the manufacturer recommended L/V ratio, a data acquisition system shall record the flowrates and calculated ratio every 15 minutes and shall compute and record an average ratio each hour and a 3-hour average ratio every third hour. The liquid and gas flow indicators shall be installed immediately upstream of the respective inlet lines to the absorber.

(j) *Alternate monitoring procedures.* Alternate procedures to those described in this section may be used upon application to, and approval by, the Administrator. The owner or operator shall comply with the procedures for use of an alternative monitoring method in § 63.8(f).

§ 63.565 Test methods and procedures.

(a) *Performance testing.* The owner or operator of an affected source in § 63.562 shall comply with the performance testing requirements in § 63.7 of subpart A of this part in accordance with the provisions for applicability of subpart A to this subpart in Table 1 of § 63.560 and the performance testing requirements in this section.

(b) *Pressure/vacuum settings of marine tank vessel's vapor collection equipment.* For the purpose of determining compliance with § 63.563(a)(3), the following procedures shall be used:

(1) Calibrate and install a pressure measurement device (liquid manometer, magnehelic gauge, or equivalent instrument) capable of measuring up to the maximum relief set pressure of the pressure-vacuum vents;

(2) Connect the pressure measurement device to a pressure tap in the terminal's vapor collection system, located as close as possible to the connection with the marine tank vessel; and

(3) During the performance test required in § 63.563(b)(1), record the pressure every 5 minutes while a marine tank vessel is being loaded and record the highest instantaneous pressure and vacuum that occurs during each loading cycle.

(c) *Vapor-tightness test procedures for the marine tank vessel.* When testing a vessel for vapor tightness to comply with the marine vessel vapor-tightness requirements of § 63.563(a)(4)(i), the owner or operator of a source shall use the methods in either paragraph (c)(1) or (2) in this section.

(1) *Pressure test for the marine tank vessel.*

(i) Each product tank shall be pressurized with dry air or inert gas to no more than the pressure of the lowest pressure relief valve setting.

(ii) Once the pressure is obtained, the dry air or inert gas source shall be shut off.

(iii) At the end of one-half hour, the pressure in the product tank and piping shall be measured. The change in pressure shall be calculated using the following formula:

$P = P_i - P_f$

Where:

P=change in pressure, inches of water.

P_i=pressure in tank when air/gas source is shut off, inches of water.

P_f=pressure in tank at the end of one-half hour after air/gas source is shut off, inches of water.

(iv) The change in pressure, P, shall be compared to the pressure drop calculated using the following formula:

$PM = 0.861 \, P_{ia} \, L/V$

Where:

PM=maximum allowable pressure change, inches of water.

P_{ia}=pressure in tank when air/gas source is shut off, psia.

L=maximum permitted loading rate of vessel, barrels per hour.

V=total volume of product tank, barrels.

(v) If $P \leq PM$, the vessel is vapor tight.

(vi) If $P > PM$, the vessel is not vapor tight and the source of the leak must be identified and repaired prior to retesting.

(2) *Leak test for the marine tank vessel.* Each owner or operator of a source complying with §§ 63.563(a)(4)(ii) or (iii) shall use Method 21 as the vapor-tightness leak test for marine tank vessels. The test shall be conducted during the final 20 percent of loading of each product tank of the marine vessel, and it shall be applied to any potential sources of vapor leaks on the vessel.

(d) *Combustion (except flare) and recovery control device performance test procedures.*

(1) All testing equipment shall be prepared and installed as specified in the appropriate test methods.

(2) All testing shall be performed during the last 20 percent of loading of a tank or compartment.

(3) All emission testing intervals shall consist of each 5 minute period during the performance test. For each interval, the following shall be performed:

(i) *Readings.* The reading from each measurement instrument shall be recorded.

(ii) *Sampling Sites.* Method 1 or 1A of appendix A of part 60 of this chapter, as appropriate, shall be used for selection of sampling sites. Sampling sites shall be located at the inlet and outlet of the combustion device or recovery device except for owners or operators complying with the 1,000 ppmv VOC emissions limit for gasoline vapors under § 63.563(b)(6) or (7), where the sampling site shall be located at the outlet of the recovery device.

(iii) *Volume exhausted.* The volume exhausted shall be determined using Method 2, 2A, 2C, or 2D of appendix A of part 60 of this chapter, as appropriate.

(4) *Combustion devices, except flares.* The average VOC concentration in the vent upstream and downstream of the control device shall be determined using Method 25 of appendix A of part 60 of this chapter for combustion devices, except flares. The average VOC concentration shall correspond to the volume measurement by taking into account the sampling system response time.

(5) *Recovery devices.* The average VOC concentration in the vent upstream and downstream of the control device shall be determined using Method 25A of appendix A of part 60 of this chapter for recovery devices. The average VOC concentration shall correspond to the volume measurement by taking into account the sampling system response time.

(6) The VOC mass at the inlet and outlet of the combustion or recovery device during each testing interval shall be calculated as follows:

$M_j = FKV_sC_{voc}$

Where:

M_j=mass of VOC at the inlet and outlet of the combustion or recovery

device during testing interval j, kilograms (kg).
$F=10^{-6}$=conversion factor, (cubic meters VOC/cubic meters air)(1/ppmv) (m^3 VOC/m^3 air)(1/ppmv).
K=density, kilograms per cubic meter (kg/m^3 VOC), standard conditions, 20 °C and 760 mm Hg.
V_s=volume of air-vapor mixture at the inlet and outlet of the combustion or recovery device, cubic meters (m^3) at standard conditions, 20 °C and 760 mm Hg.
C_{VOC}=VOC concentration (as measured) at the inlet and outlet of the combustion or recovery device, ppmv, dry basis.
s=standard conditions, 20 °C and 760 mm Hg.

(7) The VOC mass emission rates at the inlet and outlet of the recovery or combustion device shall be calculated as follows:

$$E_i = \frac{\sum_{j=1}^{n} M_{ij}}{T}$$

$$E_o = \frac{\sum_{j=1}^{n} M_{oj}}{T}$$

Where:
E_i, E_o=mass flow rate of VOC at the inlet (i) and outlet (o) of the recovery or combustion device, kilogram per hour (kg/hr).
M_{ij}, M_{oj}=mass of VOC at the inlet (i) or outlet (o) during testing interval j, kg.
T=Total time of all testing intervals, hour.
n=number of testing intervals.

(8) Where Method 25 or 25A is used to measure the percent reduction in VOC, the percent reduction across the combustion or recovery device shall be calculated as follows:

$$R = \frac{E_i - E_o}{E_i}(100\%)$$

Where:
R=control efficiency of control device, percent.
E_i=mass flow rate of VOC at the inlet to the combustion or recovery device as calculated under paragraph (c)(7) of this section, kg/hr.
E_o=mass flow rate of VOC at the outlet of the combustion or recovery device, as calculated under paragraph (c)(7) of this section, kg/hr.

(9) Repeat the procedures in paragraph (d)(1) through (d)(8) of this section 3 times. The arithmetic average percent efficiency of the three runs shall determine the overall efficiency of the control device.

(10) Use of methods other than Method 25 or Method 25A shall be validated pursuant to Method 301 of appendix A of part 63 of this chapter.

(e) *Performance test for flares.* When a flare is used to comply with § 63.562(b)(2), (3), and (4), (c)(3) and (4), and (d)(2), the source must demonstrate that the flare meets the requirements of § 63.11 of subpart A of this part. In addition, a performance test according to Method 22 of appendix A of part 63 shall be performed to determine visible emissions. The observation period shall be at least 2 hours and shall be conducted according to Method 22. Performance testing shall be conducted during three complete loading cycles with a separate test run for each loading cycle. The observation period for detecting visible emissions shall encompass each loading cycle. Integrated sampling to measure process vent stream flow rate shall be performed continuously during each loading cycle. The owner or operator shall record all visible emission readings, heat content determinations, flow rate measurements, maximum permitted velocity calculations, and exit velocity determinations made during the performance test.

(f) *Baseline temperature.* The procedures in this paragraph shall be used to determine the baseline temperature required in § 63.563(b)(4), (6), and (7) for combustion devices, carbon adsorber beds, and condenser/refrigeration units, respectively, and to monitor the temperature as required in § 63.564(e), (g), and (h). The owner or operator shall comply with either paragraph (f)(1) or (2) of this section.

(1) *Baseline temperature from performance testing.* The owner or operator shall establish the baseline temperature as the temperature at the outlet point of the unit averaged over three test runs from paragraph (d) of this section. Temperature shall be measured every 15 minutes.

(2) *Baseline temperature from manufacturer.* The owner or operator shall establish the baseline temperature as the manufacturer recommended minimum operating temperature for combustion devices, maximum operating temperature for condenser units, and maximum operating temperature for carbon beds of carbon adsorbers.

(g) *Baseline outlet VOC concentration.* The procedures in this paragraph shall be used to determine the outlet VOC concentration required in § 63.563(b)(4), (6), (7), and (8) for combustion devices except flare, carbon adsorbers, condenser/refrigeration units, and absorbers, respectively, and to monitor the VOC concentration as required in § 63.564(e), (g), (h), and (i). The owner or operator shall use the procedures outlined in Method 25A. For the baseline VOC concentration, the arithmetic average of the outlet VOC concentration from three test runs from paragraph (d) of this section shall be calculated for the control device. The VOC concentration shall be measured at least every 15 minutes. Compliance testing of VOC CEMS shall be performed using PS 8.

(h) *Baseline regeneration time for carbon bed regeneration.* The procedures in this paragraph shall be used to demonstrate the baseline regeneration time for the vacuum stage of carbon bed regeneration required in § 63.563(b)(6) for a carbon adsorber and to monitor the regeneration time for the vacuum regeneration as required in § 63.564(g). The owner or operator shall comply with paragraph (h)(1) or (2).

(1) *Baseline regeneration time from performance testing.* The owner or operator shall establish the baseline regeneration time as the length of time for the vacuum stage of carbon bed regeneration averaged over three test runs from paragraph (d) of this section.

(2) *Baseline regeneration time from manufacturer recommendation.* The owner or operator shall establish the baseline regeneration time as the manufacturer recommended minimum regeneration time for the vacuum stage of carbon bed regeneration.

(i) *Baseline vacuum pressure for carbon bed regeneration.* The procedures in this paragraph shall be used to demonstrate the baseline vacuum pressure for the vacuum stage of carbon bed regeneration required in § 63.563(b)(6) for a carbon adsorber and to monitor the vacuum pressure as required in § 63.564(g). The owner or operator shall establish the baseline vacuum pressure as the manufacturer recommended minimum vacuum for carbon bed regeneration.

(j) *Baseline total stream flow.* The procedures in this paragraph shall be used to demonstrate the baseline total stream flow for steam regeneration required in § 63.563(b)(6) for a carbon adsorber and to monitor the total stream flow as required in § 63.564(g). The owner or operator shall establish the baseline stream flow as the manufacturer recommended minimum total stream flow for carbon bed regeneration.

(k) *Baseline L/V ratio.* The procedures in this paragraph shall be used to

determine the baseline L/V ratio required in § 63.563(b)(8) for an absorber and to monitor the L/V ratio as required in § 63.564(i). The owner or operator shall comply with either paragraph (k)(1) or (2) of this section.

(1) *Baseline L/V ratio from performance test.* The owner or operator shall establish the baseline L/V ratio as the calculated value of the inlet liquid flow divided by the inlet gas flow to the absorber averaged over three test runs using the procedures in paragraph (d) of this section.

(2) *Baseline L/V ratio from manufacturer.* The owner or operator shall establish the baseline L/V ratio as the manufacturer recommended minimum L/V ratio for absorber operation.

(l) *Emission estimation procedures.* For sources with emissions less than 10 or 25 tons and sources with emissions of 10 or 25 tons, the owner or operator shall calculate an annual estimate of HAP emissions, excluding commodities exempted by § 63.560(d), from marine tank vessel loading operations. Emission estimates and emission factors shall be based on test data, or if test data is not available, shall be based on measurement or estimating techniques generally accepted in industry practice for operating conditions at the source.

(m) *Alternate test procedures.*

(1) Alternate test procedures to those described in this section may be used upon application to, and approval by, the Administrator.

(2) If the owner or operator intends to demonstrate compliance by using an alternative to any test method specified, the owner or operator shall refrain from conducting the performance test until the Administrator approves the use of the alternative method when the Administrator approves the site-specific test plan (if review of the site-specific test plan is requested) or until after the alternative method is approved (see § 63.7(f) of subpart A of this part). If the Administrator does not approve the site-specific test plan (if review is requested) or the use of the alternative method within 30 days before the test is scheduled to begin, the performance test dates specified in § 63.563(b)(1) shall be extended such that the owner or operator shall conduct the performance test within 60 calendar days after the Administrator approves the site-specific test plan or after use of the alternative method is approved. Notwithstanding the requirements in the preceding two sentences, the owner or operator may proceed to conduct the performance test as required in this section (without the Administrator's prior approval of the site-specific test plan) if he/she subsequently chooses to use the specified testing and monitoring methods instead of an alternative.

§ 63.566 Construction and reconstruction.

(a) The owner or operator of an affected source shall fulfill all requirements for construction or reconstruction of a source in § 63.5 of subpart A of this part in accordance with the provisions for applicability of subpart A to this subpart in Table 1 of § 63.560 and construction or reconstruction requirements in this section.

(b) (1) *Application for approval of construction or reconstruction.* The provisions of this paragraph and § 63.5(d)(1)(ii) and (iii), (2), (3), and (4) of subpart A implement section 112(i)(1) of the Act.

(2) *General application requirements.* An owner or operator who is subject to the requirements of § 63.5(b)(3) of subpart A shall submit to the Administrator an application for approval of the construction of a new source, the reconstruction of a source, or the reconstruction of a source not subject to the emissions standards in § 63.562 such that the source becomes an affected source. The application shall be submitted as soon as practicable before the construction or reconstruction is planned to commence. The application for approval of construction or reconstruction may be used to fulfill the initial notification requirements of § 63.567(b)(3). The owner or operator may submit the application for approval well in advance of the date construction or reconstruction is planned to commence in order to ensure a timely review by the Administrator and that the planned commencement date will not be delayed.

(c) *Approval of construction or reconstruction based on prior State preconstruction review.* The owner or operator shall submit to the Administrator the request for approval of construction or reconstruction under this paragraph and § 63.5(f)(1) of subpart A of this part no later than the application deadline specified in paragraph (b)(2) of this section. The owner or operator shall include in the request information sufficient for the Administrator's determination. The Administrator will evaluate the owner or operator's request in accordance with the procedures specified in § 63.5(e) of subpart A of this part. The Administrator may request additional relevant information after the submittal of a request for approval of construction or reconstruction.

§ 63.567 Recordkeeping and reporting requirements.

(a) The owner or operator of an affected source shall fulfill all reporting and recordkeeping requirements in §§ 63.9 and 63.10 of subpart A of this part in accordance with the provisions for applicability of subpart A to this subpart in Table 1 of § 63.560 and fulfill all reporting and recordkeeping requirements in this section. These reports will be made to the Administrator at the appropriate address identified in § 63.13 of subpart A of this part.

(1) Reports required by subpart A and this section may be sent by U.S. mail, facsimile (fax), or by another courier.

(i) Submittals sent by U.S. mail shall be postmarked on or before the specified date.

(ii) Submittals sent by other methods shall be received by the Administrator on or before the specified date.

(2) If acceptable to both the Administrator and the owner or operator of a source, reports may be submitted on electronic media.

(b) *Notification requirements.* The owner or operator of an affected source shall fulfill all notification requirements in § 63.9 of subpart A of this part in accordance with the provisions for applicability of that section to this subpart in Table 1 of § 63.560 and the notification requirements in this paragraph.

(1) *Applicability.* If a source that otherwise would not be subject to the emissions standards subsequently increases its HAP emissions calculated on a 24-month annual average basis after September 19, 1997 or increases its annual HAP emissions after September 20, 1999 or subsequently increases its gasoline or crude loading throughput calculated on a 24-month annual average basis after September 19, 1996 or increases its gasoline or crude loading annual throughput after September 21, 1998 such that the source becomes subject to the emissions standards, such source shall be subject to the notification requirements of § 63.9 of subpart A of this part and the notification requirements of this paragraph.

(2) *Initial notification for sources with startup before the effective date.* The owner or operator of a source with initial startup before the effective date shall notify the Administrator in writing that the source is subject to the relevant standard. The notification shall be submitted not later than 365 days after the effective date of the emissions standards and shall provide the following information:

(i) The name and address of the owner or operator;

(ii) The address (i.e., physical location) of the source;

(iii) An identification of this emissions standard that is the basis of the notification and the source's compliance date;

(iv) A brief description of the nature, size, design, and method of operation of the source;

(v) A statement that the source is a major source.

(3) *Initial notification for sources with startup after the effective date.* The owner or operator of a new or reconstructed source or a source that has been reconstructed such that it is subject to the emissions standards that has an initial startup after the effective date but before the compliance date, and for which an application for approval of construction or reconstruction is not required under § 63.5(d) of subpart A of this part and § 63.566 of this subpart, shall notify the Administrator in writing that the source is subject to the standard no later than 365 days or 120 days after initial startup, whichever occurs before notification of the initial performance test in § 63.9(e) of subpart A of this part. The notification shall provide all the information required in paragraph (b)(2) of this section, delivered or postmarked with the notification required in paragraph (b)(4) of this section.

(4) *Initial notification requirements for constructed/reconstructed sources.* After the effective date of these standards, whether or not an approved permit program is effective in the State in which a source subject to these standards is (or would be) located, an owner or operator subject to the notification requirements of § 63.5 of subpart A of this part and § 63.566 of this subpart who intends to construct a new source subject to these standards, reconstruct a source subject to these standards, or reconstruct a source such that it becomes subject to these standards, shall comply with paragraphs (b)(4)(i), (ii), (iii), and (iv) of this section.

(i) *Notify the Administrator in writing of the intended construction or reconstruction.* The notification shall be submitted as soon as practicable before the construction or reconstruction is planned to commence. The notification shall include all the information required for an application for approval of construction or reconstruction as specified in § 63.5 of subpart A of this part. The application for approval of construction or reconstruction may be used to fulfill the requirements of this paragraph.

(ii) Submit a notification of the date when construction or reconstruction was commenced, delivered or postmarked not later than 30 days after such date, if construction was commenced after the effective date.

(iii) Submit a notification of the anticipated date of startup of the source, delivered or postmarked not more than 60 days nor less than 30 days before such date;

(iv) Submit a notification of the actual date of startup of the source, delivered or postmarked within 15 calendar days after that date.

(5) *Additional initial notification requirements.* The owner or operator of sources subject to § 63.562(b)(2), (3), and (4), MACT standards, shall also include in the initial notification report required by paragraph (b)(2) and (3) the 24-month annual average or the annual actual HAP emissions from marine tank vessel loading operations, as appropriate, at all loading berths, as calculated according to the procedures in § 63.565(l). Emissions will be reported by commodity and type of marine tank vessel (barge or tanker) loaded.

(ii) As an alternative to reporting the information in paragraph (b)(5)(i) of this section, the source may submit documentation showing that all HAP-containing marine tank vessel loading operations, not exempt by § 63.560(d), occurred using vapor tight vessels that comply with the procedures of § 63.563(a) and that the emissions were routed to control devices meeting the requirements specified in § 63.563(b).

(c) *Request for extension of compliance.* If the owner or operator has installed BACT or technology to meet LAER consistent with § 63.6(i)(5) of subpart A of this part, he/she may submit to the Administrator (or State with an approved permit program) a request for an extension of compliance as specified in § 63.6(i)(4)(i)(B), (i)(5), and (i)(6) of subpart A of this part.

(d) *Reporting for performance testing of flares.* The owner or operator of a source required to conduct an opacity performance test shall report the opacity results and other information required by § 63.565(e) and § 63.11 of subpart A of this part with the notification of compliance status.

(e) *Summary reports and excess emissions and monitoring system performance reports.*

(1) *Schedule for summary report and excess emissions and monitoring system performance reports.* Excess emissions and parameter monitoring exceedances are defined in § 63.563(b). The owner or operator of a source subject to these emissions standards that is required to install a CMS shall submit an excess emissions and continuous monitoring system performance report and/or a summary report to the Administrator once each year, except, when the source experiences excess emissions, the source shall comply with a semi-annual reporting format until a request to reduce reporting frequency under paragraph (e)(2) of this section is approved.

(2) *Request to reduce frequency of excess emissions and continuous monitoring system performance reports.* An owner or operator who is required to submit excess emissions and continuous monitoring system performance and summary reports on a semi-annual basis may reduce the frequency of reporting to annual if the following conditions are met:

(i) For 1 full year the sources's excess emissions and continuous monitoring system performance reports continually demonstrate that the source is in compliance; and

(ii) The owner or operator continues to comply with all recordkeeping and monitoring requirements specified in this subpart and subpart A of this part.

(3) The frequency of reporting of excess emissions and continuous monitoring system performance and summary reports required may be reduced only after the owner or operator notifies the Administrator in writing of his or her intention to make such a change and the Administrator does not object to the intended change. In deciding whether to approve a reduced frequency of reporting, the Administrator may review information concerning the source's entire previous performance history during the 5-year recordkeeping prior to the intended change, including performance test results, monitoring data, and evaluations of an owner or operator's conformance with operation maintenance requirements. Such information may be used by the Administrator to make a judgement about the source's potential for noncompliance in the future. If the Administrator will notify the owner or operator in writing within 45 days after receiving notice of the owner or operator's intention. The notification from the Administrator to the owner or operator will specify the grounds on which the disapproval is based. In the absence of a notice of disapproval within 45 days, approval is automatically granted.

(4) *Content and submittal dates for excess emissions and monitoring system performance reports.* All excess emissions and monitoring system performance reports and all summary reports, if required per paragraph (e)(5) and (6) of this section, shall be delivered or postmarked within 30 days following the end of each calendar year, or within 30 days following the end of each six month period, if appropriate. Written reports of excess emissions or exceedances of process or control system parameters shall include all information required in § 63.10(c)(5) through (13) of subpart A of this part as applicable in Table 1 of § 63.560 and information from any calibration tests in which the monitoring equipment is not in compliance with PS 8 or other methods used for accuracy testing of temperature, pressure, or flow monitoring devices. The written report shall also include the name, title, and signature of the responsible official who is certifying the accuracy of the report. When no excess emissions or exceedances have occurred or monitoring equipment has not been inoperative, repaired, or adjusted, such information shall be stated in the report. This information will be kept for a minimum of 5 years and made readily available to the Administrator or delegated State authority upon request.

(5) If the total duration of excess emissions or control system parameter exceedances for the reporting period is less than 5 percent of the total operating time for the reporting period, and CMS downtime for the reporting period is less than 10 percent of the total operating time for the reporting period, only the summary report of § 63.10(e)(3)(vi) of subpart A of this part shall be submitted, and the full excess emissions and continuous monitoring system performance report of paragraph (e)(4) of this section need not be submitted unless required by the Administrator.

(6) If the total duration of excess emissions or process or control system parameter exceedances for the reporting period is 5 percent or greater of the total operating time for the reporting period, or the total CMS downtime for the reporting period is 10 percent or greater of the total operating time for the reporting period, both the summary report of § 63.10(e)(3)(vi) of subpart A of this part and the excess emissions and continuous monitoring system performance report of paragraph (e)(4) of this section shall be submitted.

(f) *Vapor collection system of the terminal.* Each owner or operator of an affected source shall submit with the initial performance test and maintain in an accessible location on site an engineering report describing in detail the vent system, or vapor collection system, used to vent each vent stream to a control device. This report shall include all valves and vent pipes that could vent the stream to the atmosphere, thereby bypassing the control device, and identify which valves are car-sealed opened and which valves are car-sealed closed.

(g) If a vent system, or vapor collection system, containing valves that could divert the emission stream away from the control device is used, each owner or operator of an affected source shall keep for at least 5 years up-to-date, readily accessible continuous records of:

(1) All periods when flow bypassing the control device is indicated if flow indicators are installed under § 63.563(a)(1) and § 63.564(b), and

(2) All times when maintenance is performed on car-sealed valves, when the car-seal is broken, and when the valve position is changed (i.e., from open to closed for valves in the vent piping to the control device and from closed to open for valves that vent the stream directly or indirectly to the atmosphere bypassing the control device) if valves are monitored under § 63.564(b).

(h) The owner or operator of an affected source shall keep the vapor-tightness documentation required under § 63.563(a)(4) on file at the source in a permanent form available for inspection.

(i) *Vapor tightness test documentation for marine tank vessels.* The owner or operator of an affected source shall maintain a documentation file for each marine tank vessel loaded at that source to reflect current test results as determined by the appropriate method in § 63.565(c)(1) and (2). Updates to this documentation file shall be made at least once per year. The owner or operator shall include, as a minimum, the following information in this documentation:

(1) Test title;

(2) Marine vessel owner and address;

(3) Marine vessel identification number;

(4) Loading time, according to § 63.563(a)(4)(ii) or (iii), if appropriate;

(5) Testing location;

(6) Date of test;

(7) Tester name and signature;

(8) Test results from § 63.565(c)(1) or (2), as appropriate;

(9) Documentation provided under § 63.563(a)(4)(ii) and (iii)(B) showing that the repair of leaking components attributed to a failure of a vapor-tightness test is technically infeasible without dry-docking the vessel; and

(10) Documentation that a marine tank vessel failing a pressure test or leak test has been repaired.

(j) *Emission estimation reporting and recordkeeping procedures.* The owner or operator of each source complying with the emission limits specified in § 63.562(b)(2), (3), and (4) shall comply with the following provisions:

(1) Maintain records of all measurements, calculations, and other documentation used to identify commodities exempted under § 63.560(d);

(2) Keep readily accessible records of the emission estimation calculations performed in § 63.565(l) for 5 years; and

(3) Submit an annual report of the source's HAP control efficiency calculated using the procedures specified in § 63.565(l), based on the source's actual throughput.

(4) Owners or operators of marine tank vessel loading operations specified in § 63.560(a)(3) shall retain records of the emissions estimates determined in § 65.565(l) and records of their actual throughputs by commodity, for 5 years.

(k) *Leak detection and repair of vapor collection systems and control devices.* When each leak of the vapor collection system, or vapor collection system, and control device is detected and repaired as specified in § 63.563(c) the following information required shall be maintained for 5 years:

(1) Date of inspection;

(2) Findings (location, nature, and severity of each leak);

(3) Leak determination method;

(4) Corrective action (date each leak repaired, reasons for repair interval); and

(5) Inspector name and signature.

Medicare Program; Criteria and Procedures for Extending Coverage to Certain Devices and Related Services

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule with comment period.

SUMMARY: This final rule establishes in regulations that certain devices with an investigational device exemption (IDE) approved by the Food and Drug Administration (FDA) and certain services related to those devices may be covered under Medicare. Specifically, it sets forth the process by which the FDA will assist HCFA in identifying non-experimental investigational devices that are potentially covered under Medicare.

This rule responds to the mandate that Federal agencies streamline their regulatory processes to make them less burdensome and more customer-focused. It is intended to provide Medicare beneficiaries with greater access to advances in medical technology and encourage clinical researchers to conduct high quality studies of newer technologies.

DATES: *Effective Date:* This rule is effective November 1, 1995.

Comment Date: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on November 20, 1995.

ADDRESSES: Mail written comments (1 original and 3 copies) to the following address:

Health Care Financing Administration, Department of Health and Human Services, Attention: BPD–841–FC, P.O. Box 26688, Baltimore, MD 21207–0519.

If you prefer, you may deliver your written comments (1 original and 3 copies) to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, or
Room C5–09–26, 7500 Security Boulevard, Baltimore, MD 21244–1850.

Because of staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code BPD–841–FC. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, in Room 309–G of the Department's offices at 200 Independence Avenue, SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: (202) 690–7890).

Copies: To order copies of the **Federal Register** containing this document, send your request to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954. Specify the date of the issue requested and enclose a check or money order payable to the Superintendent of Documents, or enclose your Visa or Master Card number and expiration date. Credit card orders can also be placed by calling the order desk at (202) 512–1800 or by faxing to (202) 512–2250. The cost for each copy is $8. As an alternative, you can view and photocopy the **Federal Register** document at most libraries designated as Federal Depository Libraries and at many other public and academic libraries throughout the country that receive the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Sharon Hippler, (410) 786–4633.

SUPPLEMENTARY INFORMATION:

I. Background

A. Statutory Basis

The Social Security Act (the Act) provides Medicare coverage for broad categories of benefits through the hospital insurance program, known as Part A, and the supplementary medical insurance program, known as Part B.

The Act does not, however, provide an all-inclusive list of covered items, services, treatments, procedures, or technologies. Except for certain items of durable medical equipment identified in section 1861(n) of the Act, some of the medical and other health services listed in section 1861(s) of the Act, and exclusions from coverage listed in section 1862 of the Act, the statute does not specify devices that are covered or excluded from coverage.

The Congress understood that questions about the coverage of specific services would invariably arise and would require a specific decision of coverage by the Secretary. Thus, it vested in the Secretary the authority to make those decisions. Among the provisions relevant to the determination of coverage is section 1862(a)(1)(A) of the Act, which states "Notwithstanding any other provision of this title, no payment may be made under Part A or Part B for any expenses incurred for items or services which * * * are not reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member." This is a key provision since the words "notwithstanding any other provision of this title * * *" make this an overriding exclusion that may be applicable in a given situation despite the existence of provisions that would otherwise permit coverage. Thus, while the Congress provided for the coverage of certain services, with limited exceptions specified by HCFA, coverage for those services is prohibited unless they are "reasonable" and "necessary."

B. Implementation of the Law

Historically, HCFA has interpreted the statutory terms "reasonable" and "necessary" to mean that a device must be safe and effective, medically necessary, and not experimental. For most Medicare coverage purposes, the term experimental has been used synonymously with the term investigational. Therefore, a device categorized by the FDA as being investigational served as an indication that it was not "reasonable" and "necessary" within the meaning of the Medicare program. As a general rule, these devices currently are not covered.

There is increasing recognition, however, that there are devices that are refinements of existing technologies or replications of existing technologies by other manufacturers. The FDA places many of these devices within the investigational device exemption (IDE) category as a means of gathering the scientific information necessary to establish the safety and effectiveness of the particular device, even though there is scientific evidence that similar devices can be safe and effective. Arguably, these devices could be viewed as "reasonable" and "necessary" under Medicare and recognized for payment if it were possible to identify them in the FDA's process.

C. January 1989 Proposed Rule on Coverage Decision Process

On January 30, 1989, we published a proposed rule (54 FR 4302) that proposed to establish in regulations generally applicable criteria for determining whether a service is "reasonable" and "necessary" under the Medicare program, and the coverage decisionmaking process. In response to that rule, we received comments pertaining to the coverage of experimental procedures and services related to those procedures. In this rule, we are choosing to respond to comments on investigational devices and services related to those devices and to announce our final policy. We have not completed our deliberations on the other issues addressed in the January 1989 proposed rule. This rule does not respond to comments other than those pertaining to devices.

Comment: Twenty-two commenters suggested that we revise our proposed policy so that we do not automatically exclude from Medicare coverage all devices that the FDA considers investigational. Several of these commenters recommended that we allow coverage of investigational devices when they are used in FDA-approved clinical trials.

Response: We agree that there are some investigational devices that should be considered for coverage if they are used in accordance with an FDA-approved protocol. The devices that will be considered for possible coverage are those investigational devices for which the FDA has determined that the device type can be safe and effective. For example, we will consider for possible coverage those investigational devices

that are of the same type as a device for which a manufacturer has received FDA clearance or approval for marketing. We have entered into an interagency agreement with the FDA to identify those investigational devices that are of a device type for which the underlying questions of safety and effectiveness have been resolved. These devices may be covered if all other applicable Medicare coverage requirements are met.

Comment: One commenter recommended that we not change our previous policy that excluded coverage of investigational devices.

Response: We do not agree. We believe that there are certain investigational devices that should be covered if all other applicable coverage requirements are met. However, the investigational devices that we will consider for coverage will not include any device for which the FDA is unsure whether the device type in general can be safe and effective.

Comment: A number of commenters requested that we clarify the coverage rules concerning the furnishing of services related to experimental procedures (for example, a hospital stay).

Response: As stated earlier, we are limiting the focus of this rule to Medicare coverage of certain investigational devices and services related to those devices. Also, in the preamble to this rule and in new § 405.207, we explain our coverage policy concerning services related to a noncovered device.

II. Provisions of This Final Rule

While the policies contained in this final rule will be effective November 1, 1995, we are providing a 60-day comment period for the receipt of public comments. We believe it is appropriate to provide an opportunity for comment on these policies because we are broadening the proposals concerning certain devices contained in the January 1989 proposed rule. Consequently, beneficiaries, providers, and suppliers that may have chosen not to comment because they may have believed they were not affected by the 1989 proposals may wish to comment on these broadened final policies. If our consideration of the comments we receive leads us to a change in these policies, we will publish another document.

A. HCFA Coverage Decision Process

The Administration has set forth a mandate that all Federal agencies must streamline their regulatory processes to make them less burdensome and more customer-focused. Agencies have been directed to review their policies and processes to determine which requirements can be reduced or eliminated without lowering health and safety standards. In accordance with this directive, the FDA reviewed its regulatory processes for devices and HCFA reviewed its Medicare coverage policies. This rule results in an improved process for covering certain investigational devices that is expected to benefit Medicare beneficiaries.

This new policy will lead to broader coverage of certain investigational devices and certain services related to those devices. A long-term benefit is to facilitate the collection of information about these devices through approved clinical trials, which will enable the marketing of these devices. Medicare beneficiaries will have earlier access to the latest advances in medical technology.

To assist HCFA in its coverage decision process, the FDA will follow a categorization process that differentiates between the clinical assessment of novel, first-of-a-kind devices and newer generations of legally marketed devices. The policy changes in this rule reflect the categorization of investigational devices that are the subject of FDA-approved IDEs.

The FDA uses the definition of a device that appears in 21 U.S.C. 321(h). A device, for purposes of the FDA process, refers to an instrument, apparatus, implement, machine, contrivance, implant, *in vitro* reagent, or other similar or related article, including any component, part, or accessory, which is—

- Recognized in the official National Formulary, or the U.S. Pharmacopeia, or any supplement to them,
- Intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of disease, in man or other animals,
- Intended for use in the diagnosis of conditions other than diseases such as pregnancy,
- Intended to affect the structure or any function of the body of man or other animals, or
- Considered an *in vitro* diagnostic product, including those previously regulated as drugs, and which does not achieve any of its principal intended purposes through chemical action within or on the body of man or other animals

and which is not dependent upon being metabolized for the achievement of any of its principal intended purposes.

When a sponsor (usually a manufacturer) submits a marketing application for clearance or approval of a device to the FDA, the FDA evaluates the safety and effectiveness of the device. If sufficient information exists to determine its safety and effectiveness, the FDA may clear the device for marketing. In some instances, for certain devices, the FDA may require that clinical trials be conducted to obtain clinical information to determine the device's safety and effectiveness. Generally, in order for these devices to be shipped lawfully for purposes of conducting the clinical trial, the sponsor must obtain an approved investigational device exemption (IDE).

Under the Food, Drug, and Cosmetic Act (21 U.S.C. 360c), devices fall into one of three classes:

Class I—Devices for which the general controls of the Food, Drug, and Cosmetic Act, such as adherence to good manufacturing practice regulations, are sufficient to provide a reasonable assurance of safety and effectiveness.

Class II—Devices that, in addition to general controls, require special controls, such as performance standards or postmarket surveillance, to provide a reasonable assurance of safety and effectiveness.

Class III—Devices that cannot be classified into Class I or Class II because insufficient information exists to determine that either special or general controls would provide reasonable assurance of safety and effectiveness. Class III devices require premarket approval.

Under the new categorization process to assist HCFA, the FDA assigns each device with an FDA-approved IDE to one of two categories: Experimental/Investigational (Category A) Devices, or Non-Experimental/Investigational (Category B) Devices. Under this categorization process, an experimental/investigational device (Category A) is an innovative device in Class III for which "absolute risk" of the device type has not been established (that is, initial questions of safety and effectiveness have not been resolved and the FDA is unsure whether the device type can be safe and effective). A non-experimental/investigational (Category B) device is a device believed to be in Class I or Class II, or a device believed to be in Class III for which the incremental risk is the primary risk in question (that is, underlying questions of safety and effectiveness of that device type have been resolved), or it is known that the device type can be safe and effective because, for example, other manufacturers have obtained FDA approval for that device type. The criteria the FDA will use to categorize an investigational device is described in the addendum to this rule.

Currently there are about 1,200 FDA-approved clinical trials of devices. The FDA is categorizing those devices as "experimental/investigational (Category A)" or "non-experimental/investigational (Category B)," a process that is expected to be completed by November 1, 1995. The great majority of these devices in clinical trials are likely to be categorized as "non-experimental/investigational (Category B)".

The FDA will notify HCFA, when it notifies the sponsor, either by electronic means or written communication, of its categorization decisions. Through these categorization decisions, the FDA will be advising HCFA as to the similarity of a device that has been approved for use in an FDA-approved clinical trial to a device that has been approved or cleared by the FDA for marketing.

HCFA excludes from Medicare coverage a device with an IDE that is categorized by the FDA as experimental/investigational (Category A). HCFA will continue to view these experimental/investigational (Category A) devices as not satisfying the statutory requirement that Medicare pay for only devices determined to be reasonable and necessary. HCFA is not changing its policy on this issue because essential considerations of health and safety are involved.

This rule does not affect HCFA's policy on services related to a noncovered device. That is, services related to the use of a noncovered device are not covered under Medicare. We are codifying in the regulations a provision explaining that services related to a noncovered device are not covered under Medicare. These services include all services furnished in preparation for the use of a noncovered device, services furnished contemporaneously with and necessary to the use of a noncovered device, and services furnished as necessary after-care that are incident to recovery from the use of the device or from receiving related noncovered services.

Services furnished to address medical complications arising from the use of the device (and that are not incident to normal recovery) may be covered. Services not related to the use of a noncovered device, which meet all other coverage requirements, can be covered under Medicare.

The following are some examples of services "related to" and "not related to" noncovered devices furnished while the beneficiary is an inpatient:

- A beneficiary is hospitalized to receive a noncovered device and breaks a leg while in the hospital. Services related to care of the broken leg during this stay are "not related to" services and are covered under Medicare.
- A beneficiary is admitted to the hospital for a covered service and during the hospital stay received a noncovered investigational device. The services related to the admitting condition are covered because the reason for the admission was to receive covered services and not related to the diagnoses that led to the need for the noncovered device.
- A beneficiary is admitted to the hospital for covered services related to a condition that led to receiving a noncovered device during the same hospital stay. We would review all of the services and make a comparison of the date they are received to the date the beneficiary is identified as needing the noncovered device. If our review reveals that services were required because of receiving the noncovered device, the services "related to" the noncovered device will not be covered.
- After a beneficiary is discharged from a hospital stay during which he or she receives a noncovered investigational device, medical and hospital services to treat a condition or complication that arises as a result of the noncovered device or related noncovered services may be covered when they are reasonable and necessary in all other respects. Thus, coverage could be provided for subsequent inpatient hospital stays or outpatient treatment ordinarily covered by Medicare, even if the need for treatment arose because of a previous noncovered device or related noncovered services. Any subsequent services that could be expected to have been incorporated into a global fee, however, will not be covered.

The related services policy will also apply to experimental/investigational (Category A) and non-experimental/investigational (Category B) devices that are excluded from Medicare coverage. Therefore, Medicare policy will continue to preclude coverage of certain devices and services related to the use of those devices when they are furnished as part of a hospital stay.

It is our intention that a beneficiary not pay for a noncovered device or services related to a noncovered device when a beneficiary did not know that the device or related services are not covered. Existing regulations concerning limitations on liability in §§ 411.400 through 411.406 will apply to this broader coverage of certain investigational devices and services related to those devices. Medicare payment may be made for certain assigned claims for a service related to a noncovered device if the service was excluded from coverage in accordance with § 411.15(k) as not medically necessary under section 1862(a)(1)(A) of the Act. A beneficiary who did not know and could not reasonably have been expected to know that payment would be denied under section 1862(a)(1)(A) of the Act receives protection from financial liability in accordance with §§ 411.400 through 411.406 under the limitation on liability provision of section 1879 of the Act. Similarly, when the beneficiary is protected and the provider or supplier also did not know and could not reasonably have been expected to know that payment would be denied, the provider or supplier also receives protection from financial liability in accordance with the limitation on liability provision. Consequently, Medicare payment may be made to the provider or supplier.

For unassigned claims for related physician services excluded from coverage as not medically necessary under section 1862(a)(1)(A) of the Act, a beneficiary who did not know and could not reasonably have been expected to know that payment would be denied as not medically necessary may receive protection from financial liability in accordance with existing § 411.408 under the refund requirement provision of section 1842(l) of the Act. If the beneficiary is found not to have known, and the provider or supplier also did not know and could not reasonably have been expected to know that payment would be denied, the provider or supplier will receive protection from financial liability under the refund requirement provision.

Under changes made by this final rule, HCFA will consider coverage of a device with an FDA-approved IDE, categorized by the FDA as non-experimental/investigational (Category B) for Medicare beneficiaries participating in FDA-approved clinical trials. As a general rule for all medical care, HCFA has authority to conduct a separate assessment of an item—s or service's appropriateness for Medicare coverage, including whether it is reasonable and necessary specifically for its intended use for Medicare beneficiaries. Medicare coverage of a non-experimental/investigational (Category B) device will be subject to the same process and criteria used by Medicare contractors when making coverage decisions for legally marketed devices. Coverage of the device is dependent on it meeting all other Medicare coverage requirements contained in the statute, regulations, and instructions issued by HCFA.

The FDA-approved IDE study protocols restrict investigational device shipment to a limited number of investigational sites for testing on a specific number of patients. To the extent Medicare covers a non-experimental/investigational (Category B) device, coverage is limited to beneficiaries meeting the protocol requirements. For example, coverage of an investigational device may be limited to Medicare beneficiaries participating in trials conducted by certain health care practitioners in an approved clinical trial.

Medicare coverage of a non-experimental/investigational (Category B) device is predicated, in part, upon the device continuing to meet criteria that led to this designation by the FDA. In the event a device fails to meet the criteria for Category B designation or its use violates relevant IDE requirements necessitating the withdrawal of the IDE approval, the FDA will immediately notify the sponsor and HCFA. HCFA will re-evaluate the device's continued eligibility for Medicare payment.

Payment under Medicare for a non-experimental/investigational (Category B) device will be based on, and may not exceed, the amount that would have been paid for a currently used device serving the same medical purpose that has been approved or cleared for marketing by the FDA. In cases involving a hospital stay, the diagnosis related group (DRG) payment under the prospective payment system ordinarily will not be affected.

B. Re-evaluation of Categorization Decision

We anticipate that instances will arise under which a device sponsor believes that a device, categorized by the FDA as experimental/investigational (Category A), should be categorized as non-experimental/investigational (Category B). In these instances, the sponsor may request that the FDA re-evaluate its categorization decision. Only after the FDA has completed its re-evaluation, and concluded that the device still is an experimental/investigational (Category A) device, may a sponsor request review by HCFA. A sponsor may request review by HCFA even if no Medicare claims are involved.

1. FDA Action

Under this process, the sponsor may submit a written request for re-evaluation to the FDA (at the same address it submitted its original application), together with information and rationale that it believes support recategorization. Only the sponsor of a device may seek a re-evaluation of the FDA IDE categorization decision.

Time limits on seeking a re-evaluation will not be imposed. The FDA will review the request and inform the sponsor, and HCFA, of its decision. If the FDA does not agree to recategorize the device, the sponsor may seek further review by HCFA.

2. HCFA Action

Upon written request to the HCFA Administrator from the sponsor of a device with an FDA-approved IDE, HCFA will review the categorization of the device. As part of this process, HCFA will review all information submitted by the sponsor and the FDA's recommendation. HCFA will review only information in the FDA record to determine whether to change the categorization. HCFA will not accept or review any information from the sponsor that was not previously reviewed by the FDA. While HCFA, during the re-evaluation process, will be the final decisionmaker concerning categorization of a device for Medicare coverage purposes, HCFA relies heavily on the FDA review of the scientific information related to the device and consequently the FDA recommendation. HCFA will issue a written decision and notify the sponsor and the FDA. No further reviews will be available to the sponsor.

3. Update of Categorization Decision

If the circumstances that led to the initial categorization decision change (for example, a premarket approval application is approved for a device similar to one under investigation), the FDA will re-evaluate the categorization designation and notify the sponsor and HCFA of any change. Neither the FDA categorization and re-evaluation nor HCFA's review constitute an initial determination for purposes of the Medicare appeals processes under 42 CFR part 405, subparts G or H, or parts 417, 473, or 498.

C. Quarterly Announcement of Categorization Decisions

HCFA publishes quarterly in the **Federal Register** a notice that lists HCFA manual instructions, substantive and interpretive regulations and other **Federal Register** notices, and statements of policy that relate to the Medicare and Medicaid programs. HCFA will announce in the quarterly notice all IDE categorizations, using IDE numbers the FDA assigns. The initial notice will include all FDA-approved IDE numbers organized by the categories to which the device numbers are assigned (that is, Category A or Category B, and identified by the IDE number). Subsequent notices will include the additions and deletions to the initial list of all devices with an FDA-approved IDE.

D. Confidentiality of Investigational Device Exemption Information

Data and information otherwise exempt from public disclosure may be revealed in judicial proceedings if the data or information are relevant. HCFA will take appropriate measures, or request that appropriate measures be taken, to reduce disclosure to the minimum necessary under the circumstances. Because HCFA relies on information submitted to the FDA under 21 U.S.C. 360j(g), HCFA will consult with the FDA to ensure that the confidentiality of the information is protected to the extent possible.

E. Contractor Coverage Decisions of Devices With an FDA-approved IDE

1. Current Contractor Functions

Sections 1816 and 1842 of the Act provide for most claims processing and administrative functions for Medicare to be handled by public or private insurance organizations (commercial insurers or Blue Cross/Blue Shield Associations) acting as fiscal agents or contractors for the Medicare program.

The contractors responsible for the administration of Part A benefits are called fiscal intermediaries. The major role of the intermediaries is to review and pay claims submitted by providers (such as hospitals, skilled nursing facilities, and home health agencies) for covered services furnished to Medicare beneficiaries. The intermediary makes payments for hospital inpatient services generally under the prospective payment system. It makes payments for hospital and other provider outpatient services by reviewing submitted cost reports and making reasonable cost determinations or payment determinations under a fee schedule following policies set by HCFA.

Under Part B, the contractors are called carriers. Part B services are paid on a fee schedule, reasonable charge, or reasonable cost basis. One of the major functions of the carriers is to determine the appropriate amount of payment for each medical care service paid for under the program. Carriers also are responsible for reviewing and paying claims to or on behalf of beneficiaries for the services furnished.

The functions performed by Medicare contractors include utilization review, beneficiary hearings and appeals, professional relations, and statistical activities, in addition to claims review and processing. Currently, there are 29 carriers, 46 intermediaries, and some other entities under contract with HCFA that perform reviews and process claims for Medicare beneficiaries.

2. Current Criteria and Procedures for Contractor Coverage Decisions

Contractors make Medicare coverage decisions within the parameters set by statutory authority and regulations and program instructions issued by HCFA. If HCFA has issued a national coverage decision, contractors are bound by that decision. If no national coverage decision has been issued, a contractor must decide whether the service in question is reasonable and necessary and therefore covered by Medicare.

Medicare contractors may specifically consider, among other factors, whether the service is—

- Medically necessary in the particular case and whether the amount, duration, and frequency of use or application of the service are medically appropriate;
- Furnished in accordance with accepted standards of medical practice; and
- Furnished in a setting appropriate to the patient's medical needs and condition (such as inpatient care at a hospital or skilled nursing facility, outpatient care at a hospital or physician's office, or home care).

3. Changes to Contractor Process

Under this rule, contractors will review the instructions HCFA issues to determine if a non-experimental/investigational (Category B) device is potentially covered under Medicare. After determining that a device is potentially covered, the contractor will apply HCFA's long-standing criteria and procedures for making coverage decisions. When considering whether a non-experimental/investigational (Category B) device is furnished in accordance with accepted standards of medical practice, it will consider those standards that relate to an FDA-approved clinical trial.

In accordance with HCFA coverage policy, Medicare contractors are precluded from covering any device that is an experimental/investigational (Category A) device.

F. Appeals Under Part A and Part B

While the categorization decision is not itself an initial determination, if HCFA denies a Medicare claim on the basis that the device is an experimental/investigational (Category A) device, the initial determination denying the claim encompasses the categorization decision. A proper party to the denied Medicare claim has a right to appeal the experimental/investigational (Category A) categorization as an initial determination under 42 CFR part 405, subparts G or H.

A decision that a device is experimental/investigational (Category A) means that the device is experimental and, therefore, excluded from coverage as not reasonable and necessary under section 1862(a)(1)(A) of the Act. HCFA's acceptance of the FDA categorization of an experimental/investigational (Category A) device constitutes a national coverage decision and is binding on HCFA's contractors. In accordance with section 1869(b)(3)(A) of the Act, national coverage decisions made by HCFA under section 1862(a)(1) of the Act may not be reviewed by administrative law judges.

III. Regulatory Impact Statement

Consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), we prepare a regulatory flexibility analysis unless we certify that a rule will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all device manufacturers and providers are considered to be small entities. Individuals and States are not included in the definition of a small entity.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

This regulation removes certain investigational devices from being presumed excluded by Medicare and places them in a category under which they may be covered. On a claim-by-claim basis, Medicare contractors verify or determine that devices are covered under the circumstances presented by the claim or bill. This regulation does not change that process, except the contractors must ascertain whether these devices were furnished to beneficiaries participating in, and in accordance with the requirements of, approved clinical trials. Once coverage is verified, payment is made at the level established for a similar device that has been approved as covered by Medicare.

We anticipate that this regulation will lead to a beneficial but not a major expansion of coverage of devices. Each year the FDA receives approximately 200 IDE applications for review. The majority of these IDEs are approved for study. At the present time, there are approximately 1,200 clinical trials underway involving devices, which are being conducted under FDA-approved IDEs.

We expect that this regulation will have a number of beneficial effects. It will provide Medicare beneficiaries with greater access to advances in medical technology. It will allow Medicare beneficiaries faced with a decision of choosing between a fully covered device and one undergoing clinical trials to choose the investigational device without losing Medicare coverage. Because Medicare payment is based on the payment for a fully covered device, that choice would not result in increased costs to Medicare for those devices.

At the present time, device manufacturers and the providers that furnish services involving non-experimental/investigational devices (Category B) are not eligible for Medicare payments. We estimate that this regulation will result in negligible costs to the Medicare program. We expect affected entities would receive less than $10 million per year over the next 5 years.

Virtually all of these devices replace devices for which Medicare coverage is currently available and which would have been furnished to beneficiaries if we had not changed the policy. The services are primarily furnished on an inpatient basis in hospitals. Hospitals are paid on a prospective basis so that prices are not adjusted based on changes in the price-components (that is, device costs) of individual DRGs. Instead, the payment base under the prospective payment system is annually updated based on a host of considerations, including the increased cost of inputs. As a result, this change in coverage will not significantly affect Medicare's current payments and will only affect its future payments in concert with the other factors affecting the DRG update decisions.

For these reasons, we are not preparing analyses for either the RFA or section 1102(b) of the Act because we have determined, and we certify, that this rule will not have a significant economic impact on a substantial number of small entities or a significant impact on the operations of a substantial number of small rural hospitals.

In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

IV. Collection of Information Requirements

This document does not impose information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

V. Response to Comments

Because of the large number of items of correspondence we normally receive on **Federal Register** documents published for comment, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the "DATES" section of this preamble, and, if we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

List of Subjects

42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 411

Kidney diseases, Medicare, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 42 CFR Chapter IV is amended as follows:

A. 42 CFR part 405 is amended to read as follows:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

1. A new subpart B, consisting of §§ 405.201–405.215, is added to read as follows:

Subpart B—Medical Services Coverage Decisions That Relate to Health Care Technology

Sec.
405.201 Scope of subpart and definitions.
405.203 FDA categorization of investigational devices.
405.205 Coverage of a non-experimental/investigational (Category B) device.
405.207 Services related to a noncovered device.
405.209 Payment for a non-experimental/investigational (Category B) device.
405.211 Procedures for Medicare contractors in making coverage decisions for a non-experimental/investigational (Category B) device.
405.213 Re-evaluation of a device categorization.
405.215 Confidential commercial and trade secret information.

Subpart B—Medical Services Coverage Decisions That Relate to Health Care Technology

Authority: Secs. 1102, 1862, and 1871 of the Social Security Act as amended (42 U.S.C. 1302, 1395y, and 1395hh).

§ 405.201 Scope of subpart and definitions.

(a) *Scope.* This subpart establishes that—

(1) HCFA uses the FDA categorization of a device as a factor in making Medicare coverage decisions; and

(2) HCFA may consider for Medicare coverage certain devices with an FDA-approved investigational device exemption (IDE) that have been categorized as non-experimental/investigational (Category B).

(b) *Definitions.* As used in this subpart—

Class I refers to devices for which the general controls of the Food, Drug, and Cosmetic Act, such as adherence to good manufacturing practice regulations, are sufficient to provide a reasonable assurance of safety and effectiveness.

Class II refers to devices that, in addition to general controls, require special controls, such as performance standards or postmarket surveillance, to provide a reasonable assurance of safety and effectiveness.

Class III refers to devices that cannot be classified into Class I or Class II because insufficient information exists to determine that either special or general controls would provide reasonable assurance of safety and effectiveness. Class III devices require premarket approval.

Contractors refers to carriers, fiscal intermediaries, and other entities that contract with HCFA to review and adjudicate claims for Medicare services.

Experimental/investigational (Category A) device refers to an innovative device believed to be in Class III for which "absolute risk" of the device type has not been established (that is, initial questions of safety and effectiveness have not been resolved and the FDA is unsure whether the device type can be safe and effective).

IDE stands for investigational device exemption. An FDA-approved IDE application permits a device, which would otherwise be subject to marketing clearance, to be shipped lawfully for the purpose of conducting a clinical trial in accordance with 21 U.S.C. 360j(g) and 21 CFR parts 812 and 813.

Non-experimental/investigational (Category B) device refers to a device believed to be in Class I or Class II, or a device believed to be in Class III for which the incremental risk is the primary risk in question (that is, underlying questions of safety and effectiveness of that device type have been resolved), or it is known that the device type can be safe and effective because, for example, other manufacturers have obtained FDA approval for that device type.

PMA stands for "premarket approval" and refers to a marketing application for a Class III device, which includes all information submitted with or incorporated by reference in the application in accordance with 21 U.S.C. 360e and 360j and 21 CFR 814.3(e).

Sponsor refers to a person or entity that initiates, but does not conduct, an investigation under an IDE.

§ 405.203 FDA categorization of investigational devices.

(a) The FDA assigns a device with an FDA-approved IDE to one of two categories:

(1) Experimental/Investigational (Category A) Devices.

(2) Non-Experimental/Investigational (Category B) Devices.

(b) The FDA notifies HCFA, when it notifies the sponsor, that the device is categorized by FDA as experimental/investigational (Category A) or non-experimental/investigational (Category B).

(c) HCFA uses the categorization of the device as a factor in making Medicare coverage decisions.

§ 405.205 Coverage of a non-experimental/investigational (Category B) device.

(a) For any device that meets the requirements of the exception at § 411.15(o) of this chapter, the following procedures apply:

(1) The FDA notifies HCFA, when it notifies the sponsor, that the device is categorized by FDA as non-experimental/investigational (Category B).

(2) HCFA uses the categorization of the device as a factor in making Medicare coverage decisions.

(b) If the FDA becomes aware that a categorized device no longer meets the requirements of the exception at § 411.15(o) of this chapter, the FDA notifies the sponsor and HCFA and the procedures described in paragraph (a)(2) of this section apply.

§ 405.207 Services related to a noncovered device.

(a) *When payment is not made.* Medicare payment is not made for medical and hospital services that are related to the use of a device that is not covered because HCFA determines the device is not "reasonable" and "necessary" under section 1862(a)(1)(A) of the Act or because it is excluded from coverage for other reasons. These services include all services furnished in preparation for the use of a noncovered device, services furnished contemporaneously with and necessary to the use of a noncovered device, and services furnished as necessary after-care that are incident to recovery from the use of the device or from receiving related noncovered services.

(b) *When payment is made.* Medicare payment may be made for services, ordinarily covered by Medicare, to treat a condition or complication that arises because of the use of a noncovered device or from the furnishing of related noncovered services.

§ 405.209 Payment for a non-experimental/investigational (Category B) device.

Payment under Medicare for a non-experimental/investigational (Category B) device is based on, and may not exceed, the amount that would have been paid for a currently used device serving the same medical purpose that has been approved or cleared for marketing by the FDA.

§ 405.211 Procedures for Medicare contractors in making coverage decisions for a non-experimental/investigational (Category B) device.

(a) *General rule.* In their review of claims for payment, Medicare contractors are bound by the statute, regulations, and all HCFA administrative issuances, including all national coverage decisions.

(b) *Potentially covered non-experimental/investigational (Category B) devices.* Medicare contractors may approve coverage for any device with an FDA-approved IDE categorized as a non-experimental/investigational (Category B) device if all other coverage requirements are met.

(c) *Other considerations.* Medicare contractors must consider whether any restrictions concerning site of service, indications for use, or any other list of conditions for coverage have been placed on the device's use.

§ 405.213 Re-evaluation of a device categorization.

(a) *General rules.* (1) Any sponsor that does not agree with an FDA decision that categorizes its device as experimental/investigational (Category A) may request re-evaluation of the categorization decision.

(2) A sponsor may request review by HCFA only after the requirements of paragraph (b) of this section are met.

(3) No reviews other than those described in paragraphs (b) and (c) of this section are available to the sponsor.

(4) Neither the FDA original categorization or re-evaluation (described in paragraph (b) of this section) nor HCFA's review (described in paragraph (c) of this section) constitute an initial determination for purposes of the Medicare appeals processes under part 405, subpart G or subpart H, or parts 417, 473, or 498 of this chapter.

(b) *Request to FDA.* A sponsor that does not agree with the FDA's categorization of its device may submit a written request to the FDA at any time requesting re-evaluation of its original categorization decision, together with any information and rationale that it believes support recategorization. The FDA notifies both HCFA and the sponsor of its decision.

(c) *Request to HCFA.* If the FDA does not agree to recategorize the device, the sponsor may seek review from HCFA. A device sponsor must submit its request in writing to HCFA. HCFA obtains copies of relevant portions of the application, the original categorization decision, and supplementary materials. HCFA reviews all material submitted by the sponsor and the FDA's recommendation. HCFA reviews only information in the FDA record to determine whether to change the categorization of the device. HCFA issues a written decision and notifies the sponsor of the IDE and the FDA.

§ 405.215 Confidential commercial and trade secret information.

To the extent that HCFA relies on confidential commercial or trade secret information in any judicial proceeding, HCFA will maintain confidentiality of the information in accordance with Federal law.

Subpart G—[Amended]

2. The authority citation for subpart G continues to read as follows:

Authority: Secs. 1102, 1151, 1154, 1155, 1869(b), 1871, 1872, and 1879 of the Social Security Act (42 U.S.C. 1302, 1320c, 1320c–3, 1320c–4, 1395ff(b), 1395hh, 1395ii and 1395pp).

3. In subpart G, a new § 405.753 is added to read as follows:

§ 405.753 Appeal of a categorization of a device.

(a) HCFA's acceptance of the FDA categorization of a device as an experimental/investigational (Category A) device under § 405.203 is a national coverage decision under section 1862(a)(1) of the Act.

(b) HCFA's acceptance of the FDA categorization of a device as an experimental/investigational (Category A) device under § 405.203 is an aspect of an initial determination that, under section 1862 of the Act, payment may not be made.

(c) In accordance with section 1869(b)(3)(A) of the Act, HCFA's acceptance of the FDA categorization of a device as an experimental/investigational (Category A) device under § 405.203 may not be reviewed by an administrative law judge.

Subpart H—[Amended]

4. The authority citation for subpart H continues to read as follows:

Authority: Secs. 1102, 1842(b)(3)(C), and 1869(b) of the Social Security Act (42 U.S.C. 1302, 1395u(b)(3)(C), 1395ff(b)).

5. In subpart H, a new § 405.877 is added to read as follows:

§ 405.877 Appeal of a categorization of a device.

(a) HCFA's acceptance of the FDA categorization of a device as an experimental/investigational (Category A) device under § 405.203 is a national coverage decision under section 1862(a)(1) of the Act.

(b) HCFA's acceptance of the FDA categorization of a device as an experimental/investigational (Category A) device under § 405.203 is an aspect of an initial determination that, under section 1862 of the Act, payment may not be made.

(c) In accordance with section 1869(b)(3)(A) of the Act, HCFA's acceptance of the FDA categorization of a device as an experimental/investigational (Category A) device under § 405.203 may not be reviewed by an administrative law judge.

B. 42 CFR part 411 is amended as set forth below:

PART 411—EXCLUSIONS FROM MEDICARE AND LIMITATIONS ON MEDICARE PAYMENT

1. The authority citation for part 411 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

2. In § 411.15, the introductory text is republished and new paragraph (o) is added to read as follows:

§ 411.15 Particular services excluded from coverage.

The following services are excluded from coverage.

* * * * *

(o) *Experimental or investigational devices, except for certain devices—*

(1) Categorized by the FDA as a non-experimental/investigational (Category B) device defined in § 405.201(b) of this chapter; and

(2) Furnished in accordance with the FDA-approved protocols governing clinical trials.

3. In § 411.406, paragraph (e) is revised to read as follows:

§ 411.406 Criteria for determining that a provider, practitioner, or supplier knew that services were excluded from coverage as custodial care or as not reasonable and necessary.

* * * * *

(e) *Knowledge based on experience, actual notice, or constructive notice.* It is clear that the provider, practitioner, or supplier could have been expected to have known that the services were excluded from coverage on the basis of the following:

(1) Its receipt of HCFA notices, including manual issuances, bulletins, or other written guides or directives from intermediaries, carriers, or PROs, including notification of PRO screening criteria specific to the condition of the beneficiary for whom the furnished services are at issue and of medical procedures subject to preadmission review by a PRO.

(2) **Federal Register** publications containing notice of national coverage decisions or of other specifications regarding noncoverage of an item or service.

(3) Its knowledge of what are considered acceptable standards of practice by the local medical community.

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: September 11, 1995.

Bruce C. Vladeck,

Administrator, Health Care Financing Administration.

Dated: September 12, 1995.

Donna E. Shalala,

Secretary.

Note: This addendum will not appear in the Code of Federal Regulations.

Addendum—Criteria for Categorization of Investigational Devices

Category A: Experimental/Investigational

Category A devices include the following:

(1) Class III devices of a type for which no marketing application has been approved through the premarket approval (PMA) process for any indication for use. (For pre-amendments[1] Class III devices, refer to the criteria under Category B).

(2) Class III devices that would otherwise be in Category B but have undergone significant modification for a new indication for use.

Category B: Non-experimental/Investigational

Category B devices include the following:

(1) Devices, regardless of the classification, under investigation to establish substantial equivalence to a predicate device, that is, to establish substantial equivalence to a previously/currently legally marketed device.

(2) Class III devices whose technological characteristics and indications for use are comparable to a PMA-approved device.

(3) Class III devices with technological advances compared to a PMA-approved device, that is, a device with technological changes that represent advances to a device that has already received PMA-approval (generational changes).

(4) Class III devices that are comparable to a PMA-approved device but are under investigation for a new indication for use. For purposes of studying the new indication, no significant modifications to the device were required.

(5) Pre-amendments Class III devices that become the subject of an IDE after the FDA requires premarket approval, that is, no PMA application was submitted or the PMA application was denied.

(6) Nonsignificant risk device investigations for which the FDA required the submission of an IDE.

Note: Some investigational devices may exhibit unique characteristics or raise safety concerns that make additional consideration necessary. For these devices, HCFA and the FDA will agree on the additional criteria to be used. The FDA will use these criteria to assign the device(s) to a category. As experience is gained in the categorization process, this addendum may be modified.

[FR Doc. 95–23132 Filed 9–13–95; 4:00 pm]

BILLING CODE 4120–01–P

---

[1] Pre-amendments devices are devices that were marketed before the enactment of the 1976 Medical Device Amendments to the Food, Drug, and Cosmetic Act; that is, in commercial distribution before May 28, 1976.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Pat 73

[MM Docket No. 90–189; RM–6904, RM–7114, RM–7166, 7415, RM–7298]

Radio Broadcasting Services; Farmington, Grass Valley, Jackson, CA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots Channel 232A to Farmington, California, and substitutes Channel 232B1 for Channel 232A at Grass Valley, California, and modifies the license of Station KNCO, Grass Valley to specify operation on Channel 232B1. to accommodate these actions, this document substitutes Channel 259A for Channel 232A at Jackson, California, and modifies the license of Station KNGT, Jackson, California, to specify operation on Channel 259A. The reference coordinates for the Channel 232A allotment at Farmington, California, are 37–57–00 and 121–00–00. The reference coordinates for Channel 232B1 at Grass Valley, California, are 39–14–44 and 120–57–52. The reference coordinates for Channel 259A at Jackson, California, are 38–20–24 and 120–43–13. *See* 55 FR 13810 (April 12, 1990).

EFFECTIVE DATE: October 27, 1995.

47 CFR Part 73

[FCC 95–385]

Mass Media: AM Expended Band Allotment Plan

AGENCY: Federal Communications Commission.

ACTION: Final rule; Interpretation.

SUMMARY: On September 1, 1995, in response to requests for reconsideration, the FCC adopted a Memorandum Opinion and Order which rescinded its original AM Expanded Band Allotment Plan, released October 14, 1994, and provides a thirty-day period for comments to correct the AM database and a thirty-day period for comments on the procedures which will be used to generate a new plan based on recalculated ranking factors. A fifteen-day reply period is also provided. This will enable an accurate AM expanded Band Allotment Plan to be issued by the FCC.

DATES: Comments to correct the AM database must be filed on or before October 19, 1995. Comments regarding the procedures which will be used to generate a new Allotment Plan must be submitted on or before October 19, 1995. Reply comments are due on or before November 3, 1995.

ADDRESSES: Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Jim Burtle, Audio Services Division, Mass Media Bureau, (202) 418–2670.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Opinion and Order adopted September 1, 1995, and released September 6, 1995. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M St., NW, Washington, DC (See MM Docket 87–267). The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, 1990 M St., NW, Suite 640, Washington, DC 30036.

The FCC rescinded the AM Expanded Band Allotment Plan Adopted October 14, 1994 (DA 94–1154). The Allotment Plan identified stations that were eligible to apply for authorization for specific expanded band (1605 kHz–1705 kHz) frequency allotments. The Commission also verified that certain errors existed in the AM database used to generate the improvement factor rankings on which the Allotment Plan was based (June 30, 1993–A database) and rescinded the improvement factor ranking list. The Commission called for changes to the June 30, 1993–A AM database to be filed within thirty days of the publication of this Memorandum Opinion and Order in the **Federal Register**.

The FCC further identified and clarified the standards used to implement a new Allotment Plan and gave interested parties a period of thirty days from the publication of the Memorandum Opinion and Order in the **Federal Register** to comment thereon. Reply comments may be filed within fifteen days of the comment date.

Final Regulatory Flexibility Analysis

The FCC granted in part requests for reconsideration and review of the AM Expanded Band Allotment Plan adopted October 14, 1994 (DA 94–1154) and rescinded the Allotment Plan and improvement factor ranking list. The Commission will receive requests to change the June 30, 1993–A database during a thirty-day comment period. The FCC also sets forth the procedures to implement the Allotment Plan and provides for a thirty-day comment period and fifteen-day reply period, thereon.

This action is authorized under Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, and 303(r), and Section 553(b)(3)(A) of the Administrative Procedures Act.

Ordering Clause

Accordingly, it is ordered that the public is afforded thirty days from September 19, 1995 to change the June 30, 1993–A database, thirty days from September 19, 1995 to comment on the allotment plan procedures; and fifteen days from the comment date to file replies to the comments.

Proposed Rules

Federal Register
Vol. 60, No. 181
Tuesday, September 19, 1995

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

RIN 3150–AD10

Acceptance of Products Purchased for Use in Nuclear Power Plant Structures, Systems, and Components; Withdrawal

AGENCY: Nuclear Regulatory Commission.

ACTION: Advance notice of proposed rulemaking: Withdrawal.

SUMMARY: The Nuclear Regulatory Commission is withdrawing an advance notice of proposed rulemaking (ANPR) concerning the procurement and dedication of commercial grade items. The ANPR sought comment on the need for additional regulatory requirements and for obtaining an improved understanding of alternatives to regulatory requirements. On the basis of its findings, the NRC staff recommended to the Commission that this ANPR be withdrawn. The Commission has approved the withdrawal of this rulemaking.

FOR FURTHER INFORMATION CONTACT: Gregory Cwalina, Office of Nuclear Reactor Regulation, Division of Technical Support, Special Inspection Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone (301) 415–2983.

SUPPLEMENTARY INFORMATION: On March 6, 1989 (54 FR 9229), the NRC staff published in the **Federal Register** an ANPR, on the need for regulatory actions to effect improvements for procurement, receipt inspection and testing, and dedication programs, in response to the findings of 13 inspections performed on licensees from 1986 through 1989. In the ANPR, the NRC staff explained that the NRC was considering the need for additional regulatory requirements and needed to obtain an improved understanding of alternatives to regulatory requirements.

The inspections on commercial grade dedication programs identified major programmatic deficiencies. On February 21, 1990, the NRC staff submitted to the Commission SECY–90–057, "Acceptance of Products Purchased for Use in Nuclear Power Plant Structures, Systems, and Components," to summarize the NRC's analysis of the public comments on the ANPR and its actions regarding the proposed rulemaking. The NRC staff concluded that (1) More regulatory guidance and direction may be necessary to ensure that the basic requirements for procurement and dedication are clearly stated and understood, (2) the NRC may not need to perform the rulemaking if the industry properly implemented the initiatives it had begun, and (3) the NRC staff would monitor the industry's efforts to determine if the progress made warranted deferring the rulemaking.

On March 7, 1990, the NRC staff forwarded to the Commission SECY–90–076, "Inspection and Enforcement Initiatives for Commercial-Grade Procurement and Dedication Programs," in which the NRC staff described its actions to defer programmatic inspections of licensees' procurement and dedication programs for about 1 year while monitoring the industry's developments, improvements, and initiatives in this area.

On August 24, 1990, the NRC staff forwarded to the Commission SECY–90–304, "Nuclear Management and Resources Council (NUMARC) Initiatives on Procurement," in which the NRC staff reported the status of NUMARC's initiatives on general procurement practices. The NRC staff stated it would conduct assessments at selected sites to review the licensees' implementation of improved procurement and commercial grade dedication programs and to assess improvements made in the areas covered by the NUMARC initiatives. The NRC staff began the first of eight planned assessments on February 4, 1991.

On April 9, 1991, the NRC staff issued Generic Letter 91–05, "Licensee Commercial-Grade Procurement and Dedication Programs," in which the NRC staff expressed NRC positions regarding certain aspects of licensee procurement and dedication programs and discussed a number of deficiencies in licensees' commercial grade dedication programs noted during previous team inspections.

On September 16, 1991, the NRC staff forwarded to the Commission SECY–91–291, "Status of NRC's Procurement Assessments and Resumption of Programmatic Inspection Activity," in which the NRC staff reported on the findings of its assessments from February 1991 through July 1991. The NRC staff concluded that although improvements had been made in licensees' procurement and dedication programs, weaknesses in implementation still existed. The NRC staff began developing an inspection procedure (IP) and conducted five pilot inspections between December 1991 and June 1992. The NRC staff continued to identify weaknesses in the implementation of licensees' dedication programs. Because of the findings of these inspections, the NRC staff held numerous meetings with NUMARC, industry, and licensees from November 1992 to March 1993. After the pilot inspections were completed, the IP was revised and in March 1993, the NRC staff submitted the draft IP for public comment.

Weaknesses identified during the procurement assessments and pilot inspections were related to implementation of the programs (i.e., dedication of specific items), and not to the programs themselves. Adoption of the industry guidance has, for the most part, resulted in licensees having acceptable programs for the dedication of commercial grade items. These programs also adequately assure that counterfeit, substandard or fraudulently marketed materials will not be accepted for use. The NRC staff's assessment and inspection activities did not identify any instances of counterfeit or fraudulent material being accepted for use by any of the plants examined.

In April 1993, the NRC staff held a public workshop, at which the draft IP and various dedication issues were discussed. The public comment period closed in May 1993. The comment analysis and the revisions to the IP and dedication guidance were finished in June 1993. On November 8, 1993, the NRC staff issued the IP. Recent experience with the new IP demonstrated that the current inspection approach provides an effective means for assuring that licensee procurement and dedication activities will prevent the acceptance of counterfeit and fraudulent materials.

Based on the findings of the original inspections, assessments, and pilot inspections, the NRC staff believes that problems identified with respect to the quality of items dedicated for use in safety-related applications are adequately addressed by the requirements of Appendix B of Part 50 and are problems of compliance, rather than of inadequate rules. The NRC staff and industry worked closely together to improve industry efforts in procurement and commercial grade dedication. Therefore, there appears to be no need for new regulations addressed to the quality of items dedicated for use in safety-related applications.

Part of the NRC staff's reason for originally proposing rulemaking was to reduce the likelihood of counterfeit or fraudulently marketed products from being accepted for use. The NRC staff has issued numerous information notices regarding specific cases of fraudulent parts being found in nuclear facilities and guidance on how to detect them. The NRC staff has also issued two generic letters presenting information regarding procurement program improvements to help prevent the acceptance and use of counterfeit or fraudulently marketed products. This issue is also addressed as part of the NUMARC Comprehensive Procurement Initiative.

Finally, the Commission issued a rule change to 10 CFR Part 50 (§ 50.5, Deliberate misconduct) that gives the NRC staff an additional regulatory tool to pursue cases in which a licensee contractor or subcontractor has deliberately provided material, goods, or services that causes or may cause the licensee to be in violation of a rule. A supplier providing counterfeit and/or substandard materials to be used in safety-related applications is subject to that rule. Therefore, additional rulemaking to specifically address fraudulent parts appears unnecessary.

For these reasons, the Commission has concluded that the nuclear industry has made significant progress toward improving its procurement and commercial grade dedication programs and believes that problems identified with respect to the quality of items dedicated for use in safety-related applications are adequately addressed by the requirements of 10 CFR Part 50, Appendix B. Therefore, there appears to be no need for new regulations addressed to the quality of items dedicated for use in safety-related applications. Accordingly, the Commission is withdrawing the ANPR.

Dated at Rockville, Maryland, this 8th day of September, 1995.

For the Nuclear Regulatory Commission.

James M. Taylor,

Executive Director for Operations.

BILLING CODE 7590-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95–SW–19–AD]

Airworthiness Directives; Flight Trails Helicopters, Inc., Hardpoint Assemblies Installed on McDonnell Douglas Helicopter Systems Model 369D, 369E, 369F, 369FF, and 500N Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to Flight Trails Helicopters, Inc. hardpoint assemblies, installed in accordance with Supplemental Type Certificate (STC) No. SH6080NM, or in accordance with Federal Aviation Administration (FAA) Form 337, "Major Repair and Alteration," approved on McDonnell Douglas Helicopter Systems (MDHS) Model 369D, 369E, 369F, 369FF, and 500N helicopters. This proposal would require removing any Flight Trails Helicopters, Inc. hardpoint assembly not identified by part number (P/N) and serial number (S/N). This proposal is prompted by two incidents in which the hardpoint assembly used to support a search light or night vision system reportedly failed. The actions specified by the proposed AD are intended to prevent failure of the hardpoint assembly, separation of the hardpoint assembly from the helicopter, and subsequent contact between the hardpoint assembly and the fuselage or rotor system of the helicopter.

DATES: Comments must be received by November 20, 1995.

ADDRESSES: Submit comments in triplicate to the FAA, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–SW–19–AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. James Wang, Aerospace Engineer, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Blvd., Lakewood, California 90712, telephone (310) 627–5232, fax (310) 627–5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 95–SW–19–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–SW–19–AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

Discussion

This document proposes the adoption of a new AD that is applicable to Flight Trails Helicopters, Inc. hardpoint assemblies installed in accordance with STC No. SH6080NM, or in accordance with FAA Form 337, "Major Repair and Alteration," approved on MDHS Model 369D, 369E, 369F, 369FF, and 500N helicopters. Two incidents have occurred in which the hardpoint assembly reportedly failed at its installation weld. The hardpoint assembly is used to attach equipment such as a search light or night vision

system to the helicopter's fuselage. In the first incident, a failure occurred in the hardpoint installation weld area due to a fatigue crack. The discovery of a crack in the hardpoint assembly installation weld on a second helicopter occurred during a visual ground check. This condition, if not corrected, could result in failure of the hardpoint assembly, separation of the hardpoint assembly from the helicopter, and subsequent contact between the hardpoint assembly and the fuselage or rotor system of the helicopter.

Since an unsafe condition has been identified that is likely to exist or develop on other Flight Trails Helicopters, Inc. hardpoint assemblies installed on MDHS Model 369D, 369E, 369F, 369FF, and 500N helicopters of the same type design, the proposed AD would require, before further flight, removing the hardpoint assembly that secures a searchlight or night vision system to the helicopter.

The FAA estimates that 59 helicopters of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per helicopter to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $3,540.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive to read as follows:

Flight Trails Helicopters, Inc.: Docket No. 95–SW–19–AD.

Applicability: McDonnell Douglas Helicopters Systems (MDHS) Model 369D, 369E, 369F, 369FF, and 500N helicopters, that have been modified in accordance with Supplemental Type Certificate (STC) No. SH6080NM, or in accordance with a Federal Aviation Administration (FAA) Form 337, "Major Repair and Alteration," using Flight Trails Helicopters, Inc. hardpoint assemblies, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (b) to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition, or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any helicopter from the applicability of this AD.

Note 2: Information concerning the hardpoint assemblies may be obtained from Flight Trails Helicopters, Inc., ATTN: Mr. Larry Anderson, 4805 Falcon Drive, Mesa, Arizona, 85205, telephone (602) 396–8242.

Compliance: Required as indicated, unless accomplished previously. To prevent failure of the hardpoint assembly, separation of the hardpoint assembly from the helicopter, and subsequent contact between the hardpoint assembly and the fuselage or rotor system of the helicopter, accomplish the following:

(a) Before further flight, remove from the helicopter any Flight Trails Helicopters, Inc. hardpoint assembly not marked with a part number (P/N) and serial number (S/N) by removing the NAS 1351–3 cap screw that secures the hardpoint assembly to the jacking fitting, P/N 369H2521, and slipping the hardpoint assembly out of the step mount.

The only Flight Trails Helicopters, Inc. hardpoint assemblies that are considered airworthy and eligible for installation are those hardpoint assemblies marked with a serial number and either P/N FTH 105 LH Mod 1, for a hardpoint assembly mounted on the left side of the helicopter, or P/N FTH 105 RH Mod 1, for a hardpoint assembly mounted on the right side.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Los Angeles Aircraft Certification Office.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles Aircraft Certification Office.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the helicopter to a location where the requirements of this AD can be accomplished.

Issued in Fort Worth, Texas, on September 11, 1995.

Eric Bries,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

[FR Doc. 95–23123 Filed 9–18–95; 8:45 am]

BILLING CODE 4910-13-P

---

14 CFR Part 39

[Docket No. 95–CE–44–AD]

Airworthiness Directives; Jetstream Aircraft Limited HP137 Mk1, Jetstream Series 200, and Jetstream Models 3101 and 3201 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would apply to Jetstream Aircraft Limited (JAL) HP137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes. The proposed AD would require repetitively inspecting the main landing gear (MLG) pintle to cylinder interface for cracks, and replacing any cylinder that has a crack exceeding certain limits. Reports of MLG cracks in the area of the pintle to cylinder interface on three of the affected airplanes prompted the proposed action. The actions specified by the proposed AD are intended to prevent failure of the MLG caused by cracks in the pintle to cylinder interface area, which, if not detected and

corrected, could result in loss of control of the airplane during landing operations.

DATES: Comments must be received on or before November 17, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–44–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from Jetstream Aircraft Limited, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland, telephone (44–292) 79888; facsimile (44–292) 79703; or Jetstream Aircraft Inc., Librarian, P.O. Box 16029, Dulles International Airport, Washington, DC 20041–6029; telephone (703) 406–1161; facsimile (703) 406–1469. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. Raymond A. Stoer, Program Officer, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B–1000 Brussels, Belgium; telephone (322) 513.3830; facsimile (322) 230.6899; or Mr. Sam Lovell, Project Officer, Small Airplane Directorate, Airplane Certification Service, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64105; telephone (816) 426–6932; facsimile (816) 426–2169.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 95–CE–44–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–44–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on JAL HP137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes. The CAA reports that the main landing gear (MLG) has cracked in the area of the pintle to cylinder interface on three of the affected airplanes. This condition, if not detected and corrected, could result in failure of the MLG and possible loss of control of the airplane.

Jetstream has issued Alert Service Bulletin (ASB) 32–A–JA 941245, Revision 2, dated March 28, 1995, which specifies procedures for preparing the affected airplanes for a non-destructive testing (NDT) eddy current inspection of the MLG pintle to cylinder interface. The procedures for the NDT eddy current inspection are included in AP Precision Hydraulics Ltd. Service Bulletin (SB) 32–56, Revision 3, dated February 1995.

The CAA classified these service bulletins as mandatory in order to assure the continued airworthiness of these airplanes in the United Kingdom. The CAA classifying a service bulletin as mandatory is considered equivalent in the United Kingdom to the FAA issuing an AD in the United States.

The airplane models are manufactured in the United Kingdom and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information including the above-referenced service information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop in other JAL HP137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes of the same type design, the proposed AD would require repetitively inspecting (using NDT eddy current methods) the MLG pintle to cylinder interface for cracks, and replacing any cylinder that has a crack exceeding certain limits. Accomplishment of the proposed inspections would be in accordance with Jetstream ASB 32–A–JA 941245, Revision 2, dated March 28, 1995, and AP Precision Hydraulics Ltd. SB 32–56, Revision 3, dated February 1995.

The FAA estimates that 250 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 6 workhours per airplane to accomplish the proposed action, and that the average labor rate is approximately $60 an hour. Based on these figures, the total cost impact of the proposed inspection on U.S. operators is estimated to be $90,000. This figure does not take into account the cost of repetitive inspections or the cost of replacement cylinders if cracks are found that exceed certain limits. The FAA has no way of determining the number of repetitive inspections each operator would incur or the number of cylinders that may be found cracked during the inspections proposed by this action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules

Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

Jetstream Aircraft Limited: Docket No. 95–CE–44–AD.

Applicability: HP 137 Mk1, Jetstream Series 200, and Jetstream Models 3101 and 3201 airplanes (all serial numbers), certificated in any category, that are equipped with one of the following main landing gear (MLG) part numbers:

1863, 1863/4A, 1863/4B, 1863/4C, 1864,
1864/4A, 1864/4B, 1864/4C,
BOOA702850A, BOOA702851A,
BOOA702925A, BO1A702925A,
BOOA703065A, BO1A703065A,
BOOA703030A, BOOA702926A,
BO1A702926A, BOOA703066A,
BO1A703066A, BOOA703031A,

Note 1: This AD applies to each airplane identified in the preceding applicability revision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required initially upon the accumulation of 8,500 landings on an affected MLG or within the next 100 landings after the effective date of this AD, whichever occurs later, unless already accomplished, and thereafter as indicated.

Note 2: If the number of MLG landings is unknown, hours time-in-service (TIS) may be used by multiplying the number of hours TIS times 0.75. If hours TIS are utilized to come up with the number of landings, this would make the AD effective "initially upon the accumulation of 11,333 hours TIS or within the next 133 hours TIS after the effective date of this AD, whichever occurs later."

To prevent failure of the MLG caused by cracks in the pintle to cylinder interface area, which, if not detected and corrected, could result in loss of control of the airplane during landing operations, accomplish the following:

(a) Using non-destructive testing (NDT) eddy current methods, inspect the MLG pintle to cylinder interface for cracks in accordance with the following:

(1) Jetstream Alert Service Bulletin 32–A–JA 941245, Revision 2, dated March 28, 1995; and

(2) AP Precision Hydraulics Ltd. Service Bulletin 32–56, Revision 3, dated February 1995.

(b) Based on the inspection results, accomplish the following, as applicable:

(1) If any crack is found that is .05 inch or more in length, prior to further flight, replace the cylinder with a new part, and reinspect at intervals not to exceed 4,000 landings provided the MLG pintle to cylinder interface is crack-free.

(2) If any crack is found that is less than .05 inch, reinspect at intervals not to exceed 40 landings provided the crack remains less than .05 inch or replace the cylinder with a new part and reinspect at intervals not to exceed 4,000 landings provided the MLG pintle to cylinder interface is crack-free.

(3) If no cracks are found, reinspect at intervals not to exceed 4,000 landings provided the MLG pintle to cylinder interface is crack-free.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the initial and repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Office (ACO), Europe, Africa, Middle East office, FAA, c/o American Embassy, B–1000 Brussels, Belgium. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Brussels ACO.

(e) All persons affected by this directive may obtain copies of the documents referred to herein upon request to Jetstream Aircraft Limited, Manager Product Support, Prestwick Airport, Ayrshire, KA9 2RW Scotland; or Jetstream Aircraft Inc., Librarian, P.O. Box 16029, Dulles International Airport, Washington, DC, 20041–6029; or may examine these documents at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on September 13, 1995.

Gerald W. Pierce,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 95–CE–40–AD]

Airworthiness Directives; Fairchild Aircraft SA226 and SA227 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would apply to certain Fairchild Aircraft SA226 and SA227 series airplanes. The proposed action would require drilling inspection access holes in the elevator torque tube arm, inspecting the elevator torque tube for corrosion, replacing any corroded elevator torque tube, and applying a corrosion preventive compound. Several reports of corrosion found in the elevator torque tube area on the affected airplanes prompted the proposed action. The actions specified by the proposed AD are intended to prevent failure of the flight control system caused by a corroded elevator torque tube, which, if not detected and corrected, could result in loss of control of the airplane.

DATES: Comments must be received on or before November 17, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–40–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from Fairchild Aircraft, P.O. Box 790490, San Antonio, Texas 78279–0490; telephone (210) 824–9421. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. Hung Viet Nguygen, Aerospace Engineer, FAA, Airplane Certification Office, 2601 Meacham Boulevard, Fort Worth,.Texas 76193–0150; telephone (817) 222–5155; facsimile (817) 222–5960.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 95–CE–40–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–40–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The FAA has received reports of internal corrosion found in the elevator torque tube on over 20 Fairchild Aircraft SA226 and SA227 series airplanes. This condition, if not detected and corrected, could result in failure of the airplane flight control system and subsequent loss of control of the airplane.

Fairchild Aircraft Service Bulletin (SB) 226–27–050 and SB 227–27–028, both issued: January 22, 1990, specify procedures for the following:

- Drilling inspection access holes in the elevator torque tube arm;
- Inspecting the elevator torque tube for corrosion; and
- Applying a corrosion preventive compound.

After examining the circumstances and reviewing all available information related to the incidents described above, including the referenced service information, the FAA has determined that AD action should be taken to prevent failure of the flight control system caused by a corroded elevator torque tube, which, if not detected and corrected, could result in loss of control of the airplane.

Since an unsafe condition has been identified that is likely to exist or develop in other Fairchild Aircraft SA226 and SA227 series airplanes of the same type design, the proposed AD would require drilling inspection access holes in the elevator torque tube arm, inspecting the elevator torque tube for corrosion, replacing any corroded elevator torque tube, and applying a corrosion preventive compound. Accomplishment of the proposed inspection access hole drilling, the inspection, and the corrosion preventive compound application would be in accordance with either Fairchild SB 226–27–050 or SB 227–27–028, both issued: January 22, 1990.

The compliance time for the proposed AD is presented in calendar time instead of hours time-in-service (TIS). The FAA has determined that a calendar time for compliance would be the most desirable method because the unsafe condition described by the proposed AD is caused by corrosion. Corrosion can occur on airplanes regardless of whether the airplane is in service or on the ground.

The FAA estimates that 390 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 10 workhours to accomplish the proposed actions, and that the average labor rate is approximately $60 an hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $234,000. This figure is based on the assumption that no owner/operator of the affected airplanes has accomplished the proposed inspection access hole drilling, inspection, or corrosion preventive compound application. It also is based on the assumption that no elevator torque tube would be found corroded and need replaced. The FAA has no way of determining how many owners/operators of the affected airplanes may have already complied with the proposed AD.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

Fairchild Aircraft: Docket No. 95–CE–40–AD.

Applicability: The following airplane models and serial numbers, certificated in any category:

Model	Serial Nos.
SA226–T	T201 through T275 and T277 through T291.
SA226–T(B)	T(B)276 and T(B)292 through T(B)417.
SA226–AT	AT001 through AT074.
SA226–TC	TC201 through TC419.
SA227–TT	TT421 through TT541.
SA227–AT	AT423 through AT695.
SA227–AC	AC406, AC415, AC416, and AC420 through AC772.

Note 1: This AD applies to each airplane identified in the preceding applicability revision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required within the next 6 calendar months after the effective date of this AD, unless already accomplished.

To prevent failure of the flight control system caused by a corroded elevator torque tube, which, if not detected and corrected, could result in loss of control of the airplane, accomplish the following:

(a) Drill two .5 inch diameter holes in the inboard side of the elevator torque tube arm in accordance with the ACCOMPLISHMENT INSTRUCTIONS section of and as specified in Figure 1 of Fairchild Aircraft Service Bulletin (SB) 226–27–050 or SB 227–27–028, both Issued: January 22, 1990, as applicable.

(b) Inspect the elevator torque tube in accordance with the ACCOMPLISHMENT INSTRUCTIONS section of Fairchild Aircraft SB 226–27–050 or SB 227–27–028, both Issued: January 22, 1990, as applicable. Prior to prior further flight, replace any corroded elevator torque tube with a new part of like design in accordance with the applicable maintenance manual.

(c) Apply a corrosion preventive compound in accordance with the ACCOMPLISHMENT INSTRUCTIONS section of Fairchild Aircraft SB 226–27–050 or SB 227–27–028, both Issued: January 22, 1990, as applicable.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Airplane Certification Office (ACO), FAA, 2601 Meacham Boulevard, Fort Worth, Texas 76193–0150. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Fort Worth ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Fort Worth ACO.

(f) All persons affected by this directive may obtain copies of the service bulletins referred to herein upon request to Fairchild Aircraft, P.O. Box 790490, San Antonio, Texas 78279–0490; or may examine these service bulletins at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on September 13, 1995.

Gerald W. Pierce,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 95–CE–35–AD]

Airworthiness Directives; The New Piper Aircraft, Inc. (Formerly Piper Aircraft Corporation) Models PA23, PA23–150, PA23–160, PA23–235, and PA23–250 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to supersede Airworthiness Directive (AD) 92–13–04, which currently requires preflight draining procedures on The New Piper Aircraft, Inc. (Piper) Models PA23–150 and PA23–160 airplanes. This proposed action would require installing external fuel ramp assemblies on Piper Models PA23, PA23–150, PA23–160, PA23–235, and PA23–250 airplanes, and incorporating pilots' operating handbook (POH) revisions for Piper Models PA23, PA23–150, and PA23–160 airplanes. Reports of water-in-the-fuel on the affected airplanes, regardless of whether the airplane owners/operators have accomplished preflight draining procedures, prompted the proposed action. The actions specified by the proposed AD are intended to prevent rough engine operation or complete loss of engine power caused by water-in-the-fuel.

DATES: Comments must be received on or before December 26, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–35–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FFC Engineering Specification 2810–002, Revision A, dated March 21, 1995, may be obtained from Floats & Fuel Cells, 4010 Pilot Drive, suite 3, Memphis, Tennessee 38118. Piper Service Bulletin (SB) No. 827A, dated November 4, 1988, may be obtained from The New Piper Aircraft, Inc., Customer Services, 2926 Piper Drive, Vero Beach, Florida 32960. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Ms. Juanita Craft-Lloyd, Aerospace Engineer, FAA, Atlanta Aircraft Certification Office, Campus Building, 1701 Columbia Avenue, suite 2–160, College Park, Georgia 30337–2748; telephone (404) 305–7373; facsimile (404) 305–7348.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 95–CE–35–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–35–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

Sixteen accidents since 1975 involving Piper PA23 series airplanes where water-in-the-fuel was believed to cause engine stoppage prompted the FAA to issue AD 90–23–18, Amendment 39–6782 (55 FR 46787; November 7, 1990), and AD 92–13–04, Amendment 39–8274 (57 FR 24938;

June 12, 1992). AD 92–13–04 superseded AD 90–23–18 and currently requires preflight draining procedures on Piper Models PA23–150 and PA23–160 airplanes, and was issued to prevent rough engine operation or complete loss of engine power because of water contamination in the fuel. AD 92–13–04 exempts from its requirements airplanes with a dual fuel drain kit, part number (P/N) 765–363, installed in accordance with Piper Service Bulletin (SB) 827A, dated November 4, 1988. AD 90–23–18 required the installation of dual fuel drain kits and the installation of internal wedges in the fuel tanks before its effectiveness was suspended and eventually superseded by AD 92–13–04.

Even with the issuance of, and the owners/operators' compliance with, AD 92–13–04, the FAA continues to receive reports of fuel-related problems where the cause is believed to be water-in-the-fuel. Some of these reports specify incidents involving Piper Models PA23–235 and PA23–250 airplanes. AD 92–13–04 did not apply to these airplane models because the FAA believed that the baffled fuel tanks included with these airplane models would channel the water towards the drain instead of the low spot.

Floats and Fuel Cells (FFC) has issued Engineering Specification 2810–002, Revision A, dated March 21, 1995, which specifies procedures for installing external fuel ramps on Piper PA23 series airplanes.

After examining all information related to the incidents and service reports described above including the referenced service information, the FAA has determined that:

- The preflight draining procedures required by AD 92–13–04 are not adequate in eliminating water from the fuel on the applicable Piper Models PA23–150 and PA23–160 airplanes, and external fuel ramps should be installed on these airplanes;
- External fuel ramps should be installed on certain Piper Models PA23, PA23–235, and PA23–250 airplanes in order to eliminate water in the fuel;
- External fuel ramps should be installed on any affected airplane with a dual fuel drain kit, part number (P/N) 765–363, installed in accordance with Piper SB 827A, dated November 4, 1988;
- Any affected airplane with Piper Fuel Tank Wedge Kit, part number 599–367, incorporated in accordance with Piper SB 932A, dated August 30, 1990, should not have external fuel ramps installed until the fuel tank is replaced; and
- AD action should be taken to require the installation of these external fuel ramps in accordance with the instructions in FFC Engineering Specification 2810–002, Revision A, dated March 21, 1995.

Since an unsafe condition has been identified that is likely to exist or develop in other Piper Models PA23, PA23–150, PA23–160, PA23–235, and PA23–250 airplanes of the same type design, the proposed AD would supersede AD 92–13–04, Amendment 39–8274, with a new AD that would:

- Retain the preflight draining procedures required by AD 92–13–04 to require incorporating pilots' operating handbook (POH) revisions for Piper Models PA23, PA23–150, and PA23–160 airplanes that are not equipped with a dual fuel drain kit, part number (P/N) 765–363 (unless already accomplished). The POH revisions are included in Piper SB No. 827A, dated November 4, 1988;
- Require installing external fuel ramp assemblies on all the affected airplanes in accordance with FFC Engineering Specification 2810–002, Revision A, dated March 21, 1995; and
- Delay the compliance time for airplanes with Piper Fuel Tank Wedge Kit, part number 599–367, incorporated in accordance with Piper SB 932A, dated August 30, 1990, until a new fuel tank is installed.

The FAA estimates that 6,973 airplanes in the U.S. registry would be affected by the proposed installation, that it would take approximately 6 workhours per airplane to accomplish the proposed action, and that the average labor rate is approximately $60 an hour. Parts cost approximately $280 per airplane ($140 per tank X 2 tanks per airplane). Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $4,462,720. This figure is based on the assumption that no affected airplane owner/operator has installed external fuel ramps. No fuel ramps have been distributed to the owners/operators of the affected airplanes.

In addition, incorporating the POH revisions as proposed would be required for approximately 2,046 airplanes in the U.S. registry. Since an owner/operator who holds a private pilot's certificate as authorized by sections 43.7 and 43.11 of the Federal Aviation Regulations (14 CFR 43.7 and 43.11) can accomplish this proposed action, the only cost impact upon the public is the time it takes to incorporate these POH revisions.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Airworthiness Directive (AD) 92–13–04, Amendment 39–8274 (57 FR 24938; June 12, 1992), and by adding a new AD to read as follows:

The New Piper Aircraft, Inc.: Docket No. 95–CE–35–AD; Supersedes AD 92–13–04, Amendment 39–8274.

Applicability: The following model and serial number airplanes, certificated in any category:

Models	Serial No.
PA23, PA23–150, and PA23–160.	23–1 through 23–2046.
PA23–235.	27–505 through 27–622.
PA23–250.	27–1 through 27–7405476 and 26–7554001 through 27–8154030.

Note 1: This AD applies to each airplane identified in the preceding applicability revision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required with whichever of the following is applicable:

- For airplanes that do not have Piper Fuel Tank Wedge Kit, part number 599–367, incorporated in accordance with Piper Service Bulletin (SB) 932A, dated August 30, 1990: Within the next 100 hours time-in-service after the effective date of this AD, unless already accomplished; or
- For airplanes that do have Piper Fuel Tank Wedge Kit, part number 599–367, incorporated in accordance with Piper SB 932A, dated August 30, 1990: Upon installation of a new fuel tank, unless already accomplished.

To prevent water in the fuel tanks, which could result in rough engine operation or complete loss of engine power, accomplish the following:

(a) For all of the affected model and serial number airplanes, install external fuel ramps in accordance with the ACCOMPLISHMENT INSTRUCTIONS section of Floats and Fuel Cells (FFC) Engineering Specification 2810–002, Revision A, dated March 21, 1995.

(b) For all of the affected Models PA23, PA23–150, and PA23–160 airplanes that do not have a dual fuel drain kit, part number (P/N) 765–363, installed in accordance with Piper SB 827A, dated November 4, 1988, incorporate, into the Owners Handbook and Pilots' Operating Handbook, paragraphs 1 through 5 of the *Aircraft Systems Operating Instructions* that are contained in Part I of Piper SB 827A, unless already accomplished (compliance with superseded AD 92–13–04).

Note 2: Paragraphs 6 and 7 of the Handling and Servicing instructions that are contained in Part I of Piper SB No. 827A, dated November 4, 1988, are covered by AD 88–21–07 R1.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Atlanta Aircraft Certification Office (ACO), Campus Building, 1701 Columbia Avenue, suite 2–160, College Park, Georgia 30337–2748. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Atlanta ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Aircraft Certification Office.

(e) All persons affected by this directive may obtain copies of the Engineering Specification 2810–002, Revision A, dated March 21, 1995, upon request to Floats & Fuel Cells, 4010 Pilot Drive, suite 3, Memphis, Tennessee 38118. Piper SB No. 827A, dated November 4, 1988, may be obtained upon request from the Piper Aircraft Corporation, Customer Services, 2926 Piper Drive, Vero Beach, Florida 32960. These documents may be examined at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

(f) This amendment supersedes AD 92–13–04, Amendment 39–8274.

Issued in Kansas City, Missouri, on September 13, 1995.

Gerald W. Pierce,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[AD–FRL–5298–1]

Clean Air Act Proposed Disapproval of Operating Permits Program; Commonwealth of Virginia

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed disapproval.

SUMMARY: EPA is proposing to disapprove the Commonwealth of Virginia's Operating Permits Program, which Virginia submitted in response to Federal requirements that States adopt programs providing for the issuance of operating permits to all major stationary sources and to certain other sources. EPA is proposing disapproval of Virginia's submittal because Virginia's program does not afford all persons who are entitled to seek judicial review of operating permits with the legal standing to obtain such review, does not assure that all sources required by the Clean Air Act (CAA) to obtain Title V permits will be required to obtain such permits, and does not contain an adequate provision for collection of Title V program fees.

DATES: Comments on this proposed action must be received in writing by October 19, 1995.

ADDRESSES: Comments should be submitted to Ray Chalmers, USEPA Region III; Air, Radiation, & Toxics Division; 841 Chestnut Building; Philadelphia, PA 19107.

Copies of the State's submittal and other supporting information used in developing the proposed disapproval are available for inspection during normal business hours at the following location: U.S. EPA Region III; Air, Radiation, & Toxics Division; 841 Chestnut Building; Philadelphia, PA 19107.

SUPPLEMENTARY INFORMATION:

I. Introduction

Title V of the CAA, 42 U.S.C. §§ 7661–7611f, requires that States develop programs for issuing operating permits to all major stationary sources and to certain other sources, that they submit those programs to EPA by November 15, 1993, and that EPA approve or disapprove each program within 1 year after receiving the submittal. The EPA's program review occurs pursuant to section 502 of the CAA and regulations promulgated at 40 Code of Federal Regulations (CFR) Part 70. The regulations promulgated at 40 CFR Part 70 define the minimum elements of an approvable State operating permits program and the corresponding standards and procedures by which the EPA will approve or disapprove and oversee implementation of State operating permits programs (see 57 FR 32250 (July 21, 1992)). Where a program substantially, but not fully, meets the requirements of section 502 of the CAA or of Part 70, EPA may grant the program interim approval for a period of up to 2 years. If EPA has not fully approved a program by 2 years after the November 15, 1993 date, or by the end of an interim program, it must establish and implement a Federal program.

Due in part to pending litigation over several aspects of the Part 70 rule promulgated on July 21, 1992, Part 70 is in the process of being revised. When the final revisions to Part 70 are promulgated, the requirements of the revised Part 70 will define EPA's criteria for the minimum elements of an approvable State operating permits program and the corresponding standards and procedures by which EPA will review State operating permits program submittals. Until the date on which the revisions to Part 70 are promulgated, the currently effective July 21, 1992 version of Part 70 shall be used as the basis for EPA review.

Virginia submitted a Title V program to EPA on November 12, 1993. The submittal included regulations, an Attorney General's opinion, a program description, permitting program documentation, and other required elements. On January 14, 1994, Virginia submitted a supplemental letter pertaining to enhanced monitoring. In a **Federal Register** notice published December 5, 1994 (59 Fed. Reg. 62324), EPA disapproved this program.[1] On January 9, 1995, Virginia submitted revised regulations and a revised Attorney General's opinion as amendments to its original program, and asked that EPA approve the revised program. On January 17, 1995, Virginia submitted an additional copy of the revised regulations (the version published in the Virginia Register). On April 18, 1995, EPA found Virginia's January 9, 1995 submittal to be administratively complete, pursuant to 40 CFR 70.4(e)(1). Finally, on May 17, 1995, Virginia again amended its program by submitting revised statutory language and an amended Attorney General's opinion.

The analysis contained in this document focuses on the major corrections required in Virginia's operating permit program submittals to enable Virginia's program to meet the minimum requirements of 40 CFR Part 70 and the CAA. The full program submittal, the Technical Support Document (TSD), providing additional analysis of Virginia's submittal, and other relevant materials providing more detailed information are available as part of the public docket.

II. Analysis of State Submittal

A. Statutes, Regulations and Program Implementation

Virginia's operating program submittal does not substantially meet the requirements of the CAA and of the implementing regulations at 40 CFR Part 70 because it: (1) Does not adequately afford persons the opportunity to seek judicial review of final permit decisions; (2) does not assure that all sources required by the CAA to obtain Title V permits will be required to obtain such permits; and (3) does not contain an adequate provision for collection of Title V program fees. These issues are discussed below, and in the TSD. In addition, this notice and the TSD specify other deficiencies which must be corrected before EPA can grant full approval to Virginia's operating permits program.

1. Standing for Judicial Review

EPA is proposing to disapprove Virginia's Title V program because it does not adequately provide interested parties with adequate standing to obtain judicial review of final Title V permit decisions. As described in the December 5, 1994 final disapproval notice, EPA interprets section 502(b)(6) of the CAA and 40 CFR 70.4(b)(3)(x) as requiring that approvable Title V permit programs provide any party who participated in the public comment process on a permit action and who meets the threshold standing requirements of Article III of the U.S. Constitution with the opportunity to obtain judicial review of an operating permit in State court. (See 59 FR 62325). The Commonwealth's January 9, 1995, submittal did not correct the previously identified deficiency in Virginia's standing provisions. In particular, Virginia did not amend the standing provisions of Section 10.1–1318(B) of the Code of Virginia. Those provisions continue to extend the right to seek judicial review only to persons who have suffered an "actual, threatened, or imminent injury * * *" where "such injury is an invasion of an immediate, legally protected, pecuniary and substantial interest which is concrete and particularized * * *" Virginia's statute does not enable a party who meets the minimum threshold standing requirements of Article III of the U.S. Constitution to obtain access to Virginia's court system and therefore it fails to meet the minimum requirements for providing an opportunity for judicial review as required by section 502(b)(6) of the CAA and 40 CFR 70.4(b)(3)(x).

The Commonwealth's Attorney General has questioned the validity of EPA's interpretation of section 502(b)(6) of the CAA and, if that interpretation is valid, of the constitutionality of the CAA. EPA believes that its interpretation of section 502(b)(6) of the CAA is reasonable and is supported by the language of the CAA, its legislative history, and the goals Congress sought to achieve under Title V of the CAA. In addition, EPA believes that Title V of CAA and its related sanctions provisions do not violate the U.S. Constitution. (See 59 FR 62325–62327).

EPA must disapprove Virginia's program and cannot merely grant it interim approval on this issue because this deficiency is so significant that it prevents the entire program from substantially meeting the requirements of 40 CFR Part 70. If Virginia is permitted to narrowly preclude public commenters from exercising judicial review rights, one of the chief incentives for permit decision makers to fully consider public comments would be significantly reduced and the public comments process would thereby be rendered less meaningful. The guiding principle that EPA considers in all evaluations of approvability of interim programs is whether the proposed program can ensure the issuance of good permits. Only after a permit program is found to substantially meet the requirements of Part 70 can the criteria in 40 CFR § 70.4(d)(3) be applied to determine if the program is eligible for interim approval.

EPA cannot approve Virginia's operating permit program until Virginia amends *Va. Code* § 10.1–1318(B) to correct this deficiency.

2. Applicability Under the Operating Permits Program

EPA is also proposing to disapprove Virginia's submittal because it does not ensure the applicability of the Title V operating permit program to all sources subject to the program under 40 CFR 70.3. Virginia's regulations provide that the operating permit program applies to sources subject to certain listed air pollution control requirements. (See § 120–08–0501 and § 120–08–0601.) In these applicability sections the Commonwealth should have listed all the CAA requirements which trigger Title V applicability, as they are set forth at 40 CFR 70.3. Instead, Virginia lists, in several cases, its own air pollution control regulations, in which Virginia incorporates federal CAA § 111 and § 112 requirements. Virginia states in Rule 8–5, § 120–08–0501, and in Rule 8–6, § 120–08–0601, that sources are subject to its operating permits rule if they are subject to Virginia's regulatory provisions of Parts IV, V and VI as adopted pursuant to sections 111 and 112 of the CAA. To meet the requirements of 40 CFR 70.3, Virginia must revise § 120–08–0501 and § 120–08–0601 to state that sources are subject to the operating permits rule if they are subject to a standard, limitation or other requirement under sections 111 or 112 of the CAA.

EPA cannot approve Virginia's operating permit program until Virginia corrects the deficiencies discussed above.

3. Permit Fee Demonstration

EPA is also proposing to disapprove Virginia's submittal because it does not contain an adequate permit fee demonstration. Virginia's Rule 8–6, entitled "Permit Program Fees for Stationary Sources," includes a formula to be used for calculating permit fees. Under this formula a base year fee

amount is to be increased each year by the amount of inflation as measured by the consumer price index for all urban consumers. This part of the formula meets the permit fee requirements of 40 CFR § 70.9.

However, in the formula Virginia defines the base year amount not as $25, which is the minimum required for EPA to presume a State fee to be adequate, as specified under 40 CFR § 70.9, but rather as "the base year amount specified in § 10.1–1322(B) of the Virginia Air Pollution Control Law, expressed in dollars per ton." Section 10.1–1322(B) does not define a certain base year fee, but states only that "The annual permit program fees shall not exceed a base year amount of twenty-five dollars per ton using 1990 as the base year, and shall be adjusted annually by the Consumer Price Index as described in § 502 of the federal Clean Air Act." For Virginia's program to be approvable, the fee assessment formula in Virginia Rule 8–6 must be revised to specify a base year fee amount of $25 per ton, with a base year of 1989 adjusted for inflation, as provided for under 40 CFR § 70.9. Also, § 10.1–1322(B) should be changed to specify a base year of 1989.

Virginia Rule 8–6 also includes a provision, in §§ 120–08–0604.D. and E., which allows Virginia to assess a fee of less than $25 per ton (1989 dollars) adjusted for inflation, if Virginia determines that it would collect more money than required to fund its Title V program if it assessed the full $25 per ton fee (1989 dollars), adjusted for inflation. If Virginia chooses in the future to collect a fee of less than $25 (1989 dollars), adjusted for inflation, its fee assessment would no longer meet the requirement for presumed adequacy under 40 CFR §70.9. Accordingly, Virginia would trigger the requirements under 40 CFR § 70.9(b)(5) that it provide EPA with a detailed accounting that its fee schedule meets the requirements of 40 CFR § 70.9(b)(1).

Before the Commonwealth assesses a fee lower than the presumptive minimum of § 25 per ton (1989 dollars), adjusted for inflation, it must obtain EPA approval of such a fee. EPA would approve such a fee if Virginia submitted a detailed accounting showing that the fee would result in the collection of sufficient funds to run a fully adequate Title V program. This requirement for EPA approval of any fee lower than the presumptive minimum is consistent with the requirements of 40 CFR § 70.9, and is implied by § 120–08–0604.D. which states that "Any adjustments made to the annual permit program fee shall be made within the constraints of 40 CFR § 70.9."

4. Insignificant Activities

Section 70.4(b)(2) requires States to include in their operating programs any criteria used to determine insignificant activities or emission levels for the purposes of determining complete applications. Section 70.5(c) provides that an application for a Part 70 permit may not omit information needed to determine the applicability of, or to impose, any applicable requirement, or to evaluate appropriate fee amounts. Section 70.5(c) further states that EPA may approve, as part of a State program, a list of insignificant activities and emissions levels which need not be included in permit applications. Under Part 70, a State may approve as part of that State's program any activity or emission level that the State wishes to consider insignificant. Part 70, however, does not establish specific emission levels for insignificant activities, relying instead on a case-by-case determination of appropriate levels based on the particular circumstances of the Part 70 program under review.

In Appendix W of Rules 8–5 and 8–6 Virginia defines various specified types of emission units as insignificant for purposes of Title V permitting, and states that these units are not required to be identified in Title V applications. The Appendix also states that other unspecified types of units can be considered insignificant if their emissions or their size or production rate are below certain levels. These units must be listed in Title V applications, and their emissions, size, or production rate must be given, whichever is relevant, but no additional information must be supplied regarding them.

EPA has several concerns regarding Virginia's classifications of insignificant sources. One overall concern is that under Virginia Rule 8–5 and Appendix W the determination of whether or not a source is subject to the operating permit program can be done without taking into account emissions from units considered to be insignificant. If the total emissions from units subject to Title V requirements were just below the level which would trigger Title V program applicability, failure to take into account additional emissions from units which are exempt could result in a source avoiding Title V requirements when it should be subject to those requirements. EPA recommends that Virginia correct this deficiency by modifying the statements found in § 120–08–505D(1)(a)(2) and in Appendix W(I)(A)(4), which require that "the emissions from any emissions unit shall be included in the permit application if the omission of those emission units from the application would interfere with the determination or imposition of any applicable requirement or the calculation of permit fees." The last portion of this statement should be modified to state "if the omission of those emission units would interfere with the determination of Title V applicability, the determination or imposition of an applicable requirement, or the calculation of permit fees."

EPA is also concerned that when Virginia defined emissions units as insignificant based on their emissions levels, Virginia used emissions levels which are too high. Specifically, EPA is concerned that Virginia defined as insignificant all emissions units with uncontrolled emissions of less than 10 tons per year of nitrogen dioxide, sulfur dioxide, and total suspended particulates or particulate matter (PM10), less than seven tons per year of volatile organic compounds, and less than 100 tons per year of carbon monoxide. Virginia defines "uncontrolled emissions" as emissions from a source when operating at maximum capacity without air pollution control equipment. Insignificant activity thresholds that are considered to be "sound" by EPA would fall in the range of 1 to 2 tons per year for criteria pollutants. EPA is also concerned that Virginia defined as insignificant all other pollutant emission sources (many of them hazardous emission sources) with emissions less than the section 112(g) de minimis levels set forth at 40 CFR § 63.44 or the accidental release threshold levels found at 40 CFR § 68.130. These levels are appropriate in many cases, but are too high in others. Accordingly, EPA believes that Virginia should modify this provision to indicate that sources emitting other air pollutants are considered insignificant if their emissions are below the lesser of the § 112(g) threshold levels set forth at 40 CFR § 63.44, the accidental release thresholds set forth at 40 CFR § 68.130, or 1000 pounds per year. EPA believes that the above criteria and other pollutant emission levels are sufficiently below the applicability thresholds for many applicable requirements to assure that no unit potentially subject to an applicable requirement would be omitted from a Title V application.

EPA is concerned that Virginia did not provide EPA with sufficient information to properly evaluate whether or not all of the activities

---

[1] The Commonwealth of Virginia filed an appeal of this rulemaking in the United States Court of Appeals for the Fourth Circuit (Case No. 95–1052).

which Virginia included on its list of insignificant activities are appropriate. Of key importance to EPA in reviewing such lists is that no source subject to an applicable federal requirement should be included on the list, pursuant to 40 CFR § 70.5. Virginia did not provide a demonstration that the activities it listed are not likely to be subject to such requirements. Also important in reviewing such lists is that the emissions from the activities listed be truly insignificant, and Virginia did not provide EPA with information on the likely emissions of the activities listed. However, it is clear that Virginia has incorrectly listed as insignificant both "comfort air conditioning" and "refrigeration systems," which are subject to stratospheric ozone protection requirements established by Title VI of the CAA. Virginia should remove both comfort air conditioning and refrigeration systems from the insignificant activities list.

EPA cannot fully approve Virginia's operating permit program until Virginia corrects the deficiencies discussed above.

5. Variance Provision

While not a disapproval issue, it should be noted that Virginia has the authority to issue a variance from requirements imposed by Virginia law. The variance provision at *Va. Code* § 10.1–1307.C. empowers the Air Pollution Control Board, after a public hearing, to grant a local variance from any regulation adopted by the board. EPA regards this provision as wholly external to the program submitted for approval under Part 70, and consequently is proposing to take no action on this provision of Virginia law. EPA has no authority to approve provisions of State law, such as the variance provision referred to, which are inconsistent with the CAA. EPA does not recognize the ability of a permitting authority to grant relief from the duty to comply with a federally enforceable permit, except where such relief is consistent with the applicable requirements of the CAA and is granted through procedures allowed by Part 70. EPA reserves the right to enforce the terms of the permit where the permitting authority purports to grant relief from the duty to comply with a permit in a manner inconsistent with the CAA and Part 70 procedures.

B. Provisions Implementing Other CAA Requirements

1. Authority and Commitments for Section 112 Implementation

Virginia requested that EPA grant Virginia "delegation of authority upon approval of the operating permit program for all Section 112 programs except Section 112(r), prevention of accidental releases." Because EPA is disapproving Virginia's Title V submittal, Virginia's request for delegation has not been triggered.

Virginia demonstrated that it has in Va. Code § 10.1–1322.A. and Rule 8–5 the broad legal authority to incorporate into permits and to enforce most applicable CAA section 112 requirements. However, Virginia also indicated that it may require additional authority to conduct certain specific section 112 activities. Virginia supplemented its broad legal authority with a commitment to "develop the state regulatory provisions as necessary to carry out these programs and the responsibilities under the delegation after approval of the operating permit program and EPA has issued the prerequisite guidance for development of these title III programs." Also, Virginia has the authority under § 120–08–0505.K. to require that an applicant state that the source has complied with CAA § 112(r) or state in the compliance plan that the source intends to comply and has set a schedule to do so.

EPA had until recently interpreted the CAA as requiring sources to comply with section 112(g) beginning on the date of approval of a Title V program regardless of whether or not EPA had completed its section 112(g) rulemaking. EPA has since revised this interpretation of the CAA as described in a February 14, 1995 **Federal Register** notice (see 60 FR 83333). The revised interpretation postpones the effective date of section 112(g) until after EPA has promulgated a rule addressing that provision. The rationale for the revised interpretation is set forth in detail in the February 14, 1995 interpretive notice.

The section 112(g) interpretive notice explains that EPA is still considering whether the effective date of section 112(g) should be delayed beyond the date of promulgation of the federal rule to allow States time to adopt rules implementing the federal rule, and that EPA will provide for any such additional delay in the final section 112(g) rulemaking. Unless and until EPA provides for such an additional postponement of section 112(g), Virginia would be required, if it were delegated authority to implement section 112(g), to be able to implement section 112(g) during the transition period between promulgation of the federal section 112(g) rule and adoption of implementing Virginia regulations.

2. Acid Rain Provisions

Virginia's program does not contain all provisions required relating to acid rain sources, but Virginia has committed to submit the required provisions shortly, and EPA find Virginia's commitment acceptable. Virginia's program properly requires "affected sources" to obtain operating permits, and Virginia defines an "affected source" as a source containing one or more "affected units," which are themselves defined as "a unit subject to any acid rain emissions reduction requirement or acid rain emissions limitation under 40 CFR Parts 72, 73, 75, 76, 77, or 78." However, Virginia has not defined as an "applicable requirement" any of these acid rain emissions reduction requirements or limitations. Therefore, Virginia's operating permits would not be required to include any of these requirements.

Virginia is aware of this deficiency and has committed to correct it. In Virginia's operating permits program submittal of January 9, 1995, Virginia committed to adopting an acid rain regulation by the latter half of 1995. Virginia stated that under this regulation it would issue acid rain sources operating permits which would include all requirements of the acid rain program. In a statement included in that submittal, Virginia's Attorney General also committed to provide EPA, when Virginia submits its acid rain regulation, with the required legal opinion regarding Virginia's legal authority to carry out the acid rain portion of the operating permits program.

III. Proposed Action and Implications

The EPA is proposing to disapprove the operating permits program contained in submittals from Virginia dated November 12, 1993, January 14, 1994, January 9, 1995, January 17, 1995, and May 17, 1995. If promulgated, this disapproval would constitute a disapproval under section 502(d) of the CAA (see generally 57 FR 32253–54). As provided under section 502(d)(1) of the CAA, Virginia would have up to 180 days from the date of EPA's notification of disapproval to the Governor to revise and resubmit the program.

If EPA finalizes this proposed disapproval, Virginia may become subject to sanctions under the CAA. Pursuant to section 502(d)(2)(A) of the CAA, EPA may, at its discretion, apply any of the sanctions in section 179(b) at any time following the effective date of

a final disapproval. The available sanctions include a prohibition on the approval by the Secretary of Transportation of certain highway projects or the awarding of certain federal highway funding, and a requirement that new or modified stationary sources or emissions units for which a permit is required under Part D of Title I of the CAA achieve an emissions reductions-to-increases ratio of at least 2-to-1. In addition, EPA is required by section 502(d)(2)(B) of the CAA to apply one of the sanctions in section 179(b), as selected by the Administrator, on the date 18 months after the effective date of a final disapproval, unless prior to that date Virginia has submitted a revised operating permits program and EPA has determined that it corrects the deficiencies that prompted the final disapproval. Moreover, if the Administrator finds a lack of good faith on the part of Virginia, both sanctions shall apply after the expiration of the 18-month period until the Administrator determines that Virginia has come into compliance. In all cases, if, six months after EPA applies the first sanction, Virginia has not submitted a revised program that EPA has determined corrects the disapproved program's deficiencies, a second sanction is required. Finally, if EPA has not granted full approval to Virginia's program by November 15, 1995, and Virginia's program at that point does not have interim approval status, EPA must promulgate, administer and enforce a Federal permits program for Virginia on that date.

EPA first disapproved Virginia's operating permits program in a **Federal Register** notice published on December 5, 1994, which became effective on January 5, 1995. As a result, EPA's authority to apply discretionary sanctions to Virginia arose on January 5, 1995, and the 18-month period before which EPA is required to apply sanctions also began on that date.

Consequently, following today's proposed disapproval EPA continues to have the authority to apply discretionary sanctions to Virginia and will be required to apply sanctions on July 5, 1996, unless by that date EPA determines Virginia has corrected each of the deficiencies that prompted EPA's original disapproval. Moreover, if today's proposed disapproval is finalized, EPA would be required to apply sanctions 18 months after the effective date of such action, unless by that date EPA determines Virginia has corrected each of the deficiencies that prompted EPA's disapproval and that were not the subject of the original final disapproval action.

IV. Proposed Action

EPA is proposing to disapprove the submittals made on January 9, 1995 and May 17, 1995 by the Commonwealth of Virginia to satisfy the requirements for the operating permits program required by Title V of the Clean Air Act for the reasons outlined in this notice.

V. Administrative Requirements

A. Request for Public Comments

The EPA is requesting comments on all aspects of this proposed disapproval. Copies of the State's submittal and other information relied upon for the proposed disapproval are contained in a docket maintained at the EPA Regional Office. The docket is an organized and complete file of all the information submitted to, or otherwise considered by, EPA in the development of this proposed disapproval. The principal purposes of the docket are: (1) To allow interested parties a means to identify and locate documents so that they can effectively participate in the disapproval process; and (2) to serve as the record in case of judicial review. The EPA will consider any comments received by October 19, 1995.

B. Executive Order 12866

The Office of Management and Budget has exempted this action from Executive Order 12866 review.

C. Regulatory Flexibility Act

The EPA's actions under section 502 of the CAA do not create any new requirements, but simply address operating permits programs submitted to satisfy the requirements of 40 CFR Part 70. Because this action does not impose any new requirements, it does not have a significant impact on a substantial number of small entities.

D. Federal Mandates

Under Section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final action that includes a Federal mandate that may result in estimated costs to State, local, or tribal governments in the aggregate; or to the private sector, of $100 million or more. Under section 205, EPA must consider the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule. EPA has determined that this proposed disapproval action of Virginia's Title V Operating Permits Program does not include a Federal mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector. This Federal action disapproves pre-existing requirements under State or local law, and imposes no new Federal requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action.

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, and Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401–7671q.

Dated: September 8, 1995.

BILLING CODE 6560-50-P

---

40 CFR Part 81

[AD–FRL–5297–9]

Clean Air Act Reclassification; Pennsylvania—Liberty Borough Nonattainment Area; PM–10

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to find that the Liberty Borough, Pennsylvania nonattainment area has not attained national ambient air quality standards (NAAQS) for particulate matter of nominal aerodynamic diameter smaller than 10 micrometers (PM–10) by the Clean Air Act (the Act) mandated attainment date for moderate nonattainment areas. The Act established an attainment date of no later than December 31, 1994 for areas classified as moderate nonattainment areas. This proposed finding is based on monitored air quality data for the PM–10 NAAQS during the years 1992–94. EPA is soliciting public comment on all relevant matters associated with this proposed action, including comment as to whether there are any mitigating facts or extenuating circumstances that it should consider in its review of the monitoring data used to propose to find that the area has not achieved the

NAAQS. All comments and information submitted, in writing, at the address and within the time frame specified below will be fully considered by EPA in determining its final action.

DATES: Comments must be received on or before October 19, 1995.

ADDRESSES: Comments may be mailed to Marcia L. Spink, Associate Director, Air Programs, Mailcode 3AT00, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107 and at the Allegheny County Health Department, Bureau of Environmental Quality, Division of Air Quality, 301 39th Street, Pittsburgh, Pennsylvania 15201.

FOR FURTHER INFORMATION CONTACT: Thomas A. Casey, U.S. EPA Region III, (215) 597–2746.

SUPPLEMENTARY INFORMATION:

I. Background

A. Health and Welfare Effects of Particulate Matter

Based on studies of human populations exposed to high concentrations of particles (at times in the presence of SO_2) and laboratory studies of animals and humans, there are major human health concerns associated with particulate matter. These include deleterious effects on breathing and respiratory systems, aggravation of existing respiratory and cardiovascular disease, alterations in the body's immune systems against foreign materials, damage to lung tissue, carcinogenesis, and premature death. The major subgroups of the population that appear to be most sensitive to the effects of particulate matter include individuals with chronic obstructive pulmonary or cardiovascular disease, those with influenza, asthmatics, the elderly, and children. Particulate matter also soils and damages materials, and fine particles are a major cause of visibility impairment in the United States.[1]

B. Clean Air Act Requirements Concerning Designation and Classification

On November 15, 1990, the date of enactment of the 1990 Clean Air Act Amendments, PM–10 areas meeting the criteria of section 107(d)(4)(B) of the Act were designated nonattainment by operation of law. Once an area is designated nonattainment, section 188 of the Act outlines the process for classification of the area and establishes the area's attainment date. Pursuant to section 188(a), all PM–10 nonattainment areas were initially classified as moderate by operation of law upon designation as nonattainment. These nonattainment designations and moderate area classifications were codified in 40 CFR Part 81 on November 6, 1991 (56 FR 56694).

C. Clean Air Act's Requirements for Moderate PM–10 Nonattainment Areas

States containing areas which were designated as moderate nonattainment by operation of law under section 107(d)(4)(B) were to develop and submit State Implementation Plans (SIPs) to provide for the attainment of the PM–10 NAAQS. Those SIPs were to include the adoption and implementation of PM–10 reduction requirements which constitute reasonably available control measures, (RACM), including reasonably available control technology (RACT). Pursuant to section 189(a)(2) of the Act, those SIP revisions were to be submitted to EPA by November 15, 1991. The Commonwealth of Pennsylvania submitted this SIP revision (developed and adopted by the Allegheny County Health Department) on January 11, 1994. On April 11, 1995 (60 FR 18385), in a rulemaking separate from today's action, EPA proposed approval of the Commonwealth's SIP revision for the Liberty Borough moderate PM–10 nonattainment area. EPA received numerous comments on its proposed action, some in support and some in opposition, and has yet to take final action on that SIP revision.

D. Reclassification to Serious Nonattainment

EPA has the responsibility, pursuant to sections 179(c) and 188(b)(2) of the Act, of determining within 6 months of the applicable attainment date, whether PM–10 nonattainment areas have attained the NAAQS. Section 179(c)(1) of the Act provides that these determinations are to be based upon an area's "air quality as of the attainment date", and section 188(b)(2) is consistent with this requirement. EPA makes the determination of whether an area's air quality is meeting the PM–10 NAAQS based upon air quality data gathered at monitoring sites in the nonattainment area and entered into the Aerometric Information Retrieval System (AIRS). These data are reviewed to determine the area's air quality status in accordance with 40 CFR Part 50, Appendix K.

Pursuant to Appendix K, attainment of the annual PM–10 standard is achieved when the expected annual arithmetic mean PM–10 concentration is equal to or less than 50 micrograms per cubic meter ($\mu g/m^3$). Attainment of the 24-hour standard is determined by calculating the expected number of exceedances of the 150 $\mu g/m^3$ limit per year. The 24-hour standard is attained when the expected number of exceedances is 1.0 or less. A total of 3 consecutive years of non-violating air quality data is generally necessary to show attainment of the 24-hour and annual standards for PM–10. A complete year of air quality data, as defined in 40 CFR Part 50, Appendix K, is comprised of all 4 calendar quarters with each quarter containing data from at least 75 percent of the scheduled sampling days.[2]

Under section 188(b)(2)(A), a moderate PM–10 nonattainment area is reclassified as serious by operation of law if the Administrator finds that the area has failed to attain the NAAQS by the statutory attainment date. Pursuant to section 188(b)(2)(B) of the Act, EPA must publish a notice in the **Federal Register** identifying those areas that failed to attain the standard and the resulting reclassifications. EPA is fulfilling its responsibility for this requirement via the federal rulemaking process initiated by today's action.

E. Clean Air Act's Requirements for Serious PM–10 Nonattainment Areas

PM–10 nonattainment areas reclassified as serious under section 188(b)(2) of the Act are required to submit, within 18 months of the area's reclassification, SIP revisions providing for, among other things, the adoption and implementation of best available control measures (BACM), including best available control technology (BACT), for PM–10 and PM–10 precursors no later than four years from the date of reclassification. The SIP also must contain a demonstration that its implementation will provide for attainment of the PM–10 NAAQS no later than December 31, 2001. EPA has provided specific guidance on developing serious area PM–10 SIP revisions in an addendum to the General Preamble to Title I of the Clean Air Act. See 59 FR 41998 (August 16, 1994). These requirements are in addition to the moderate PM–10 nonattainment area requirements for RACT/RACM.

---

[1] Air Quality Criteria for Particulate Matter (External Review Draft), EPA–600/AP–95/001a–c, April 1995 (NTIS #: PB95–22–1727, –1735, –1743).

[2] EPA is currently under court order to review the NAAQS for particulate matter (*American Lung Association* v. *Browner*, No. 93–643 D. Ariz., October 6, 1994).

II. Rationale for EPA's Proposed Action

By today's action, EPA is proposing to find that the Liberty Borough area did not attain the PM–10 NAAQS by the required attainment date of December 31, 1994. As discussed below, this proposed finding is based upon air quality data which revealed violations of the PM–10 NAAQS during 1992–1994. If EPA takes final action on this proposed finding, the Liberty Borough nonattainment area (comprised of the City of Clairton and the Boroughs of Liberty, Lincoln, Glassport, and Port Vue) located in Allegheny County, Pennsylvania) will be reclassified by operation of law as a serious nonattainment area for PM–10 under section 188(b)(2)(A) of the Act.

A. Ambient Air Monitoring Data

Table 1 lists each of the monitoring sites in the Liberty Borough area where the 24-hour PM–10 NAAQS has been exceeded during 1992–1994 and the concentration, in micrograms per cubic meter, on the day of the exceedance.

TABLE 1

Year and date	Lincoln (high-volume sampler) ($\mu g/m^3$)	Lincoln (continuous sampler) ($\mu g/m^3$)	Liberty (high-volume sampler) ($\mu g/m^3$)
1992:			
1/28			175
12/15	186		
1993:			
5/10	167		
11/23	223	195	
1994:			
2/19	163		
3/7	157		

The monitors in the nonattainment area that recorded exceedances of the PM–10 NAAQS have operated on varying sampling schedules with varying data capture rates. EPA requires the adjustment of observed exceedances to account for incomplete data pursuant to 40 CFR Part 50 Appendix K. In the case of the Lincoln high-volume sampler, five exceedances of the 24-hour NAAQS were observed from 1992 through 1994.[3] Before adjusting for incomplete sampling, the number of exceedances per year for the three year period would be 1.7. After adjusting for incomplete sampling, the number of expected exceedances of the NAAQS at this site during the three year period was 2.2.

According to 40 CFR Part 50, the 24-hour NAAQS is attained when the expected number of days per calendar year with a 24-hour average concentration above 150 $\mu g/m3$ is equal to or less than one. In the simplest case, the number of expected exceedances at a site is determined by recording the number of exceedances in each calendar year, accounting for incomplete data, and then averaging them over the past three calendar years. Therefore from 1992–1994, the number of expected exceedances at the Lincoln high-volume sampler is 2.2. This estimation of expected exceedances indicates that the Lincoln site had not attained the 24-hour PM–10 NAAQS during 1992–1994.

Only one exceedance of the annual NAAQS has been recorded in the Liberty Borough area from 1992–1994. (The Lincoln high-volume sampler recorded a weighted-average concentration of 52.5 $\mu g/m^3$ in 1994.) No station in the Liberty Borough area recorded an annual average concentration, averaged (as prescribed in Appendix K) from 1992–1994, which exceeded the annual NAAQS.

III. Proposed Action

By today's action, EPA is proposing to find that the Liberty Borough area did not attain the PM–10 NAAQS by December 31, 1994. As discussed above, this proposed finding is based upon air quality data which revealed violations of the PM–10 NAAQS during 1992–1994. If EPA takes final action on this proposed finding, the Liberty Borough nonattainment area will be reclassified by operation of law as a serious nonattainment area for PM–10 under section 188(b)(2)(A) of the Act.

IV. Request for Public Comment

EPA is requesting comment on all aspects of today's proposal, including, but not limited to: The PM–10 control requirements adopted to date by the County and the timing and status of their implementation, the compliance status and history of the sources subject to the PM–10 control requirements, the efforts made to date to meet the requirements, air quality data and trends as they relate to implementation of the control requirements, and weather system occurrances (meteorology). EPA is also soliciting comment as to whether there are any mitigating facts or extenuating circumstances that it should consider in its review of the monitoring data used to propose to find that the area has not achieved the NAAQS, including any relevant comparison of the data collected from the ambient monitors. EPA is soliciting comment as to the relevancy of such information in determining whether the area has achieved the NAAQS.

As indicated earlier in this notice, EPA will consider any comments received, in writing, by October 19, 1995.

V. Executive Order (E.O.) 12866

Under E.O. 12866, 58 FR 51735 (October 4, 1993), EPA is required to determine whether regulatory actions are significant and therefore should be subject to OMB review, economic analysis, and the requirements of the Executive Order. The Executive Order defines a "significant regulatory action" as one that is likely to result in a rule that may meet at least one of the four criteria identified in section 3(f), including, under paragraph (1), that the rule may "have an annual effect on the economy of $100 million or more or adversely affect, in a material way, the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities."

The Agency has determined that the finding of failure to attain proposed today would result in none of the effects identified in section 3(f). Under section 188(b)(2) of the Act, findings of failure to attain and reclassification of nonattainment areas are based upon air quality considerations and must occur by operation of law in light of certain air quality conditions. They do not, in-and-of-themselves, impose any new requirements on any sectors of the economy. In addition, because the statutory requirements are clearly defined with respect to the differently classified areas, and because those requirements are automatically triggered by classifications that, in turn, are triggered by air quality values, findings of failure to attain and reclassification cannot be said to impose a materially adverse impact on State, local, or tribal governments or communities.

VI. Regulatory Flexibility

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

---

[3] The Lincoln high volume sampler began operation in the Fall of 1992.

As discussed in section V of this notice, findings of failure to attain and reclassification of nonattainment areas under section 188(b)(2) of the Act do not in-and-of-themselves create any new requirements. Therefore, I certify that today's proposed action does not have a significant impact on small entities.

VII. Unfunded Mandates

Under sections 202, 203 and 205 of the Unfunded Mandates Reform Act of 1995 (Unfunded Mandates Act), signed into law on March 22, 1995, EPA must assess whether various actions undertaken in association with proposed or final regulations include a Federal mandate that may result in estimated costs of $100 million or more to the private sector, or to State, local or tribal governments in the aggregate.

EPA believes, as discussed earlier in section V of this notice, that the proposed finding of failure to attain and reclassification of the Liberty Borough nonattainment area are factual determinations based upon air quality considerations and must occur by operation of law and, hence, do not impose any federal intergovernmental mandate, as defined in section 101 of the Unfunded Mandates Act.

Medicaid Program; Payment for Covered Outpatient Drugs Under Drug Rebate Agreements With Manufacturers

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule would specify requirements for State Medicaid agencies and conditions under which Federal payments would be made under Medicaid for covered outpatient prescription drugs. The rule would also specify the conditions for approval and renewal of rebate agreements with drug manufacturers participating in the Medicaid program.

The proposed rule would interpret sections 1902(a)(54), 1903(i)(10), and 1927 of the Social Security Act, as added by section 4401 of the Omnibus Budget Reconciliation Act of 1990, and amended by section 13602 of the Omnibus Budget Reconciliation Act of 1993, and section 601(b) of the Veterans Health Care Act of 1992. We consider this rule necessary to adequately implement the provisions of section 1927 of the Act.

DATES: Written comments will be considered if we receive them at the appropriate address, as provided in the "Addresses" section below, no later than 5:00 p.m. on November 20, 1995.

ADDRESSES: Mail written comments (an original and 3 copies) to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: MB–046–P, P.O. Box 7518, Baltimore, MD 21207–0518.

If you prefer, you may deliver your written comments (an original and 3 copies) to one of the following addresses: Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, D.C., or C5–09–26, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Due to staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code MB–046–P. Written comments received timely will be available for public inspection as they are received, beginning approximately 3 weeks after publication of this document, in room 309–G of the Department's offices at 200 Independence Ave., SW., Washington, D.C., on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (telephone: (202) 690–7890).

If you wish to submit comments on the information collection requirements contained in this rule, you may submit written comments to: Office of Information and Regulatory Affairs, Attention: Laura Oliven, Office of Management and Budget, Room 3002, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Estelle Chisholm, (410) 786–3286.

SUPPLEMENTARY INFORMATION:

I. Background

A. Overview of the Drug Rebate Provisions

Under section 1927 of the Social Security Act (the Act), manufacturers that have entered into a national rebate agreement must provide each State Medicaid program with rebate period payments (or other periodic rebate payments, as determined by the Secretary). The rebate must be calculated in accordance with sections 1927(b) and (c) of the Act, using manufacturing pricing data and State drug utilization information as outlined in the statute.

The requirements concerning rebate agreements apply to drugs dispensed and paid for under Medicaid on or after January 1, 1991. For manufacturers who entered into rebate agreements before March 1, 1991, section 1927(a)(1) of the Act provided for Federal financial participation (FFP) retroactively calculated as if the agreement had been entered into on January 1, 1991. For agreements that are entered into on or after March 1, 1991, Medicaid coverage and FFP begin, as specified in section 1927(a)(1), the first day of the rebate period that begins more than 60 days after the date the agreement is entered into. We are interpreting the term "entered into" to mean the date the agreement is postmarked by the U.S. Postal Service or other common mail carrier. We will not consider the date stamped by a postage meter to be a postmark.

Although the statute provides specific deadlines for manufacturers to sign rebate agreements, section 1927(a)(3) of the Act provides, in part, for payment of drugs not covered under rebate agreements if the Secretary determines that in the first calendar quarter of 1991 there were extenuating circumstances. Therefore, in light of the deadlines imposed by the statute for signing the agreement, and in accordance with the extenuating circumstances clause in section 1927(a)(3) of the Act, HCFA extended through April 30, 1991, the deadline for manufacturers to enter into Medicaid rebate agreements that are retroactive to January 1, 1991. Therefore, rebate agreements entered into on or after May 1, 1991, are effective on the first day of the calendar quarter that begins more than 60 days after the date the agreement is entered into.

The statute does not specify whether the drug provisions are applicable in areas other than the 50 States and the District of Columbia. However, in the

legislative history, the Congress specifically noted that the drug rebate provisions "[r]equire drug manufacturers to comply with the rebate requirements in all States and the District of Columbia." (H. R. Conf. Rep. 964, 101st Cong., 2d Sess. 822 (1990).) Therefore, in accordance with our understanding of Congressional intent, we are applying the drug rebate requirements only to the 50 States and the District of Columbia.

Section 1115 of the Act contains provisions for State demonstration projects that are likely to assist in promoting the objectives of certain Federal programs, including the Medicaid program. Specifically, under the authority of section 1115(a)(1), the Secretary may waive compliance with the requirements of section 1902 of the Act for any State that is operating an experimental, pilot or demonstration project. Under section 1115(a)(2), the Secretary may also make payments notwithstanding restrictions under section 1903. In accordance with these provisions, a State operating under a section 1115(a) demonstration project waiver may have the requirements of section 1902(a)(54) of the Act, concerning compliance with applicable requirements of section 1927, waived. In addition to the extent that section 1927 requirements act as conditions under section 1903 for Federal matching funds to such a State, these conditions may be excused.

We note that section 1115(a) does not provide authority to waive or excuse requirements applicable to States other than the waiver State. Thus, there is no authority to waive inclusion of manufacturer sales within a waiver State from the calculation of best price or average manufacturer price applicable to other States.

Section 1927(j) of the Act specifies that the provisions of the drug rebate program do not apply to covered outpatient drugs dispensed by (1) health maintenance organizations (HMOs), including those organizations that contract to provide services to Medicaid recipients under section 1903(m) of the Act; and (2) hospitals that dispense covered outpatient drugs using drug formulary systems and bill the Medicaid program no more than the hospitals' purchasing costs for these drugs as determined under the State plan. Even though HMOs and certain hospitals are exempt from the requirements of the rebate program, section 1927(j) specifically states that its provisions should not be construed as providing that the amounts paid by these organizations should be excluded from the best price calculations. (Section V.B.2.a. of this preamble contains a discussion on best price.)

On February 15, 1991, we made available to drug manufacturers a national rebate agreement developed in response to section 1927 of the Act. Prior to that date, we held extensive discussions with representatives from States and drug manufacturers. These parties reviewed and commented on the proposed language of the national rebate agreement. We also provided information to the public regarding the national drug rebate agreement through a notice with comment period in the **Federal Register** on February 21, 1991 (56 FR 7049). The February 1991 notice reprinted the text of the national drug rebate agreement. We received a number of timely public comments in response to this notice.

A detailed discussion of the public comments and the Department's responses appear under section X. of this preamble. We have given these public comments full consideration and have incorporated certain provisions in this proposed rule based on that consideration. We are not amending the national rebate agreement at this time. We will amend the national rebate agreement in the future, as necessary, to conform the agreement with the regulations and to take into consideration public comments received on the February 21, 1991, notice that are not addressed in this rule and public comments that we receive on this proposed rule.

This proposed rule would interpret in regulations the amendments made by section 4401 of the Omnibus Budget Reconciliation Act of 1990 (OBRA '90), Public Law 101–508, enacted on November 5, 1990; section 601(b)(1) of the Veterans Health Care Act of 1992 (VHCA), Public Law 102–585, enacted on November 4, 1992; and section 13602 of the Omnibus Budget Reconciliation Act of 1993 (OBRA '93), Public Law 103–66, enacted on August 10, 1993, as discussed below.

B. Changes Made by the Omnibus Budget Reconciliation Act of 1990

Under the Medicaid program, States may provide coverage of prescription drugs as an optional service under section 1905(a)(12) of the Act. Section 1903(a) of the Act provides for FFP in State expenditures for these drugs.

Section 4401 of OBRA '90 added a Medicaid State plan requirement under section 1902(a)(54) of the Act to provide that: (1) if a State elects to cover outpatient prescription drugs, the State plan must provide that any formulary or similar restriction, except as provided in section 1927(d) of the Act, shall permit coverage of covered outpatient drugs of any manufacturer that enters into and complies with a rebate agreement under section 1927 of the Act, if the drugs are prescribed for a medically accepted indication; and (2) the State must comply with certain reporting and other coverage requirements specified in section 1927 of the Act.

Section 4401 of OBRA '90 also redesignated the existing section 1927 of the Act as section 1928 and added a new section 1927. New section 1927 provides that for payment to be made under section 1903 of the Act for covered outpatient drugs, the manufacturer must enter into and have in effect a rebate agreement with the Secretary of the Department of Health and Human Services (HHS) on behalf of the States (except that the Secretary may authorize a State to enter directly into agreements with manufacturers). (Section I.D. of this preamble contains a description of changes to sections 1902(a)(54) and 1927 made by section 13602 of the OBRA '93.)

Section 1927 of the Act specifies the requirements for the rebate agreements with manufacturers of covered outpatient drugs, the terms and length of the agreement, the requirements for States to provide State Medicaid drug utilization information to HCFA and the manufacturers, the requirements for manufacturers to provide pricing information to HCFA, the formulas to be used to determine the amount of the drug rebate, and the limitations on coverage of drugs. Section 1927 of the Act also contains provisions on termination procedures for agreements, and the imposition of civil money penalties on manufacturers that fail to comply with the requirements concerning pricing data submissions.

Section 4401 of OBRA '90 also amended section 1903(i) of the Act by adding a new paragraph (10) to provide for the denial of FFP in expenditures for covered outpatient drugs of a manufacturer dispensed in any State if, except as specified in section 1927(a) of the Act (whereby the Secretary may authorize a State to enter directly into agreements with a manufacturer), the manufacturer does not comply with the rebate requirements specified in section 1927; and, effective January 1, 1993, if the State does not provide for drug use review in accordance with section 1927(g) of the Act. (Section I.D. of this preamble contains a description of changes to section 1903(i)(10) made by section 13602 of OBRA '93.)

C. Changes Made by the Veterans Health Care Act of 1992

The VHCA amended section 1927 of the Social Security Act in several areas. This proposed regulation reflects the self-implementing amendments required under VHCA.

One major change required by VHCA affects the conditions that manufacturers must meet so that payment can be made under Medicaid for a manufacturer's covered outpatient drugs. Section 601(b)(1) of VHCA amended section 1927(a)(1) of the Act to provide that a manufacturer must meet the requirements of section 1927(a)(5) (with respect to drugs purchased by a covered entity on or after December 1, 1992) and section 1927(a)(6) of the Act (with respect to drugs purchased by the Department of Veterans Affairs (DVA) and certain other Federal agencies).

A manufacturer meets the requirements of section 1927(a)(5)(A) of the Act if it has entered into an agreement with the Secretary that meets the requirements of section 340B of the Public Health Service (PHS) Act with respect to covered outpatient drugs purchased by a covered entity on or after December 1, 1992. The term "covered entity" means an entity described in section 340B(a) of the PHS Act. In general, VHCA amended section 1927 of the Act to require that drug manufacturers enter into pharmaceutical pricing agreements with the PHS and offer discounts on covered outpatient drugs to PHS covered entities that are at least as great as the rebates (both basic and additional rebates) received by State Medicaid agencies.

A manufacturer meets the requirements of section 1927(a)(6) of the Act if it complies with the provisions of section 8126 of title 38 of the United States Code, including the requirement of entering into a master agreement with the Secretary of the DVA under such section. In general, effective January 1, 1993, a manufacturer must enter into a pharmaceutical pricing agreement (master agreement) with the DVA for all single source drugs, innovator multiple source drugs, biologicals, and insulin. Generally, beginning January 1, 1993, the prices that manufacturers charge Federal agencies listed in the master agreement may not exceed the annual Federal ceiling prices specified for such drugs.

In accordance with these amendments to section 1927(a) of the Act, a manufacturer must enter into a pharmaceutical pricing agreement with the PHS and, if necessary, the DVA in order for a manufacturer's drugs to be paid for under Medicaid. Manufacturers that do not enter into and comply with these agreements are subject to termination of the Medicaid national rebate agreement.

Section 1927(b)(4)(B)(ii) of the Act specifies that a manufacturer may terminate its rebate agreement for any reason. Section 601(b)(4) of VHCA amended section 1927(b)(4)(B) of the Act to provide that any such termination not be effective until the rebate period beginning at least 60 days after the date the manufacturer provided notice to the Secretary. Section 601(b)(4) of VHCA also added section 1927(b)(4)(B)(iv) of the Act, which provided that, in the case of a termination of a manufacturer, the Secretary will provide notice of the termination to the State not less than 30 days before the effective date of the termination.

D. Changes made by the Omnibus Budget Reconciliation Act of 1993

Section 13602 of OBRA '93 modified the Medicaid drug rebate program by amending sections 1902(a)(54), 1903(i)(10), and 1927 of the Act.

This section of the preamble contains a discussion of the amendments to the sections of the Act and how they differ from the original language under OBRA '90. Where applicable, effective dates are noted in the discussion.

Sections 13602(d)(1) and (2) of OBRA '93 specify two different effective dates of the OBRA '93 amendments. Section 13602(d)(1) provides that, except for changes made to sections 1902(a)(54) and 1927(d) of the Act, the OBRA '93 amendments are effective as if included in the enactment of OBRA '90. Under section 13602(d)(2) of OBRA '93, amendments to sections 1902(a)(54) and 1927(d) of the Act are effective with rebate periods (calendar quarters) beginning on or after October 1, 1993, without regard to whether or not regulations to carry out these amendments have been published by that date.

1. Payment for Covered Outpatient Drugs

Section 13602(b) of OBRA '93 amended section 1903(i)(10) of the Act to provide that FFP for covered outpatient drugs will be denied (l) unless there is a rebate agreement in effect under section 1927 for covered outpatient drugs or unless the drug is rated 1–A by the Food and Drug Administration, and (2) with respect to any amount expended for innovator multiple source drugs dispensed on or after July 1, 1991, if, under applicable State law, a less expensive multiple source drug could have been dispensed, but only to the extent that such amount exceeds the upper payment limit for such multiple source drug.

OBRA '93 amended section 1903(i)(10) of the Act to remove from this section the requirement for States to provide for drug use review as a condition to receive FFP. (A drug use review is still required under section 1927(g).) Former section 1927(e) of the Act, with respect to multiple source drugs, has also been added to section 1903(i)(10) and modified. This section now requires only that any amount above the upper payment limit be disallowed for an innovator multiple source drug if, under applicable State law, a less expensive multiple source drug could have been dispensed. As is the case with our current policy, this provision only applies to drugs subject to the Federal upper limits payment.

2. Formulary Provisions and Permissible Restrictions

Section 13602(c) of OBRA '93 amended section 1902(a)(54) of the Act to delete the reference that prohibits a State from maintaining a restrictive formulary. Section 1927(d)(1)(B)(iv) provides that a State may exclude a covered outpatient drug if the State has excluded coverage from its formulary in accordance with section 1927(d)(4). Section 13602(a)(1) of OBRA '93 added section 1927(d)(4) which provides that States may establish a formulary if the formulary meets the requirements specified in that section, as discussed below. States may continue to exclude or restrict drugs or classes of drugs specified in section 1927(d)(2). Previously, any State formulary or similar restriction must have permitted coverage, for all medically accepted indications, of a participating manufacturer's drugs except for those drugs or classes of drugs specified in the list of permissible restrictions in section 1927(d)(2).

a. Formulary Requirements. Section 13602(a)(1) of OBRA '93 added section 1927(d)(4) which provides that States may establish a formulary if it meets certain requirements, effective October 1, 1993. The formulary must:

(i) Be developed by an appropriate Governor-appointed committee consisting of physicians, pharmacists, and other appropriate individuals, or, at State option, the State drug use review board;

(ii) Except as specified in item (iii), include covered outpatient drugs, other than those drugs excluded from coverage or restricted under section 1927(d)(2), of manufacturers which have entered into and comply with the Medicaid drug rebate agreement;

(iii) Exclude only those drugs (with respect to the treatment of a specific disease or condition for an identified population) where the drug's labeling or its medically acceptable indication (based on appropriate compendia) does not have a significant, clinically meaningful therapeutic advantage, in terms of safety, effectiveness, or clinical outcome, over other drugs included in the formulary;

(iv) Have available to the public, a written explanation of the reasons for excluding drugs under item (iii); and

(v) Permit coverage of drugs that are excluded under item (iii) from the State's drug formulary (other than those drugs excluded from coverage in accordance with section 1927(d)(2)) and subject them to prior authorization consistent with the requirements in section 1927(d)(5).

This proposed rule does not address any further requirements that a formulary must meet. If we determine later that additional requirements should be imposed on States with regard to formularies, we will address them in a separate notice of proposed rulemaking.

b. List of Drugs Subject to Restriction. Section 1927(d)(1)(B) of the Act permits States to exclude or restrict drugs contained in the list of permissible restrictions in section 1927(d)(2) of the Act. Prior to OBRA '93, section 1927(d)(2) contained a paragraph (I) which meant that States could exclude or restrict drugs described in section 107(c)(3) of the Drug Amendments of 1962 ("DESI" drugs) and those identical, similar, or related drugs (IRS drugs). OBRA '93 amended section 1927(d)(2) to eliminate paragraph (I). However, the removal of coverage restrictions from section 1927(d)(1)(B) does not mean that coverage is necessarily required in light of existing funding restrictions under section 1903(i)(5) and restrictions in the definition of a covered outpatient drug.

Thus, effective with rebate periods beginning on or after October 1, 1993, States cannot exclude or restrict these DESI/IRS drugs. This includes DESI/IRS drugs approved prior to 1962 that have not yet been approved under or subject to the DESI review process. If these drugs otherwise meet the criteria of a covered outpatient drug and are not subject to funding restrictions under section 1903 (i)(5) of the Act, States must provide coverage of these drugs and manufacturers must pay rebates on these drugs if they are dispensed and paid for by the State.

3. Terms of the Rebate Agreement

a. Periodic Rebates. Section 13602(a)(2)(A) of OBRA '93 amended sections 1927(b)(1)(A) and (b)(2)(A) of the Act and made technical changes to the original language under OBRA '90 as follows:

- The period of time used to calculate rebates was previously referenced as "calendar quarter." OBRA '93 changed this term of reference to "rebate period." However, this change does not alter the quarterly rebate period as previously established.
- OBRA '93 clarified the language in section 1927(b)(1)(A). This clarification supports the policy in the national rebate agreement that manufacturers will be responsible for rebates calculated for drugs dispensed after December 31, 1990 for which payment was made under the State Medicaid plan during a rebate period. Since the beginning of the Medicaid rebate program, Medicaid utilization data and rebates have been based on the date the State paid for the drug and not the date it was dispensed.

b. State Provision of Information. Section 13602(a)(2)(A)(ii) of OBRA '93 amended section 1927(b)(2)(A) of the Act to specify that States must report information to each manufacturer on the total number of units of each dosage form and strength and package size of each covered outpatient drug dispensed and paid for by the State. This change clarifies the language in section 1927(b)(2)(A), and supports the standard reporting format established by the Secretary and approved by the Office of Management and Budget that States must report drug utilization data to manufacturers using an 11-digit National Drug Code (NDC) number for each drug. Previously, section 1927(b)(2)(A) of the Act did not specify that States must report information on the package size, which represents the last two digits of the 11-digit NDC code.

4. Amount of Rebate

a. Revisions to Definition of Best Price. Section 13602(a)(1) of OBRA '93 amended section 1927(c)(1)(C) of the Act to ratify our interpretation that the definition of "best price" includes those prices available to providers and health maintenance organizations (HMOs). This interpretation of the definition of best price has been in effect since OBRA '90. Manufacturers must include in their best price calculation, for a single source or innovator multiple source drug, the lowest price available from the manufacturers during the rebate period to any wholesaler, retailer, provider, health maintenance organization, nonprofit entity, or governmental entity within the United States except for those entities specifically excluded by statute.

Section 13602(a)(1) of OBRA '93 also amended section 1927 of the Act to clarify the term "free good" to specify which free goods must be included in the best price calculation. Section 1927(c)(1)(C)(ii)(I) of the Act specifies that best price must include free goods that are contingent on any purchase requirement. Thus, only those free goods that are not contingent on any purchase requirements may be excluded from best price.

5. Additional Rebate for Single Source and Innovator Multiple Source Drugs

Section 13602(a)(1) of OBRA '93 amended section 1927(c)(2) of the Act regarding how additional rebates for single source and innovator multiple source drugs are calculated if the increase in the average manufacturer price (AMP) of the drug exceeds the increase in the Consumer Price Index-Urban (CPI-U). OBRA '93 deleted the requirement that effective January 1, 1994, additional rebates would be calculated using a weighted average manufacturer price (WAMP). Amended section 1927(c)(2) provides that additional rebates for single source and innovator multiple source drugs will continue to be calculated on a drug-by-drug basis, that is, the method in effect since January 1, 1991.

The additional rebate calculation utilizes the drug's "base date AMP" (the AMP of the drug when it was first marketed) and the "base CPI-U" (the CPI-U in effect when the drug was first marketed). Section 1927(c)(2) of the Act further clarifies "base date AMP" and "base CPI-U" for the calculation of the additional rebates as follows:

a. For Drugs Approved on or Before October 1, 1990. Base Date AMP—For drugs approved by the FDA on or before October 1, 1990, the base date AMP means the AMP for the calendar quarter beginning July 1, 1990. This base date AMP remains the same as the definition in the national rebate agreement. Consequently, the base date AMP remains the AMP reported for the July - September 1990 calendar quarter. OBRA '93 clarified our interpretations of section 1927(c)(2)(A)(ii) of the Act previously contained in language in the rebate agreement and in operating instructions provided to manufacturers, and, thus, there is no change in methodology. Therefore, the base date AMP is the AMP for the calendar quarter beginning July 1, 1990, without regard to whether or not the drug has been sold or transferred to an entity, including a division or subsidiary of the manufacturer, after the first day of such calendar quarter.

Base CPI-U—The base CPI-U used for calculating the additional rebate amounts for drugs approved by the FDA before October 1, 1990 is also unchanged, that is, the base CPI-U in effect for September 1990.

b. For Drugs Approved After October 1, 1990. Base Date AMP—OBRA '93 changed the criteria for determining base date AMP for drugs approved by the FDA after October 1, 1990. However, as discussed in section VI.C. of this preamble, for rebate periods beginning on or after January 1, 1991 through September 30, 1993, the original policy in effect under OBRA '90 and explained in paragraph 5.a. of this section will continue to be used. That is, the base date AMP will continue to be the AMP for the first day of the first full month in which the drug was first marketed.

In accordance with the amended language of section 1927(c)(2)(B) of the Act, effective for rebate periods beginning on or after October 1, 1993 (as discussed in section VI.C. of this preamble), the AMP in effect for the first full rebate period after the day on which the drug was first marketed is the base date AMP and will be used to calculate the additional rebate.

Thus, for drugs approved by the FDA after October 1, 1990, but before October 1, 1993, there is the potential for the same drug to have different base date AMPs, that is, one AMP for the January 1, 1991 through September 30, 1993 period and one AMP for the period beginning October 1, 1993.

OBRA '93 amended section 1927(c)(2)(A)(ii) of the Act to clarify that the base date AMP in effect for both of these periods is to be determined without regard to whether or not the drugs have been sold or transferred to an entity, including a division or subsidiary of the manufacturer, after the first day of such rebate period. Thus, a manufacturer's base date AMP (whether for drugs approved by FDA prior to or after October 1, 1990) is drug-specific and should follow the drug regardless of which manufacturer has current legal title.

Base CIP–U—OBRA '93 also amended the criteria for determining the base CIP–U for drugs approved by the FDA after October 1, 1990. In accordance with the amended language of section 1927(c)(2)(A)(ii), effective for rebate periods beginning on or after October 1, 1993, the CIP–U for the month prior to the month of the first full rebate period on which the drug was first marketed is used to calculate the additional rebate as the base CIP–U.

In accordance with section 1927(c)(2)(A)(ii)(II) of the Act, the base CIP–U is the CPI in effect for the month prior to the month of the first full rebate period after the day on which the drug was first marketed. This change will be effective for rebate periods beginning on or after October 1, 1993.

For rebate periods beginning January 1, 1991 through September 30, 1993, the original policy in effect under OBRA '90 will be used. That is, the base CIP–U continues to be the CIP–U for the month before the month in which the drug was first marketed.

6. Requirements of the Prior Authorization Program

Except with respect to new drugs, OBRA '93 did not modify existing requirements on a State's ability to establish and maintain a program to subject drugs to prior authorization. The statute clarified in section 1927(d)(4) of the Act that a prior authorization program established by a State under section 1927(d)(5) is not a formulary subject to the requirements of section 1927(d)(4) (A) through (E).

7. Treatment of New Drugs

OBRA '93 eliminated all special coverage requirements for new drugs by deleting the former section 1927(d)(6) and deleting a reference to new drugs in sections 1902(a)(54), 1927(d)(1)(A) and 1927(d)(3) of the Act. Former section 1927(d)(6) provided that States could not exclude from coverage, subject to prior authorization, or otherwise restrict any new biological or drug approved by the FDA for 6 months after FDA approval.

Effective for rebate periods on or after October 1, 1993, States may exclude or restrict from coverage or prior authorize any new drugs approved by the FDA. New drugs approved by the FDA prior to October 1, 1993 will only receive the unrestricted coverage specified in former section 1927(d)(6) of the Act through September 30, 1993. Beginning October 1, 1993 the unrestricted coverage no longer applies to these new drugs.

8. Treatment of Pharmacy Reimbursement

a. Treatment of Pharmacy Reimbursement Limits. Section 13602(a)(1) of OBRA '93 redesignated section 1927(f) of the Act as section 1927(e), "Treatment of Pharmacy Reimbursement Limits". This section continues to specify that for the moratorium period of January 1, 1991 through December 31, 1994, a State cannot reduce its reimbursement limits or dispensing fees for certain covered outpatient drugs below the limits in effect as of January 1, 1991. For this provision to apply, States must have been in compliance with Federal regulations at 42 CFR 447.331 through 447.334.

OBRA '93 amended section 1927(e)(2) of the Act to clarify that if a State is not in compliance with the regulations at 42 CFR 447.331 through 447.334, the moratorium provisions do not apply to the State until it is in compliance with these regulations.

b. Effect on State Maximum Allowable Cost Limitations. Section 13602(a)(1) of OBRA '93 also added section 1927(e)(3) to clarify that the moratorium provisions do not affect State Maximum Allowable Cost (MAC) limitations in effect prior to or after the moratorium period. That is, as allowed under OBRA '90, States may continue to operate their MAC programs in effect prior to January 1, 1991, in accordance with the terms of that program, for example, adjusting limits and adding drugs within the requirements of the MAC.

9. Average Manufacturer Price

Section 13602(a)(2)(B)(i)(II) of OBRA '93 amended section 1927(k)(1) of the Act to clarify that the AMP for a rebate period is the average price paid to the manufacturer for the drug in the United States by wholesalers for drugs distributed to the retail pharmacy class of trade after deducting customary prompt pay discounts. The policy that AMP will be calculated after deducting customary prompt pay discounts is reflected in the national rebate agreement.

10. Limiting Definition of Covered Outpatient Drug

Section 13602(a)(2)(B)(ii) of OBRA '93 amended section 1927(k)(3) to clarify the limiting definition of what is not included in the definition of a covered outpatient drug. In addition to the criteria originally defined in section 1927(k)(3), a covered outpatient drug does not include the following two items:

- Any drug or product for which a NDC number is not required by the FDA. This category includes whole blood and blood components separated by physical or mechanical means.
- Any drug, biological, or insulin provided as part of, or as incident to and in the same setting as, services in an intermediate care facility for the mentally retarded (ICF/MR) (and for which payment is made as part of the service and not as direct reimbursement for the drug.)

---

11. Medically Accepted Indication

Section 13602(a)(2)(B)(iii) of OBRA '93 amended section 1927(k)(6) to further define the term "medically accepted indication." OBRA '93 deleted the reference to the use of peer-reviewed medical literature and specified that the medical indication must be on the label or be supported by one or more citations included or approved for inclusion in any of the compendia described in section 1927(g)(1)(B)(i).

OBRA '93 amended section 1927(k)(6) to specify that the term "medically accepted indication" means any use for a covered outpatient drug which is approved under the Federal Food, Drug and Cosmetic Act or the use which is supported by one or more citations or approved for inclusion in any of the specified compendia. Those compendia have not changed and are the American Hospital Formulary Service-Drug Information, the American Medical Association Drug Evaluations, and the United States Pharmacopeia-Drug Information.

E. Organization of Remainder of Preamble

The following sections of the preamble explain the actual provisions of the regulations being issued at this time without a description of the history of the statute. In the remainder of the preamble, unless otherwise indicated, references to the statute should be read as the provisions as amended by both the VHCA and OBRA '93. The preamble is structured into six main sections which discuss all related drug covered rebate issues and policies: rebate agreements, drugs covered under the rebate agreement, limitations on drug coverage, reporting requirements, computation of drug rebates, and payment limitations for covered drugs. The balance of the preamble deals with other required regulatory sections, such as responses to comments and an impact analysis. The accompanying regulation text follows section XV. of the preamble.

II. Rebate Agreements

In general, section 1927(a)(1) of the Act provides that, in order for payment to be available under section 1903(a) of the Act for covered outpatient drugs of a manufacturer, the manufacturer must (1) have entered into and have in effect a national rebate agreement with the Secretary on behalf of the States; and (2) also enter into a pharmaceutical pricing agreement with PHS and, if necessary, with DVA (as discussed in Section I.B. of this preamble) for payment to be made under Medicaid for a manufacturer's covered outpatient drugs. The requirements for the rebate agreements are specified in section 1927(b) of the Act.

Section 1927(a)(1) also provides that the Secretary may authorize States to enter directly into separate agreements with manufacturers. For purposes of this rule, we are referring to separate agreements as either "existing," that is, agreements that were entered into on or before the date of enactment of OBRA '90 (November 5, 1990); or "new," that is, agreements that were entered into after the date of enactment of OBRA '90.

The Secretary's authority to approve separate State agreements is consistent with the statute and HCFA's understanding of Congressional intent to decrease program costs and maximize Medicaid savings. Section 1927(a)(1) of the Act gives the Secretary broad authority to authorize separate State agreements. There are no provisions in section 1927 that circumscribe the Secretary's authority to establish criteria for approving separate State agreements.

Thus, in accordance with the authority under section 1927(a)(1) of the Act, we would not approve a new agreement unless the manufacturer has entered into the national rebate agreement and the new agreement provides rebates at least as large as those required by the national agreement. (42 CFR 447.510) We believe these requirements are necessary to effectuate section 1927 of the Act and to uphold Congressional intent.

We would require that a manufacturer enter into the national rebate agreement as a condition of entering into a new State agreement, in order to ensure that Medicaid recipients in all 50 States and the District of Columbia have access to that manufacturer's drugs. In passing various provisions of section 1927, the Congress made it clear that Medicaid recipients be assured access to all medically necessary covered outpatient drugs. (H.R. Rept. No. 881, 101st Cong., 2d Sess. 96–98 (1990)). Without requiring that manufacturers enter into the national agreement, recipients could be denied access if a manufacturer only entered into separate agreements with several large States with a lucrative market for that manufacturer's drugs. Thus, access could be denied in other States.

We would require that a new State agreement provide rebates at least as large as those required by the national agreement because there would be little or no benefit to the Secretary in terms of savings to approve a new State agreement that provides less savings. Approving a new agreement that provides less savings would be contrary to the general understanding of Congressional intent to decrease program costs and maximize Medicaid savings.

The conditions that all existing agreements and new agreements between a State Medicaid agency and a manufacturer must meet in order to comply with the requirements in section 1927 of the Act are described below. The statute defines the entities considered manufacturers to which section 1927 applies. Section 1927(k)(5) of the Act defines the term "manufacturer" to mean any entity that is engaged in—

- The production, preparation, propagation, compounding, conversion, or processing of prescription drug products, either directly or indirectly by extraction from substances of natural origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis; or
- The packaging, repackaging, labeling, relabeling, or distribution of prescription drug products.

Under the statutory definition, the term "manufacturer" does not include a wholesale distributor of drugs or a retail pharmacy licensed under State law. For the reasons set forth below, we would clarify and interpret this statutory definition to require that the entity must possess legal title to the National Drug Code (NDC) number for a covered outpatient drug, insulin, or biological product. The NDC is a national, readily available numbering system maintained by the Food and Drug Administration (FDA) that identifies each drug by manufacturer, product, and package size. We believe this clarification is necessary to permit a practical means of identifying the manufacturer of the drug to determine which manufacturer is responsible for paying the rebate due under the statute to the State. This approach prevents duplicative manufacturer responsibilities for the drug.

In addition, we would further clarify and interpret the term to specify that if a corporation meets the statutory definition of manufacturer and possesses legal title to the NDC number, we would consider the term to include—

- Any corporation that owns at least 80 percent of the total combined voting power of all classes of stock or 80 percent of the total value of shares in all classes of stock in such entity (that is, a parent corporation);
- Any other corporation in which a parent corporation of the entity owns at least 80 percent of the total combined voting power of all classes of stock or 80 percent of the total value of shares

of all classes of stock in the other corporation (that is, a brother-sister corporation); and

- Any other corporation in which the entity owns at least 80 percent of the total combined voting power of all classes of stock or 80 percent of the total value of shares of all classes of stock in the other corporation (that is, a subsidiary corporation).

We would establish this definition of "manufacturer" because we believe that the statutory definition requires clarification to implement the provisions of OBRA '90 consistent with Congressional intent. As noted previously, section 1927(k)(5) of the Act defines a manufacturer, in part, as "any entity" engaged in the production, packaging or distribution of prescription drug products. We believe that when defining a manufacturer, the term "entity" should be interpreted to include any parent, brother-sister, or subsidiary corporation. Such an interpretation, in our opinion, comports with the Congress' desire to maximize recipient access to medically necessary drugs, while at the same time providing a more favorable drug purchasing arrangement for State Medicaid programs. (H. R. Conf. Rept. No. 964, 101st Cong., 2d Sess. 822, 832 (1990); H. R. Rept. No. 881, 101st Cong., 2d Sess. 996 (1990).)

The Congress, in passing the drug rebate provisions, made it clear that States that elect to cover prescription drugs must, except for certain restriction/exclusions allowed under the statute, for the most part, cover the drugs of a manufacturer that enters into and complies with a drug rebate agreement. In return for such coverage, a manufacturer would be responsible for providing a rebate to the State that would give the Medicaid program the benefit of those discounts that other large public and private purchasers receive. (*Id.*) We believe that it would be directly contrary to such intent for us to define manufacturer in a fashion that would permit a manufacturer (by forming a subsidiary corporation) to exclude some of its drugs from the drug rebate program.

A. Existing Agreements

Section 1927(a)(4) of the Act sets forth the conditions that an existing agreement must meet to be in compliance with the provisions of section 1927. Under section 1927(a)(4), existing agreements that were in effect between a manufacturer and a State Medicaid agency on November 5, 1990, will be considered to be in compliance with section 1927 of the Act until the end of the initial period specified in the agreement if (1) the State agrees to report any rebates paid under the agreement to HCFA; and (2) the agreement provides for a minimum aggregate 10-percent rebate of the State's total expenditures under the State plan for all of that manufacturer's drugs paid for by Medicaid in the rebate period. During the initial agreement period, manufacturers may calculate rebates in accordance with that existing agreement as long as these two requirements are met. (Because no manufacturer had existing agreements in all 50 States and the District of Columbia, and in light of the requirements of sections 1927(a) and 1903(i)(10) of the Act, we required all drug manufacturers with approvable existing agreements with State Medicaid agencies as of November 5, 1990, to enter into and comply with the national agreement to cover those States where manufacturers did not have existing agreements.)

As stated above, section 1927(a)(4) of the Act requires that existing individual State agreements provide for a minimum aggregate rebate of 10 percent of the State's total expenditures under the State plan for coverage of the manufacturer's drugs. However, given other provisions of the statute and the legislative history of OBRA '90, we do not believe that the Congress intended that the minimum aggregate rebate be calculated using State expenditures. Other provisions in section 1927 of the Act calculate rebates using manufacturer prices, and there is no evidence in the legislative history that the Congress intended existing rebates to be calculated using a different formula. In fact, the Conference Report specifies that manufacturer sales, not State expenditures, be used to calculate the minimum aggregate rebate. (H. R. Conf. Rept. No. 964, 101st Cong., 2d Sess. 822 (AMP), 832 (manufacturer sales) (1990).)

The House Conference Report, in discussing the House bill, specifically states that existing rebate agreements must be considered in compliance with the statute if the State can establish that "the agreement can reasonably be expected to provide rebates at least as large as the rebates under this bill [which uses manufacturer prices]." (H. R. Conf. Rept. 964, 101st Cong., 2d Sess. 822 (1990); *Id.* at 822 (Senate Amendment).) Similarly, the Conference agreement establishes a similar standard and specifies an aggregate rebate test using manufacturer pricing data. The Conference agreement provides that existing agreements should be considered in compliance with the statute if "the amount of the rebate under the [existing] contract totals at least 10 percent of the manufacturer's sales to Medicaid in the State." (*Id.* at 832.) Therefore, to read the statute in its proper context, and to give effect to our understanding of Congressional intent, we have decided to use manufacturer prices to calculate the minimum aggregate rebate.

Furthermore, as noted previously, using State total expenditures conflicts with other rebate provisions that use manufacturer prices (referred to as average manufacturer prices (AMPs) and best prices) to calculate rebates. (Section V.B.2.a. of this preamble contains the definition of AMP.) A State's total expenditures include, among other items, wholesaler and retailer markup and dispensing fees. These additional charges are not included in the rebate calculations that base rebates on the AMP. Thus, using other than AMP as a percentage of a rebate test would result in an inequitable treatment of manufacturers participating in the rebate program. In light of the legislative history, we believe that the Congress intended that a similar formula based on manufacturer pricing data be used to calculate minimum aggregate rebates under section 1927(a)(4) of the Act.

Therefore, we have concluded that the 10-percent rebate test applies to the manufacturer's AMP (which represents the manufacturer's sale of the drug) and not other State components of drug expenditures. Accordingly, we would specify in our regulations at § 447.510(b)(1)(i) that, to calculate a State's total quarterly expenditures for a manufacturer's drugs for purposes of determining whether the minimum aggregate 10-percent rebate requirement for existing rebate agreements is met, the State must receive a minimum rebate of 10 percent of the AMP for the manufacturer's drugs. Actual rebates on specific drugs may be less than 10 percent as long as the aggregate rebate from that manufacturer for all of its covered outpatient drugs in that separate agreement meets the minimum 10-percent rebate.

An existing agreement must have provided for the minimum aggregate rebate as of November 5, 1990. If this minimum rebate condition was met, we believe it would be consistent with section 1927(a)(4) of the Act to permit States to modify an existing agreement to provide for a greater rebate. Therefore, under these regulations, States would be permitted to modify existing agreements if the State and the manufacturer are in agreement with all modifications and the terms of the agreement allow such modifications. Existing agreements would also be amended to add other drugs of the manufacturer if the agreement continues to meet a minimum aggregate rebate of 10 percent of AMP. However, we do not believe it would be consistent with the statute or our understanding of Congressional intent to permit modifications to increase the length of the initial term since section 1927(a)(4) of the Act specifically references the initial agreement period.

In cases where an existing agreement did not have a stated percentage of rebate, we have required the State to submit to the HCFA regional office (RO) a written assurance from the manufacturer that the minimum 10-percent rebate, as calculated above, was met as of November 5, 1990. We would require in § 447.510(b)(2) that the rebates under an existing agreement also continue to meet the 10-percent threshold in order for payment to be made available under section 1903(a) of the Act for the manufacturer's covered outpatient drugs throughout the initial period specified in the agreement. We would monitor the savings figures, and, if this threshold is not met, we would consider the existing agreement as no longer in compliance with section 1927(a) of the Act. In this case, HCFA would notify the State that the manufacturer's drugs are subject to the rebate terms of the national drug rebate agreement.

The requirements for renewal of existing rebate agreements between States and manufacturers at the end of the initial period specified in the agreement are generally specified in section 1927(a)(4) of the Act. Under this section, a State/manufacturer agreement is renewable after the initial period specified in the agreement if the State establishes to HCFA's satisfaction that the agreement provides for rebates that are at least as large as the rebates required under the national rebate agreement, and the State agrees to report to HCFA any rebates received under the agreement. We would not approve the renewal of an existing agreement unless the manufacturer has entered into the national rebate agreement. As is the case for existing agreements in the initial period, the State is responsible for submitting to the HCFA RO, along with the agreement, a written assurance from the manufacturer that the agreement submitted for renewal meets the minimum rebate requirements described above.

If the actual rebates fail to be at least as large as those rebates required under the national agreement for the renewal period, the renewed agreement would not be considered to be in compliance with section 1927(a) of the Act. In this case, HCFA would notify the State that the manufacturer's drugs are subject to the rebate terms of the national agreement.

B. New Agreements

New rebate agreements are those individual rebate agreements between a manufacturer and a State that are entered into on or after November 6, 1990, and specifically authorized by HCFA. Section 1927(a)(1) of the Act provides that the manufacturer may enter into a rebate agreement with the Secretary on behalf of a State, or the Secretary may authorize a State to enter directly into a rebate agreement with a manufacturer, thus providing an alternative to the national rebate agreement.

In accordance with section 1927 of the Act, HCFA would authorize State Medicaid agencies to enter directly into new agreements with drug manufacturers. However, we would apply the requirements in section 1927(a)(4) to these new State manufacturer agreements, that is, the agreements must provide rebates at least as large as those required under the national rebate agreement, and the State must agree to report any rebates under the agreement to HCFA. Therefore, we would require in § 447.510(c)(4) that the State include with its agreement authorization request to HCFA a written assurance from the manufacturer that the agreement provides rebates that equal or exceed the rebate amounts specified in the national agreement.

We believe this additional verification of the rebate amounts specified in the new agreement would be necessary since these contracts can differ in form and content in each State. A written assurance from the manufacturer would be evidence that both parties certify that the rebate amounts under the new agreement meet or exceed the rebate amounts in the national agreement.

We would not authorize individual State agreements that provide for rebates less than those required under the national agreement. In our opinion, such agreements are contrary to our understanding of Congressional intent to maximize program savings while expanding access to covered outpatient drugs. Thus, since there is little or no additional benefit for either the States or HCFA to authorize these types of individual agreements, which would increase Medicaid drug costs without offsetting national rebate savings, we would not approve such agreements.

C. Length of Agreements

We would specify in § 447.512(a) that the initial period of an existing State/manufacturer agreement and a new State/manufacturer agreement is the period specified in the agreement, and that the national rebate agreement is effective for an initial period of at least 1 year. While we would not require a 1-year timeframe for the initial period in a new State/manufacturer agreement, we recommend its use to avoid administrative delays from HCFA reviewing new agreements with shorter timeframes. More frequent reviews add to unnecessary administrative costs and burdens for all parties involved.

Under this section we also would specify that the national agreement will be automatically renewed for successive periods of at least 1 year unless (1) HCFA terminates the agreement under the conditions specified in section 1927(b)(4)(B)(i) of the Act; or (2) the manufacturer terminates the agreement for any reason as permitted under section 1927(b)(4)(B)(ii) of the Act.

D. Termination of Agreements

1. Termination by HCFA

In accordance with section 1927(b)(4)(B)(i) of the Act, a rebate agreement may be terminated by the Secretary if the manufacturer violates the requirements of the agreement or for "other good cause shown." HCFA has been delegated the Secretary's authority under section 1927(b)(4)(B) to provide for termination of a rebate agreement. We would interpret "other good cause shown" to be any violations of the provisions of the national rebate agreement, section 1927 or the related regulations, or the persistent failure to provide timely information on pricing and other required information or to pay timely rebates. HCFA would send a written notice of the decision to terminate the agreement to the manufacturer. HCFA would also notify State agencies of the termination. The termination would not be effective earlier than 60 days after the date a notice of the termination is sent to the manufacturer (§ 447.514(b)). If a manufacturer is dissatisfied with a termination decision made by HCFA, the manufacturer may request a hearing (as specified in section II.D.5. of this preamble). However, a request for a hearing would not delay the effective date of the termination.

2. Termination by the Manufacturer

In accordance with section 1927(b)(4)(B)(ii) of the Act, the manufacturer may terminate its rebate agreement for any reason. Section 601(b)(4) of VHCA amended section 1927(b)(4)(B) of the Act to provide that any such termination not be effective until the rebate period beginning at least

60 days after the date the manufacturer provides notice to the Secretary. A termination notice from a manufacturer is considered a request to end its participation in the national rebate agreement with the understanding that there is a delay before reinstatement (as discussed in section II.D.4. of this preamble).

We would provide in § 447.514(c)(1) that a manufacturer that wishes to terminate an agreement must provide to HCFA a written notice of intent to terminate at least 60 days before the beginning of the rebate period in which the termination will occur. We would specify that the effective date of a requested termination will be the first day of the first rebate period beginning at least 60 days after the manufacturer gives written notice requesting termination, or a later date if specified by the manufacturer. We would specify in § 447.514(c)(3) that the date of notice will be considered to be the postmark date of the U.S. Postal Service or common mail carrier.

If the manufacturer fails to terminate the agreement at least 60 days before the renewal date, the automatic renewal provisions of section 1927(b)(4)(A) would be effective and the agreement would not terminate until the rebate period following the renewal. For example, if a manufacturer intended to terminate the rebate agreement effective January 1, 1994, HCFA must have received the written notice on or before November 1, 1993. Otherwise, if HCFA received the notice on November 15, 1993, the termination date would be April 1, 1994 (the first day of the first rebate period beginning at least 60 days after receipt of the notice).

Any termination would not affect rebates due under the agreement before the effective date of the termination.

3. Nonrenewal of Rebate Agreement

To effectuate sections 1927(b)(4)(A) and (b)(4)(B)(ii) of the Act, we would require in § 447.514(c)(2)(i) that a manufacturer give written notice of its decision not to renew the rebate agreement (nonrenewal notice) at least 60 days before the end of the current agreement period. (We would consider the date a manufacturer gives written notice of its decision not to renew to be the date of the postmark of the U.S. Postal Service or common mail carrier (§ 447.514(c)(3)).) If HCFA receives a manufacturer's nonrenewal notice at least 60 days before the end of the agreement period, the nonrenewal would be effective on the ending date of the agreement period. This 60-day period would give HCFA the time needed to notify States that the manufacturer's drugs are no longer eligible for FFP under Medicaid.

If the manufacturer fails to meet this 60-day advance notice requirement, the agreement would be automatically renewed for another 1-year term. In this case, HCFA would deem the nonrenewal notice a termination notice because the manufacturer missed the nonrenewal deadline. Therefore, in accordance with the regulations at § 447.514(c)(2)(ii)(B), HCFA would terminate the rebate agreement effective the second calendar quarter of the renewed agreement period.

4. Reinstatements

Section 1927(b)(4)(C) of the Act provides that, if a rebate agreement is terminated, another agreement with the manufacturer (or a successor manufacturer) may not be entered into until a period of 1 calendar quarter has elapsed from the date of the termination, unless the Secretary finds good cause for an earlier reinstatement of the agreement. We would incorporate this provision in § 447.514(d) of our regulations. For example, if HCFA received a written notice on October 1, 1993, to terminate an agreement, the rebate agreement would be terminated on January 1, 1994, and a manufacturer could not enter into another agreement until April 1, 1994, unless HCFA finds good cause to do otherwise. An example of good cause might be if a manufacturer's drug is medically necessary to a significant number of Medicaid recipients and there is no therapeutic substitute available.

5. Opportunity for Appeal

Section 1927(b)(4)(B) of the Act provides that the Secretary must provide a manufacturer with a hearing concerning a termination of a rebate agreement if the manufacturer requests one. In accordance with this section of the Act, we would provide in § 447.514(b)(4) that, if a manufacturer is dissatisfied with a termination of a rebate agreement by HCFA, the manufacturer may appeal the termination under the administrative procedures specified in the contract provision in the rebate agreement. We believe the appeal procedures specified in the national rebate agreement afford manufacturers the due process rights to which they are entitled under section 1927 of the Act, since the process provides a written notification process, the right to appeal the termination and, if applicable, a hearing before a HCFA official or other party.

Section 1927(b)(4)(B)(i) of the Act also requires that the hearing not delay the effective date of the termination. Accordingly, we would provide in § 447.514(b)(4) that, while manufacturers have the right to an administrative hearing, such a hearing would not delay the effective date of the termination.

6. Notice to States

Section 601(b)(4) of VHCA added section 1927(b)(4)(B)(iv) of the Act, which provides that in the case of a termination of a manufacturer, the Secretary will provide notice of the termination to the States not less than 30 days before the effective date of the termination. In accordance with this section of the Act, we would provide in § 447.514(f) that HCFA will notify States of any termination from the drug rebate program at least 30 days prior to the effective date of the termination.

III. Drugs Covered Under the Rebate Agreement

A. Rebated and Non-Rebated Drugs

Sections 1927(k)(2) and (k)(4) of the Act specify the covered outpatient drugs that are subject to rebate agreements. Covered outpatient drugs are defined as (1) those drugs that may be covered as prescribed drugs under Medicaid under section 1905(a)(12) of the Act, are dispensed only upon prescription (except over-the-counter drugs), and that meet certain requirements specified in sections 1927(k)(2)(A)(i) through (iii) of the Act; (2) a biological product other than a vaccine that may be dispensed only upon prescription, is licensed under section 351 of the Public Health Service Act, and is produced at an establishment licensed under section 351 to produce such products; (3) insulin certified under section 506 of the Federal Food, Drug, and Cosmetic Act; and (4) "over-the-counter" drugs that are prescribed by a physician or other person authorized to prescribe under State law, if the State provides for coverage of these drugs as prescribed drugs under its approved State plan. We would add this definition to § 447.516(a) of our regulations.

We would require in § 447.516(b) that a manufacturer submit as part of its rebate agreement a listing of all of its drugs that fall within the definition of covered outpatient drugs in sections 1927(k)(2) through (k)(4) of the Act. We also would require use of National Drug Code (NDC) numbers to identify the drugs.

We would interpret "covered outpatient drug," as defined in section 1927(k)(2) of the Act, to include all covered outpatient drugs for which that manufacturer holds legal title to the NDC number. The statutory definition encompasses all FDA-approved prescription drugs and biologicals except for vaccines or drugs that fall within the limiting definition in section 1927(k)(3) of the Act (§§ 447.504 and 447.516(b)(2)). Manufacturers that have entered into the national rebate agreement have agreed to submit a listing of all covered outpatient drugs, not a partial listing. Therefore, in accordance with the statute and the provisions of the national rebate agreement, manufacturers that enter into a rebate agreement could not exclude any covered outpatient drug specified in section 1927(k) of the Act from its listing of covered outpatient drugs.

Even though States may choose to exclude or restrict certain drugs under section 1927(d) of the Act (as discussed in section IV.B of this preamble), the drugs may be covered in other States or covered by that State at a later date. Therefore, a manufacturer would be required to list by NDC number all of its covered outpatient drugs, regardless of whether its drugs are dispensed or covered by Medicaid programs in all States. In addition, HCFA would not allow a manufacturer to withhold its covered outpatient drugs from being subject to the rebate provisions, regardless of whether the drugs are sold by the manufacturer's subsidiaries or parent company, as discussed in section I.A. of this preamble.

In § 447.522(a), we would provide for an exclusion from the definition of covered outpatient drugs consistent with section 1927(k)(3) of the Act. Section 1927(k)(3) of the Act, as amended by section 13602(a)(2)(B)(ii) of OBRA '93, provides certain exclusions from the definition of covered outpatient drugs. This section specifies that covered outpatient drugs do not include "any drug, biological product, or insulin provided as part of, or as incident to and in the same setting as, any of the following (and for which payment may be made under [Medicaid] as part of payment for the following and not as direct reimbursement for the drug): Inpatient hospital services; hospice services; dental services (except that drugs for which the State plan authorizes direct reimbursement to the dispensing dentist are covered outpatient drugs); physicians' services; outpatient hospital services; nursing facility services and services provided by an intermediate care facility for the mentally retarded; other laboratory and x-ray services; and renal dialysis" (§ 447.522(a)).

The term "covered outpatient drug" also would not include any such drug, biological product, or insulin for which an NDC number is not required by the FDA that is used for an indication that is not "medically accepted" (§ 447.522(b)). A medically accepted indication is defined under section 1927(k)(6) of the Act, as amended by section 13602(a)(2)(B)(iii) of OBRA '93, as any use for a covered outpatient drug that is approved under the Federal Food, Drug and Cosmetic Act, or the use of which is supported by one or more citations included or approved for inclusion in any of the following compendia: The American Hospital Formulary Service-Drug Information, the American Medical Association Drug Evaluations, and the United States Pharmacopeia-Drug Information. We would incorporate this definition in § 447.504 of our regulations.

There are additional drugs and biologicals that do not fall within the definition of covered outpatient drugs set forth in section 1927(k) of the Act. These drugs are not subject to rebates, although Medicaid coverage may be provided under section 1905(a)(12) of the Act at State option, and FFP is available. Generally, these additional drugs and biologicals that do not fall within the section 1927(k) definition are discussed below and would be specified in § 447.522(c) through (g) of the regulations. We do not consider this a definitive list due to the vast nature of drugs and biologicals regulated by the FDA and the unique situations that exist for particular products. Drugs that fall outside of the scope of section 1927 of the Act would not be considered covered outpatient drugs and, therefore, would not be subject to rebate.

- Any drug, biological product, or insulin for which an NDC number is not required by the FDA would not meet the definition of a covered outpatient drug in section 1927(k) and, therefore, would not be subject to a rebate as a condition of FFP. This would include whole blood (collected from a single human donor) and blood components (which are the result of physical or mechanical separation either as part of the collection process or subsequent to the collection of whole blood).
- Medical items and supplies, such as syringes (except insulin-filled syringes), urine and blood glucose testing strips and devices, lancets, and inhalers (except pre-filled inhalers) do not meet the definition of covered outpatient drugs in sections 1927(k)(2) through (k)(4) of the Act and, therefore, would not be subject to a rebate as a condition of FFP.
- Certain nutritional products that are regulated as drugs would be covered under the rebate program. Parenteral products that are administered intravenously are approved as drugs by the FDA under section 505 of the Federal Food, Drug, and Cosmetic Act. These parenteral products that are approved as drugs, are administered intravenously, and meet the definition of a covered outpatient drug in accordance with section 1927(k) of the Act would be subject to a rebate as a condition of FFP. Parenteral products that are not administered intravenously are regulated as "foods" by the FDA and would not meet the definition of a covered outpatient drug.
- Enteral nutrition products that are not approved by FDA as a drug under sections 505, 506, or 507 of the Federal Food, Drug, and Cosmetic Act would not be considered covered outpatient drugs under section 1927(k)(2)(4) of the Act, and would not be subject to rebate.

HCFA has permitted States the option to cover enteral nutrition products that are not approved as a drug by the FDA, under Medicaid benefit categories other than prescription drugs. These categories include outpatient hospital services, home health services, clinic services, and rural health clinic services. The nutrient products may be covered in these settings as a medical supply. These supplies would not be considered covered outpatient drugs and, therefore, would not be subject to rebate.

- States have the option to cover under their Medicaid program investigational new drugs (IND) (for example, Treatment IND drugs, Parallel Track, and Group C cancer drugs). (State Medicaid programs often use the term "experimental" when referring to these types of drugs.) Since section 1927 of the Act made no changes to a State's previous ability to cover these drugs, FFP continues to be available for these drugs. However, because they do not meet the definition of covered outpatient drugs in sections 1927(k)(2) through (4) of the Act, they would not be covered under the drug rebate program or subject to a rebate.

B. Definitions of Drug Categories

As defined in section 1927(k)(7)(A)(iv) of the Act, "single source drug" means a covered outpatient drug that is produced or distributed under an original new drug application (NDA) approved by the FDA, including a drug product marketed by any cross-licensed producers or distributors operating under the NDA. (Section III.C.3. of this preamble contains the definition of original new drug application.) Section 1927(k)(7)(A)(i) of the Act defines "multiple source drug" as a covered outpatient drug for which there are two or more drug products that are—

- Rated as therapeutically equivalent by the FDA under its most recent publication of*Approved Drug Products with Therapeutic Equivalence Evaluations;*
- Are pharmaceutically equivalent and bioequivalent as determined by the FDA; and
- Are sold or marketed in the State during a calendar quarter.

Drugs are pharmaceutically equivalent if the products contain identical amounts of the same active drug ingredient in the same dosage form and meet compendial or other applicable standards of strength, quality, purity, and identity.

Drugs are bioequivalent if they do not present a known or potential bioequivalence problem, or if they do present such a problem, they are shown to meet an appropriate standard of bioequivalence. (This condition does not apply if FDA changes by regulation the requirement that in order for drug products to be rated as therapeutically equivalent, they must be pharmaceutically equivalent and bioequivalent.)

Sections 1927(k)(7)(A)(ii) and (iii) of the Act define "innovator multiple source drug" as a multiple source drug that was originally marketed under an original NDA approved by the FDA and "noninnovator multiple source drug" as a multiple source drug that is not an innovator multiple source drug. To clarify the statutory definition, we would further define multiple source drugs to distinguish the differences between an innovator multiple source drug and a noninnovator multiple source drug.

In accordance with our understanding of Congressional intent, we would define an "innovator multiple source drug" as a multiple source drug from 1938 to present that was originally marketed under an original NDA approved by the FDA. We would define a "noninnovator multiple source drug" as a multiple source drug that was marketed under an abbreviated NDA or any marketed, unapproved pre-1938 drug product for which the FDA has not made a final determination about its legal status. This would include (1) all products approved under an abbreviated NDA (authorized under the Drug Price Competition and Patent Term Restoration Act of 1984, Public Law 98–417), paper NDA under the FDA's former "Paper NDA" policy (54 FR 28873), or an application under section 505(b)(2) of the Federal Food, Drug, and Cosmetic Act; and (2) any marketed, unapproved pre-1938 drug product that has not been evaluated under the new drug provisions of the Federal Food, Drug and Cosmetic Act. (§ 447.504)

C. Treatment of New Drugs

1. Elimination of New Drug Coverage Under OBRA '93

OBRA '93 eliminated all special requirements for new drugs by deleting the former section 1927(d)(6) of the Act. That section provided that a State may not exclude, subject to prior authorization, or otherwise restrict from coverage under the rebate program any new drug or biological approved by the FDA after the date of enactment of OBRA '90 (November 5, 1990) for a period of 6 months after the date of FDA approval. OBRA '93 also deleted the references to new drugs in section 1927(d)(1)(A) and (d)(3) of the Act.

Section 13602(d)(2) of OBRA '93 provided that amendments to section 1927(d) of the Act are effective with rebate periods beginning on or after October 1, 1993. That is, effective October 1, 1993, States may exclude or restrict from coverage or prior authorize any new drugs approved by the FDA. In accordance with section 13602(d)(2), new drugs approved by the FDA prior to October 1, 1993 may only receive the unrestricted coverage specified in former section 1927(d)(6) of the Act through the rebate period ending September 30, 1993. Beginning October 1, 1993 the unrestricted coverage no longer applies to these new drugs.

2. New Drug Coverage Provision in Effect for January 1, 1991–September 30, 1993

(Note: The discussions of sections 1927(d)(1), (3), and (7) throughout this section III.C.2. of the preamble pertain to any amendments made by OBRA '93.)

Prior to OBRA '93, section 1927(d)(6) of the Act provided that a State may not exclude, subject to prior authorization, or otherwise restrict from coverage under the rebate program any new drug or biological approved by the FDA after the date of enactment of OBRA '90 (November 5, 1990) for a period of 6 months after the date of FDA approval. Except as authorized in section 1927(d)(1) and (2) of the Act for the period of January 1, 1991–September 30, 1993, States must have covered these drugs with no restrictions for 6 months from the date of FDA approval, regardless of when the manufacturer began to market the drugs. We would incorporate these provisions in § 447.520(a) of our regulations. For purposes of these provisions, we did not consider a delay in the marketing of a new drug following FDA approval a cause for extending the 6-month period.

The mandatory coverage provisions of section 1927(d)(6) of the Act did not encompass those drugs that a State may exclude under sections 1927(d)(1) and (d)(2) of the Act. Sections 1927(d)(1) and (d)(2) provide that a State may exclude or otherwise restrict coverage of a covered outpatient drug if the drug is used to treat, for example, anorexia, weight gain, hair loss, or cough or cold symptoms. Section 1927(d)(2), when read in conjunction with sections 1927(d)(1) and 1927(k)(2) of the Act, circumscribes those covered outpatient drugs that must be covered by States under their State plan. In other woads, the mandatory coverage provisions of section 1927(d)(6) did not affect those drugs that a State may exclude or otherwise restrict under sections 1927(d)(1) or (d)(2).

In addition, we would provide under § 447.520(c) of the regulations that coverage of new drugs between January 1, 1991 and September 30, 1993 for the first 6 months after approval by the FDA would not be available for manufacturers that did not have agreements in existence with HCFA for this 6-month time period, since section 1927(a) of the Act provides FFP only for covered outpatient drugs of manufacturers with rebate agreements. However, if the new drug is rated as 1–A, section 1927(a)(3) of the Act authorizes payment, at State option, for certain 1–A drugs not covered under a rebate agreement. (Section III.D.1 of this preamble contains a discussion of 1–A drugs.)

Before the enactment of OBRA '93, sections 1927(d)(1) and (d)(6) of the Act provided that a State may not subject a new drug to prior authorization during the 6-month period after FDA approval. If the State chose to cover a new drug or class of drugs that was listed in section 1927(d)(2) of the Act, it could not prior authorize a new drug within that category during the 6-month period. After the 6-month period, a drug that was considered a new drug could be subject to the prior authorization provisions of section 1927(d)(1) at State option. We would incorporate these provisions in § 447.520(b) of our regulations.

Before the enactment of OBRA '93, section 1927(d)(3) of the Act prohibited new drugs from being added to the list of drugs subject to restriction in section 1927(d)(2) during the 6-month period specified in section 1927(d)(6). After the 6-month period, new drugs could be added to the list, as discussed in section IV.B.2. of this preamble.

Before the enactment of OBRA '93, section 1927(d)(7) of the Act permitted a State to impose limitations on all drugs in a therapeutic class, on the minimum or maximum quantities per prescription, or on the number of refills, provided such limitations are necessary to discourage waste. We believe that to effectuate Congressional intent, sections 1927(d)(6) and 1927(d)(7) of the Act must have been read in concert to discourage waste in the use of new drugs during the 6-month period after FDA approval. Section 1927(d)(7), in our opinion, permitted States to impose limitations on all drugs, including new drugs, in a therapeutic class, on the minimum or maximum quantities per prescription, or on the number of refills, provided such limitations were necessary to discourage waste.

We believe such an interpretation would be consistent with the statutory provisions in both section 1927(d)(6) and section 1927(d)(7). We believe the Congress mandated that States could not exclude from coverage, subject to prior authorization, or otherwise restrict a new drug for 6 months from FDA approval to ensure that medically necessary new drugs were made available to the general population. The limitations for waste in section 1927(d)(7) of the Act did nothing to discourage the proper prescribing, dispensing, and use of a new drug. They simply ensure that, for Medicaid recipients, the minimum supply of the drug is sufficient to be medically effective and economical and that the maximum supply of the drug discourages waste in the event the drug cannot be used (for example, because of allergic reactions, side effects, drug interaction, or other reasons of medical necessity). The foregoing would give effect to the provisions in both section 1927(d)(6) and section 1927(d)(7) and, thus, would uphold the intent of the Congress as set forth in the statute. (See section IV.C. of the preamble for a discussion of a State's attorney authority to impose limitations as amended by OBRA '93.)

3. Definition of Original New Drug Application (NDA)

Sections 1927(k)(7)(A)(ii) and (iv) of the Act reference the term "original NDA" in the definitions of "innovator multiple source drug" and "single source drug." Under the national rebate agreement, a drug marketed under an original NDA, in addition to other criteria, may be classified as either a single source or an innovator multiple source drug. Neither the statute nor the rebate agreement, however, define the term "original NDA." This term is also not defined in the Federal Food, Drug, and Cosmetic Act.

Because the statute does not provide specific guidance on this term, we would interpret it to comport with our understanding of the intent of the Congress. We would define in regulations at § 447.504 the term "original NDA" as an FDA-approved drug or biological application that received one or more forms of patent protection, patent extension under title II of Public Law 98–417, the Drug Price Competition and Patent Term Restoration Act, or marketing exclusivity rights granted by the FDA. This definition would include an NDA, an amended NDA, an antibiotic drug application (ADA), an amended ADA, a product license application (PLA), and an amended PLA.

Based on the statute, which requires larger rebates for single source and innovator multiple source drugs, we believe the term "original NDA" was included in sections 1927(k)(7)(A)(ii) and (iv) of the Act for the purposes of extracting larger rebates from those products that received some form of patent or marketing protection for a specific period of time. This form of protection could have been achieved through either some type of patent on the drug or some type of marketing exclusivity rights granted by the FDA.

Patent protection is generally granted for 17 years. Exclusivity rights generally run for a period of 3 to 7 years and are granted by the FDA for such innovations as new medical indications, new dosage strengths, new dosage forms, new regimens, or new routes of administration. Exclusivity rights can extend beyond the life of the patent and protect the manufacturer from competition in one or more specific market areas. Thus, the innovators of drug products with market protection often benefitted from a lack of competition and increased profits for a specific period of time. Therefore, innovators with market protection are required to pay larger rebates than noninnovators that produce generic drugs with no market protection. We believe the term "original NDA," as proposed above, produces this effect.

The rebate classification system has raised questions among manufacturers regarding how to classify certain products. We believe some drugs that appear to meet the rebate agreement's definition of innovator multiple source drug are actually noninnovator multiple source drugs. The FDA may consider a previously approved drug product to be a new drug and require an NDA before marketing. However, in accordance with our understanding of these provisions, this drug may actually be a noninnovator. For example, under 21 CFR 310.509, the FDA does not generally recognize any parenteral drug product packaged in a plastic immediate container as safe and effective. Therefore, this type of drug product is considered a new drug within the meaning of section 201(p) of the Federal Food, Drug, and Cosmetic Act and requires an approved NDA as a condition for marketing. In this case, if no patent protection or marketing exclusivity rights were granted by the FDA for the covered outpatient drug of that manufacturer, we would consider it to be a noninnovator multiple source drug.

D. Covered Drugs of Manufacturers Without Rebate Agreements

1. Coverage of 1–A Rated Drugs

Prior to 1992, the FDA maintained a rating system under which drugs were rated based on various factors. Under that system, the FDA rating "1–A" signified the chemical type (1) and the therapeutic potential (A). The FDA, in its 1991 publication *Offices of Drug Evaluation Statistical Report,* defined the rating 1–A as follows:

- The chemical type "1" identifies the drug as a new molecular entity, that is, a drug for which the active moiety has not been previously marketed in the United States for use in a drug product, either as a single ingredient or as part of a combination product, or as part of a mixture of stereoisomers. The term "new molecular entity" is equivalent to "new chemical entity".
- The therapeutic potential type "A" is defined as a drug with important therapeutic gain. The drug may provide effective therapy or diagnosis for a disease not adequately treated or diagnosed by any marketed drug, or provide improved treatment of a disease through improved effectiveness or safety (including decreased abuse potential).

A 1–A drug may also be labeled "1–A/AA". The 1–A/AA designation means it is a 1–A drug that is generally being developed for AIDS and AIDS-related opportunistic infections and that the FDA has placed the drug on a fast track and will monitor it through the drug review process.

Section 1927(a)(3)(A) of the Act authorizes FFP for single source or innovator multiple source drugs rated by the FDA as 1–A that are furnished by manufacturers without rebate agreements if certain conditions are met. Under this section, Medicaid payments may be made if: (1) The State has determined that the availability of the drug is essential to the health of recipients under the approved State plan; and (2) the physician has obtained approval for use of the drug before it is dispensed in accordance with a prior authorization program, or the Secretary has approved the State's determination regarding drug necessity to obviate the need for prior authorization (§ 447.518(b)). Necessity would be judged based on alternative therapies available and the probable outcome if a specific drug is not dispensed.

Even though section 1927(a)(3) of the Act authorizes HCFA to provide FFP for 1–A rated drugs under certain circumstances, States retain the option under sections 1902(a) and 1905 of the Act to choose which 1–A drugs they will cover under their approved State Medicaid plans.

The FDA recently changed its therapeutic classification system in which drugs were rated as either A, B, or C. As indicated in the FDA's *Staff Manual Guide*, Center for Drug Evaluation and Research, this three-tiered system has been replaced by a mutually exclusive two-tiered system in which the potential therapeutic classification of a drug product is either a Type P (Priority review, therapeutic gain) or a Type S (Standard review, substantially equivalent drug product). Type P is assigned to drugs that appear to represent a therapeutic gain over already marketed or approved drugs (formerly rated A or B). Type S is assigned to drug products that appear to have therapeutic qualities similar to drugs already approved or marketed (formerly rated C).

The Type P and S therapeutic classification system is effective for all NDAs approved on or after January 1, 1992. The classifications for NDAs approved prior to January 1, 1992, will remain unchanged, that is, these drugs will retain their A, B, or C therapeutic classification and 1–A drugs would continue to be covered by States as specified in this regulation. For purposes of section 1927(a)(3)(A) of the Act, we are inviting public comments on possible methods to identify 1–P-rated drugs that we could include as 1–A-drugs under this provision using the FDA's former classification system.

2. Coverage of Drugs During the First Rebate Period of 1991

Section 1927(a)(3)(B) of the Act provides for Medicaid payment for drugs not covered under rebate agreements if the Secretary determined that in the first rebate period of 1991 there were extenuating circumstances. On March 8, 1991, HCFA notified all State Medicaid Directors of its determination that extenuating circumstances did exist and that, for the first rebate period of 1991, outpatient prescribed drugs of manufacturers without rebate agreements were covered under Medicaid if they were included in the approved State Medicaid plan. States were not formally notified until March 15, 1991, of manufacturers participating in the rebate program. There was no practical way States could retroactively discontinue drug coverage on January 1, 1991, for drugs of nonparticipating manufacturers. However, as of April 1, 1991, FFP is available only for those covered outpatient drugs of manufacturers with rebate agreements.

Section 1927(a)(1) of the Act required that manufacturers enter into a rebate agreement by March 1, 1991, for payment to be available for their drugs under Medicaid for the January–March 1991 rebate period. As discussed earlier, HCFA also extended through April 30, 1991, the deadline for manufacturers to enter into rebate agreements that are retroactive to January 1, 1991.

IV. Limitations on Coverage of Drugs

Section 1927(d) of the Act, as amended by OBRA '93, permits States to place certain limitations on drugs that are covered under a rebate agreement. States may limit the coverage of drugs by: (1) Implementing a prior authorization program that complies with the requirements in section 1927(d) (5); (2) restricting or excluding from coverage drugs listed in section 1927(d) (2); (3) restricting the quantities of outpatient drugs per prescription and the number of refills under section 1927(d) (6); and (4) excluding coverage of the drug from its formulary in accordance with section 1927(d)(4). These limitations, that are proposed in the regulations at §§ 447.524 and 447.526, are explained below.

A. Prior Authorization

Section 1902(a)(54) of the Act provides that in the case of a State plan that provides medical assistance for covered outpatient drugs (as defined in section 1927(k) of the Act), the State must comply with the applicable requirements of section 1927 of the Act. Section 1927(d)(1)(A) provides that a State may subject any covered outpatient drug to prior authorization; that is, require approval of the drug before its dispensing for any medically accepted indication. The prior authorization system must meet two conditions specified under section 1927(d)(5) of the Act.

For drugs dispensed on or after July 1, 1991 section 1927(d)(5) of the Act permits a State to maintain a prior authorization program if the State responds by telephone or other telecommunication device to requests within 24 hours of a request for prior authorization. A State must, except for those drugs listed in section 1927(d)(2) of the Act, further provide for the dispensing of at least a 72-hour supply of the drug in emergency situations.

The provisions in section 1927 of the Act make no other changes to the State's ability to maintain or establish prior authorization programs. Thus, as specified in section 1927(d)(1) of the Act, States may subject to prior authorization any covered outpatient drug.

In passing these provisions, the Congress made it clear that Medicaid recipients should be assured access to all medically necessary covered outpatient drugs. (H. R. Rep. No. 881, 101st Cong., 2d Sess. 96–98 (1990).) Even though OBRA '93 added section 1927(d)(4) of the Act to allow States to establish formularies which meet specific requirements, section 1927(d)(4)(D) provides that the State plan must permit coverage of a drug excluded from the formulary (other than any drug excluded or restricted under section 1927(d)(2)) pursuant to a prior authorization program. In accordance with our understanding of Congressional intent, we believe that it is necessary to prevent States from using a prior authorization program as a proxy for a closed formulary beyond what the statute allows under the formulary provisions of section 1927(d)(4). In addition, we believe it is necessary to ensure that States respond to prior authorization requests within the timeframes specified in the statute. We believe these requirements are necessary to effectuate section 1927 of the Act and to uphold Congressional intent.

Prior authorizing drugs as a proxy for a closed formulary, beyond what the statute allows under the formulary provisions of section 1927(d)(4) without regard for medical necessity could result in recipients being treated with alternate therapies that may not be in their best interest. This could result in increased program costs if other medical services, such as inpatient hospital services, are necessary because a drug therapy is made less accessible under the State Medicaid program. Thus, a recipient's access to medically needed drugs could be unduly hampered if medical necessity is not used in a prior authorization program.

Therefore, we are proposing requirements to ensure that States utilize individuals with the appropriate level of medical expertise when determining which drugs are prior authorized and when deciding if the drug can be dispensed. Accordingly, we

believe it most appropriate that the level of expertise be reflected by the ability to prescribe/dispense drugs. We believe individuals with this knowledge would more likely be aware of negative consequences that could result if a specific drug is prior authorized or not approved for dispensing. Thus, the State Medicaid program and recipients would benefit from such a prior authorization system that considers medical necessity as its primary concern.

We note that this same level of expertise need not be present in those individuals responding to the prior authorization requests, as these persons would be acting in accordance with guidelines developed by those persons who place the drugs on prior authorization. However, as there may be requests for prior authorized drugs that do not fit into present guidelines, access to those persons responsible for putting drugs into a prior authorization program is needed.

Therefore, in accordance with section 1902(a)(54) of the Act, we would specify in these regulations at § 447.526(d) and (e) that:

- State staff who place drugs in a prior authorization system must be licensed to prescribe or dispense drugs in the State, for example, physicians or pharmacists, since these persons would have the medical knowledge necessary to determine criteria for prior authorization.
- State staff who respond to prior authorization requests are not limited to persons licensed to prescribe or dispense drugs as long as all decisions involving drugs subject to prior authorization are made—
  - + In consultation with these licensed professionals; or
  - + Under guidelines promulgated by such individuals as long as States provide access to licensed professionals in difficult or unusual cases.
- The State must establish a process to ensure recipients access to medically necessary covered outpatient drugs. We would not permit a State to use a prior authorization program as a means to deny covered outpatient drugs when medical necessity is shown.
- The State must provide annual written assurances to HCFA that the State's prior authorization program does not prevent recipients from gaining access to medically needed drugs.

Generally, we would allow States flexibility in implementing the statutory provisions relating to a 24-hour turnaround time for prior authorization requests and at least a 72-hour supply for emergency situations. For example, States may continue to prescribe the format for sending the request (for example, mail, telephone, or telefax). States may also continue to staff this function only during normal business hours, provided the requirement concerning a response to prior authorization requests within 24 hours of a request can be met.

However, to ensure access to medically necessary drugs, we would require States to structure their system so that, in emergency situations, a State's response is given to the dispenser or physician requesting the authorization before the emergency supply is exhausted. In these emergency situations, we would require the State to provide a mechanism so that a dispenser or physician can make a prior authorization request 24 hours before the supply is exhausted and a response returned by the State within that 24-hour period. We would require the State to allow a dispenser to provide a sufficient emergency supply (of at least 72 hours) until the prior authorization response can be returned to the dispenser. For example, the supply of a drug dispensed on Friday evening should not be exhausted before the prior authorization is requested on Monday morning and a response returned to the requester by the State on Tuesday morning (within 24 hours of a request).

We would allow States to develop a reasonable definition of emergency situations, as long as the definition does not prevent recipients from acquiring medically necessary covered outpatient drugs within the parameters set forth below. We would require in § 447.526(c)(2)(i) that States specify in their State plans the process that will be used to determine what constitutes an emergency situation. Emergency situations may involve immediate and severe adverse consequences or continuation of an immediate and severe adverse consequence if a covered outpatient drug is not dispensed when a prescription is submitted. We would not consider an emergency situation to exist if (1) the lack of a drug supply does not pose an immediate threat to the recipient, or (2) a drug must be prior authorized before it can be dispensed if there is no immediate threat to the recipient.

B. Exclusion or Restriction of Drugs

1. Drugs Subject to Restriction

Section 1905(a)(12) of the Act and regulations at 42 CFR 440.120 define prescribed drugs that may be covered by a State under its Medicaid program. Existing regulations under § 441.25 contain prohibitions on FFP for certain prescribed drugs. Except for covered outpatient drugs defined in section 1927 of the Act, these rules are not affected by the requirements for rebate agreements as a condition of FFP. This proposed rule would implement, in part, the provisions of section 1927(d)(2) of the Act, which specify the specific drugs or classes of drugs that States may exclude or restrict from coverage.

As noted previously in this preamble, section 1927(d)(1)(B) of the Act as amended by OBRA '93 specifies conditions under which a State may exclude or restrict coverage of an outpatient drug under a drug rebate agreement. A State may exclude or restrict a drug if—

- The prescribed use of the drug is not for a medically accepted indication;
- The drug is contained in the list of drugs subject to restriction under section 1927(d)(2) of the Act;
- The drug is subject to restrictions in a separate or existing agreement between a manufacturer and a State agency that has been authorized by HCFA under sections 1927(a)(1) of the Act or in effect in accordance with section 1927(a)(4) of the Act (§ 447.524(b)); or
- The State has excluded coverage of the drug from its formulary established in accordance with the requirements for formularies specified in section 1927(d)(4).

Section 1927(d)(2) limits a State's option to exclude or restrict drugs from coverage under the rebate program to the following drugs, classes of drugs, or their medical uses:

- Agents when used for anorexia, weight loss or weight gain.
- Agents when used to promote fertility.
- Agents when used for cosmetic purposes or hair growth.
- Agents when used for the symptomatic relief of cough or colds.
- Agents when used to promote smoking cessation.
- Prescription vitamins and mineral products, except prenatal vitamins and fluoride preparation.
- Nonprescription drugs.
- Covered outpatient drugs that the manufacturer seeks to require as a condition of sale that associated tests or monitoring services be purchased exclusively from the manufacturer or its designee.
- Barbiturates.
- Benzodiazepines.

We would allow States flexibility in specifying the drugs and medical uses that fall within these descriptions. We do not intend to further identify or define these drugs at this time. We would allow States to exclude or restrict drugs that fall within these descriptions. However, when a drug that is primarily formulated to treat a medically accepted indication not included on the list set forth in section 1927(d)(2) of the Act is also prescribed for a medical use included in section 1927(d)(2), that use of the drug for the medically accepted indication outside of section 1927(d)(2) would not be excludable. For example, a drug that is primarily formulated to treat asthma or some condition other than coughs and colds should not be excluded for the treatment of asthma. However, a State could prior authorize the drug and exclude or restrict it if the drug is prescribed for a cough or cold in an individual case.

We would require in § 447.524(g) that a State amend its State Medicaid plan to include a list of those drugs or classes of drugs or medical uses under section 1927(d)(2) of the Act that the State is excluding or restricting from coverage. We would also require a State to describe in its plan limitations or conditions of coverage for these drugs. However, we would not require the State to list those drugs for which it requires prior authorization. We would require States to amend their State plans in this manner to ensure that both HCFA and the public are adequately informed of those drugs covered by various State plans.

2. Updating the List of Drugs Subject to Restriction

a. Adding Drugs to the List. In accordance with section 1927(d)(3) of the Act as amended by OBRA '93, the Secretary must periodically update, by regulation, the list of drugs, classes of drugs, or their medical uses subject to restriction under the rebate program if there is evidence of clinical abuse or inappropriate use. Section 1927(d)(3) provides that the Secretary must update the list on the basis of data collected by the State Medicaid agencies' surveillance and utilization review (SUR) programs. We would incorporate this provision in our regulations at § 447.524(d). As necessary, we will announce a proposed updated list in the **Federal Register** and allow public comment before the list is issued in final.

We request public comments with suggestions on how we should administer a process to determine when a drug, class of drug, or its medical use should be added to the list in section 1927(d)(2) of the Act when the item is subject to clinical abuse or inappropriate use. At a minimum, any suggestions made for the process must take into consideration that we must use SUR data to substantiate any proposal to add an item to the list. In accordance with section 1927(d)(3) of the Act, a SUR report submitted as supporting documentation would need to provide HCFA with the data necessary to make an objective analysis regarding clinical abuse or inappropriate use of an item.

While we currently have reporting requirements for SUR data, we would need to modify them to accommodate the additional information needed to update the list of drugs subject to restriction. These reporting requirements would be addressed in a separate document.

b. Deleting Drugs From the List. Section 1927(d)(3) of the Act provides that the Secretary must "update" the list of drugs subject to exclusion or restriction. In this proposed rule, we would interpret this provision to mean that drugs subject to clinical abuse or inappropriate use may be added to the list. However, we do not believe that section 1927(d)(3) allows the Secretary to delete drugs from the list. That list, set forth in section 1927(d)(2) of the Act, represents drugs that, as noted in the Senate Report, are "commonly subject to exclusion or restriction by State Medicaid programs." (136 *Cong. Rec.*, S15658, daily ed. October 18, 1990) The tenor of that report, as with the statute, is that drugs may be added to the list, but that the categories already on the list will remain subject to State restriction.

An example to reinforce this point can be made with paragraph (H) under section 1927(d)(2) of the Act. Paragraph (H) refers to "covered outpatient drugs that the manufacturer seeks to require as a condition of sale that associated tests or monitoring services be purchased exclusively from the manufacturer or its designee." If we were to conclude that we have the authority to remove any drug from the list if it were not subject to clinical abuse or inappropriate use (as noted in section 1927(d)(3) of the Act), and data were available demonstrating that a product was not subject to clinical abuse or inappropriate use, we would have to remove the drug from the list (regardless of any exclusive arrangement) and require all State Medicaid programs to cover the drug. This result would clearly conflict with the statute and with the legislative history. Accordingly, the drugs on the list would be statutorily mandated and could only be deleted from the list by amendments to the statute.

3. DESI and IRS Drugs

a. The DESI Program. Before enactment of the Federal Food, Drug, and Cosmetic Act of 1938, drugs could be marketed in the United States as long as a drug's label did not present false information regarding the drug's strength and purity. The Federal Food, Drug, and Cosmetic Act first established the requirement that a manufacturer has to prove the safety of a drug before the manufacturer could market it in the United States. In accordance with that statute, drugs marketed before the passage of the Federal Food, Drug, and Cosmetic Act were "grandfathered" so that manufacturers, if they do not change the representations on the drugs' labels, were allowed to continue to market them unless evidence was developed to indicate that they were not safe (referred to as pre-38 drugs). However, once a manufacturer changed the representation on a pre-38 drug's label, that drug was considered by the FDA to be a "new drug" and the manufacturer was required to prove that the drug was safe for its intended use.

In 1962, the Federal Food, Drug, and Cosmetic Act was amended to require that drugs sold in the United States be regulated more closely. Under the provisions of the Drugs Amendments of 1962 (Public Law 87–781), all new drugs must be shown by adequate studies to be both safe and effective before they can be marketed. This legislation also applied retroactively to all drugs approved as safe from 1938 to 1962 (referred to as pre-62 drugs). These pre-62 drugs were permitted to remain on the market while evidence of their effectiveness was reviewed. The program established under which the FDA would review the effectiveness of drugs approved between 1938 and 1962 was named the Drug Efficacy Study Implementation (DESI) program.

If the DESI review indicates a lack of substantial evidence of a drug's effectiveness for all of its labeled indications, the FDA will publish a Notice of Opportunity for a Hearing (NOOH) in the **Federal Register** concerning its proposal to withdraw approval of the drug for marketing. At that time, a manufacturer of that drug or identical, related, or similar (IRS) drugs has the opportunity to request a hearing and provide FDA with documentation of the effectiveness of the drug product before a final determination is made. Drugs for which a NOOH has been published are referred to as less than effective (LTE) DESI drugs. The IRS drug counterpart of a LTE DESI drug is also considered less than effective. (We note that the terms "DESI drug" and "LTE DESI drug" are not synonymous.)

If all the labeled indications of the product are found to lack substantial evidence of effectiveness, a withdrawal notice is published in the **Federal Register** withdrawing approval of the NDA for the product. At that time, shipping this product and any IRS drug product in interstate commerce after the

effective date of the withdrawal notice is unlawful.

If only some of the labeled indications of the product are found to lack substantial evidence of effectiveness, the manufacturer must delete those LTE indications from the drug's label. If a manufacturer does not comply with this requirement, the manufacturer's NDA can be withdrawn by the FDA. All manufacturers of IRS drug products must also revise their labeling and submit an application to the FDA to obtain approval for their product to be allowed to continue marketing their drug.

In accordance with section 1903(i)(5) of the Act, FFP is not available for LTE DESI/IRS drugs for which a NOOH is issued for all labeled indications. Under the drug rebate program, a drug is not considered a covered outpatient drug if a NOOH is issued for some or all labeled indications.

At present, drugs subject to the DESI review process are in various stages of review. The mandatory and optional State coverage requirements and FFP restrictions on these drugs are discussed in section IV.B.3.b. of this preamble. The term "DESI/IRS drugs" is used when discussing coverage of a DESI drug and its IRS counterparts.

b. Coverage of DESI/IRS Drugs Under the Medicaid Program. This section describes the general coverage, FFP requirements, and rebate requirements for DESI/IRS drugs. Detailed instructions on how to identify DESI drugs and the roles that HCFA, States, manufacturers, and the FDA play in this process have been sent to the manufacturers and States.

- Non-DESI/IRS Drugs or DESI/IRS Drugs Determined Safe and Effective. Non-DESI/IRS drugs (pre-38 drugs and post-62 drugs) and pre-62 DESI/IRS drugs that have undergone the DESI review process and have been determined by the FDA to be safe and effective for their labeled uses under sections 505 and 507 of the Federal Food, Drug, and Cosmetic Act meet the definition of a covered outpatient drug. Therefore, these drugs of a participating manufacturer must be covered under the drug rebate program and are, therefore, subject to a rebate and FFP.
- DESI/IRS Drugs under Review (No NOOH Issued). DESI/IRS (pre-62 drugs) of participating manufacturers which meet the definition of a covered outpatient drug that are undergoing the DESI review process but for which a NOOH has not been issued must be covered under the rebate program. These drugs include:
  + Drugs described in section 107(c)(3) of the Drug Amendments of 1962 and for which the Secretary has determined there is a compelling justification for its medical need, or is identical, similar, or related to such a drug; and
  + Drugs for which the Secretary has not issued a NOOH under section 505(e) of the Federal Food, Drug, and Cosmetic Act to withdraw approval of an application for such drug under such section because the Secretary has determined that the drug is less than effective for some or all conditions of use prescribed, recommended, or suggested in its labeling.

In other words, a State must cover DESI/IRS drugs of a participating manufacturer for which a NOOH has not been issued for some or all of the drug's labeled indications. FFP is available and the drugs are subject to a rebate. DESI/IRS drugs under this category do not include drugs that have been found to be safe and effective under the DESI review program.

- Less Than Effective (LTE) DESI/IRS Drugs for Some Indications. Section 1903(i)(5) of the Act does not prohibit FFP if a DESI drug is effective for at least one indication. A drug would meet this criterion if a NOOH has been issued for some, but not all, indications. These DESI/IRS drugs may be covered at State option and FFP is available.

For purposes of the rebate program, the definition of a covered outpatient drug in section 1927(k)(2)(A)(iii) of the Act specifically excludes those DESI/IRS drugs for which a NOOH has been issued because the FDA has determined that the drugs are less than effective for some or all of their prescribed recommended uses. However, when these drugs have an FDA-approved, labeled indication for which a NOOH has not been issued, the drug is considered a covered outpatient drug for that indication (and other medically accepted indications). Therefore, these drugs of participating manufacturers must be included in the drug rebate program for their approved indications (and other medically accepted indications) and are subject to a rebate and FFP.

- Less Than Effective (LTE) DESI/IRS Drugs for All Indications. Under section 1903(i)(5) of the Act, FFP is prohibited for DESI drugs for which a NOOH has been issued for all conditions of use prescribed, recommended, or suggested in its labeling. Therefore, if a State chooses to cover these LTE DESI/IRS drugs, FFP is not available. This prohibition was not changed by OBRA '90 and applies regardless of whether the manufacturer is appealing the NOOH for some or all of the drug's indications.
- Less Than Effective DESI/IRS Drugs Withdrawn from the Market. The FDA has determined this group of DESI/IRS drugs to be less than effective and published a NOOH and subsequent withdrawal notice in the **Federal Register**. Based on these findings, the manufacturer is required to discontinue the distribution of these drug products. However, because the FDA does not institute recalls of these drug products to the retail level, these products may still be available in pharmacies. In any event, under section 1903(i)(5), FFP is not available for these DESI/IRS drugs.

c. Reporting DESI/IRS Drugs. The rebate agreement requires that the manufacturer's list of covered outpatient drugs include the NDC numbers for all drugs currently marketed by the manufacturer. Manufacturers are also required to list the NDC number for a drug that it no longer markets because the manufacturer will be responsible for providing a rebate on the drug until the entire supply of the drug under an NDC has expired, the drug has been taken off the market, or for other reasons, the potential no longer exists that the covered outpatient drug may be dispensed under the manufacturer's NDC number. To comply with these requirements, manufacturers must include on their lists of covered outpatient drugs all DESI/IRS drugs.

Even though some drugs are not subject to the rebate program, manufacturers must report to HCFA the required information for all LTE DESI/IRS drugs. A change from one DESI category to another DESI category, as described in section IV.B.3.b. of this preamble, could change a drug's coverage under Medicaid. For example, LTE DESI/IRS drugs could be potentially covered at some point under the rebate program if the FDA reverses its decision on a NOOH. HCFA must have the baseline pricing data (for single source and innovator multiple source drugs) from October 1, 1990, and for all drugs, the DESI drug indicator, as well as other data, in the event they are covered at a later date.

A manufacturer is responsible for knowing the status of DESI/IRS drugs by reviewing DESI notices published in the **Federal Register** by the FDA. (See 52 FR 1663 and 1668, January 15, 1987.) Manufacturers must identify in their list of covered outpatient drugs which they submit to HCFA those DESI/IRS drugs that they produce that are the subject of a NOOH.

In accordance with section 1927(b)(3)(C)(ii) of the Act, any manufacturer with an agreement under section 1927 that knowingly provides false information is subject to a civil money penalty in an amount not to exceed $100,000 for each item of false information. This provision also applies to any manufacturer that knowingly reports false information to HCFA regarding the status of a DESI/IRS drug for coverage purposes. In addition to civil money penalties, the manufacturer may also be subject to termination because it is not in compliance with section 1927 of the Act, the national rebate agreement, and regulations under § 447.534 that specify manufacturer reporting requirements.

C. Amount, Duration, and Scope of Services. Prior to the enactment of OBRA '90, States could establish amount, duration, and scope restrictions on Medicaid services, including prescription drugs. These restrictions could be based on such criteria as medical necessity and utilization control, or could be based on other factors so long as the amount of the services provided was sufficient to "reasonably achieve its purpose" (See section 1902(a)(10) of the Act and § 440.230 (Sufficiency of amount, duration, and scope)). States could impose prior authorization restrictions and also limit the number of prescription drugs that they covered through a formulary.

Section 1927 of the Act curtails a State's authority to exclude drugs from coverage and limited its authority to impose prior authorization requirements under section 1927(d)(5). However, the statute did not alter the State's authority to establish amount, duration, and scope restrictions, and, in fact, specifically recognized States' authority to impose additional restrictions on the quantities per prescription and the number of refills. Specifically, section 1927(d)(6) of the Act allows a State to impose restrictions on minimum and maximum quantities of outpatient drugs per prescription and on the number of refills within a therapeutic class to discourage waste. Section 1927(d)(6) also allows a State to impose these limitations and address instances of fraud or abuse by individuals in any manner authorized under the Act.

The legislative history of OBRA '90 indicates that this statutory provision was designed to enhance, not limit or replace, a State's authority to impose reasonable amount, duration, and scope restrictions. The House Report, adopted by the Conference Committee, states that "States are not prevented from restricting the amount, duration, and scope of coverage of covered outpatient drugs consistent with the need to safeguard against unnecessary utilization." (H. R. Conf. Rept. No. 964, 101st Cong., 2nd Sess., 825, 832 (1990)) This statement supports the conclusion that the Congress did not intend to circumscribe a State's authority to impose amount, duration, and scope restrictions. Therefore, in regulations at § 447.524(e), we would specify that a State may continue to impose limitations on the minimum and maximum quantities of drugs per outpatient prescription and the number of prescriptions or dispensing fees allowed per month as it did before the enactment of OBRA '90.

A State, in accordance with section 1927(d)(6) of the Act, may impose coverage restrictions on package sizes of a drug when required to prevent waste. We do not believe that, given the general goals of the drug rebate provisions, Congress intended for States to pay for more expensive package sizes when less costly alternatives exist. Thus, we would permit States to impose coverage restrictions based on the relative economy, or the high cost, of a specific package size. For example, a State may exclude from coverage the unit dose packaging of a particular drug based on its cost; however, such restrictions may be imposed, given the formulary requirements of section 1927(d), only if the manufacturer packages the drug in other sizes which the State covers.

V. Reporting Requirements

Under section 1927(b)(2) of the Act as amended by OBRA '93, States are responsible for providing to the manufacturer Medicaid utilization data for a rebate period regarding the quantity of drugs that they have dispensed after December 31, 1990 for which payment was made under their State plan during a rebate period. Section 1927(b)(3) of the Act requires a manufacturer to supply to HCFA, for each rebate period, information concerning AMP and, as required, best price for its covered outpatient drugs. Rebates are calculated for each rebate period on the basis of this information, as explained in section VI. of this preamble.

A. State Reporting Requirements

Under section 1927(b)(2)(A) of the Act, the State Medicaid agency must provide to manufacturers with drug rebate agreements State drug utilization data regarding the total number of "units" of each dosage form, strength, and package size of the manufacturer's drug that were dispensed after December 31, 1990 and paid for under the State plan during a rebate period. In the regulations at § 447.530(a)(2), we would define "unit" as the lowest commonly identifiable amount of a drug for example, tablet or capsule for solid dosage form, milliliter for liquid forms, and gram for ointments or creams, as supplied to HCFA in accordance with instructions in the rebate agreement. The use of units with regard to State reporting requirements and rebate calculations is discussed throughout sections V. and VI. of the preamble.

To comply with the provisions of section 1927(b)(2)(A), we would specify in our regulations at § 447.530(b) that States provide Medicaid drug utilization data based on claims paid by the State Medicaid agency during a rebate period.

1. Pharmacy Coding, Oversight, and Audit

To comply with the provisions of section 1927(b)(2)(A) of the Act, and to facilitate uniform reporting, we would require in § 447.530(a)(1) that States report their utilization data by the 11-digit NDC number. We note that FDA's regulations at 21 CFR 207.35 refer to the NDC number as a 10-character code. This code can show leading zeros in any segment of the NDC number. However, for standardization purposes in the drug rebate program, we are using a consistent 11-digit code that reflects leading zeros and the maximum number of digits that can appear in each segment of the NDC code.

We are recommending that, in order to implement these provisions in the most efficient and cost-effective manner, State Medicaid agencies identify for pharmacies certain information, as discussed below, that will enable them to determine those drugs that are covered under a State plan. The State should make available to pharmacies information concerning the labeler codes of manufacturers with rebate agreements; drugs under section 1927(d) of the Act that are excluded or restricted from coverage and the limitations or conditions of coverage; and drugs that are subject to prior authorization.

For purposes of this regulation, the term "pharmacy" applies to any entity authorized by the State to dispense covered outpatient drugs in that State. Thus, these requirements will be binding on all dispensers of covered outpatient drugs to Medicaid recipients.

The State agency may establish its own policies to ensure accurate pharmacy coding. However, we would require the agency to establish and implement an oversight and auditing process to ensure proper pharmacy coding and reporting practices. We would also require States to establish and implement procedures for investigating allegations of erroneous utilization data at the pharmacy level by participating manufacturers or other

interested parties (§ 447.530(e) (2) and (3)). We would require State agencies to establish procedures to comply with section 1927(b)(2)(B) of the Act, which gives manufacturers the authority to audit State data. The agency would also be responsible for taking the actions necessary to ensure accurate coding (§ 447.530(e)(4)).

We believe these requirements regarding accurate pharmacy coding are necessary to effectuate OBRA '90 drug rebate provisions. Accurate pharmacy coding is a fundamental and critical component of the Medicaid drug rebate program under section 1927 of the Act. Without these requirements, pharmacies may use incorrect NDC numbers when billing the Medicaid State agencies, which could result in numerous problems.

Use of incorrect NDC numbers could have a detrimental effect that would carry through the entire drug rebate process. First, pharmacies could bill States for a brand name drug although a generic drug was dispensed, resulting in overpayments to pharmacies, increased drug costs, and erroneous utilization data. If pharmacies substitute the NDC numbers of one manufacturer for another, even if the drugs cost the same amount, the Medicaid utilization data would be flawed. Secondly, flawed data would cause the States to invoice manufacturers for erroneous rebates, resulting in over and under billing for rebates. Thirdly, erroneous data may increase the likelihood that manufacturers would dispute the data and withhold rebate payments to States. Thus, inaccurate pharmacy coding would increase a State's dispute resolution workload, delay rebate payments, and cause interest to accrue on unpaid amounts. The dispute resolution process is an expensive, lengthy, and resource-intensive process for all parties involved.

In addition to disputing the data, manufacturers may, in accordance with section 1927(b)(2)(B) of the Act, audit the drug utilization data provided (or required to be provided) by the State. A manufacturer could also request a State to audit a pharmacy, which is also expensive and resource intensive. Because of the magnitude of the problems and costs inaccurate pharmacy coding can cause, we believe the requirements discussed above are necessary to properly and efficiently effectuate the drug rebate program requirements in OBRA '90.

Therefore, we would require in § 447.530(e)(1) that the State must inform pharmacies that they are required to use accurate NDC numbers for the drugs dispensed in submitting their Medicaid claims and that payment can be denied for a drug that has been inaccurately coded by a pharmacy. States may consider inaccurate coding to be good cause for terminating provider agreements subject to applicable Federal and State laws. Also, under anti-fraud provisions, pharmacy claims with incorrect NDC numbers may subject these pharmacies to criminal or civil money penalties, as well as exclusion from the Medicare and Medicaid programs.

States must implement the requirements of § 447.530(e) within 60 days after publication of the final rule. We believe this timeframe is adequate for establishing procedures to ensure accurate pharmacy coding since we informed States of these requirements in mid-1991. We are aware that many States have since established procedures to ensure accurate pharmacy coding. States that do not ensure accurate pharmacy coding may be considered to be out of compliance with section 1927 of the Act and, therefore, subject to compliance proceedings. In addition to effectuating OBRA '90 drug rebate provisions, we believe these pharmacy coding requirements are essential to comply with section 1902(a)(30) of the Act. Section 1902(a)(30) generally provides that methods and procedures relating to the utilization and payment of services under the State plan safeguard against unnecessary utilization and to ensure that payments are consistent with efficiency, economy and quality of care.

In accordance with section 1927(b)(2)(B) of the Act, a manufacturer may audit the drug utilization data provided (or required to be provided) by the State. If the information indicates that utilization was greater or less than the amount previously specified, adjustments to the rebates must be made on the next quarterly report submitted by the State. All corrections must be applied to the quarter for which utilization data are adjusted. If the adjustments result in a manufacturer owing an additional rebate amount, the manufacturer must include that amount, plus interest, in the rebate payment for next rebate period.

Since the statute permits manufacturers to audit drug utilization data but does not authorize manufacturers to directly audit pharmacies, we would require States to have procedures to investigate manufacturers' allegations of erroneous utilization data produced at the pharmacy level. If the State agrees to such a request, it may apply a process that uses a sampling methodology to audit pharmacies in a targeted area where erroneous data are believed to be occurring, or by other means that will address the alleged problem. Given the large volume of Medicaid drug claims, we believe a targeted sampling of pharmacies and their claims is a reliable method to discover inaccurate coding and billing practices, especially when targeted for specific drugs. Doing otherwise could prove costly for States without providing a significant amount of additional information. If erroneous data are discovered, a State could expand the audit to determine the severity of inaccurate billing practices.

An audit may be performed at any time throughout the dispute resolution process. However, both parties must agree to the audit and develop mutually agreeable audit procedures. (Section V.F. of this preamble contains a discussion of dispute resolution.)

2. Format and Contents of Report

Section 1927(b)(2)(A) of the Act requires that the Secretary establish a standard reporting format that States must use to report dr[illegible]ization data to manufactu[illegible]s a[illegible]CFA. Using this standard r[illegible]ormat, States must identify d[illegible]anufacturer to ensure that the proper rebates are paid. As indicated earlier, we selected the NDC number that identifies each drug by manufacturer, product, and package size as part of the standard reporting format to be used throughout the rebate program.

We have issued, through the rebate agreement and a notice published in the **Federal Register** on May 1, 1991 (56 FR 20006), the standard reporting format for States to use in reporting for the rebate period to HCFA and manufacturers. We have also issued subsequent letters to State Medicaid Directors containing instructions to provide additional guidance in using the reporting format. This standard reporting format includes the following information:

- State identification;
- Rebate period and year for which data apply;
- NDC number to identify labeler code, product code, and package size code;
- Total number of units paid for during the rebate period for each NDC;
- FDA registration name to provide a cross-check for the product code;
- Total amount of rebate that a State claims for each NDC;
- Number of prescriptions reimbursed by NDC;
- Rebate amount per unit and total reimbursement amount to verify manufacturer's payment; and

- A correction record flag to alert HCFA of a change or correction from a previous report.

These data elements will be updated through separate instructions as needed to further program objectives in this area. We would incorporate in the regulations at § 447.530(a) through (d) the basic reporting requirements and timeframes. HCFA instructions will provide guidelines for States to use when reporting utilization data.

3. Timeframe for State Reporting of Utilization Data

In accordance with section 1927(b)(2)(A) of the Act, we would require in § 447.530(c) that each State Medicaid agency report drug utilization data to HCFA and the manufacturer no later than 60 days after the end of each rebate period. The data for the first rebate period (January-March 1991) were originally due to HCFA and the manufacturer on May 30, 1991. However, since the Secretary had not developed a standard reporting format, we extended the May 30, 1991, deadline to July 30, 1991, for States to submit data to HCFA and the manufacturer. This delay resulted, in part, from a lack of either baseline and/or first rebate period data from many of the manufacturers, including the majority that joined the rebate program during the extension period to April 30, 1991. We believe the extension alleviated the need for States to send to HCFA and manufacturers multiple updates of corrected data, prevented disputes on partial data, and allowed for smoother implementation of the drug rebate program.

States should mail the utilization data to manufacturers in a form that will provide evidence of the date the data were received by the manufacturers. Manufacturers must pay rebates for each rebate period or provide a written notice of disputed utilization data by the 30th day after receipt of State utilization data. Evidence of the date received is important so that States can accurately determine when rebate payments are due, when interest begins accruing on any unpaid balances, and when the interest period begins for purposes of the dispute resolution process. (Section V.F.4. of this preamble contains a discussion of the interest provision.)

4. Effect of Timeliness of State Utilization Data on Payment of Rebates

Section 1927(b)(2)(A) of the Act provides that a State Medicaid agency shall report rebate period information on the drugs dispensed and paid for to each manufacturer not later than 60 days after the end of each rebate period and in a form consistent with a standard reporting format established by the Secretary. As noted previously in section V.A. of this preamble, we would specify in regulations that States provide Medicaid drug utilization data based on claims paid by the State during a rebate period. However, we believe circumstances could arise that prevent States from being able to generate Medicaid utilization information in the standard reporting format to meet this 60-day deadline. While the statute requires States to meet this 60-day requirement, we do not believe the statute relieves manufacturers from the obligation of paying rebates if States cannot meet the requirement. States do not have an incentive to submit late rebate claims to manufacturers since they are losing revenue by doing so. While processing late rebate claims may be an inconvenient administrative task for manufacturers, manufacturers have the advantage, in this case, by having access to these rebate funds which should have been paid to the State had the State submitted the data within the specified timeframe.

Thus, we realize that we must establish a maximum timeframe during which the manufacturer is bound to pay rebates on all drugs sold to Medicaid recipients. We would, therefore, establish a maximum time limit of 1 year from the end of a rebate period for States to bill a manufacturer for a rebate. However, if a State submits claims later than the required 60-day period, the State can only bill the manufacturer for the rebate amount that would have been due during the rebate period in which the State paid the drug claim. Consequently, we would specify in regulations at § 447.530(c) that the manufacturer is not required to pay a rebate on its drugs when a State does not submit its rebate period utilization data to the manufacturer within 1 year after the rebate period ended.

We believe this 1-year timeframe meets the needs of both States and manufacturers and is equitable because it parallels the maximum 1-year timeframe for providers' and States' responsibilities. Other Medicaid provisions allow a maximum timeframe of 1 year for pharmacies to submit claims and up to 1 year for States to pay claims (42 CFR 447.45(d)). A State would not lose rebates on those drugs for which it cannot compile the data within 60 days, and a manufacturer would not be held liable for rebates for an extensive period of time due to a State's failure to report utilization data within 60 days. As a general matter, HCFA will not find a State to be out of compliance if its utilization data are submitted to the manufacturer within this 1-year timeframe.

We consider any time period longer than 1 year after the rebate period ended to be extensive since this period could ultimately translate into a manufacturer being responsible for rebates for more than 3 years after the drug is dispensed. In accordance with § 447.45, pharmacies have up to 1 year to bill the State agency for drugs dispensed to Medicaid recipients, and States could take as long as 1 year to pay a drug claim. Thus, these two processing timeframes and the 1-year cutoff total 3 years. This 3-year time period also comports with general business principles. The Internal Revenue Service generally requires that records be maintained for 3 years unless they are involved in some type of action requiring their use. Manufacturers may not be able to substantiate rebate claims for more than 3 years after a drug is dispensed since they are not required to maintain records for more than 3 years. Adding more disputes to the resolution process for data where no records may exist is not, in our opinion, a cost effective or efficient manner of operating the drug rebate program. Thus, we believe this 1-year threshold for States to submit utilization data to manufacturers is reasonable and consistent with the drug rebate provisions of section 1927 of the Act and necessary to effectuate the OBRA '90 drug rebate provisions.

States that lose rebates required under section 1927 of the Act for failure to submit rebate period utilization data to manufacturers within 1 year after the rebate period ended may be considered out of compliance with section 1927. Therefore, HCFA could initiate a compliance action against a State if it fails to collect rebates to reduce the amount expended under their State plan for medical assistance (§ 447.530(c)).

5. Data Edits on State Utilization Data

As discussed in section V.A.2. of this preamble, States are required, under section 1927(b)(2)(A) of the Act, to submit drug utilization data to manufacturers in a format established by HCFA. Since the accuracy of the invoiced rebates is dependent upon the reliability of the State utilization data, we would require States to establish a system of edits to its Medicaid utilization information. These edits must be performed before the State submits it utilization data to the manufacturer. The data reports generated from these edits will not be disclosed to the manufacturer but will be used to verify the accuracy of the information disclosed. We believe this requirement is necessary to effectuate

the OBRA '90 drug rebate provisions and to prevent unnecessary disputes between States and manufacturers that delay the timely payment of rebates.

The types of edits described in this section are intended to verify the accuracy of the Medicaid utilization information by examining whether:

- The unit types claimed are appropriate for NDC number claimed;
- The units claimed match the amount paid by the State; and
- The amount paid by the State is an amount allowable for the NDC (for example, a brand name payment amount was not made for a generic drug or the opposite).

We believe that, by verifying the accuracy of such items described in this section before submitting the information to the manufacturer, the State will identify inconsistencies, correct them, and reduce the number of subsequent disputes. The State must submit the utilization data to the manufacturer within the timeframes contained in § 447.530(c), as described in sections V.A.3. and V.A.4. of this preamble, and only after the State has performed the types of edits described in § 447.530(f) and believes the data are accurate.

The requirement in § 447.530(f) for State edits on Medicaid utilization information would be effective 60 days following publication of the final rule. That is, State data submitted to manufacturers for that rebate period must have been verified through the use of system edits.

6. Use of Rounding Indicator

We also would establish the requirement in § 447.530(g) that States must identify by NDC number those drugs for which the number of units has been rounded by showing a rounding indicator for the number of units dispensed. States must include this information in their rebate period Medicaid utilization information submitted to the manufacturers. We have determined that this requirement is necessary since some pharmacies lack the ability to report decimal quantities in the Medicaid utilization information and, thus, in accordance with accepted industry standards, round up decimal quantities to the nearest whole unit. This practice can result in manufacturers being sent inflated utilization data or lead to disputes over the number of units billed.

We believe this requirement is necessary to effectuate the OBRA '90 drug rebate provisions and to prevent unnecessary disputes between States and manufacturers which delay the timely payment of rebates. We would, therefore, require States to indicate in the appropriate data field whether or not the number of units reported in the Medicaid utilization information has been rounded. This indicator will alert the manufacturer that a rounding adjustment factor has been applied to appropriately deflate the State's utilization data.

The requirement in § 447.530(g) for States to use the rounding indicator would be effective 60 days following publication of the final rule. That is, State data submitted to manufacturers for that rebate period must include the rounding indicator field and the number of units billed. We will provide separate instructions to the States and manufacturers regarding the use of the rounding indicator.

7. Rebate Tolerance Limits for Invoicing

Many States have informed us that the costs of preparing an invoice for drug rebates can often exceed the amount of a minimal rebate. For instance, some States have spent $50 preparing an invoice for a $5 rebate. We believe that if administrative costs are more than the rebates, the State should not expend its resources to collect a rebate that reduces State savings. Thus, to effectuate the OBRA '90 drug rebate provisions in the most efficient manner, we would establish a rebate tolerance limit for States to use in determining whether it should bill a manufacturer for a rebate when the administrative expense exceeds the rebate savings.

Generally, if the rebate amount due per labeler code is less than the administrative costs associated with preparing the invoice and collecting the rebate, the State should not invoice the labeler for that rebate amount. We have determined that a maximum tolerance of $50 per rebate period would be acceptable if State-supplied information establishes this as the reasonable cost of preparing a labeler's utilization data. In situations where the tolerance is applied, the State need not invoice the manufacturer, although it is free to establish its own tolerance below $50 and continue to submit utilization data above that tolerance. (We note that, in either event, the unit rebate amount must have been supplied by HCFA for all of that manufacturer's drugs in that rebate period and the State applied that unit rebate amount to its utilization data. If the manufacturer fails to supply pricing information for a drug, the unit rebate amount would be zero or missing from the HCFA pricing file. In this case, the tolerance would not apply.) Further, the State would not be at risk of loss of FFP on that portion of the uncollected rebates within the tolerance limits.

The State should maintain supporting documentation that identifies the instances when the tolerance levels were applied. We believe our policy promotes efficiency by allowing States the authority to pursue only those rebate amounts that exceed the States' administrative costs associated with those rebate amounts. Our policy also alleviates States' concern that they may be liable for the Federal share of those rebates that are within the tolerance limits.

B. Reporting Requirements for Manufacturers

Section 1927(b)(3)(A) of the Act requires manufacturers to supply drug pricing information to HCFA. In addition to pricing data, we would require manufacturers to complete and submit to States Form HCFA–304, the Medicaid Remittance Advice Report (RAR), within 30 days of receiving State Medicaid utilization information. The RAR has been approved by OMB prior to publication of this proposed regulation (OMB approval No. 0983–0676). The basis and timeframes for meeting this requirement, as well as what information is required on the RAR, are discussed below.

1. Timeframes for Reporting

Under the terms of the statute and the national rebate agreement, manufacturers must supply HCFA with a list of all covered outpatient drugs, the applicable baseline AMP, and, for single source and innovator multiple source drugs, best price within 30 calendar days of entering into the national rebate agreement. Manufacturers must update the list for each rebate period under the agreement to include AMP and, as appropriate, best price of drugs (both terms are discussed more fully below) and must report the update to HCFA no later than 30 days after the last day of each rebate period. We would incorporate these requirements in the regulations under § 447.534 (a) and (b).

In accordance with the dispute resolution process described in section V.F. of this preamble, and as set forth in regulations under § 447.536(b), we would require manufacturers to complete and submit to States the RAR within 30 days of receiving a State's Medicaid utilization information. We believe this requirement is necessary to effectuate the drug rebate provisions in OBRA '90, and to aid in the timely resolution of disputes and the timely payment of rebates.

2. Content of Reporting

a. Manufacturer Reporting Requirements to HCFA. Section

1927(b)(3)(A)(i) of the Act requires that the manufacturer's list of covered outpatient drugs submitted under the rebate agreement must be updated by the manufacturer on a rebate period basis to include the AMP and, for single source drugs and innovator multiple source drugs, the manufacturer's best price.

(1) Definition of Average Manufacturer Price (AMP). As stated earlier, under section 1927(k)(1) of the Act, AMP means, with respect to a rebate period, the average unit price paid to the manufacturer for the drug in the States by wholesalers for drugs distributed to the retail pharmacy class of trade after deducting customary prompt pay discounts. We would incorporate the definition of AMP in § 447.534(c). Under this definition, sales that a manufacturer makes to other than the retail class of trade must be excluded. Thus, sales where the buyer relabels or repackages the drug with another NDC number and sales through wholesalers where the manufacturer pays a chargeback for sales to an excluded buyer, such as a hospital, would not be considered sales to the retail class of trade.

We would also exclude from this definition direct sales to hospitals, health maintenance organizations and to distributors where the drug is relabeled under that distributor's NDC number because these entities are not considered the retail pharmacy class of trade. We would also exclude Federal Supply Schedule (FSS) prices from the calculations of AMP since the statute does not include FSS and FSS does not represent a retail level of trade.

We have interpreted AMP to include cash discounts and all other price reductions and customary prompt pay discounts (other than rebates under section 1927 of the Act) that reduce the actual price paid. This definition comports with the statute and HCFA's understanding of Congressional intent as set forth in the legislative history. (H.R. Conf. Rept. No. 964, 101st Cong., 2nd Sess. 825 (1990).)

The manufacturer must calculate AMP as a weighted average price for all of its package sizes for each covered outpatient drug sold during that rebate period but only report a single AMP for the weighted average. AMP must be calculated as net sales divided by number of units sold, excluding goods or any other items given away that are not contingent on any purchase requirements. For bundled sales, the allocation of the discount is made proportionately to the dollar value of the units of each drug sold under the bundled arrangement. In this context, bundled sale refers to the packaging of drugs of different product codes where the condition of rebate or discount is that more than one drug is purchased, or where the resulting discount or rebate is greater than that which would have been received had the drug products been purchased separately. Because we are defining the AMP to include cash discounts allowed and all other price reductions, we would require in § 447.534(c)(5) that the manufacturer adjust the AMP for a rebate period if cumulative discounts or other arrangements subsequently adjust the prices actually realized.

(2) Definition of Best Price. We have interpreted "best price," as defined in section 1927(c)(1)(C) of the Act, to mean, with respect to single source and innovator multiple source drugs, the lowest price at which the manufacturer sells the covered outpatient drug to any purchaser (as discussed later in this section of the preamble) in the United States (excluding the Territories). We would further interpret best price at § 447.534(d) to mean the lowest price in any pricing structure (including capitated payments) in the same rebate period for which the AMP is computed.

The best price must include cash discounts, free goods that are contingent on any purchase requirements, volume discounts, and rebates other than rebates under section 1927 of the Act. Best price must be determined on a unit basis without regard to special packaging, labeling, or identifiers on the dosage form or product or package, and will not take into account prices that are nominal in amount (that is, less than 10 percent of AMP). Unlike AMP, the best price is the single lowest price of the drug at the product code level during the rebate period and is not a weighted average.

For bundled sales, the allocation of the discounts is made proportionately to the dollar value of the units of each drug sold under the bundled arrangement. We would require the manufacturer to adjust the best price for a rebate period if cumulative discounts, rebates, or other arrangements subsequently adjust the prices actually realized. We believe this is consistent with our understanding of the statute and the Congress' desire that the Medicaid program benefit from the same discounts available to other bulk purchasers.

OBRA '93 amended section 1927(c)(1)(C) of the Act by adding to the definition of "best price" providers and health maintenance organizations (HMOs) as entities included in the best price calculation. This reflects our existing policy in this area as the result of OBRA '90. The best price reflects any price of a manufacturer except those prices specifically exempted by the law. For purposes of best price we interpret "provider" to mean a physician, hospital and other health maintenance organizations or entities that treat individuals for illnesses and injuries or provide services or items in the provision of health care.

OBRA '93 amended section 1927(k)(3) to specify that any drug, biological, or insulin excluded from the definition of covered outpatient drug as a result of section 1927(k)(3) must be treated as a covered outpatient drug for the purpose of determining the drug's best price. That is, any prices offered to the entities listed in section 1927(k)(3) of the Act must be included in a manufacturer's best price calculation even though drugs provided as part of these settings are not considered covered outpatient drugs.

Because of legislative changes, best price varies over time regarding the prices that are included and excluded from its definition. To identify these variances, we have separated them into the specific time periods.

(a) *Best Price Definition Effective January 1, 1991–October 27, 1991 and July 1, 1992–September 30, 1992.* For these periods, best price includes prices to wholesalers, retailers, providers, HMOs, nonprofit entities or governmental entities within the States (excluding depot prices and single-award contract prices of any agency of the Federal Government). "Depot prices" mean prices available to any depot of the Federal Government for purchase of drugs from a manufacturer through the depot system of procurement, irrespective of whether the drug products physically flow through the depot. "Depot" means any Federal warehousing facility and distribution arrangement whether: (1) Government owned and operated; (2) government owned and privately operated; or (3) privately owned and operated. The Department of Defense's (DOD's) Electronic Commerce Initiative (ECI), which is an electronic ordering system that ships drugs directly to Federal Government medical facilities that were previously shipped through the depot system, is included in this definition. "Single-award contract prices" mean prices under a contract between the Federal Government and a manufacturer resulting in a single supplier for a covered outpatient drug within a class of drugs.

Given the definition of best price provided in section 1927(c)(1)(C) of the Act, it is our opinion that the FSS prices must be included in the best price calculation for these periods, since FSS

prices are neither depot nor single award prices, which are the only statutory exclusions relative to best price. Since prices for drugs and biologicals that are either paid by the DVA or in contracts administered by the DVA are listed in the FSS, these prices must also be included in the best price calculation for these periods.

(b) *Best Price Definition Effective October 28, 1991–June 30, 1992.* For this period, best price includes prices to wholesalers, retailers, providers, HMOs, nonprofit entities, governmental entities within the States (excluding depot prices and single-award contract prices of any agency of the Federal Government). The Department of Veterans Affairs Appropriations Act (Public Law 102–139), enacted on October 28, 1991, provides that effective October 28, 1991, through either June 30, 1992, or the date of enactment of other DVA drug price legislation, whichever is earlier, prices for drugs and biologicals paid by the DVA, and drugs and biologicals sold under contracts administered by that Department that are listed in the FSS, shall not be considered in the Medicaid drug rebate calculation. Therefore, for the period October 28, 1991, through June 30, 1992, the definition of best price excludes FSS prices for drugs and biologicals paid by the DVA and drugs and biologicals sold under contracts administered by that Department that are listed in the FSS. (Note: In accordance with this legislation, manufacturers must reflect any sales of drugs or biologicals to the DVA or of drugs and biologicals sold under contracts with that Department that are listed in the FSS during the period of October 1, 1991, through October 27, 1991, in their best price for the fourth quarter of 1991 and again beginning in the rebate period starting July 1, 1992.)

(c) *Best Price Definition Effective October 1, 1992.* Beginning October 1, 1992, best price includes prices to wholesalers, retailers, providers, HMOs, nonprofit entities or governmental entities within the States (excluding depot prices and single award contract prices of any agency of the Federal Government). The Veterans Health Care Act broadened the exclusions from best price effective October 1, 1992. Section 601(a) of VHCA amends section 1927(c)(1)(C) of the Act to exclude from best price any prices charged on or after October 1, 1992, to the Indian Health Service, the DVA, a State home receiving funds under section 1741 of title 38 of the United States Code, the Department of Defense, the Public Health Services, or a covered entity described in section 1927(a)(5)(B) of the Act; any prices charged under the FSS of the General Services Administration; or any prices used under a State pharmaceutical assistance program. Best price excludes depot prices and single-award contract prices of any agency of the Federal Government.

(3) Requirements for the List of Covered Outpatient Drugs. We would require that the manufacturer's list of covered outpatient drugs include the NDC numbers for all drugs currently marketed by the manufacturer and continue to list the NDC numbers for drugs that are no longer marketed until such time as it is no longer possible for a State Medicaid agency to properly make payment for the drug and report this payment to the manufacturer. We would require that a manufacturer continue to list an NDC number for a drug that it no longer markets because the manufacturer will be responsible for providing a rebate on the drug until the entire supply of the drug under an NDC has expired, the drug has been taken off the market, or, for other reasons, there no longer exists the potential that the drug may be dispensed under the manufacturer's NDC number (for example, the FDA recalls the drug or reverses its approval on an approved NDA). In addition, since the manufacturer must pay the rebate on State utilization data for up to 1 year after the rebate period in which the data are submitted (as discussed in section V.A.4. of this preamble), the manufacturer must continue to report the data during this period. A rebate would be calculated on drugs that are no longer marketed using the AMP and best price from the last rebate period reported for those drugs (§ 447.534(b)).

In accordance with the provisions of the rebate agreement and the May 1, 1991, **Federal Register** notice (56 FR 20006), and to implement the drug rebate provisions of OBRA '90, we would require the manufacturer to supply the following information:

- NDC number with labeler code, product code, and package size code;
- Period covered for rebates (rebate period and year);
- Product FDA registration name;
- Drug category of single source, innovator multiple source, or noninnovator multiple source;
- DESI drug indicator;
- FDA therapeutic equivalence explanation code;
- Unit type;
- Units per package size;
- Average manufacturer price (AMP);
- Base date AMP;
- Best price;
- FDA approval date;
- Date drug entered market;
- Drug termination date;
- Drug type (Rx/OTC indicator);
- Rounding adjustment factor; and
- Correction record flag.

The above information is needed to meet the requirements set out in section 1927 of the Act. To calculate the rebate amounts required for each manufacturer under section 1927(c) of the Act, we need specific information to identify the manufacturers, drugs, prices, number of units sold, and the time period covered. The drug category is used to determine which rebate calculation to apply. The FDA approval date and the date the drug entered the market are necessary to determine baseline AMP for drugs approved by the FDA after October 1, 1990. The drug termination date is necessary to avoid making payment for a drug that is no longer on the market. The FDA registration name, DESI drug indicator, FDA therapeutic equivalence code, and the drug type indicate whether the drug meets the definition of a covered outpatient drug in sections 1927(k)(2) and (4) of the Act, and allow States to properly exclude drugs under section 1927(d)(2) of the Act. The rounding adjustment factor is supplied for drugs sold in decimal quantities and is used by a State when the quantity of a drug has been rounded up. The correction flag signals that the record contains corrected information from a previous submission.

(4) Rounding Adjustment Factor. We would establish a requirement that manufacturers include a rounding adjustment factor for those drugs sold in decimal quantity sizes, for example, a 1.4 gram of ointment. We have determined that this requirement is necessary to effectuate the OBRA '90 drug rebate provisions because, as described in section V.A.6. of this preamble, some pharmacies lack the capability to report decimal quantities of drugs to the State agencies. In this situation, the pharmacy rounds the utilization data upward so that a 1.4-gram tube is reported as a 2-gram tube. Rounding up is the pharmacy industry standard and is a common practice in all States that round decimal quantities of drug utilization data. Since, in this case, the rebate amount is calculated on a unit basis of grams, the manufacturer may be invoiced for an excessive rebate amount. Thus, the use of a rounding adjustment factor can reduce the amount of disputes for decimal quantity packages. Therefore, we would require manufacturers to provide a rounding adjustment factor for each of their rebate period pricing data submitted to HCFA for those drugs sold in decimal quantities.

As described in section V.A.6. of this preamble, we would also require States to identify for manufacturers those utilization data by NDC number that have been rounded. Therefore, HCFA will submit the rounding adjustment factors to the States with the rebate period unit rebate amount information. This will enable States that round decimal quantity packages to apply the rounding factor to its data before submitting utilization data to the manufacturer. Such data will help ensure that rebates are an accurate reflection of the units paid during a rebate period.

We will issue specific program instructions to States and manufacturers regarding the use of the rounding adjustment factor.

The requirements for reporting the rounding adjustment factor for manufacturers and the requirements for States to identify rounded utilization data with the rounding indicator, as described in section V.A.6. of this preamble, would be effective 60 days following publication of the final rule. That is, the rebate period pricing data submitted to HCFA by manufacturers for that rebate period must include the rounding adjustment factor for those applicable NDCs. We believe this allows sufficient time for manufacturers and States to implement the rounding requirements.

As stated earlier, section 1927(b)(3)(A)(i) of the Act requires that the manufacturer's list of covered outpatient drugs submitted under the rebate agreement be updated by the manufacturer on a rebate period basis to include the AMP and, for single source drugs and innovator multiple source drugs, the manufacturer's best price. We will issue program instructions to manufacturers to update the data elements, as needed, to further program objectives in this area.

b. Manufacturer Reporting Requirements to States. We would require manufacturers to complete and submit to States Form HCFA–304, the Medicaid Remittance Advice Report (RAR). The RAR has been approved by OMB prior to publication of this proposed regulation (OMB approval No. 0938–0676). The RAR is a mandatory form that provides a uniform format for manufacturers to report the remittance of rebate payments to States, adjustments to previous rebate period payments, and disputed rebate amounts. The RAR is available in two formats, electronic and paper, depending on the preference of the manufacturer. Each participating manufacturer would be required to complete and submit the RAR to States within 30 days of receiving State Medicaid drug utilization information. In addition to reporting regular rebate period rebates and disputed amounts, manufacturers would use the RAR on an unscheduled basis when the States need the RAR to process adjustments to prior periods. The regulations pertaining to the RAR are found in §§ 447.534(f) and 447.536(b).

HCFA developed the RAR in response to a need for improved data exchange between manufacturers and States. In order to develop the RAR to meet the needs of both manufacturers and States, HCFA convened several dispute resolution conferences beginning in February 1992. These conferences were attended by groups representing manufacturers, pharmacists, States and HCFA. HCFA received suggestions from these groups to help develop a uniform reconciliation report to improve data exchange between manufacturers and States, to enable States to verify rebate payments, and to provide a vehicle for manufacturers to identify specific disputed amounts. HCFA considered these suggestions in preparing the final version of the RAR.

The RAR will function as a reconciliation report with the intent of reducing disputes by standardizing data exchange and improving communication between manufacturers and States regarding Medicaid utilization data, rebates, adjustments, and disputes. For these reasons, we have determined that the requirement for the completion and submission of the RAR is necessary to effectuate the OBRA '90 drug rebate provisions and to provide for the efficient administration and function of the Medicaid drug rebate program as required under section 1927 of the Act.

The RAR includes the following information:

- Manufacturer name;
- Labeler code;
- Manufacturer address;
- Name of manufacturer contact person;
- Telephone number of contact person;
- Facsimile (FAX) number of contact person;
- State;
- Rebate period and year for which the information applies;
- Invoice number, if State provided one;
- NDC number;
- Product name;
- Rebate amount per unit;
- Units invoiced;
- Rebate amount invoiced;
- Rebate amount paid;
- Adjusted rebate per unit, if applicable;
- Adjustment code, if applicable;
- Credit/debit indicator, if applicable;
- Adjusted invoice amount, if applicable;
- Units disputed, if applicable;
- Dispute code, if applicable;
- Withheld invoice amount, if applicable;
- Total rebate amount invoiced;
- Total rebate amount paid;
- Total adjusted invoice amount, if applicable; and
- Total withheld invoice amount, if applicable.

These data elements will be updated, as needed, through separate instructions to further program objectives in this area. We would incorporate the basic reporting requirements and timeframes in our regulations at § 447.534(f).

We believe the above information is needed for the State to identify and verify rebates per NDC and reconcile any disputed amounts as a result of the requirements set forth in section 1927 of the Act and these regulations. We further believe the information is necessary for HCFA to more accurately monitor the operation of the drug rebate program. To verify the rebate amounts paid as calculated under section 1927(c) of the Act, or to reconcile any disputed amounts, it is essential that the information contained in the RAR identify the manufacturers, drugs by NDCs, rebate amounts per units, units invoiced, rebate amounts invoiced, and rebate amounts paid, as well as any adjusted rebate amounts, reasons for any adjustments, units disputed, reasons for any disputed amounts, and any withheld invoice amounts, if applicable. We would also require that manufacturers separately report supporting documentation if a State requests it to verify the information contained on the RAR.

c. Prior Period Adjustments. A prior period adjustment is a change in the unit rebate amount based on a manufacturer's revised AMP or best price data for a prior rebate period after that rebate period's pricing data has been submitted to HCFA. HCFA uses the manufacturer's pricing data to generate the unit rebate amount for each 9-digit NDC which States use to calculate rebate amounts due from manufacturers. Any changes to a manufacturer's AMP or best price result in changes to the unit rebate amount and rebates due from the manufacturer. Thus, prior period adjustments are necessary to correct rebate amounts that are owed by manufacturers or credits due to manufacturers.

We would establish a time limitation of 3 years during which prior period adjustments will be generated based on

revised AMP or best price data from manufacturers. Therefore, we would require manufacturers to report changes to AMP or best price for 3 years after the rebate period to which the data pertains (§ 447.334(h)). No prior period adjustments will be generated for a quarter more than 12 quarters prior to the current quarter. For example:

(1) No prior period adjustment pertaining to the rebate period ending December 31, 1991, may be generated after December 31, 1994.

(2) All prior period adjustments pertaining the rebate period ending June 30, 1992, must be generated prior to July 1, 1995.

We believe this 3-year timeframe is reasonable since it is consistent with the record retention requirements we would establish under § 447.534(g)(1). That is, we would require manufacturers to retain records (written or electronic) for 3 years after the date the manufacturer reports its rebate period AMP or best price. This 3-year time-frame also comports with the requirements for the maintenance of records on State Medicaid expenditures imposed on States. (See section V.C. of the preamble for a discussion of the record retention requirements.)

The 3-year timeframe during which manufacturers must report changes to AMP or best price parallels the record retention period and the possible corrective actions from audits during this 3-year period. During this timeframe, a manufacturer's records on the drug rebate program could be audited with findings that result in an adjustment of pricing information and rebate payments. Thus, any changes to AMP or best price should also be required during this 3-year timeframe.

After States receive prior period adjustments from HCFA on the quarterly pricing file, States should calculate the difference between the original and revised unit rebate amounts and adjust the rebate amounts due from or credited to manufacturers.

We note that changes to the unit rebate amount from prior period adjustments cannot be disputed by manufacturers nor handled through the normal dispute resolution mechanism because this information is reported by manufacturers to HCFA. Any discrepancies in the unit rebate amounts should be reported to HCFA for clarification and resolution. HCFA will review all pricing information changes that result in a revised unit rebate amount.

C. Recordkeeping Requirements

1. AMP and Best Price Calculations

Section 1927(b)(3)(B) of the Act gives the Secretary the authority to survey a manufacturer's records and data to verify the pricing information reported under section 1927(b)(3)(A) of the Act. To facilitate such surveys, we would require under § 447.534(g) that a manufacturer must retain for 3 years from the date the manufacturer reports that rebate period's data, all records (written or electronic) of the data and any other materials from which the calculations of the AMP and best price were derived. A manufacturer must retain records beyond the 3-year period if audit findings related to the AMP and best price have not been resolved. In addition, if the manufacturer makes reasonable assumptions in its calculations of AMP and best price, the manufacturer must also maintain a written or electronic record outlining these assumptions. We will consider reasonable assumptions to include: that the AMP can never be zero or a negative number; that the methodology used to determine basedate AMP, as well as AMP and best price, is used consistently for all rebate period calculations; and that accounting methods are in accordance with generally acceptable accounting principles and conform to the manufacturer's tax reporting accounting policies.

We would require manufacturers to maintain records for 3 years since this time period is necessary to verify the accuracy of information received. Also, the 3-year time period comports with the requirements for the maintenance of records on State Medicaid expenditures imposed on States. Regulations at § 433.32 require that States retain records for 3 years from the date of submission of a final expenditure report for FFP. Therefore, we believe that manufacturers should also maintain records for this same timeframe, in the event that manufacturers' records on the drug rebate program are audited and the audit results in an adjustment of pricing information and rebate payments.

2. Dispute Resolution Process and RAR

The dispute resolution process described in section V.F. of this preamble and § 447.536 would require that both States and manufacturers maintain supporting documentation at various stages of the dispute resolution process. For example, manufacturers and States must maintain supporting documentation for certain types of disputes indicated on the RAR, data inconsistencies, and agreements reached between both the manufacturer and State in settling a dispute. States must also maintain documentation if States choose to cease the dispute resolution process based on the cost effectiveness thresholds. Thus, in § 447.534(g)(2) we would require both States and manufacturers to keep all supporting documentation required under the dispute resolution process and in conjunction with the RAR for a 3-year period from the date the dispute is resolved between the manufacturer and the State.

As discussed in section V.C.1. of this preamble, States are required to maintain records on State Medicaid expenditures for 3 years from the date of submission of a final expenditure report for FFP. The final expenditure report for FFP must contain any rebate payment adjustments as a result of the final dispute settlement (§ 447.534(g)(2)).

We would require manufacturers to maintain supporting documentation for this 3-year period under our general rulemaking authority since this requirement comports with the State maintenance of record requirements and is necessary to effectuate the provisions of OBRA '90 and the dispute resolution process.

D. Confidentiality of Reported Information

In accordance with section 1927(b)(3)(D) of the Act (as amended by VHCA), we would specify in § 447.540(a) that manufacturer-specific pricing information disclosed by the manufacturer in connection with the rebate agreement is confidential and, notwithstanding other provisions of law (including the Freedom of Information Act (FOIA), 5 U.S.C. 552), must not be disclosed by the Secretary of HHS, the Secretary of Veterans Affairs, the State Medicaid agency or its contractors in a form that reveals the manufacturer or wholesaler, or prices charged by the manufacturer or wholesaler, except as necessary for:

- The Secretary to carry out the provisions of section 1927 of the Act;
- The Comptroller General to review the information provided; and
- The Director of the Congressional Budget Office to review the information provided.

Based on this explicit confidentiality language, HCFA is prohibited from disclosing specific manufacturer data that identify the base date AMP, AMP, best price, unit rebate amount, or the total rebate amount claimed. We believe that it is reasonable to expect that disclosure of any of these data would lead to the identity of a manufacturer and its prices. We do not believe, however, that this prohibits us from releasing data in a non-manufacturer specific or aggregate form, such as that required in section 1927(i) of the Act, which describes the information to be included in the Secretary's annual report regarding the operation of the drug rebate program. Under this section, the Secretary must include in the annual report such information as the total value of rebates received and the number of manufacturers providing such rebates, and the effect of inflation on the value of rebates required under the drug rebate program.

While we are not precluded from releasing AMP and best price to the States (inasmuch as the confidentiality provisions of section 1927(b)(3)(D) of the Act contemplate such release), we have determined that supplying the specific unit rebate amount to the States, as opposed to other pricing data, will give States sufficient information to invoice and verify rebate payments.

States are prohibited from releasing any manufacturer-specific pricing data supplied by HCFA in relation to the drug rebate program. States are also prohibited from releasing these data to individual pharmacists or pharmacy groups. However, release of a State's utilization data, excluding manufacturer-specific pricing data, is permitted to the extent it is allowed under Federal or State confidentiality laws.

These confidentiality provisions will remain in full force and effect on the States and HCFA, regardless of the nonrenewal or termination of the rebate agreement. The statute does not specify that the confidentiality provisions are limited to the period when an agreement is in effect.

E. Penalty for Failure to Report Information or for Reporting False Information

Section 1927(b)(3)(B) of the Act provides that the Secretary may survey wholesalers and manufacturers that directly distribute their covered outpatient drugs, when necessary, to verify manufacturer prices reported to HCFA. The Secretary may impose a civil monetary penalty in an amount not to exceed $100,000 on a wholesaler, manufacturer, or direct seller of a covered outpatient drug if the wholesaler, manufacturer, or direct seller refuses a request for information about charges or prices by the Secretary in connection with a survey or knowingly provides false information. The provisions of section 1128A of the Act regarding civil monetary penalties (except for subsections (a) (with respect to amounts of penalties or additional assessments) and (b)) apply to the imposition of these penalties in the same manner as such provisions apply to a penalty or proceeding under section 1128A(a).

If a manufacturer fails to provide the required information on AMP and best price or the list of covered outpatient drugs, the amount of the civil money penalty is $10,000 for each day beyond the due date that the information is not provided. We have included the list of covered outpatient drugs as a required item because we believe it is a necessary component of the pricing information required by the statute. The corresponding drug identifiers provided by the list of covered outpatient drugs, such as NDC numbers, names, and package sizes, are needed to accurately verify the pricing information of the vast number of drugs on the market. If all of the required information is not reported within 90 days of the required timeframe, HCFA is authorized to suspend the drug rebate agreement after the end of that 90-day period and continue the suspension until the information is provided. The suspension period must not be for less than 30 days. A manufacturer will continue to be responsible for rebates on drugs covered during the period the agreement was not suspended.

Any manufacturer with an agreement, that knowingly provides false information, will be subject to a civil money penalty in an amount not to exceed $100,000 for each item of false information. These penalties are in addition to other penalties prescribed by law. The provisions of section 1128A (other than subsections (a) and (b)) apply to a civil money penalty under this paragraph in the same manner as such provisions apply to a penalty or proceeding under section 1128A(a). We would incorporate these provisions under § 447.542.

F. Dispute Resolution for Medicaid Utilization Information

1. Background

As required under section 1927(b)(1) of the Act, a manufacturer must provide to each State a rebate for covered outpatient drugs within 30 days after receipt of the State utilization information. For purposes of the Medicaid drug rebate program, and, as set forth in section II.(b) of the national rebate agreement, the manufacturer is responsible for timely payment of the rebate amounts within 30 days of receiving, at a minimum, information, by NDC number, on the number of units reported by the State. Additionally, section V.(b) of the national rebate agreement sets forth broad guidelines for a dispute resolution process for States and manufacturers to follow in cases where the manufacturer believes the State utilization data are erroneous. We would clarify these guidelines and timeframes for dispute resolution in these regulations.

The resolution of disputes has been a source of concern for manufacturers and States alike. The type of process needed to resolve disputes over utilization data is unique to the drug rebate program under Medicaid. Because these disputes often do not involve legal issues but can be resolved by exchange of information and refinement of data collection methods through discussions between the principals, the process must provide a full opportunity for such resolution before any proceeding before a hearing officer (the method commonly used to resolve other types of disputes). There are no existing regulations, under either the Medicaid or Medicare program, that can be applied to this dispute process. Likewise, there are no regulations that could be used as a model for developing the dispute resolution requirements.

Recognizing the need for improvements in this area, HCFA convened a meeting in February 1992 on dispute resolution with members of organizations representing manufacturers, pharmacists, and States. At that meeting, we discussed the concerns of the participants relating to dispute resolution. A workgroup was formed from the conferees to explore ways in which HCFA could develop a uniform set of guidelines for States and manufacturers to follow in the resolution of disputes.

In May 1992, the conferees reconvened and recommendations of the workgroup were discussed. As a result of the meetings and suggestions received from participants, HCFA decided to provide more detailed requirements in the area of dispute resolution. In part, we have established a two-phase process for settling disputes. Phase I involves the manufacturer and State working jointly to resolve the dispute. Phase II involves using the State hearing process or an arbitrator or mediator to help resolve the dispute. We would identify specific steps and timeframes within each phase for the resolution of disputes and have incorporated them into our regulations at § 447.536. We believe these requirements are necessary to effectuate the drug rebate provisions of OBRA '90, and to ensure that rebates are paid in a timely manner.

Under phase I of the process, there is a 240-day timeframe after the State receives the manufacturer's RAR for the States and manufacturers to seek resolution of the dispute through exchange of information and informal negotiation. If both parties cannot reach a resolution within this timeframe, they must take one of several actions described in Step 4 of phase I or proceed to phase II of the dispute resolution process.

Under phase II of the process, the State must schedule a hearing to settle the dispute. Proceeding to phase II to settle disputes is generally done after all steps in phase I have been completed. However, either a State or a manufacturer may proceed to phase II if either party has not fulfilled its obligations under any step in the first phase of the process. For example, the manufacturer may request that the State schedule a hearing at any stage of the dispute resolution process if the State fails to perform required phase I actions within the specified timeframes. Conversely, the State may schedule a hearing at any stage of the process if the manufacturer fails to perform required phase I actions within the specified timeframes, and/or request HCFA, through the HCFA Regional Office (RO), to terminate the manufacturer's national rebate agreement.

We believe the timeframes established for each of the steps in the first and second phases of the dispute resolution process are reasonable for both States and manufacturers based on our experience to date with the drug rebate program, and based on feedback from States and manufacturers in compiling such data and working with the original dispute resolution process under the national rebate agreement. The timeframes established in these proposed regulations were extensively discussed with the workgroup participants for the dispute resolution process. We believe that delaying the payments of rebates due to a more time-consuming dispute resolution process would harm both States and manufacturers. Rebates are needed on a predictable basis to reduce State expenditures for drugs and to allow States to estimate future budgeting for drug spending based on expected rebates. Longer timeframes could result in the manufacturer being liable for substantial amounts of interest accruing on disputed data.

Therefore, to effectuate the OBRA '90 drug rebate provisions and to ensure that rebates are paid in a timely manner, we would require manufacturers and States to comply with the process and timeframes outlined in this section of the preamble beginning with disputes associated with data for the rebate period occurring 60 days following publication of the final rule. We believe this timeframe is sufficient since both manufacturers and States have had extensive experience in handling a variety of disputes since 1991. Disputes in existence prior to this rebate period would not be subject to the dispute resolution requirements of the final rule, as in some cases the applicable timeframes will already have passed. However, we expect such disputes to be resolved as quickly as possible or the State hearing process, as specified in the initial rebate agreement, to be made available to the manufacturer by the State.

While current State law may not include manufacturers as "providers" under State Medicaid programs, for purposes of these proposed regulations, we would require States to provide a hearing which we anticipate will involve the same procedure as provider hearings. There are no specific Federal requirements that govern this hearing process. In these regulations, we would not establish any new requirements or criteria for this process, except for the overall timeframe for the conduct of the hearing.

2. Identifying and Resolving Data Inconsistencies Prior to Phase I of the Dispute Resolution Process

In general, within prescribed timeframes after a State submits to a manufacturer the Medicaid utilization information, the manufacturer must review the data and pay a rebate on the undisputed portion. The disputed portion of the data must be resolved through the dispute resolution process. However, to prevent both phase I and phase II of the process from being used to handle disputes involving data inconsistencies, we would require both States and manufacturers to take certain actions, as discussed below, to resolve data inconsistencies before they initiate phase I of the dispute resolution process. We would consider data inconsistencies to be data errors unrelated to actual utilization, such as incorrect NDC numbers, unit types, or decimal positions (§ 447.536(a)).

The dispute resolution process is a costly and time-consuming activity for all parties, delays the payment of rebates for disputed data, and causes interest to accrue on disputed amounts. Therefore, to effectuate the drug rebate provisions of OBRA '90 and to ensure the timely payment of rebates, we would require in § 447.536(a) that manufacturers attempt to identify and resolve State Medicaid utilization data inconsistencies with the State no later than 30 days after receipt of the data. We believe that requiring States and manufacturers to resolve data inconsistencies during the 30-day period before a manufacturer must pay a rebate on the undisputed data will result in timely rebates being paid for a larger percentage of State utilization data and reduce the volume of data involved in disputes. Thus, administrative costs incurred from the dispute resolution process would be reduced for both States and manufacturers.

Examples of data inconsistencies that manufacturers must screen for are items such as:

- Incorrect unit types;
- Reported NDC numbers failing to match manufacturer's NDC numbers; and
- Incorrect decimal position in units reported.

If, in any rebate period, a manufacturer discovers discrepancies in a State's utilization data, the manufacturer must distinguish between disputes that will require further resolution and data inconsistencies before initiating phase I of the dispute resolution process. If data inconsistencies are detected, a manufacturer must contact the State, identify the inconsistencies, and propose possible corrective actions. Examples of an attempt by the manufacturer and State to resolve these data inconsistencies could involve:

- Verifying that unit types are appropriate for the product;
- Examining the data to verify that the total number of units is appropriate for the amount paid; and
- Matching State-reported NDCs to the manufacturer's NDCs.

If an agreement is reached and the data inconsistencies are resolved, both the State and manufacturer must maintain written documentation of the resolution. The manufacturer must record the resolution of data inconsistencies on the RAR. If these preliminary attempts to resolve the data inconsistencies fail, the manufacturer and State must initiate phase I of the dispute resolution process as described below.

3. Steps in the Dispute Resolution Process

a. Steps in Phase I of the Dispute Resolution Process. Phase I of the dispute resolution process is divided into four steps. These steps describe the actions that manufacturers and States must take and specify the timeframes within which the actions must be completed. The HCFA RO will monitor the dispute resolution process, and problems that occur in the process should be referred to the appropriate RO.

Step 1: Manufacturer Submits RAR to State (To be completed within 30 days after the manufacturer receives State utilization information)

In the event a manufacturer discovers a discrepancy in the Medicaid utilization information that the manufacturer and the State are unable to resolve within the 30-day timeframe, as discussed in section V.F.2. of this preamble, the manufacturer must complete the following actions:

- Pay the rebate on undisputed data and provide written notice of any discrepancies by submitting the RAR to the State Medicaid agency. The manufacturer may, at this time, pay rebates on the disputed portion of the data;
- Ensure that the RAR is postmarked by the United States Postal Service or common mail carrier no later than 30 days after receipt of State data; and
- Identify on the RAR, among the other requirements of that form, the reason(s) why the data are disputed, by NDC number, and, if the entire amount of the rebate is not paid, why the disputed portion of the rebate is withheld.

We would require the manufacturer to submit supporting documentation with the RAR for certain types of disputes, as indicated on the RAR. The manufacturer must submit supporting documentation for other types of disputes if a State requests it to verify information contained on the RAR. This support will allow the State to verify the dispute and submit relevant information in the next step to move towards a resolution.

Interest begins to accrue on the withheld portion of rebates for disputed data on the 31st day after the manufacturer receives State data. Interest ceases to accrue only when payment is made for both rebates and accumulated interest, or an excess payment is refunded, consistent with the resolution of the dispute.

Step 2: State Responds to Manufacturer Regarding Disputes Identified on RAR (To be completed within 90 days after the State receives the manufacturer's RAR).

Within 90 days after the State receives the manufacturer's RAR, the State must complete two actions. First, the State must contact the manufacturer to discuss, by NDC number, the items disputed and the reasons why the manufacturer is disputing the items. Second, the State must present its preliminary response on the items identified on the RAR as being in dispute. Both the State and manufacturer must maintain documentation of the items disputed and the State's preliminary response to the manufacturer.

Step 3: Exchange of Data and Negotiations Between Manufacturer and State (To be completed within 150 days after the State receives the manufacturer's RAR).

Within 150 days after the State receives the manufacturer's RAR, the State must take definitive steps, as discussed below, to resolve the disputed items. If State confidentiality laws allow, we would require that the State provide the manufacturer with zip code or pharmacy-level data, a sampling of pharmacy claims, or historical trends data on such items as the manufacturer may have found in dispute. We would require the State to provide the manufacturer with the same type of data that the manufacturer used to dispute the rebate payment. That is, if the manufacturer based its dispute on pharmacy-level data, the State must provide pharmacy-level data to enable the manufacturer to analyze and compare the two sources in an effort to resolve the discrepancies. We would define zip code-level data or pharmacy-level data as a report by NDC number for a particular covered outpatient drug dispensed by pharmacies within a particular zip code or dispensed by a particular pharmacy respective to Medicaid recipients.

We believe these requirements for data exchange between States and manufacturers are necessary to effectuate the OBRA '90 drug rebate provisions and to resolve disputes in a timely manner. Without additional like data to substantiate or refute disputes, neither party may be able to resolve the discrepancies and, thus, further delay the payment of rebates and increase the amount of interest accruing on disputed rebates. Further, if the State disagrees with the manufacturer on the disputed items, the State must provide the manufacturer with this further breakdown of data or other reasons to support its position. Otherwise, the process may reach an impasse if the State and the manufacturer have no basis to resolve the underlying dispute.

Both the State and the manufacturer must ensure that any exchange of data protects the confidentiality requirements of section 1927(b)(3)(D) of the Act. Specifically, the statute prohibits disclosure by the State of any information that would disclose the identity of the manufacturer or the prices of the manufacturer's drugs.

Furthermore, if State confidentiality laws prohibit the release of certain data, such as pharmacy specific data, the State may require the manufacturer to supply to the State the data on which it based its dispute. If the manufacturer supplies the State with like data in this situation, we will consider the manufacturer to have satisfied this data exchange requirement and to be in compliance with the requirements under this step of phase I of the dispute resolution process.

Step 4: Post-Negotiations Decision (To be completed within 240 days after the State receives the manufacturer's RAR) Within 240 days after the State receives the manufacturer's RAR, the negotiations between the State and the manufacturer must be completed and one of the following options must be chosen and acted upon:

- The State may decide to cease the dispute resolution process based on its cost-effectiveness determination as described in section V.F.6 of this preamble. However, the State maintains the discretion to continue the dispute resolution process for disputed amounts that fall below the thresholds. Further, the State must maintain adequate documentation to support its determination to discontinue the dispute based on cost-effectiveness or maintain adequate documentation that clearly describes any settlement reached with a manufacturer.
- The State and the manufacturer may agree to a settlement based on the State's Medicaid utilization information.
- The State and the manufacturer may agree to a settlement based on valid documentation that other data were more representative of the actual Medicaid utilization.
- If none of the above settlements are reached, the State and manufacturer must proceed to phase II of the process to settle the dispute.

b. Phase II of the Dispute Resolution Process. Phase II of the dispute resolution process is initiated when the dispute is not resolved in step 4 of phase I, or when either party does not comply with the requirements under any of the phase I steps and either the manufacturer or State wants to proceed to phase II. In either case, under phase II the State must schedule a hearing within 30 days from the end of the phase I process, or within 30 days from the date the manufacturer or the State chooses to proceed to phase II due to noncompliance. We would require that the hearing be conducted no later than one year from the 240th day after the State receives the manufacturer's RAR (§ 447.536(d)). The State and the manufacturer could continue to attempt to settle the dispute between themselves before the hearing is conducted. However, we would require that the hearing be scheduled and conducted, if

still necessary, within the one-year timeframe.

In lieu of a State hearing, the State and the manufacturer may agree to arbitration or mediation to settle the dispute. In this case, we would require the State to maintain documentation that clearly describes the agreement with the manufacturer to settle the dispute through arbitration or mediation rather than a State hearing (§ 447.536(e)).

After the dispute is resolved, the disputed amount plus the rate of interest, as set forth in section 1903(d)(5) of the Act, must be paid or credited on the entire balance by the manufacturer or the State no later than the due date of the next rebate period payment. As noted in section V.F.4 of this preamble, interest would begin to accrue 38 calendar days from the date the State mails its Medicaid utilization information to the manufacturer. Interest would continue to accrue until the date payment is made or excess payment is refunded for the part of the disputed Medicaid utilization information that the State and manufacturer agree is appropriate, as resolved through the dispute resolution procedures set forth in this section.

4. Interest Rate under Section 1903(d)(5) of the Act

The interest rate under section 1903(d)(5) of the Act is the average of the yield of the weekly 90-day Treasury bill auction rates during the period for which interest will be charged. For purposes of section 1903(d)(5) of the Act, the investment yield is considered the bond equivalent rate or the true discount rate. HCFA will supply the manufacturers and States with the rates to assure that both parties are using the same interest rates in the calculation.

Interest would be applied to disputed or unpaid amounts and late rebate payments but not to prior period adjustments of unit rebate amounts or State utilization adjustments.

Interest would begin accruing 38 calendar days from the date the State mails the State utilization data, as evidenced by the postmark by the United States Postal Service or other common mail carrier on the envelope (not a postage meter stamp). We would allow 7 additional days (from the 31st day after utilization data are sent from a State) to begin the interest clock which will allow time for receipt of the mailing by the manufacturer. For documentation purposes, we would require States to maintain a record of the date of mailing and manufacturers must maintain the envelope bearing the postmark from the State.

Interest accrues on the disputed portion of the rebate amount or on the total amount of the late rebate payment for all rebate periods beginning January 1, 1991 and only stops accruing on the date the check is disbursed. We would consider the date of disbursement to be the date the check is mailed by the manufacturer. Interest must be collected and may not be disregarded as part of the dispute resolution process by the State or manufacturer.

Interest calculation is based on a 365-day year with simple interest applied to the average of the yield of the weekly 90-day Treasury bill auction rates during the period for which interest will be charged. (For purposes of this calculation, include the rate for the entire week if the beginning and/or ending date fall within that week.)

The following formula and example illustrate how interest should be calculated:

Obtain yield rates (bond equivalent rates) for period involved:

Auction dates	Yield rates (Percent)
March 1, 1993	3.035
March 8, 1993	3.043
March 15, 1993	3.064
March 22, 1993	3.003
March 29, 1993	3.022

(a) Total the yield rates of each weekly auction of 90-day Treasury Bill. Total = 15.167%

(b) Divide the total from (a) by the number of rates to determine the average interest rate.

15.167% divided by 5 = 3.0334% = Average Interest Rate.

(c) Multiply average interest rate by amount of unpaid rebate.

$1,000 × 3.0334% = $30.33 Amount of Interest Due.

(d) Divide the amount of the interest due by 365 days to obtain the amount of interest due per day.

$30.33 divided by 365 days = $.08309 = Amount of Interest Due Per Day.

(e) Multiply daily amount of interest due per day by the number of days the unpaid rebate amount is outstanding.

$.08309 × 29 days (March 4, 1993–April 1, 1993) = $2.41 Total Interest Due.

5. Manufacturer's Right To Audit Data

The manufacturer retains the right provided under section 1927(b)(2)(B) of the Act to audit the Medicaid utilization information reported (or required to be reported) by the State. While not mandated by the statute or this regulation, but as specified in the national rebate agreement, we encourage the manufacturer and the State to develop mutually beneficial audit procedures that promote a cooperative relationship that saves time and money for both parties.

Adjustments to rebate payments will be made if information indicates either that Medicaid utilization were greater or less than the amount previously specified, or that other information is inaccurate (for example, a drug is not properly classified as a single source, innovator multiple source, or noninnovator multiple source drug that affects the amount of rebates).

6. Cost-Effectiveness of Dispute Resolution

In some cases, a State may consider that engaging in continued attempts to resolve a dispute with a manufacturer is not cost-effective in that the State resources required to settle the dispute exceed the amount in dispute, or that the accuracy of the utilization data can be established only to a certain degree. Many States have expressed concern that guidelines are needed to determine cost-effectiveness tolerance limits for the dispute resolution process. Thus, to effectuate the OBRA '90 drug rebate provisions in the most efficient manner, we would establish the following cost-effectiveness tolerance limits for States.

For any rebate period, a State need not proceed into further dispute resolution process steps beyond final negotiations (Step 4 of phase I) with a manufacturer if the disputed amount is (1) under $10,000 per manufacturer's labeler code, and (2) under $1,000 per product code. States must maintain supporting documentation of the determination that may be subject to review by the Department. Further, when a State decides to cease the dispute resolution process based on these cost-effectiveness criteria and adequately documents that the process is not cost-effective, as discussed above, FFP will generally be available for the drugs dispensed and the Federal portion of the rebate will generally not be required from the State.

States maintain the discretion to proceed with the dispute resolution process in cases that fall below the thresholds described in this section. We believe this policy provides States with the flexibility to determine the merits of pursuing disputed rebates in terms of cost-effectiveness.

VI. Formulas for Computation of Amount of Drug Rebates

Section 1927(c) of the Act specifies that each manufacturer must remit a basic rebate and an additional rebate to the State Medicaid agency for single source drugs and innovator multiple source drugs, and a rebate for covered outpatient drugs other than single source and innovator multiple source drugs. We would require in regulations at § 447.546(a) and (b) that the manufacturer must make timely payment of the rebate, that is, within 30 days of receiving State Medicaid utilization information that includes, at a minimum, the number of units paid by NDC number during the rebate period under the approved State plan. We would also require in § 447.546(a)(3) that the manufacturer continue to make rebate payments for all of its covered outpatient drugs for as long as an agreement is in force and utilization information reports are made. Also, a rebate payment would be required for all drugs until the entire supply of the drug under an NDC number has expired; the drug has been taken off the market; or, for other reasons, there no longer exists the potential that the drug may be dispensed under the manufacturer's NDC number or paid for and a rebate requested by the State Medicaid agency.

Section 1927(c) of the Act specifies the formulas to be used to compute the rebates as follows:

A. Rebate for Noninnovator Multiple Source Drugs

The rebate for noninnovator multiple source drugs is—

For October 1, 1992—December 31, 1993: 10 percent of the AMP.

For January 1, 1994, and thereafter: 11 percent of the AMP.

B. Basic Rebate for Single Source Drugs and Innovator Multiple Source Drugs

In general, section 1927(c)(1)(B) of the Act, as established under OBRA '90, provided for the following basic rebate for single source drugs and innovator multiple source drugs:

For January 1, 1991–December 31, 1991: The greater of 12.5 percent of the AMP or the AMP minus best price. (The rebate is capped at 25 percent of AMP.)

For January 1, 1992–December 31, 1992: The greater of 12.5 percent of the AMP or the AMP minus best price. (The rebate is capped at 50 percent of AMP.)

For January 1, 1993 and thereafter: The greater of 15 percent of the AMP or the AMP minus best price. (The rebate is not capped.)

Section 601(c) of VHCA amended section 1927(c)(1)(B) of the Act to account for a budget neutrality adjustment to the basic rebate for single source drugs and innovator multiple source drugs. This budget neutrality adjustment was established to offset a reduction in rebates resulting from the additional exclusion of prices from the best price calculation required under section 601(a) of VHCA. On April 12, 1993, the Veterans Health Care Act of 1992—Technical Corrections (Public Law 103–18) was enacted. Section 2(a) of Public Law 103–18 amended section 1927(c)(1)(B)(ii)(II), as amended by section 601(c) of VHCA, to restore the 50 percent rebate cap for the rebate period October 1, 1992, through December 31, 1992. This amendment is effective as if it were included in the enactment of section 601(c) of VHCA. Thus, section 1927(c)(1)(B)(ii)(II) of the Act has been amended to provide that for the rebate period beginning after September 30, 1992, and before January 1, 1993, the amount of the rebate may not exceed 50 percent of the AMP.

In general, for period beginning with October 1, 1992, the following basic rebate for single source or innovator multiple source drugs are as follows:

For October 1, 1992–December 31, 1993: The greater of 15.7 percent of the AMP or the AMP minus best price. (The rebate is capped at 50 percent of AMP for the rebate period October 1, 1992–December 31, 1992.)

For January 1, 1994–December 31, 1994: The greater of 15.4 percent of the AMP or the AMP minus best price.

For January 1, 1995–December 31, 1995: The greater of 15.2 percent of the AMP or the AMP minus best price.

For January 1, 1996, and thereafter: The greater of 15.1 percent of the AMP or the AMP minus best price.

C. Additional Rebate for Single Source and Innovator Multiple Source Drugs

Section 1927(c)(2) of the Act requires that manufacturers pay an additional rebate amount for single source and innovator multiple source drugs if, for rebate periods beginning January 1, 1991, the AMP exceeds the "base date" AMP by a greater percentage than the percentage increase in the CPI–U for the rebate period from the "base CPI–U." Section 13602(a)(1) of OBRA '93 made clarifying changes to section 1927(c)(2), deleted requirements that would have replaced the calculation with one based on a weighted average manufacturer price (WAMP), and changed the calculation method for drugs approved by the FDA after October 1, 1990. Under section 13602(d)(2) of OBRA '93, these amendments are effective without regard to whether or not regulations to carry out these amendments have been promulgated by that date. HCFA adopted an October 1, 1993 effective date with respect to the OBRA '93 amendments to section 1927(c). Using a retroactive effective date for these provisions would require HCFA, manufacturers, and States to recalculate additional rebates for 11 quarters. This would generate an enormous amount of prior period adjustments and changes to rebate amounts in the dispute resolution process. Such a volume of changes would place an undue administrative burden on States, manufacturers, and HCFA without a level of additional rebates to warrant the administrative costs involved in such a task. We believe our adoption of an October 1, 1993 effective date comports with HCFA's understanding of Congressional intent, as demonstrated in the legislative history. Since the amendments clarified but did not substantively change methods for calculating the additional rebate for drugs approved by the FDA before October 1, 1990, a single calculation method can be used for those drugs. Since OBRA '93 substantively changed the method for calculating the additional rebate for drugs approved by the FDA after October 1, 1990, different calculation methods must be used for the periods January 1, 1991 through September 30, 1993 and October 1, 1993 and thereafter. We discuss all of these methods in more detail below.

1. For Drugs Approved on or Before October 1, 1990

Section 1927(c)(2)(A) of the Act requires that manufacturers pay an additional rebate amount for single source and innovator multiple source drugs if, for rebate periods beginning January 1, 1991, the AMP exceeds the base date AMP by a greater percentage than the percentage increase in the CPI–U for the rebate period from the base CPI–U. The statute provides that the CPI–U used for calculating the additional rebate amounts be based on the CPI–U in effect for the month preceding the rebate period (or other period) involved. Therefore, to be consistent with the statute and the national rebate agreement, we have defined the following terms to be used in the formulas for calculating additional rebates:

Base Date AMP—The base date AMP means the AMP for the calendar quarter beginning July 1, 1990, i.e., that originally reported for the July–September 1990 rebate period. Section 1927(c)(2)(A)(ii)(II) of the Act, as amended by OBRA '93, provides that the base date AMP is the base date in effect at the time of the rebate period beginning July 1, 1990, without regard to whether or not the drug has been sold or transferred to an entity, including a division or subsidiary of the manufacturer, after the first day of such rebate period.

Base CPI–U—The base CPI–U means the CPI–U in effect for September 1990; for example, the CPI–U in effect that month was 132.7.

2. For Drugs Approved After October 1, 1990

For drugs approved by the FDA after October 1, 1990, OBRA '93 defines base date AMP and base CPI–U different from how they are defined in OBRA '90. These changes affect how additional rebates are calculated for single source and innovator multiple source drugs approved after October 1, 1990. Generally, the base date AMP is the AMP in effect for the first full rebate period after the day the drug was first marketed. The base CPI–U is the CPI–U in effect for the month prior to the first full rebate period after the day the drug was first marketed.

HCFA adopted on October 1, 1993 effective date for these changes to section 1927(c). Therefore, these changes are effective with rebate periods beginning on or after October 1, 1993, and additional rebates will be calculated differently for these drugs for the period of January 1, 1991 through September 30 1993 and rebate periods beginning on or after October 1, 1993. Therefore, to be consistent with the statute, we have defined the following terms to be used in the formulas for calculating additional rebates. HCFA will issue specific instructions to manufacturers and States on how to calculate additional rebates for these different periods.

Base Date AMP for rebate periods beginning on or after January 1, 1991 through September 30 1993—The original policy in effect under OBRA '90 will continue to be used for base date AMP. That is, for this period, the base date AMP will continue to be that for the first day of the first full month in which the drug was first marketed.

Base CPI–U for rebate periods beginning January 1, 1991 through September 30, 1993—The original policy in effect under OBRA '90 will be used for the base CPI–U. That is, the base CPI–U continues to be the CPI–U in effect for the month before the month in which the drug was first marketed.

Base Date AMP for rebate periods beginning on or after October 1, 1993—In accordance with section 1927(c)(2)(B), the base date AMP is the AMP in effect for the first full rebate period after the day on which the drug was first marketed.

Base CPI–U for rebate periods beginning on or after October 1, 1993—The base CPI–U means the CPI–U in effect for the month prior to the month of the first full rebate period after the day on which the drug was first marketed.

VII. Payment Limitations for Covered Drugs

A. Applying Federal Reimbursement Upper Limits

OBRA '93 amended section 1927 of the Act regarding pharmacy reimbursement limits. Section 13602(a)(1) of OBRA '93 amended section 1927(f) by redesignating it as section 1927(e) and modifying the language in several subsections. OBRA '93 revised and redesignated section 1927(f)(1) of OBRA '90 as sections 1927(e)(1) and (e)(2), added section 1927(e)(3), and redesignated section 1927(f)(2) of OBRA '93 as section 1927(f)(4) of the Act.

Existing regulations at 42 CFR 447.331 through 447.334 establish methodologies for upper limits for payment of drugs covered under the Medicaid program, in accordance with section 1902(a)(30)(A) of the Act. Section 1927(e)(1) of the Act (redesignated from section 1927 (f)(1) under OBRA '90) imposed a moratorium period beginning January 1, 1991, and ending on December 31, 1994 with regard to pharmacy reimbursement limits. During this moratorium period, in accordance with section 1927(e)(1)(a), a State cannot reduce its reimbursement limits for covered outpatient drugs or the dispensing fees for these drugs in effect as of January 1, 1991 which were established in accordance with 42 CFR 447.331 through 447.334. In accordance with the statute, up to January 1, 1991, States retained the right to reduce payments to pharmacies.

Section 1927(e)(2) establishes a special rule for States that were not in compliance with these regulations. If a State is not in compliance with §§ 447.331 through 447.334, the provisions in section 1927(e)(1)(A) do not apply to the State until it is in compliance. That is, States which reduce reimbursement rates during January 1, 1991 through December 31, 1994 to comply with the regulations will not be violating the moratorium provision under section 1927(e)(1).

Since the statute refers specifically to States "in compliance," States that were not in compliance with the regulations on January 1, 1991, are still required to come into compliance with the regulations and reduce reimbursement limits, as required by these regulations, after January 1, 1991. To be in compliance with the regulations, the State must demonstrate that the estimated acquisition cost (EAC) is set at the State Medicaid agency's "best estimate" of the prices that pharmacists in the State are generally and currently paying. (Section 447.301 contains the definition of EAC.)

Section 1927(e)(1)(B) of the Act provides that the Secretary may not modify by regulation the Federal upper limits formula used to determine reimbursement limits in §§ 447.331 through 447.334 to reduce the reimbursement limits for covered outpatient drugs. This provision applies to the Federal upper limits formula that was in effect on November 5, 1990 (the date of enactment of OBRA '90).

In accordance with section 1927(e)(3) of the Act (as added by OBRA '93), the moratorium provisions will not supersede or affect provisions in effect for State maximum allowable cost (MAC) limitations prior to January 1, 1991, or after December 31, 1994. MAC programs established by States prior to January 1, 1991, or after December 31, 1994 are allowable under the statute and are not considered a reduction in pharmacy reimbursement. States may continue to operate MAC programs in effect prior to January 1, 1991 in accordance with the terms of that program, e.g., States may adjust limits and add drugs within the requirements of the MAC programs in effect prior to January 1, 1991.

B. Multiple Source Drugs

1. Drugs Subject to Federal Upper Limits Under Section 447.332 (Upper Limits for Multiple Source Drugs)

Under existing § 447.332(a), an upper limit for a multiple source drug may be established if the following requirements are met:

- All of the formulations of the drug approved by the FDA have been evaluated as therapeutically equivalent in the current edition of the FDA publication, *Approved Drug Products with Therapeutic Equivalence Evaluations*; and
- At least three suppliers list the drug (which has been classified by the FDA as category "A") in the current editions (or updates) of published compendia of cost information for drugs available for sale nationally.

Under these existing provisions of § 447.332, a State agency's payment for multiple source drugs must not exceed in the aggregate the payment levels determined by applying for each drug a reasonable dispensing fee established by the agency plus an amount established by HCFA that is equal to 150 percent of the published price for the least costly therapeutic equivalent (using all available national compendia) that can be purchased by pharmacists in quantities of 100 tablets (or capsules) or the commonly listed size. Upper limits do not apply to brand name drugs if a physician certifies in his or her own handwriting on the prescription that a specific brand is medically necessary for the recipient. HCFA identifies the multiple source drugs that are subject to upper limits and their prices on a periodic basis in the *State Medicaid Manual* under Part 6, Payment for Services.

2. Drugs Subject to Federal Upper Limits Under Section 1927(e)(4) of the Act

Section 1927(e)(4) of the Act (redesignated from section 1927(f)(2) under OBRA '93) contains a provision that establishes new conditions for determining which multiple source drugs are subject to upper limits and, thus, establishes a new group of drugs subject to upper limits. Section 1927(e)(4) requires HCFA to establish an upper reimbursement limit for each multiple source drug when there are at least three therapeutically and pharmaceutically equivalent (A-rated by the FDA) multiple source drugs. When this condition is met, an upper limit will be applied to the multiple source drug whether or not the FDA rating of the additional formulations of the drug are either A-rated or B-rated drugs. (§ 447.335.)

Given the moratorium provisions in section 1927(e)(1)(B) of the Act (discussed in section VII.A. of this preamble), we view section 1927(e)(4) of the Act as authority to establish upper payment limits for additional multiple source drugs, rather than a mandate to change the formula set forth in § 447.332. Any modification to existing § 447.332 during the moratorium period of January 1, 1991, to December 31, 1994, would conflict with section 1927(e)(1)(B) of the Act, which prohibits the Secretary from modifying by regulation the Federal upper limits formula in §§ 447.331 through 447.334. By prohibiting a change in the reimbursement methodology under section 1927(e)(1)(B), we believe that the Congress recognizes and approves of the current method of establishing upper limits under § 447.332.

In accordance with the moratorium provisions in section 1927(e)(1)(B) of the Act, we would not change the formula used to determine reimbursement limits that is presently set forth in §§ 447.331 through 447.334. However, we do not believe the moratorium provisions prevent HCFA from applying the existing upper payment limit formula to existing and additional drugs as required by section 1927(e)(4) of the Act.

To comply with the requirements of both 42 CFR 447.332 and section 1927(e)(4) of the Act, HCFA would establish an upper reimbursement limit for multiple source drugs using both sets of criteria found at the existing § 447.332 and the new § 447.335. We would specify in regulations at § 447.335 the conditions under which covered outpatient drugs will be subject to the Federal upper limits under section 1927(e)(4) of the Act. On a periodic basis, HCFA would consolidate both groups of drugs, including their prices, into one listing of drugs that are subject to the Federal upper limits. HCFA will issue this listing to the States in an electronic medium and in the *State Medicaid Manual* under Part 6, Payment for Services.

3. Inclusion of A- and B-Rated Drugs

The FDA publication, Approved Drug Products with Therapeutic Equivalence Evaluations, lists the application holders for the drugs and the accompanying A or B drug rating. This publication, however, does not list the current owner of the drug or distributors, that is, packagers or relabelers, and there is no Federal requirement that these repackagers or relabelers identify the source of their drug product. Therefore, the A and B rating is lost for all such drugs in the marketplace once they are repackaged or relabeled.

Because we are unable to identify an A or B rating for what we believe are the majority of drugs sold at the retail level of trade, we are including all drugs (A and B rated) in the rebate program. Otherwise, since there is no method to identify A-rated drugs, we would have to require all manufacturers that participate in the drug rebate program to sell only A-rated drugs to all its customers (as there is no method to determine which particular drug will be dispensed to a Medicaid recipient). This requirement would be the only feasible way to ensure that Medicaid recipients receive only A-rated drugs. However, such a requirement is not authorized under the provisions of section 1927 of the Act and would be contrary to FDA's current drug approval process which allows B-rated drugs to be marketed. Such a requirement would also not be consistent with our understanding of Congressional intent of the drug rebate program since it might reduce the number of manufacturers participating in the program that sell only B-rated products or a combination of A- and B-rated products, which could then decrease the availability of needed drugs to Medicaid recipients.

C. Denial of FFP When a Generic Substitution is Available

Section 1903(i)(10) of the Act provides that payment will not be made to a State for an innovator multiple source drug dispensed on or after July 1, 1991 if, under applicable State law, a less expensive noninnovator multiple source drug could have been dispensed but only to the extent that such amount exceeds the upper payment limit for such multiple source drugs. Consistent with our understanding of the statute and Congressional intent, we would interpret this provision in our regulations at § 447.550(b) to apply to drugs subject to the Federal upper limits under § 447.332(a). Therefore, we would include in regulations at § 447.335 that therapeutic equivalent drugs for upper limits under section 1903(i)(10) of the Act means drugs rated A or B by the FDA. We would apply this policy to only those drugs subject to the Federal upper limits to provide an established drug data base available to all States for determining if generic substitution is appropriate. The Federal upper limits program offers both pharmacists and the State Medicaid agencies a familiar, regularly updated guideline that can be easily used to compare the innovator and noninnovator drug prices.

We considered using national compendia prices or pharmacy charges in applying the generic substitution requirements; however, either alternative would be difficult to administer. Both alternatives would require the comparison of prices for the innovator and noninnovator multiple source drugs. These prices frequently change and, therefore, would require frequent update by the State Medicaid agency, possibly resulting in different lists in each State. Such alternatives could also disadvantage Medicaid recipients by substituting the regular medication they receive due to constant fluctuations in price which would determine whether the innovator multiple source drug could be dispensed at a given point in time.

Section 1903(i)(10) of the Act specifies that the substitution will be under applicable State law. FFP will be available for the dispensing of the innovator drug where the prescription has been hand annotated by the prescriber either as "brand medically necessary" or other such words to that effect as may be required under State law. Current regulations under § 447.331(c)(3) prohibit the use of a checkoff box on a form but allow the use

of a notation such as "brand medically necessary."

VIII. Compliance Action

A State's failure to comply with the reporting or drug access requirements of section 1927 of the Act is cause for compliance action against the State. Accordingly, we would specify in § 447.538 that a manufacturer may request HCFA to initiate compliance action against a State if the State fails to comply with the drug access requirements of section 1927 of the Act. A manufacturer may also request compliance action against a State if the manufacturer can show a pattern or history of inaccuracy in the drug utilization information provided by the State. It is incumbent upon the State to report accurate utilization data to ensure that rebates are paid in accordance with the statute.

Compliance actions taken by HCFA will not relieve the manufacturer from its obligation of making the rebate payment to States as set forth in section 1927 of the Act and will not bar the manufacturer from taking other actions against the State that are legally available to the manufacturer.

IX. Drug Rebate Agreement Provisions Not Addressed in This Document

On November 2, 1992, we published in the **Federal Register** (57 FR 49397) an interim final rule with comment period that addressed the following provisions of section 1927 of the Act:

- Drug Use Review—Section 1927(g) of the Act provides that a State must have, by January 1, 1993, a drug use review program for covered outpatient drugs that meet certain statutory requirements.
- Electronic Claims Management—Section 1927(h) of the Act provides that the Secretary shall encourage each State Medicaid agency to establish, as its principal means of processing claims for covered outpatient drugs under drug rebate agreements, a point-of-sale electronic claims management system, for the purpose of performing on-line, real time eligibility verifications, claims data capture, and adjudication of claims, and assisting pharmacists and other authorized persons in applying for and receiving payment.

A document that addresses public comments and finalizes rules is under development.

X. Summary of Public Comments on Notice and Departmental Responses

We received 20 timely pieces of correspondence from manufacturers, State agencies, a pharmaceutical manufacturer association, and other parties on the notice published in the **Federal Register** on February 21, 1991 (56 FR 7049) that reprinted the text of the national drug rebate agreement. A summary of these comments and the Department's responses follow:

A. Enforcement of Enhanced Access Provisions

1. Restrictive Formularies

Comment: The majority of the commenters stated that the rebate agreement, State instructions, and regulations implementing the drug rebate program should prohibit States from developing restrictive formularies.

Response: We agree that prior to OBRA '93, section 1902(a)(54) of the Act generally prohibited restrictive formularies (that is, formularies that impose access limitations for covered outpatient drugs covered under a rebate agreement). OBRA '93 revised section 1902(a)(54) to require that States comply with the applicable requirements of section 1927 and added section 1927(d)(4) which allows States to establish a drug formulary, effective October 1, 1993, which meets specific requirements. A State formulary must include covered outpatient drugs other than: (1) those drugs excluded under section 1927(d)(2); and (2) those drugs (with respect to the treatment of a specific disease or condition for an identified population) where the drug's labeling or compendia-based medically accepted indication does not have a significant, clinically meaningful therapeutic advantage, in terms of safety, effectiveness, or clinical outcome over other drugs included in the formulary.

We would require States to list in their State plans those drugs in section 1927(d) that they are excluding or restricting from coverage and also describe limitations or conditions of coverage (not including prior authorization programs). We would not require States to list in their State plans those drugs they are excluding or restricting from coverage with respect to the treatment of a specific disease or condition since States must have available to the public a written explanation of reasons for excluding the drugs. We believe requiring States to amend their State plans to include these drugs would be an unnecessary use of State resources.

2. Prior Authorization

Comment: The majority of commenters were adamant that States be required to implement what they characterized as statutorily acceptable prior authorization programs. They believed that medical factors should be the only criteria for approving or denying drugs subject to prior authorization and suggested that HCFA establish standards for State prior authorization programs to prevent abusive restrictions. One commenter was concerned that States would place on prior authorization: (1) All but the least expensive product in a therapeutic class; (2) the drugs of a manufacturer that does not provide an additional rebate above the amount required in the national agreement; and (3) the most expensive drug in a therapeutic class without regard for improved outcomes or reduction in total treatment costs associated with the more expensive drug therapy.

Response: Section 1927(d)(1)(A) of the Act provides that a State may subject any covered outpatient drug to prior authorization; that is, require approval of the drug before its dispensing for any medically accepted indication. In accordance with section 1927(d)(4)(E), a State's prior authorization formula is not considered a formulary subject to the requirements specified in section 1927(d)(4). The prior authorization system must meet two conditions specified under section 1927(d)(5) of the Act.

These proposed regulations would implement these provisions of section 1927 and allow States to maintain their prior authorization programs as they currently exist except that—

- A State must respond to a prior authorization request within 24 hours of the request; and
- A State must provide for the dispensing of at least a 72-hour supply of the drug in emergency situations.

In response to items numbered (1) and (3) in the comment, we believe that States should be able to consider both clinical and economic criteria in their prior authorization programs as long as medically necessary drugs are not denied. Prior to the drug rebate provisions, States could consider such criteria. We believe that OBRA '90 did not change that provision. We recognize, however, that the Congress, in passing the statutory provisions of the drug rebate program, was concerned with ensuring recipient access to medically necessary drugs. We would, therefore, require assurances from States that their prior authorization programs do not prevent access to medically necessary drugs.

In regard to item numbered (2) in this comment, States may, in accordance with sections 1927(a) (1) and (4) of the Act, negotiate separate agreements for additional rebates as long as they can establish that the requirements in section 1927 (as discussed in section II.

of this preamble) have been met. We will monitor the prior authorization programs to ensure that States are in compliance with these regulations.

We do not believe that, in light of the provisions of section 1927(d)(1)(A) of the Act, the Congress intended to set up any further requirements than those explicitly stated in the statute that would preclude States from requiring that prior authorization be obtained for any medically accepted indications, or requiring that the physician provide medical justification for using a particular drug within a therapeutic class, as long as access to medically necessary drugs is ensured. In accordance with the statute, we believe that a State continues to maintain the authority to prior authorize drugs provided the State approves the drug if medically necessary.

Additionally, section 4401(d)(3) of OBRA '90 requires that the Secretary, acting in consultation with the Comptroller General, study prior approval procedures utilized by State Medicaid programs conducted under title XIX of the Act. We will review the results of this study and, if necessary, consider additional changes to prior authorization programs at that time.

Comment: One commenter suggested that (1) a State should use a review board (similar to the drug utilization board) to establish criteria for selecting drugs subject to prior authorization; (2) the manufacturer should have input before a drug is placed on prior authorization or petition a State to remove a drug from prior authorization status; (3) the prior authorization process should be subject to the State Administrative Procedures Act; and (4) the prior authorization process should apply only for new prescriptions.

Response: We would require in § 447.526 that State staff who place drugs in a prior authorization system must be licensed to prescribe or dispense drugs, for example, physicians or pharmacists. We would provide, however, that State staff who respond to prior authorization requests need not be limited to persons licensed to prescribe or dispense drugs as long as all responses are made in consultation with these licensed professionals, or are made under guidelines promulgated by these licensed professionals and they are available for consultation in difficult or unusual cases. We believe that a State might benefit from a formulary committee for determining drugs that will be subjected to prior authorization but are not mandating this. However, we do not believe that we should limit the States' flexibility in operating their prior authorization programs to accommodate the commenter's other concerns since the statute supports the States' authority to maintain their prior authorization programs as they currently exist.

Comment: One commenter suggested that States should be required to disclose all information regarding the basis for selecting drugs and for denying drugs subject to prior authorization, and to generate a report for HCFA on all claims that were denied.

Response: In accordance with section 1927(d)(5) of the Act and our understanding of the legislative intent of OBRA '90, we expect States to operate their prior authorization programs in a manner that does not preclude access to medically necessary drugs. We believe States will be consistent in applying criteria as to how drugs are selected for prior authorization. We would also require annual assurances that a State's prior authorization program does not prevent access to medically necessary drugs. States may continue to disclose their records for prior authorization in the same manner that they did before the change in statute, as the statute made no changes in this area. We believe it would be overly burdensome to require States to generate specific reports on prior authorization claims and would be of nominal benefit to HCFA.

Comment: Several commenters believed that, if a State does not comply with the prior authorization requirements that the commenters believe are appropriate (as discussed above in other comments on prior authorization), the manufacturer should be able to withhold the rebate due the State.

Response: The statute requires a manufacturer to provide a rebate to the State for each rebate period based on utilization data submitted by the State. The rebate must be paid by the manufacturer to the State no later than 30 days after the date of receipt of the State's utilization data. There is no authority for the Secretary to permit a manufacturer to withhold a rebate (nor for a manufacturer to unilaterally withhold such a rebate) where a State does not comply with prior authorization requirements. We have a compliance process to ensure that States comply with all provisions of the Medicaid program and, as noted in the rebate agreement, manufacturers may notify the appropriate HCFA RO if they believe a State is not complying with a provision of the drug rebate program.

B. New Drug Coverage

Comment: Several commenters were concerned that States would not allow unrestricted access to new drugs. Some commenters believed that the new drug coverage protection afforded by section 1927(d)(6) prior to OBRA '93 should have provided that the 6 months of coverage for a new drug begin with the date when it is first marketed, and not from the date it is approved by the FDA. One commenter asserted that the Congress inadvertently reduced the time to less than 6 months because it may take several weeks, if not months, to bring a new drug on the market and suggested that HCFA support a technical amendment to the law. This commenter believed that prior to OBRA '93, section 1927(d)(6) of the Act encouraged manufacturers to bring new drugs to market prematurely since a manufacturer may need to educate and train physicians on a drug's use or administration once the drug is approved. Also, the commenter suggested that the FDA's approval of promotional materials and manufacturing specifications may not coincide with the drug approval date.

Response: OBRA '93 deleted section 1927(d)(6) and special coverage provisions for new drugs. Prior to OBRA '93, section 1927(d)(6) of the Act provided that a State may not exclude from coverage, subject to prior authorization or otherwise restrict any new drug or biological approved by the FDA for a 6-month period following the date of FDA approval. Effective October 1, 1993, these requirements no longer exist. New drugs approved by the FDA prior to October 1, 1993 will only receive the unrestricted coverage as specified in section 1927(d)(6) of the Act prior to OBRA '93 through September 30, 1993.

Based on our understanding of Congressional intent, we believe this 6-month period was specifically intended to be effective from the date of FDA approval to make prescribers familiar with a new drug and allow it to be introduced into the market place before it might require prior authorization by a State. Because this date was statutorily mandated, HCFA lacked authority to change this requirement to the date the drug was marketed.

Generally, with the exception of certain biological products, the approval of a new drug by the FDA under the NDA process does not include the approval of promotional materials. However, since the mid-1970s, the FDA has offered voluntary review and recommendations on proposed launch promotional materials to all sponsors. This review is utilized by well over 90 percent of the companies when marketing new products. With regard to manufacturing specifications, there are a few cases where compliance with the manufacturing specifications was part of a post-NDA approval agreement that would be completed prior to marketing the product. However, since there are so few exceptions in this area and because we are bound to follow the statute, HCFA considered the 6-month period effective from the date the drug is approved by the FDA.

C. Confidentiality of Manufacturer Price Information

Comment: Many of the commenters believed that States should not have access to manufacturers' price information, including unit rebate amounts, since HCFA has access to this information. The commenters stated that the risk of disclosure and use of information for other purposes is too great.

Response: We have agreed not to disclose AMP and best price to States but maintain that the statute contemplates the disclosure of manufacturer pricing data to States. Section 1927(b)(3)(D) of the Act provides that information concerning drug prices must not be disclosed by "the Secretary or a State agency (or contractor therewith)." By including States within the confidentiality provisions, we believe that the Congress intended that States have the right to access of sufficient pricing information to calculate their rebates as required by the statute. The unit rebate amount, which provides the rebate due per tablet, etc., and which is the end result of the manufacturer's calculation, is, in our opinion, the minimum amount of information States need to accomplish this. At the same time, the statute protects the manufacturer's pricing data from disclosure. In accordance with section 1927(b)(3)(D) of the Act, information disclosed by manufacturers in connection with the rebate agreement is confidential and, notwithstanding other provisions of law (including the Freedom of Information Act, 5 U.S.C. 552) must not be disclosed by HCFA, the State agency, or its contractors in a form that reveals the manufacturer, except as necessary for the Secretary of HHS to carry out the provisions of section 1927 and for the Comptroller General or the Director of the Congressional Budget Office to review the information provided.

D. Unit Rebate Amounts

Comment: Several commenters believed that HCFA is not authorized by the statute to calculate the unit rebate amount since the law clearly states that the manufacturers will compute the information. They indicated that the penalties that may be imposed on manufacturers and HCFA's auditing authority are sufficient to ensure that manufacturers make accurate and timely calculations.

Response: In accordance with sections 1902(a)(4), 1903, and 1927 of the Act, we believe that the Secretary has the authority and duty to implement and oversee various aspects of the drug rebate program. The Secretary has delegated this responsibility to HCFA. In accordance with this authority, HCFA is not precluded from calculating the unit rebate amount. We agree that manufacturers are responsible for calculating and paying rebates correctly. However, we believe that the administrative approach of HCFA supplying the States with unit rebate information to verify rebates is a practical and acceptable administrative oversight responsibility to ensure that States receive correct rebate payments and that the proper amount of FFP is made available to States.

E. Manufacturer's Requirements To List All Drugs

Comment: One commenter asserted that a manufacturer should not have to provide to HCFA a list of all of its covered outpatient drugs since some of its drugs may not be covered under Medicaid, that is, those drugs that a State may restrict or exclude from coverage under section 1927(d)(2) of the Act. The commenter believed that the requirement to list all of its drugs places an unnecessary administrative burden on the manufacturers and States. The commenter also believed that HCFA should review and evaluate each manufacturer's list of covered drugs after several rebate periods of experience in the drug rebate program and delete those drugs that are not covered under Medicaid or delete drugs that provide a minimal rebate.

Response: Under the terms of the national rebate agreement, a manufacturer is required to provide to HCFA rebates for all its covered outpatient drugs dispensed under the plan. Thus, in our opinion, there is no authority under the statute to delete drugs from the list of covered outpatient drugs where those drugs provide a minimal rebate from the drug rebate program.

F. Enforcement of State's Obligations

Comment: Several commenters asserted that HCFA's compliance action initiated against a State that fails to meet the various requirements under the drug rebate program, (for example, covering all drugs or new drugs from the date of FDA approval) is an ineffective and inadequate means of ensuring that States obey the requirements of sections 1902(a)(54) and 1927 of the Act.

The majority of commenters believed that manufacturers should be able to withhold rebate payments to a State until the State conforms its policies to the law. One commenter suggested that manufacturers should be allowed to withhold rebate payments in an amount equal to the sales lost during a rebate period, which would be estimated by the manufacturer, as a result of a State not properly covering drugs. Otherwise, the commenter was concerned that a State could "reap a windfall" since it would receive rebates and, at the same time, avoid paying for selected products that the State was required by statute to cover.

Response: Section 1904 of the Act and regulations at 42 CFR part 430, subpart C, provide that we may initiate a noncompliance action if States do not comply with all provisions of the Medicaid program. As noted in the rebate agreement, manufacturers may notify HCFA if they believe a State is not complying with a provision of the drug rebate program. The statute requires a manufacturer to provide a rebate to the State for each calendar rebate period based on utilization data submitted by the State. The rebate must be paid by the manufacturer to the State not later than 30 days after the date of receipt of the State's utilization data. Section 1927 of the Act does not contemplate that manufacturers can withhold rebates in those situations where a State does not comply with all of the provisions of the Medicaid program.

G. Adequacy of State Medicaid Utilization Data

Comment: One commenter asserted that section II. (b) of the national rebate agreement requires manufacturers to pay rebates to the States even if a State has failed to report all of the utilization data required by the statute and the agreement. The commenter believed this requirement is an attempt to relieve States of one of their primary responsibilities under the statute.

Response: Section 1927(b)(2)(A) of the Act requires that States use a standard reporting format established by the Secretary. In accordance with the statute, HCFA has defined the format for utilization data to include, in part, the use of NDC numbers. Given the provisions of the statute and our regulations at § 447.530, States would be required to report, at a minimum, the utilization data indicating the NDC number for the covered outpatient drugs and the total number of units of the drugs paid for during a rebate period. In accordance with the statute, manufacturers must calculate and pay the rebate amounts within 30 days of the receipt of these two items of information. Furthermore, a manufacturer may audit these data that a State provides or is required to provide. If a manufacturer believes that a State has reported erroneous utilization data, the manufacturer is not required to pay a rebate on the portion of drugs for which the data are in question until the dispute is resolved.

Comment: Several commenters believed that Medicaid utilization data that States are required to supply to manufacturers are inadequate. They suggested that States should provide data at zip code level, and at a more detailed level if a manufacturer needs it, such as a claims history file that includes recipient, pharmacy, dispensing date and other claim information. They asserted that if States do not currently have this capability, we should require them to do so. These commenters also suggested that State utilization data should include monthly totals by NDC number and a rebate period summary, and that States should also be required to maintain the date that the drug was dispensed.

Several commenters stated that manufacturers should have the right to audit pharmacies and HCFA should ensure State cooperation with manufacturers in conducting these audits.

Response: We believe the data that the States provide under this regulation would be adequate for purposes of calculating the rebate. In addition, the manufacturer has the right, by law, to audit these data and adjustments to rebate amounts will be made to the extent that the data indicate that utilization was greater or less than the amount previously indicated. We would not require States to submit additional data, such as zip code-level information or a claims history, with their rebate period information. However, in the event of a dispute, we would require States to provide the manufacturer with this type of data if State confidentiality laws allow. (Section V.F. of the preamble contains further discussion on this issue.) Specific claim information that identifies a recipient is generally prohibited from being released to the public under the authority of section 1902(a)(7) of the Act and regulations at 42 CFR 431.300 through 431.307.

Manufacturers do not have the authority to audit pharmacies under section 1927 of the Act, but we expect States to audit pharmacy data in response to manufacturer requests when warranted.

H. Dispute Mechanism

Comment: One commenter believed that the timeframe of 30 days after receipt of a State's data is inadequate for a manufacturer to challenge errors made by the State. The commenter believed that the 30-day timeframe is unfair and may encourage premature challenges by manufacturers seeking to preserve their rights to use the dispute resolution process described in section V. of the rebate agreement.

Response: Section 1927(b)(1)(A) of the Act requires that manufacturers provide rebates within 30 days of receipt of State utilization data. In accordance with this requirement, we believe that the 30-day timeframe is reasonable for manufacturers to distinguish between legitimate disputed items and data inconsistencies and to attempt to resolve those disputes since data used to contest State data are similar to that needed to pay the rebate. If a manufacturer and State are unable to resolve discrepancies within the 30-day timeframe, the manufacturer must pay the rebate on the undisputed data and provide written notice of any discrepancies by submitting the RAR to the State agency. We would view it as a violation of these regulations and the rebate agreement if a manufacturer challenges the data simply as a method to extend the time period for reviewing data and avoid paying a rebate. The manufacturer also will be responsible for paying interest, as set forth in section 1903(d)(5) of the Act, on the disputed portion of the rebate if the State's data are not erroneous. (Section V.F. of the preamble contains a detailed discussion of the dispute resolution process.)

Comment: One commenter asserted that the dispute resolution process leaves States at financial risk when a dispute arises since HCFA will require its portion of the rebate payments from the States even though a manufacturer will withhold payments. The commenter believed that HCFA should assume some financial risk as well as play a more significant role in the dispute resolution.

Response: Manufacturers must pay States a rebate on the portion of the State utilization data that is not in dispute. We do not require the State to pay HCFA the Federal portion of the rate on the amount that is in dispute. Rather, we are requiring payment on those amounts that States receive in accordance with section 1927(b)(1)(B) of the Act. As a general rule, we believe we play a significant part as an overseer of the dispute resolution process between manufacturers and States. However, since both of these parties are directly responsible for the data they generate, we believe they must primarily work together to reconcile any differences.

I. Separate State Agreements

Comment: Several commenters believed that: (1) Modifications to existing State agreements are not permitted under the statute; (2) a State agreement may not legally provide for a different rebate amount than the amount in the national agreement; and (3) approval of an agreement under which a State exempts products from prior approval restrictions in exchange for rebates greater than those provided in the national agreement would be an abuse of HCFA's discretion even if the greater rebates were legal.

Response: We do not agree that modifications to existing agreements are prohibited under the statute. Section 1927(a)(4) of the Act specifies conditions that existing agreements must meet to be in compliance with the law. (Section II.A. of this preamble contains a discussion of the provisions of section 1927(a)(4).) Section 1927(a)(4) does not preclude modifications to existing agreements, such as allowing greater rebates.

We disagree that there is no legal authority to approve a separate agreement that provides for a different rebate amount than the amount in the national agreement. Section 1927(a)(1) of the Act recognizes the Secretary's authority to authorize individual State agreements and does not require that the individual State agreements incorporate the rebate amount requirements set forth in the national agreement. Thus, rebates under the individual State agreements need not match the rebates mandated under the national agreement. However, for the Secretary to accept them, as discussed in section II. of this preamble, they must be at least as large as the amount specified in the national agreement.

HCFA has the authority under the statute to approve individual State agreements and will review the agreements to ensure that the State is operating its prior authorization program in a manner consistent with the statute and regulations. However, given the provisions of section 1927(a) of the Act, we disagree that a State may not negotiate a separate rebate agreement that requires a higher rebate in exchange for removing drugs from the State's prior authorization program, provided that medically necessary drugs continue to be available to Medicaid recipients.

Comment: Several States contend that the 60-day timeframe allowed for the resolution of disputes is inadequate.

The States suggested that we expand the timeframe to approximately 120 days as a more realistic standard.

Response: We acknowledge that this timeframe is not adequate due to the complexity of resolving disputes. Therefore, we have revised the dispute resolution process, as discussed in section V.F. of the preamble, to reasonably accommodate all of the steps necessary to resolve a dispute. We are proposing to extend the entire timeframe to 240 days after the State receives the manufacturer's RAR for a State and manufacturer to settle the dispute. After this point, both parties may use arbitration, mediation, or the State hearing mechanism to settle the dispute. As discussed in section V.F. of the preamble, we established this timeframe after much discussion with States, manufacturers, and pharmacy groups. We believe the proposed dispute resolution process and the expanded timeframes meet the needs of both States and manufacturers.

J. Right of the Secretary to Audit AMP and Best Price Data

Comment: One commenter claimed that the statute does not give the Secretary an unqualified right to audit a manufacturer's data regarding AMP and best price calculations, as stated in the rebate agreement.

Response: Section 1927(b)(3)(B) of the Act clearly states that the Secretary has the right to survey wholesalers and manufacturers to verify manufacturer prices reported on AMP and best price. We believe this provision includes the right to audit pricing data, since an audit is often necessary to verify such pricing data.

K. Nonrenewal and Termination of Agreements

Comment: One commenter recommended that the national rebate agreement should be modified to specify that the effective date of manufacturer initiated termination/nonrenewal is the "earlier" of 60 days after a notice or the ending date of the term of contract if proper notice is given. The language of the published national agreement indicated that it is the "later" of these events.

Response: This was an error in the national agreement and will be corrected in the next revision of the national rebate agreement. We will honor nonrenewals up to 60 days before the end of the current period of the agreement and terminations up to 60 days before the end of the current rebate period (effective at the end of that rebate period). We have indicated the correct date in the regulations at § 447.514(c).

L. Administrative Procedure Act

Comment: Several commenters stated that they believed HCFA violated the Administrative Procedure Act (APA), 5 U.S.C. section 553, by using a model rebate agreement to implement the drug rebate program instead of developing formal regulations that allowed for public comment. They indicated that HCFA did not have adequate input from the States, manufacturers, pharmacy organizations, and the public while developing the policies that govern the rebate program. One commenter believed that failure to develop regulations or allow amendments to the national rebate agreement puts manufacturers in the untenable situation of having to sign an agreement without fully understanding the terms or risk losing their drug coverage under Medicaid.

Response: Section 4401 of OBRA '90 requires manufacturers to enter into and comply with the terms of the national rebate agreement by March 1, 1991, in order for payment to be made available under section 1903 of the Act for covered outpatient drugs. (As noted earlier, this date was extended to April 30, 1991, under the extenuating circumstances provision of section 1927(a)(3) of the Act.) Because of the short timeframe imposed by the Congress to implement the drug rebate provisions, it was impossible to issue regulations prior to the date that the national rebate agreement was required to be signed. In light of these short timeframes, and in the interest of receiving public comments, the contents of the rebate agreement were developed in direct consultation with representatives of drug manufacturers, States, and other interested parties. We considered this process an adequate means of providing actual notice and for obtaining public comments of affected parties within the time constraints. We believe that, given the circumstances, this approach was consistent with the provisions of the APA.

In addition, section 4207(j) of OBRA '90 authorizes the Secretary to issue regulations on an interim or other basis as may be necessary to implement the amendments made by the provisions of OBRA '90. In developing this proposed rule with comment period, we have taken into consideration, as appropriate, the public comments we received on the February 21, 1991, **Federal Register** notice, which included the contents of the national rebate agreement.

M. Timeframes for Signing Rebate Agreements

Comment: The majority of commenters indicated that manufacturers did not have adequate time to analyze and sign the national rebate agreement if they wanted their drugs covered retroactively to January 1, 1991. If they did not sign the agreement by the given deadline, their drugs would not be covered until July 1, 1991, thereby resulting in a large span of time within which drugs would not be covered.

Response: We realized that the timeframe that manufacturers had to analyze and sign the rebate agreement for their drugs to be covered retroactively to January 1, 1991 was very limited. The majority of manufacturers were able to sign the rebate agreement by the deadline. However, for those few that did not, we extended, under the extenuating circumstances clause in section 1927(a)(3)(B) of the Act, the original deadline of February 28, 1991, to April 30, 1991, for manufacturers to enter into a rebate agreement effective for drug coverage retroactive to January 1, 1991.

N. Amending the Language of the Rebate Agreement

Comment: One commenter recommended that HCFA include in regulations the process and timeframes that will be used to make changes to the national rebate agreement.

Response: We plan to periodically revise the rebate agreement language as needed. However, we believe that a scheduled timeframe for publication is not warranted since manufacturers have entered into the rebate agreement with coverage beginning in different rebate periods. We will further consider all comments from the February 21, 1991 notice and this proposed rule when we revise the national rebate agreement language.

O. Definition of Terms in the National Rebate Agreement

Comment: We received numerous comments on the definitions included in section I. of the national rebate agreement. Commenters claimed that our definitions were not in compliance with the statute.

Response: We considered comments on definitions when developing this proposed rule. Where we believed changes were necessary, we included them in the definitions contained in this proposed rule. After publication of the final rule, we intend to amend the national rebate agreement to reflect any new regulatory requirements and definitions.

P. National Drug Code

Comment: Several commenters recommended that States be required to maintain their records of NDC numbers by full 11-digit NDC numbers after a reasonable transition time period. The commenters also suggested that if a State does not comply with the 11-digit NDC number requirement by the specified deadline, manufacturers should have no responsibility to pay the rebate amounts until such a system is in place.

Response: OBRA '93 amended section 1927(b)(2)(A) of the Act to require that States report to manufacturers information on the total number of units of each dosage form and strength and package size of each covered outpatient drug, that is, States must use an 11-digit NDC number. This change is effective as if it was included in OBRA '90.

Prior to the enactment of OBRA '93, we agreed that States should maintain their records by the full 11-digit NDC number that indicates the manufacturer, product, and package size of a drug. In accordance with sections 1902(a)(54) and 1927(b)(2) of the Act, we began requiring States to report drug utilization data to HCFA and manufacturers using the 11-digit NDC numbers for claims paid on and after March 1, 1992. (During a transitional period of January 1, 1991 through February 29, 1992, we allowed States that did not have the technical capability to report the 11-digit NDC number to use the 9-digit number (that is, the NDC number without the package size.)

We disagree, however, with the statement that a manufacturer should be able to withhold rebates. As stated earlier, the statute requires manufacturers to pay a rebate within 30 days of receiving State utilization data and does not authorize manufacturers to withhold a rebate when the State has submitted utilization data to the manufacturer. We will consider any State that does not maintain an 11-digit NDC number to be out of compliance.

Q. Definition of Nominal Price

Comment: One commenter contended that the definition of "nominal price" should not be predicated on a fixed percentage of 10 percent since this definition is not authorized by law and ignores the unique marketing and pricing practices of each drug manufacturer. This commenter believed that the company that claims a nominal price for a drug should have the burden of demonstrating to HCFA that the facts and circumstances concerning the drug render the price as nominal. The commenter stated that the standards and procedures to demonstrate a nominal price should be specified in the regulations. Another commenter agreed with the nominal price definition in the rebate agreement of "any price less than 10 percent of the AMP."

Response: We originally gave consideration to a definition that a nominal price be less than 1 percent of AMP. However, after discussions with manufacturers, States, and other parties, we believe the current definition of "less than 10 percent of AMP" to be sufficient to encompass the nominal prices offered by manufacturers. Prices greater than this appear to be for sales of the type meeting the definition for inclusion of AMP or best price.

We believe the administrative costs and burdens are too great to justify a policy that would require HCFA to review each manufacturer's case of why a nominal price for a drug is warranted and would offer no greater assurance of more accurately defining nominal price.

R. Additional Rebates Based on Rebate Period CPI–U Increases

Comment: One commenter recommended that the additional rebates (for increases in drug costs in excess of the increase in the CPI–U) should not be computed on a rebate period basis because manufacturers do not raise prices each rebate period and the effects of a rebate period CPI–U calculation would be uneven. However, the commenter believed that if the additional rebate is computed on a rebate period basis, it should be reconciled at the end of the year based on the increase of CPI–U compared to the increase in price. The commenter also suggested that we should consider comparing increases in prices to the projected annual increase in the CPI–U.

Response: The revision to the additional rebate calculation suggested by the commenter is contrary to section 1927 of the Act, which provides that the additional rebate is computed on the increase in CPI–U from a base date to the month before the beginning of the rebate period. OBRA '93 amended section 1927(c)(2) and removed the reference that an alternate period could be considered. We believe the intent of the law is to ensure that, for Medicaid purposes, drug price increases are equal to or less than the increase in the CPI–U on a rebate period basis.

Both of the commenter's proposals would allow drug prices to increase in excess of the rebate period CPI–U until the CPI–U "caught up", for example, a price increase of 10 percent in December 1990 would not cause an additional rebate for all of 1991 if the CPI–U increased 10 percent by December 1991.

Comment: One commenter suggested that the base CPI–U should be modified to use the June 1990 figure, the month before the rebate period used to determine the base AMP. The commenter believed this would make the time periods between the measurement of CPI–U and AMP the same.

Response: Section 1927(c)(2) of the Act provides that for drugs approved before October 1, 1990, we use the CPI–U from October 1, 1990. The CPI–U in effect on October 1, 1990, is the September 1990 CPI–U. For drugs approved after October 1, 1990, section VI. A. 2. of the preamble explains the criteria for determining the base CPI–U for the periods January 1, 1991—September 30, 1993, and October 1, 1993 and thereafter.

XI. Responses to Public Comments

Because of the large number of items of correspondence we normally receive on a rule, we are not able to acknowledge or respond to written public comments individually. However, we will consider all comments that we receive by the date specified in the "Comment Date" section of this preamble and respond to them in the preamble to any final rule that we issue.

XII. Paperwork Burden

Sections 447.508, 447.510, 447.514, 447.516(b), 447.524 (f) and (g), 447.526(c)(2)(i), 447.530, 447.534, 447.536, and 447.540(a)(2) of these proposed regulations contain requirements that are subject to review by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35). These requirements have been approved by OMB under approval numbers 0938–0578 (for manufacturers) and 0938–0582 (for States).

Based on our experience with establishing new reporting systems, we estimate that the reporting requirements contained in these sections would be 39,289 burden hours per rebate period for manufacturers and 1,531 burden hours per rebate period for State Medicaid agencies.

XIII. Impact Analysis

A. Overall Impact

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Secretary certifies that a regulation will not have a significant impact on a

substantial number of small entities. For purposes of the RFA, States and individuals are not small entities, but we consider some participating manufacturers as small entities.

In addition, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis for any proposed rule that may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds. We are not preparing a rural hospital impact statement because we have determined, and the Secretary certifies, that this proposed rule would not have a significant economic impact on the operations of a substantial number of small rural hospitals.

Although we view the anticipated results of these interim final regulations as beneficial to the Medicaid program as well as to Medicaid recipients and State governments, we recognize that some of the provisions could be controversial and may be responded to unfavorably by some affected entities. We also recognize that not all of the potential effects of these provisions can be definitely anticipated, especially in view of their interaction with other Federal, State and local activities regarding outpatient prescription drug costs. In particular, considering the effects of our simultaneous efforts to improve the delivery of Medicaid-covered outpatient prescription drugs, it is impossible to quantify meaningfully a projection of the future effect of all of these provisions on State and manufacturers' operating costs or on the frequency of substantial noncompliance and termination proceedings.

However, in a General Accounting Office report entitled "Changes in Drug Prices Paid by Health Maintenance Organizations (HMOs) and Hospitals Since Enactment of Rebate Provisions" (January, 1993, GAO/HRD–93–43), there was very little evidence of a significant effect on small rural hospitals. This report compares the year before and year after rebates went into effect. It concludes that there were only negligible effects on drug costs to hospitals (in fact, a slight decrease for inpatient drugs), but that HMOs' costs went up about 8 percent.

It is clear that a large number of small entities, such as manufacturers and pharmacies, will be affected by the implementation of these statutory provisions, and a substantial number of these entities may be required to make changes in their operations. For these reasons, we have prepared the following voluntary analysis. This analysis, in combination with the rest of the preamble, is consistent with the standards for analysis set forth by the RFA.

B. Anticipated Effects

1. Effects on the Medicaid Program

Primarily, the Medicaid drug rebate law was intended to reduce the amount State Medicaid programs pay for outpatient drugs by requiring manufacturers to offer States discounted prices for covered outpatient drugs. Below are estimates of Medicaid drug rebates. These estimates are based on data from actual rebates reported or paid for fiscal year 1992. These estimates also include the impact of section 601 of VHCA, which eliminated prices paid by the DVA and other entities from calculation of best price under the Medicaid drug rebate program. Projected Federal and State rebates have each been reduced by $10 million per year to account for the impact of the VHCA provisions.

[$ in millions]

	FY 94	FY 95	FY 96	FY 97
Federal	$870	$985	$1135	$1330
State	620	700	810	950

For fiscal year 1992, we estimated 12.76 percent rebate as a percentage of drug costs to the Medicaid program. Fiscal year 1993 data indicated an increase of the drug rebate of approximately 16 percent. Although we expect the percentage rebate to increase slightly over the estimable period reflected above, we are unable to do so with any degree of accuracy.

The estimates in the table represent savings generated from rebate payments from pharmaceutical manufacturers. They were the result of the following process:

- We developed a formula to estimate the manufacturer rebates as a percentage of Medicaid ingredient costs from a sample of drug claims drawn from the Medicaid Statistical Information System, otherwise known as MedStat.
- Average manufacturer prices were approximated by applying a discount to published average wholesale prices; the "best price" was developed from the DVA Federal supply schedule.
- The rebate formulas were modeled using a sample database from the data described above. The savings that resulted were expressed as a percentage of calculated Medicaid ingredient costs for the sample drugs.
- These saving percentages were applied to budget projections of Medicaid ingredient costs to obtain projected future savings. For this step the ingredient cost proportion of Medicaid drug spending and the distribution of brand name drugs versus generic drugs was derived from an analysis of data from the Pharmaceutical Data Service survey databases and MedStat data.
- The potential savings were reduced to account for rebate agreements that would have been negotiated between States and manufacturers in the absence of section 4401 of OBRA '90.

Further, section 13602 of OBRA '93 exhibited modifications to the Medicaid Drug Rebate law as previously indicated. We have made the following estimates of savings as a result of these changes.

[$ in millions]

	FY 94	FY 95	FY 96	FY 97	FY 98
Federal..	$25	$55	$65	$70	$75
State	20	40	45	50	55

2. Effects on Pharmaceutical Manufacturers

Initially, it was anticipated that the outcome of these provisions would provide the Medicaid outpatient prescription drug program, representing 12 to 20 percent of all retail prescriptions in their respective States, with access to the best price for single source and innovator multiple source drugs. However, it was predicted in many circles that the pharmaceutical manufacturers would be unable to absorb these losses from 12 to 20 percent of retail sales and would respond by shifting the cost to other non-Medicaid sectors of the prescription drug business. Various articles in newspapers and health journals have indicated that the pharmaceutical industry has elevated some prescription prices in non-Medicaid sectors. The overall impact of manufacturers raising drug prices for the non-Medicaid population cannot be accurately predicted.

Current data shows that approximately 515 manufacturers have signed agreements to participate in the Medicaid drug rebate program. Manufacturers appear to support the system and have minimal dissatisfaction. Recent studies done by the Office of Inspector General (OIG) show well over 90 percent of the drugs (and all major drugs) are covered compared to those covered prior to the program.

3. Effects on Non-Medicaid Sector

Reports indicate that some drug manufacturers are shifting higher drug costs to the DVA and the private sector. At one point, the DVA estimated that it would incur an additional $150 million in drug costs in 1991 and believed that these increased drug costs would be the result of manufacturers attempting to level out their pricing structure to avoid paying Medicaid significantly discounted best prices. In part, as a result of these estimates, the DVA Appropriations Act was enacted, which temporarily excluded until June 30, 1992, prices paid for drugs by the DVA from the best price. In addition, VHCA was enacted on November 4, 1992, which amended section 1927 in several areas and excluded prices paid by numerous entities from the best price component of the Medicaid drug rebate calculation. However, sufficient data do not exist to make a comprehensive evaluation of the overall impact on the non-Medicaid sectors.

If manufacturers attempt to maintain revenues as predicted by some sources, there could be several entities of the non-Medicaid sector affected other than government. If all discounts and contracts were rescinded and one price instituted for all, the economic impact on the hospital industry, for example, would be substantially negative since the industry receives large discounts for drug purchases, but for some other purchasers, it would be substantially positive.

C. Alternatives Considered

Section 1927 of the Act imposes strict legal and monetary savings requirements that the drug rebate program must meet. The only alternative to implementing the drug rebate program is to repeal section 4401 of OBRA '90 and section 13602 of OBRA '93. However, a repeal would impose additional costs on the Medicaid program since the drug rebate program is expected to generate substantial savings. Also, Federal and State administrative costs would be incurred to reverse the policy and operational procedures that were established to implement the drug rebate program.

A cost/benefit analysis of repealing the legislation was not conducted since the primary effect of this program simply includes what economists term an economic "transfer"—reducing simultaneously and equally costs to the government and revenues of manufacturers through a change in purchasing procedures. The Congress passed this law to generate program savings from rebates to obtain price reduction that other sectors of the economy have received for years, and to provide the Medicaid population with equal access to the same prescription drugs that benefit the non-Medicaid population.

D. Interaction With Other Activities

The drug rebate program, in combination with the reimbursement moratorium, prospective and retrospective drug use review, electronic claims processing system, and demonstration projects, should ensure that the Medicaid prescription drug program will operate in the most economical manner possible. These provisions should result in decreased costs for both States and pharmacies once all aspects of section 1927 of the Act are fully implemented.

E. Conclusion

State and Federal Medicaid expenditures have grown at an extraordinary rate in recent years. Medicaid expenditures on prescription drugs, in particular, during the last half of the 1980s, grew at a rate greater than spending for many other Medicaid services. Therefore, we believe that the implementation of the above mentioned provisions in combination with measures that obtain an additional rebate based on the rate of growth of drug expenditures would help to reduce costs of the Medicaid program. We solicit public comments on the extent that any of the above mentioned entities are significantly economically affected by these provisions.

In accordance with the provisions of Executive Order 12866, this rule was reviewed by the Office of Management and Budget.

List of Subjects

42 CFR Part 441

Family planning, Grant programs—ealth, Infants and children, Medicaid, Penalties, Prescription drugs, Reporting and recordkeeping requirements, Safety.

42 CFR Part 447

Accounting, Administrative practice and procedure, Grant programs—health, Health facilities, Health professions, Medicaid, Reporting and recordkeeping requirements, Rural areas.

42 CFR chapter IV, subchapter C would be amended as follows:

A. Part 441 is amended as follows:

PART 441—SERVICES: REQUIREMENTS AND LIMITS APPLICABLE TO SPECIFIC SERVICES

1. The authority citation for part 441 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. In § 441.10, the introductory text is republished, and a new paragraph (j) is added to read as follows:

§ 441.10 Basis.

This subpart is based on the following sections of the Act which state requirements and limits on the services specified or provide Secretarial authority to prescribe regulations relating to services:

* * * * *

(j) Sections 1903(a) and (i)(10) concerning FFP for State expenditures for drugs.

3. Section 441.25 is amended by adding a new paragraph (c) to read as follows:

§ 441.25 Prohibition on FFP for certain prescribed drugs.

* * * * *

(c) FFP is not available in State expenditures for covered outpatient drugs unless the requirements and conditions specified in subpart E of part 447 of this subchapter are met.

B. Part 447 is amended as follows:

PART 447—PAYMENTS FOR SERVICES

1. The authority citation for part 447 continues to read as follows:

Authority: Section 1102 of the Social Security Act (42 U.S.C. 1302).

2. Section 447.300 is revised to read as follows:

§ 447.300 Basis and purpose.

In this subpart—

(a) Sections 447.302 through 447.335 and 447.361 implement section

1902(a)(30) of the Act, which requires that payments be consistent with efficiency, economy, and quality of care; and section 1927(e)(4) of the Act, which specifies requirements for establishing upper limits on reimbursement for multiple source drugs dispensed under drug rebate agreements.

(b) Section 447.342 implements section 1902(a)(43) of the Act, which permits the State plan to provide for payment to a physician for laboratory services which the physician did not personally perform or supervise.

(c) Section 447.371 implements section 1902(a)(13)(F) of the Act, which requires that the State plan provide for payment for rural health clinic services in accordance with regulations prescribed by the Secretary.

3. Section 447.332 is revised to read as follows:

§ 447.332 Upper limits for multiple source drugs.

(a) *Establishment and issuance of listings.*

(1) HCFA will establish listings that identify and set upper limits for multiple source drugs that meet the following requirements:

(i) All of the formulations of the drug approved by the Food and Drug Administration (FDA) have been evaluated as therapeutically equivalent in the most current edition of its publication *Approved Drug Products with Therapeutic Equivalence Evaluations* (including supplements or in successor publications).

(ii) At least three suppliers list the drug (which has been classified by the FDA as category "A" in its publication, *Approved Drug Products with Therapeutic Equivalence Evaluations* (including supplements or in successor publications)) based on all listings contained in current editions (or updates) of published compendia of cost information for drugs available for sale nationally.

(2) HCFA will publish the lists of multiple source drugs for which upper limits have been established and revisions to the lists in Medicaid program instructions.

(3) HCFA will identify the sources used in compiling these lists.

(b) *Specific upper limits.*

(1) The agency's payment for multiple source drugs identified and listed in accordance with paragraph (a) of this section must not exceed, in the aggregate, payment levels determined by applying for each drug entity a reasonable dispensing fee established by the agency plus an amount established by HCFA that is equal to 150 percent of the published price for the least costly therapeutic equivalent drug (using all available national compendia) that can be purchased by pharmacists in quantities of 100 tablets or capsules (or, if the drug is not commonly available in quantities of 100, the package size commonly listed) or, in the case of liquids, the commonly listed size.

(2) For multiple source outpatient prescribed drugs identified in subpart E of this part, the formula specified in paragraph (b)(1) of this section is not subject to change by HCFA during the period January 1, 1991, through December 31, 1994.

(3) A State that is in compliance with the formula under paragraph (b)(1) of this section and § 447.331 may not reduce its reimbursement limits for covered outpatient drugs or dispensing fees for these drugs established under this formula during the period January 1, 1991, through December 31, 1994.

4. A new § 447.335 is added to read as follows:

§ 447.335 Additional upper limits for multiple source drugs.

(a) *Establishment and issuance of listings.*

(1) In addition to establishing listings specified in § 447.332, HCFA will establish listings that identify and set upper limits for multiple source drugs for which at least three of the formulations of the drug approved by the Food and Drug Administration (FDA) have been evaluated as therapeutically and pharmaceutically equivalent (category "A") in the most current edition of its publication *Approved Drug Products with Therapeutic Equivalence Evaluations* (including supplements or in successor publications), regardless of whether all additional formulations are rated as such.

(2) HCFA will publish the lists of multiple source drugs for which upper limits have been established and revisions to the lists in Medicaid program instructions.

(3) HCFA will identify the source(s) used in compiling these lists.

(b) *Specific upper limits.* The agency's payment for multiple source drugs identified and listed in accordance with paragraph (a) of this section must not exceed, in the aggregate, payment levels determined by applying for each drug entity a reasonable dispensing fee established by the agency plus an amount established by HCFA that is equal to 150 percent of the published price for the least costly therapeutic equivalent drug (using all available national compendia) that can be purchased by pharmacists in quantities of 100 tablets or capsules (or, if the drug is not commonly available in quantities of 100, the package size commonly listed) or, in the case of liquids, the commonly listed size. For purposes of this paragraph, therapeutic equivalent drugs mean drugs rated A or B by the FDA.

5. A new subpart I, consisting of §§ 447.500–447.550, is added to read as follows:

Subpart I—Payment for Outpatient Prescription Drugs Under Drug Rebate Agreements

Sec.

447.500 Basis and purpose.
447.502 Applicability.
447.504 Definitions.
447.506 Requirement for rebate agreements as a condition for payment for outpatient prescription drugs.
447.508 State plan requirements.
447.510 Rebate agreements: General requirements.
447.512 Terms of agreements.
447.514 Termination and nonrenewal of national rebate agreements.
447.516 Outpatient drugs subject to rebates.
447.518 Outpatient drugs of manufacturers without rebate agreements.
447.520 New drugs subject to rebates.
447.522 Drugs not subject to rebates.
447.524 Exclusions and restrictions on drugs subject to rebates.
447.526 Prior authorization programs.
447.530 State reporting requirements.
447.534 Manufacturer reporting requirements.
447.536 Resolution of disputes relating to information reported.
447.538 Resolution of disputes relating to drug access and State systems.
447.540 Confidentiality of reported information.
447.542 Penalties for failure to report or reporting false information.
447.546 Payment of rebates.
447.548 Computation of unit rebate amount.
447.550 Denial of FFP.

Subpart I—Payment for Outpatient Prescription Drugs Under Drug Rebate Agreements

§ 447.500 Basis and purpose.

(a) *Basis.* This subpart—

(1) Interprets section 1927 of the Act which provides in part that, in order for payment to be made under Medicaid for covered outpatient drugs of a manufacturer, the manufacturer must enter into and comply with a rebate agreement with the Secretary of HHS on behalf of States (or with States directly under specific authorization of the Secretary);

(2) Implements section 1902(a)(54) of the Act which includes a State plan requirement that provides that if a State elects to cover prescription drugs, the State must comply with the

requirements of section 1927 of the Act; and

(3) Implements section 1903(i)(10) of the Act which provides for denial of FFP in expenditures—

(i) For covered outpatient drugs of a manufacturer dispensed in any State if the manufacturer does not enter into and comply with a rebate agreement, except as prescribed in section 1927(a)(3) of the Act; and

(ii) For any amount expended which exceeds the upper payment limit for an innovator multiple source drug dispensed on or after July 1, 1991, if under applicable State law, a less expensive multiple source drug could have been dispensed.

(b) *Purpose*. This subpart specifies the requirements for State Medicaid agencies and the conditions under which FFP will be made for covered outpatient prescription drugs dispensed on or after January 1, 1991, under drug rebate agreements with manufacturers. This subpart also specifies the conditions for approval and renewal of rebate agreements with drug manufacturers and manufacturer reporting requirements.

§ 447.502 Applicability.

(a) The provisions of this subpart E apply to the 50 States (including any State that is furnishing medical assistance under a waiver granted under section 1115 of the Act) and the District of Columbia.

(b) The provisions of this subpart do not apply to covered outpatient drugs dispensed by:

(1) Health maintenance organizations (HMOs), including those organizations that contract with HCFA under section 1903(m) of the Act; and

(2) Hospitals that dispense covered outpatient drugs using drug formulary systems and bill Medicaid no more than the hospital's purchasing costs for these drugs as determined under the approved State plan.

§ 447.504 Definitions.

As used in this subpart E—

Covered outpatient prescription drugs or *covered outpatient drugs* means those drugs as defined in sections 1927(k) (2) through (4) of the Act and specified in § 447.516.

Depot means any Federal warehousing facility and distribution arrangement, including the Department of Defense's Electronic Commerce Initiative (ECI), whether:

(1) Government owned and operated;

(2) Government owned and privately operated; or

(3) Privately owned and operated.

Depot prices mean prices available to any depot of the Federal Government for purchase of drugs from a manufacturer through the depot system of procurement, irrespective of whether the drug products physically flow through the depot.

FDA refers to the Food and Drug Administration, Department of Health and Human Services.

Innovator multiple source drug means a multiple source drug from 1938 to present that was originally marketed under an original new drug application approved by the FDA.

Manufacturer. (1) A manufacturer means any entity that—

(i) Is engaged in the production, preparation, propagation, compounding, conversion, or processing of prescription drug products, either directly or indirectly by extraction from substances of natural origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis;

(ii) Is engaged in the packaging, repackaging, labeling, relabeling, or distribution of prescription drug products and is not a wholesale distributor of drugs or a retail pharmacy licensed under State law; and

(iii) Possesses legal title to the National Drug Code (NDC) number for a covered drug, or biological product.

(2) In the case of a corporation that meets the conditions of paragraphs (1)(i) and (1)(ii) of this definition, the entity includes—

(i) Any corporation that owns at least 80 percent of the total combined voting power of all classes of stocks or 80 percent of the total value of shares of all classes of stock in the entity (that is, a parent corporation);

(ii) Any other corporation in which the parent corporation of the entity owns at least 80 percent of the total combined voting power of all classes of stock or 80 percent of the total value of shares of all classes of stock in the other corporation (that is, a brother-sister corporation); and

(iii) Any other corporation in which the entity owns at least 80 percent of the total combined voting power of all classes of stock or 80 percent of the total value of shares of all classes of stock in the other corporation (that is, a subsidiary corporation).

Manufacturer-specific pricing data includes the average manufacturer price (AMP) (as defined in § 447.534(c)(1)), base date AMP, best price, or unit rebate amount in connection with a rebate agreement.

Marketed means that a drug was first sold by a manufacturer in the United States after FDA approval.

Medically accepted indication means any use for a covered outpatient drug approved under the Federal Food, Drug, and Cosmetic Act, or any use that is supported by one or more citations included or approved for inclusion in any of the following compendia: the American Hospital Formulary Service-Drug Information; the American Medical Association Drug Evaluations; and the United States Pharmacopeia-Drug Information.

Multiple source drug means a covered outpatient drug for which there are two or more drug products which—

(1) Are rated as therapeutically equivalent by the FDA in its current edition of its publication *Approved Drug Products with Therapeutic Equivalence Evaluations*;

(2) As determined by FDA, are pharmaceutically equivalent (the drug products contain identical amounts of the same active drug ingredient in the same dosage form and meet compendial or other applicable standards of strength, quality, purity, and identity) and are bioequivalent (the drugs do not present a known or potential bioequivalence problem, or if they do present such a problem, they are shown to meet an appropriate standard of bioequivalence). (This condition does not apply if FDA changes by regulation the requirement that in order for drug products to be rated as therapeutically equivalent, they must be pharmaceutically equivalent and bioequivalent);

(3) For purposes of coverage under the drug rebate program, are rated as "A" or "B" (therapeutic equivalence code) by the FDA in its current edition of its publication *Approved Drug Products with Therapeutic Equivalence Evaluations*; and

(4) Are sold or marketed in the State during a rebate period.

National rebate agreement means the rebate agreement developed by HCFA to implement section 1927 of the Act.

NDC refers to the National Drug Code number maintained by the FDA.

Nominal price refers to a price that is less than 10 percent of AMP.

Noninnovator multiple source drug means a multiple source drug that is not an innovator multiple source drug and that was marketed under an abbreviated new drug application approved by FDA, or any marketed, unapproved pre-1938 drug product for which the FDA has not made a final determination about its legal status. The term includes—

(1) All products approved under an abbreviated new drug application, paper new drug application under the FDA's former "Paper NDA" policy, or an application under section 505(b)(2) of the Federal Food, Drug, and Cosmetic Act; and

(2) Any marketed, unapproved pre-1938 drug product that has not been evaluated under the new drug provisions of the Federal Food, Drug and Cosmetic Act.

Original New Drug Application (NDA) means an FDA-approved drug or biological application that received one or more forms of patent protection, patent extension under title II of Public Law 98–417, the Drug Price Competition and Patent Term Restoration Act, or marketing exclusivity rights granted by the FDA. This definition includes a new drug application (NDA), an amended NDA, an antibiotic drug application (ADA), an amended ADA, a product license application (PLA), and an amended PLA.

Single award contract prices means prices under a contract between the Federal Government and a manufacturer resulting in a single supplier for a covered outpatient drug within a class of drugs.

Single source drug means a covered outpatient drug which is produced or distributed under an original new drug application approved by the FDA, including a drug product marketed by any cross-licensed producers or distributors operating under the new drug application.

Wholesaler means any entity (including a pharmacy or chain of pharmacies) to which the manufacturer sells the covered outpatient drugs, but that does not relabel or repackage the covered outpatient drug.

§ 447.506 Requirement for rebate agreements as a condition for payment for outpatient prescription drugs.

In order for payments to be made under Medicaid for covered outpatient prescribed drugs described in §§ 440.120 and 447.516 of this subchapter, except as provided in § 447.518, the manufacturers of the drugs must have entered into and comply with:

(a) A rebate agreement with the Secretary on behalf of States, or with States directly, that meets the requirements of this subpart.

(b) A pharmaceutical pricing agreement with the Public Health Service, in accordance with section 340B of the Public Health Service Act, for all covered outpatient drugs purchased by a covered entity (as described in section 340B(a)(4) of the Public Health Service Act) on or after December 1, 1992.

(c) A pharmaceutical pricing agreement with the Department of Veterans Affairs (DVA), in accordance with 38 U.S.C. 8126, for all single source drugs, innovator multiple source drugs, biologicals, and insulin, effective January 1, 1993.

§ 447.508 State plan requirements.

A State Medicaid plan must provide that the Medicaid agency will comply with all of the applicable requirements of this subpart.

§ 447.510 Rebate agreements: General requirements.

(a) *Basic requirements.*

(1) Except as specified in paragraph (a)(2) of this section, a manufacturer of covered outpatient drugs that are dispensed under a State Medicaid program must have entered into and must comply with—

(i) A national rebate agreement authorized by HCFA; or

(ii) A State agreement that meets the conditions of paragraph (b) or (c) of this section and is authorized by HCFA.

(2) A manufacturer that has entered into a State agreement that meets the requirements of paragraph (b) or (c) of this section must also enter into the national rebate agreement.

(3) A manufacturer must include in its rebate agreement a list all of its drugs, by NDC numbers, that fall within the definition of covered outpatient drugs.

(4) A manufacturer may not specify that only a partial list of its covered outpatient drugs are subject to rebate under this subpart.

(b) *Existing State/manufacturer agreements.*

(1) HCFA will consider an individual drug rebate agreement between a manufacturer and a State Medicaid agency that is in effect on November 5, 1990, to be in compliance with the Federal requirements for drug rebates for the initial agreement period if—

(i) The initial term of the agreement provides for a minimum aggregate rebate of 10 percent of the average manufacturer price, as defined in § 447.534(c), for all of the manufacturer's drugs paid for by the State under Medicaid in a rebate period;

(ii) The State agency agrees to report to HCFA any rebates paid under the rebate agreement; and

(iii) The State agency submits to HCFA a written assurance from the manufacturer that the minimum 10-percent rebate was met under the agreement as of November 5, 1990.

(2) HCFA will consider an existing individual State rebate agreement to be in compliance with Federal requirements for drug rebates throughout the initial period of the agreement only if the manufacturer continues to provide rebates that meet the minimum 10-percent rebate requirement specified in paragraph (b)(1)(i) of this section throughout the initial period. If this requirement is not met, the manufacturer's drugs are subject to the terms of the national rebate agreement.

(3) A State and a manufacturer may amend the initial period of a rebate agreement that was in effect on November 5, 1990, that meets the requirements of paragraph (b)(1) of this section if the State and manufacturer are in agreement with all modifications and the terms of the agreement allow such modifications. Existing agreements may be amended to:

(i) Provide for a greater rebate; or

(ii) Add drugs if the minimum 10-percent aggregate rebate requirement is met.

(4) The manufacturer must have a rebate agreement that meets the requirements of section 1927(a) of the Act in every State and the District of Columbia for FFP to be available under Medicaid.

(c) *New State/manufacturer agreements*. If a State Medicaid agency did not have an existing agreement with its drug manufacturers in effect on November 5, 1990, it may enter into a new agreement under the conditions of this paragraph.

(1) The agreement must provide drug rebates as least as great as those required under the national rebate agreement.

(2) The State agency must agree to report to HCFA any rebates paid under the rebate agreement.

(3) The manufacturer must enter into the national rebate agreement.

(4) The State agency must provide to HCFA a written assurance from the manufacturer that the agreement provides rebates that equal or exceed the amounts in the national agreement.

(d) *Authorization by HCFA*. Existing and new agreements, and their renewals, must be specifically authorized by HCFA.

§ 447.512 Terms of agreements.

(a) *Initial period.*

(1) The initial period of an existing State/manufacturer agreement and a new State/manufacturer agreement is the period specified in the agreement. In the event no period is specified, the initial period is 1 year.

(2) The initial period of the national rebate agreement must be for at least 1 year.

(b) *Renewal of agreements.*

(1) An existing agreement may be renewed if—

(i) The agreement provides drug rebates as least as great as those required under the national rebate agreement;

(ii) The State agency agrees to report to HCFA any rebates paid under the rebate agreement;

(iii) The State agency provides to HCFA a written assurance from the manufacturer that the agreement provides rebates that equal or exceed the amounts in the national agreement; and

(iv) The manufacturer enters into the national rebate agreement.

(2) Each national agreement will be automatically renewed for successive periods of at least 1 year if the agreement continues to meet the conditions of the initial period of the agreement and requirements of these regulations, unless the manufacturer gives a written notice of intent not to renew the agreement or HCFA or the manufacturer terminates the agreement in accordance with § 447.514.

(c) *Effective dates of national rebate agreements.*

(1) A national rebate agreement that was entered into and authorized by HCFA between February 15, 1991, and April 30, 1991, is effective retroactive to January 1, 1991, unless the manufacturer requests a later effective date.

(2) A national rebate agreement that is entered into and authorized by HCFA on or after May 1, 1991, is effective the first day of the rebate period that begins more than 60 days after the date the agreement is entered into unless the manufacturer requests a later effective date.

§ 447.514 Termination and nonrenewal of national rebate agreements.

(a) *Who may terminate.* National rebate agreements may be terminated by HCFA or by the manufacturer as specified in paragraphs (b) and (c) of this section.

(b) *Termination by HCFA.*

(1) HCFA may terminate an agreement if the manufacturer violates the requirements of the rebate agreement or for "other good cause" shown. "Other good cause" includes, but is not limited to, any violations of the provisions of the national rebate agreement, section 1927 or the related regulations, or the persistent failure to provide timely information on pricing and other required information or to pay timely rebates.

(2) HCFA will send a written notice of the existence of a violation and the decision to terminate the agreement to the manufacturer and notify all State Medicaid agencies of the termination.

(3) The termination will be effective no earlier than 60 days after the date the notice of termination is sent to the manufacturer.

(4) If a manufacturer is dissatisfied with a termination decision made by HCFA, the manufacturer may request a hearing to appeal the termination under the procedures established in the national rebate agreement. However, a request for a hearing will not delay the effective date of the termination.

(c) *Termination by the manufacturer.* A manufacturer may terminate an agreement for any reason.

(1) *Reasons other than nonrenewal*—(i) *Written notice.* To terminate an agreement for reasons other than nonrenewal, a manufacturer must provide a written notice of termination to HCFA at least 60 days before the beginning of the calendar quarter in which the termination will occur.

(ii) *Effective dates.* Termination will be effective on the first day of the first rebate period beginning at least 60 days after the manufacturer gives written notice requesting termination, or a later date if so specified by the manufacturer.

(2) *Nonrenewals*—(i) *Written notice.* A manufacturer that wishes not to renew an agreement must provide a written notice of nonrenewal of the agreement to HCFA at least 60 days before the end of the current agreement period.

(ii) *Effective dates.*

(A) Termination resulting from nonrenewal will be effective on the ending date of the term of the agreement if the manufacturer has given the 60-day advance notice.

(B) If the manufacturer has not given the 60-day advance notice, the effective dates of termination specified in paragraph (c)(1)(ii) of this section will apply.

(3) *Date of notice.* The postmark date of the U.S. Postal Service or common mail carrier will be considered as the date a manufacturer gives written notice.

(d) *Reinstatement after termination.* If an agreement is terminated by either HCFA or the manufacturer, another agreement with the manufacturer (or a successor manufacturer) may not be entered into until a period of one calendar quarter has elapsed from the date of the termination, unless HCFA finds good cause for an earlier reinstatement.

(e) *Effect of termination or nonrenewal on rebates due.* Any nonrenewal or termination of a rebate agreement will not affect rebates due before the effective date of nonrenewal termination.

(f) *Notification of termination.* HCFA will notify States of any termination of a manufacturer from the drug rebate program at least 30 days prior to the effective date of the termination.

§ 447.516 Outpatient drugs subject to rebates.

(a) Except for the drugs or items listed in § 447.522, the following covered outpatient drugs are subject to rebates under this subpart:

(1) Drugs that are—

(i) Covered outpatient drugs of participating manufacturers under an approved State Medicaid plan; and

(ii) Dispensed by prescription (except certain over-the-counter drugs as specified in paragraph (a)(5) of this section);

(2) Drugs that meet the requirements of the Federal Food, Drug, and Cosmetic Act and the Drug Amendments of 1962 specified in section 1927(k)(2)(A) (i) through (iii) of the Act;

(3) A biological product other than a vaccine that may only be dispensed by prescription, is licensed under section 351 of the Public Health Service Act, and is produced at an establishment licensed under section 351 to produce such products;

(4) Insulin certified under section 506 of the Federal Food, Drug, and Cosmetic Act; and

(5) "Over-the-counter" drugs that are prescribed by a physician or other person authorized to prescribe drugs under State law, if the State provides for coverage of these drugs as prescribed drugs under its approved State Medicaid plan.

§ 447.518 Outpatient drugs of manufacturers without rebate agreements.

(a) *Definition.* For purposes of this section, *1–A rated drugs* means drugs classified as such by the FDA, prior to January 1, 1992, as new molecular or chemical entities that may provide effective therapy or diagnosis for a disease not adequately treated or diagnosed by any marketed drug, or provide improved treatment of a disease through improved effectiveness or safety (including decreased abuse potential) and identified in the FDA publication *Office of Drug Evaluation Statistical Report,* issued yearly. The term includes drugs rated as 1–A/AA.

(b) *Federal financial participation (FFP).* FFP is available for payments for single source and innovator multiple source 1–A rated drugs that are furnished by manufacturers without rebate agreements if—

(1) The State agency has determined that the availability of the drug is essential to the health of Medicaid recipients under the approved State plan;

(2) The prescribing physician has obtained approval for use of the drug before it is dispensed in accordance with a prior authorization program specified in § 447.526, or the Secretary has approved the State agency's determination regarding drug necessity under paragraph (b)(1) of this section.

§ 447.520 New drugs subject to rebates.

(a) Effective October 1, 1993, there is no special treatment for new drugs under the Medicaid drug rebate program.

(b) For the period January 1, 1991 through September 30, 1993—

(1) Subject only to the exclusions and restrictions specified in § 447.524 (a)(2) and (a)(3), a new drug of participating manufacturers must be covered for a period of 6 months after the date of approval of the drug by the FDA, regardless of when the manufacturer begins to market the drug.

(2) Except as specified in § 447.524(b), a State agency may not exclude, subject to the prior authorization conditions specified in § 447.526, or otherwise restrict the coverage of covered outpatient drugs under a drug rebate agreement any new drug or biological approved by the FDA for a period of 6 months after FDA approval.

(c) FFP is not available for coverage of new drugs furnished by manufacturers who do not have rebate agreements that were in effect for the 6-month period after FDA approval of the new drug, unless covered during the retroactive period of January 1, 1991, through March 31, 1991, or covered as a 1–A rated drug under § 447.518(b).

§ 447.522 Drugs not subject to rebates.

The following list indicates drugs or items that are not subject to rebates under this subpart:

(a) Any drug, biological product, or insulin provided as part of, or as incident to and in the same setting as any of the following (and for which Medicaid payment may be made as part of payment for the following and not as direct reimbursement for the drug):

(1) Inpatient hospital services;

(2) Hospice services;

(3) Dental services (except for drugs for which the approved State plan authorizes direct reimbursement to the dispensing dentist);

(4) Physician services;

(5) Outpatient hospital services;

(6) Nursing facility services and services provided by an intermediate care facility for the mentally retarded;

(7) Other laboratory and x-ray services; and

(8) Renal dialysis.

(b) Any drug, biological product, or insulin that is used for a medical indication that is not a medically accepted indication.

(c) Any drug, biological product, or insulin for which a NDC number is not required by the FDA.

(d) Medical supply items such as syringes (excluding insulin-filled syringes), urine and blood glucose testing strips and devices, lancets, and inhalers.

(e) Enteral nutrition products that are not approved by FDA as a drug under sections 505, 506, and 507 of the Federal Food, Drug, and Cosmetic Act.

(f) Parenteral nutrition products that are not approved by the FDA under section 505 of the Federal Food, Drug, and Cosmetic Act and given by the intravenous route of administration.

(g) Investigational new drugs (for example, Treatment IND drugs, Group C cancer drugs, and Parallel Track drugs).

§ 447.524 Exclusions and restrictions on drugs subject to rebates.

(a) A State agency may limit coverage of outpatient drugs that are subject to rebate by—

(1) Implementing a prior authorization program, as specified in § 447.526;

(2) Restricting or excluding certain drugs from coverage as specified in paragraphs (b) and (c) of this section; and

(3) Restricting the quantity of drugs per prescription and the number of refills, as specified in paragraph (e) of this section.

(b) A State may exclude or restrict from coverage, as an outpatient drug subject to rebate, any drug if—

(1) The prescribed use of the drug is not for a medically accepted indication;

(2) The drug, the class of drug, or its medical use is contained on the list as specified in paragraph (c) of this section;

(3) The drug is subject to restrictions in an existing or new manufacturer rebate agreement with the State agency that has been authorized by HCFA in accordance with § 447.510; or

(4) The State has excluded coverage of the drug from its formulary established in accordance with section 1927(d)(4) of the Act.

(c) A State may exclude or restrict from coverage, as outpatient drugs subject to rebate, any of the prescribed drugs it has elected to cover under its approved State Medicaid plan that fall within the following descriptions of drugs, classes of drugs, or their medical uses:

(1) Agents when used for anorexia, weight loss, or weight gain.

(2) Agents when used to promote fertility.

(3) Agents when used for cosmetic purposes or hair growth.

(4) Agents when used for the symptomatic relief of cough or colds.

(5) Agents when used to promote smoking cessation.

(6) Prescription vitamins and mineral products, except prenatal vitamins and fluoride preparation.

(7) Nonprescription drugs.

(8) Covered outpatient drugs for which the manufacturer seeks to require, as a condition of sale, that associated tests or monitoring services be purchased exclusively from the manufacturer or its designee.

(9) Barbiturates.

(10) Benzodiazepines.

(d) HCFA will periodically update, by regulation, the list of drugs subject to restriction as specified in paragraph (c) of this section by adding drugs, classes of drugs, or medical uses if it determines that there is evidence of clinical abuse or inappropriate use. HCFA will make this determination on the basis of data collected by the State Medicaid agency's surveillance and utilization review (SUR) program under part 456 of this subchapter.

(e) A State may restrict the minimum and maximum quantities of covered outpatient drugs per prescription and the number of refills within a therapeutic class of drugs. A State may also restrict one or more package sizes of a drug to be dispensed as long as the restriction does not result in a participating manufacturer's drugs not being covered at all under the Medicaid program.

(f) The agency must specify in its State Medicaid plan that, except for the restrictions and exclusions specified in this section, and drugs excluded from its formulary which meets the requirements of section 1927(d)(4) of the Social Security Act, the formulary will permit coverage of covered outpatient drugs of manufacturers which have met the requirements of § 447.506 that are prescribed for a medically accepted indication.

(g) The agency must include in its State Medicaid plan a list of covered outpatient drugs, classes of drugs, or medical uses under paragraph (c) of this section that it is excluding or restricting from coverage under this section and specify the limitations or conditions on coverage.

§ 447.526 Prior authorization programs.

(a) A State agency may establish a prior authorization program for any covered outpatient drug under which the drug must be approved before it is dispensed for any medically accepted indication.

(b) A State agency may determine which persons (for example, physician, pharmacist) are permitted to request prior authorization of a drug.

(c) Under a prior authorization program, the State agency must—

(1) Provide for a response by telephone or telecommunications device to a request for prior authorization

within 24 hours of receipt of a request; and

(2) In emergency situations, provide for dispensing of at least a 72-hour supply of drugs, except for those drugs that are excluded or restricted as outpatient prescribed drugs under § 447.524.

(i) The State agency must specify in its State plan the process that will be used to determine what constitutes an emergency situation.

(ii) The State agency must ensure that its response to a prior authorization request is given to the dispenser before the emergency supply is exhausted.

(iii) In emergency situations, the State must provide a mechanism so that a dispenser or physician can make a prior authorization request 24 hours before the supply is exhausted and a response returned by the State within that 24-hour period.

(d) State staff who place drugs in a prior authorization system must be licensed to prescribe or dispense drugs in the State, for example, physicians or pharmacists.

(e) State staff who respond to prior authorization requests are not limited to persons licensed to prescribe or dispense drugs as long as all decisions involving drugs subject to prior authorization are made—

(i) In consultation with these licensed professionals; or

(ii) Under guidelines promulgated by such individuals as long as States provide access to these licensed professionals in difficult or unusual cases.

(f) The State agency must establish a process to ensure that recipients have access to medically necessary covered outpatient drugs and must provide annual written assurances to HCFA that its prior authorization program does not prevent recipients from gaining access to medically needed drugs.

§ 447.530 State reporting requirements.

(a) *Basic requirement.* The State agency must provide to manufacturers with drug rebate agreements State drug utilization data specified in paragraph (b) of this section for which Medicaid payments have been made during a rebate period. For purposes of this section—

(1) The agency must use the 11-digit NDC number to report drug utilization data.

(2) *Unit* means the lowest commonly identifiable amount of a drug—for example, tablet or capsule for solid dosage forms, milliliter for liquid forms, and gram for ointments or creams, as described in the rebate agreement and accompanying appendices.

(b) *Type of data to be reported.* The State agency must submit to manufacturers the following information, based on claims paid by the agency during a rebate period:

(1) State identification;

(2) Rebate period and year for which data apply;

(3) The NDC number;

(4) Total units paid for during a rebate period by NDC.

(5) The product name (FDA registration name);

(6) Total amount of rebate that a State claims for each NDC;

(7) Total number of prescriptions paid for during the rebate period by NDC number; and

(8) The rebate amount per unit and the total amount paid for during the rebate period by NDC number to verify rebate payment.

(c) *Timeframe for reporting.*

(1) The State agency must report the utilization data no later than 60 days after the end of each rebate period.

(2) In the event that a due date falls on a weekend or Federal holiday, the report or other item will be due on the first business day following that weekend or Federal holiday.

(3) If a State does not submit its rebate period utilization data to the manufacturer within 1 year after the rebate period ends—

(i) A manufacturer is not required to pay a rebate on those drugs; and

(ii) A State may be considered out of compliance with section 1927 of the Act for failure to collect rebates.

(d) *Format of report.* The State agency must report the utilization data, using the NDC number, in a form prescribed by HCFA.

(e) *Administrative procedures for data collection.* The State agency must—

(1) Inform Medicaid participating drug dispensers that they are required to use accurate NDC numbers for the drugs dispensed in submitting their Medicaid claims and of potential payment denial, sanctions, including those for fraud and abuse, and possible termination of provider agreements, for incorrect coding of NDC numbers;

(2) Establish and implement an oversight and auditing plan to ensure proper pharmacy coding and reporting practices;

(3) Establish and implement procedures for investigating at the pharmacy level allegations of erroneous utilization data by manufacturers with rebate agreements; and

(4) Establish procedures for taking actions necessary to ensure accurate coding.

(f) *Use of data edits.* The State must verify the accuracy of utilization data through the use of data edits such as, but not limited to—

(1) Unit types are appropriate for NDCs;

(2) Units match amount paid by the State; and

(3) Amount paid by the State is appropriate for the drug.

(g) *Use of rounding indicators.* States must identify by NDC number those drugs for which the number of units has been rounded by showing a rounding indicator for the number of units dispensed.

§ 447.534 Manufacturer reporting requirements.

(a) *Basic requirements.* Under the terms of the drug rebate agreement, a manufacturer must—

(1) Supply HCFA with a list of all covered outpatient drugs (as specified in paragraph (c) of this section), the average manufacturer price, and, for single source and innovator multiple source drugs, the best price (as specified in paragraph (d) of this section) within 30 calendar days of entering into an agreement;

(2) Update the list of covered outpatient drugs as provided for in paragraph (b) of this section;

(3) Supply the information specified in paragraph (e) of this section for each rebate period in a format prescribed by HCFA in regulations or instructions; and

(4) Complete and submit to States the HCFA Form 302, the Remittance Advice Report (RAR), in a format prescribed by HCFA in regulations or instructions. The RAR must include the information specified in paragraph (f) of this section, along with any rebate period rebates due within 30 days of receiving from the State Medicaid drug utilization data.

(b) *Update to manufacturer's drug list.* A manufacturer must update its list of all covered outpatient drugs for each rebate period, including the average manufacturer price of each drug, and, for single source and innovator multiple source drugs, the manufacturer's best price.

(1) The updated list must be reported by the manufacturer to HCFA no later than 30 days after the last day of each rebate period.

(2) The updated list reported by the manufacturer must include the NDC number for each covered outpatient drug currently marketed by the manufacturer and for all drugs that the manufacturer no longer markets until the supply of the drug under an NDC has expired, the drug has been taken off the market, or for any other reason, there no longer exists the potential that the drug may be paid for under the manufacturer's NDC number.

(c) *"Average manufacturer price" defined.*

(1) "Average manufacturer price" (AMP) means, with respect to a covered outpatient drug of the manufacturer for a rebate period, the average unit price paid to the manufacturer for the drug in the State by wholesalers for drugs distributed to the retail pharmacy class of trade (excluding sales to hospitals, health maintenance organizations and to wholesalers where the drug is relabeled under that distributor's NDC number), after deducting customary prompt pay discounts.

(2) Federal supply schedule prices are not included in the calculation of AMP.

(3) AMP includes cash discounts allowed and all other price reductions (other than rebates under this subpart), which reduce the actual price paid.

(4) AMP is calculated as a weighted average of prices for all the manufacturer's package sizes for each covered outpatient drug sold by the manufacturer during that rebate period. It is calculated as net sales divided by numbers of units sold, excluding goods or any other items given away, but not contingent on any purchase requirements. "Net sales" means quarterly gross sales revenues less cash discounts allowed and all other price reductions (other than rebates under section 1927 of the Act) which reduce the actual price paid. For bundled sales, the allocation of the discount is made proportionately to the dollar value of the units of each drug sold under the bundled arrangement. "Bundled sales" refers to the packaging of drugs of different types where the condition of rebate or discount is that more than one drug type is purchased, or where the resulting discount or rebate is greater than that which would have been received had the drug been purchased separately.

(5) The manufacturer must adjust the AMP for a rebate period if cumulative discounts or other arrangements subsequently adjust the prices actually realized.

(d) *"Best price" defined.*

(1) "Best price" means, with respect to single source and innovator multiple source drugs, the lowest single price at which the manufacturer sells the covered outpatient drug to any purchaser in the United States in any package size in any pricing structure (including capitated payments), in the same quarter for which the AMP is computed.

(2) To determine best price, use the following prices in the best price calculation:

(i) *Prices included in best price.*

(A) Except for those prices specifically exempted by law, as specified in paragraphs (d)(2)(i)(B) and (d)(2)(ii) of this section, best price includes prices to wholesalers, retailers, providers, HMOs, nonprofit entities, or governmental entities within the States (excluding depot prices and single award contract prices of any agency of the Federal Government).

(B) For periods January 1, 1991, through October 27, 1991, and July 1, 1992, through September 30, 1992, best price includes any prices charged under the Federal Supply Schedule of the General Services Administration, including prices for drugs and biologicals paid by the DVA and drugs and biologicals in contracts administered by the DVA.

(ii) *Prices excluded from best price.*

(A) For periods beginning on or after October 1, 1992, best price excludes any prices charged to the Indian Health Service, the DVA, a State home receiving funds under 38 U.S.C. 1741, the Department of Defense, the Public Health Service, or a covered entity described in section 1927(a)(5)(B) of the Social Security Act; any prices charged for drugs and biologicals under the Federal Supply Schedule of the General Services Administration; or any prices used under a State pharmaceutical assistance program.

(B) For the period October 28, 1991, through June 30, 1992, best price excludes any prices charged under the Federal Supply Schedule of the General Services Administration for drugs and biologicals paid by the DVA and drugs and biologicals in contracts administered by the DVA.

(3) Calculations of best prices must include cash discounts, free goods that are contingent on any purchase requirements, volume discounts, and rebates, other than rebates under section 1927 of the Act.

(4) Best price must be determined on a unit basis without regard to special packaging, labeling, or identifiers on the dosage form or product or package, and must not take into account prices that are nominal in amount.

(5) For bundled sales, the allocation of the discount is made proportionately to the dollar value of the units of each drug sold under the bundled arrangement.

(6) The manufacturer must adjust the best price for a rebate period if cumulative discounts, rebates, or other arrangements subsequently adjust the prices actually realized.

(7) For purpose of this section, *provider* means a physician, hospital and other health maintenance organizations or entities that treat individuals for illnesses or injuries or provides services or items in the provisions of health care.

(e) *Contents of quarterly report.* The manufacturer's quarterly reports to HCFA must include—

(1) NDC number with labeler code, product code, and package size code;

(2) Period covered for rebates (rebate period and year);

(3) Product FDA registration name;

(4) Drug category of single source, innovator multiple source, or noninnovator multiple source;

(5) Indicator for drug reviewed under the Drug Efficacy Study Implementation (DESI) program;

(6) FDA therapeutic equivalence explanation code;

(7) Unit type;

(8) Units per package size;

(9) AMP;

(10) Basedate AMP;

(11) Best price;

(12) FDA approval date;

(13) Date drug entered market;

(14) Drug termination date;

(15) Drug type; and

(16) Correction record flag which signals that the record contains corrected information from a previous submission.

(f) *Contents of Remittance Advice Report (RAR) (HCFA Form 304).* The manufacturer's RARs to States must include—

(1) Manufacturer name, labeler code, address, and name, telephone number, and facsimile number of contact person;

(2) State;

(3) Rebate period and year for which the information applies;

(4) Invoice number, if State provided one;

(5) NDC number and product name;

(6) Rebate amount per unit;

(7) Units invoiced;

(8) Rebate amount invoiced;

(9) Rebate amount paid;

(10) Adjusted rebate per unit, if applicable;

(11) Adjustment code, if applicable;

(12) Credit/debit indicator, if applicable;

(13) Adjusted invoice amount, if applicable;

(14) Units disputed, if applicable;

(15) Dispute code, if applicable;

(16) Withheld invoice amount, if applicable;

(17) Total rebate amount invoiced;

(18) Total rebate amount paid;

(19) Total adjusted invoice amount, if applicable; and

(20) Total withheld invoice amount, if applicable.

(g) *Recordkeeping requirements.*

(1)(i) Except as set forth in paragraph (e) of this section, a manufacturer must retain records (written or electronic) for

3 years from the date the manufacturer reports that rebate period's data. The records must include the data and any other materials from which the calculations of the AMP and best price are derived, including a record of any assumptions made in the calculations.

(ii) A manufacturer must retain records beyond the 3-year period if audit findings have not been resolved.

(2) Both the State and manufacturer must retain supporting documentation (written or electronic) related to the dispute resolution process and the RAR for 3 years from the date a dispute is resolved between the manufacturer and State.

(h) *Timeframe for reporting revised AMP or best price.* A manufacturer must report changes to AMP or best price for 3 years after the quarter to which the data pertains.

§ 447.536 Resolution of disputes relating to information reported.

(a) *Resolving data inconsistencies.*

(1) The manufacturer must attempt to identify and resolve data inconsistencies in State Medicaid drug utilization data prior to initiating the dispute resolution process described in paragraphs (b) and (c) of this section.

(2) The manufacturer must attempt to resolve any data inconsistencies under paragraph (a)(1) of this section with the State by no later than 30 days after receipt of State Medicaid drug utilization data. The manufacturer may initiate this process through telephone contact with the State.

(3) If data inconsistencies are resolved by the manufacturer and State, the manufacturer must record this fact on the RAR and the State must maintain supporting documentation to substantiate the resolution of the data inconsistencies.

(b) *Reporting disputes.*

(1) If, in any rebate period, a manufacturer and the State are unable to resolve data inconsistencies under paragraph (a) of this section or other disputed items within 30 days after the manufacturer receives State Medicaid drug utilization data, the manufacturer must complete and submit the RAR to the State in accordance with § 447.534(a)(4) or the State's utilization data are considered final and binding and the entire rebate payment is due.

(2) The RAR must include the information specified in § 447.534(f) and identify by each NDC the reason(s) why the manufacturer is disputing the data.

(3) The manufacturer must submit to the State supporting documentation for certain types of disputes as indicated on the RAR. The manufacturer must submit supporting documentation for certain types of disputes as indicated on the RAR if a State requests the documentation to verify information.

(4) The RAR must be postmarked by the United States Postal Service or common mail carrier on or prior to the due date for the rebate period payment of the rebates to the State agency.

(c) *Resolving disputes.*

(1) Within 90 days after the State receives the RAR, the State must contact the manufacturer in writing or by telephone to discuss the dispute and to present the State's preliminary response on the disputed items to the manufacturer. If the dispute is resolved, the manufacturer and the State must both maintain supporting documentation of the resolution for 3 years from the date the dispute is resolved.

(2) If the dispute is not resolved in accordance with paragraph (c)(1) of this section, the State must, within 150 days after the State receives the RAR and in accordance with State confidentiality laws—

(i) Provide the manufacturer with drug utilization data, such as zip code-level data, pharmacy-level data, sampling of pharmacy claims, or historical trends on those items in dispute; and

(ii) Submit to the manufacturer the same type of drug utilization data used by the manufacturer to identify disputed items.

(3) If State confidentiality laws prohibit the State from releasing the types of information in paragraph (c)(2) of this section, the State may require the manufacturer to provide the data upon which the manufacturer based the dispute to the State. Upon such request, the manufacturer must furnish such data to the State within 150 days after the State receives the RAR.

(4) Within 240 days after the State receives the RAR, the State and manufacturer must complete negotiations. One of the following actions must occur:

(i) The State ceases the dispute resolution process based on a cost-effectiveness determination in accordance with paragraph (k) of this section;

(ii) The State and the manufacturer settle on the State Medicaid drug utilization data and agree to make appropriate adjustments to any rebate amounts;

(iii) The State and the manufacturer agree to a resolution based on mutually acceptable data which is more representative of actual Medicaid utilization;

(iv) If no resolution is reached, the State must schedule a hearing in accordance with paragraph (d) of this section or the State may be subject to a compliance action by HCFA; or

(v) In lieu of a State hearing, the State and manufacturer may agree to arbitration or mediation to settle the dispute.

(5) The State must maintain documentation which clearly describes its decision to—

(i) Cease the dispute resolution based on cost-effectiveness as specified in paragraph (k) of this section; or

(ii) Agree with the manufacturer on a settlement as specified in paragraphs (c)(4)(ii) or (c)(4)(iii) of this section.

(d) *State hearing.*

(1) If no settlement has been reached between the State and the manufacturer within 240 days after the State receives the RAR, the State, must within 30 days, schedule a hearing. The hearing must be conducted within 1 year from the 240th day after the State receives the manufacturer's RAR.

(2) The manufacturer may require a State to schedule a hearing at any stage of the process if the State does not take the required actions of the dispute process within the specified timeframes. The State must, within 30 days, schedule a hearing.

(3) If the manufacturer does not comply with its timeframes specified in the agreement, the State may—

(i) At any stage of the process schedule a hearing which must be conducted within 1 year from the 240th day after the State received the manufacturer's RAR;

(ii) Follow the administrative law or judicial process for collecting rebate payments; and/or

(iii) Request HCFA, through the Regional Office, to terminate the manufacturer's national rebate agreement.

(e) *Use of arbitration or mediation.*

(1) In lieu of a State hearing, the State and the manufacturer may agree to arbitration or mediation to resolve the dispute.

(2) The State must maintain documentation which clearly describes the agreement with the manufacturer to resolve the dispute through arbitration or mediation rather than a State hearing.

(3) The State must maintain documentation for a period of 3 years from the date the dispute is resolved through arbitration or mediation.

(f) *Payment of rebate pending resolution of disputes.*

(1) The manufacturer must pay the State agency that portion of the rebate claimed which is not in dispute by the due date of the required rebate period rebate payment.

(2) The manufacturer may, at its option, make payment on the disputed portion of the data.

(g) *Interest on disputed amounts.*

(1) The manufacturer or the State agency must pay or credit the balance due, if any, plus a rate of interest as specified in section 1903(d)(5) of the Act by the due date of the first rebate period payment after resolution of the dispute.

(2) For disputed amounts withheld by the manufacturer and due the State, the interest is computed from the 38th day after the State mails its Medicaid drug utilization data and stops accruing on the later of the date the dispute is resolved, and the date the disputed amount is paid or credited to the proper party.

(3) For amounts paid by the manufacturer on the disputed the amount, interest must be paid by the State when resolution results in payment to the manufacturer. Interest must be paid for the period from the date of receipt of payment for the disputed data to the date the dispute is resolved and the disputed amount is paid or credited to the manufacturer.

(h) *Adjustment of rebate payment.* The State agency must adjust rebate payments if information indicates that Medicaid utilization data was greater or less than previously specified on the State's invoice for rebate payments.

(i) *Availability of FFP for rebates lost in a dispute.* FFP is available for otherwise properly dispensed drugs that involve disputed drug utilization data, and the Federal portion of the rebate is not required from the State, when—

(1) A dispute was terminated because the State determined and adequately documented that the dispute resolution process was not cost-effective as specified in paragraph (k) of this section; or

(2) Less than the full rebate resulted from a dispute resolution between a State and a manufacturer as specified in paragraph (c)(4)(ii) or (c)(4)(iii) of this section.

(j) *Rebate tolerances*—(1) *Administrative cost tolerance.* Generally, the State is not required to invoice manufacturers for rebates per labeler code which are less than the administrative cost tolerance of $50 associated with the preparation of the invoice.

(2) *Updates to administrative cost tolerance.* HCFA will update the administrative cost tolerance through Medicaid program instructions.

(k) *Cost-effectiveness tolerance for disputed amounts*—(1) *Cost-effectiveness tolerance.* Under paragraph (c)(4)(i) of this section, a State may cease the dispute resolution process based on the following cost-effectiveness tolerances:

(i) The disputed amount is less than $10,000 per labeler code; and

(ii) The disputed amount is less than $1,000 per product code.

(2) *Updates to cost-effectiveness tolerance.* HCFA will update the cost-effectiveness tolerances through Medicaid program instructions.

§ 447.538 Resolution of disputes relating to drug access and State systems.

(a) A manufacturer may request HCFA to initiate compliance action against a State if the State fails to comply with section 1927 of the Act. The manufacturer may also request HCFA to initiate compliance action when the State agency shows a pattern or history of inaccuracy in reporting Medicaid drug utilization data.

(b) Any compliance action initiated by HCFA will not relieve the manufacturer from its obligation of making the rebate payment as provided in § 447.546.

§ 447.540 Confidentiality of reported information.

(a) *State agency requirements.*

(1) Except as specified in paragraph (a)(2) of this section and notwithstanding other laws, including, but not limited to, the Freedom of Information Act (5 U.S.C. 552), the State agency and its contractors must not disclose any manufacturer-specific pricing data collected or reported in connection with a rebate agreement in any form that reveals the manufacturer or wholesaler of a drug or prices for the drugs that are charged by the manufacturer or wholesaler.

(2) The State agency and its contractors must provide to HCFA information that is necessary to carry out the provisions of section 1927 of the Act and to permit review under section 1927 of the Act by the Comptroller General and the Director of the Congressional Budget Office.

(3) A State agency may release its utilization data, excluding manufacturer-specific pricing data, to the extent such release of information is allowed under a State's confidentiality laws.

(b) *Manufacturer requirements.*

(1) A manufacturer or its contractors must not disclose information contained in the State's drug utilization reports.

(2) A manufacturer must observe State confidentiality laws and regulations.

§ 447.542 Penalties for failure to report or reporting false information.

(a) *Surveys and audits.*

(1) HHS surveys wholesalers, manufacturers, and direct sellers that distribute covered outpatient drugs, when necessary, to verify manufacturer prices reported to HCFA.

(2) HHS may audit a manufacturer's calculations of AMP and best price of covered outpatient drugs, as necessary, to verify reported data.

(b) *Imposition of penalties.*

(1) The Secretary may impose on any wholesaler, manufacturer, or direct seller of a covered outpatient drug that refuses a request for information about charges or prices in connection with a survey or knowingly provides false information a civil monetary penalty in an amount not to exceed $100,000 for each item.

(2) The Secretary may impose on a manufacturer who fails to provide the required information on AMP and best price or the list of covered outpatient drugs on a timely basis a civil money penalty of $10,000 for each day beyond the due date that the information is not provided.

(i) If the information is not reported within 90 days of the due date, HCFA may suspend the drug rebate agreement after the end of the 90-day period.

(ii) The suspension is for a period of at least 30 days and continues until the information is provided.

(3) The Secretary may impose on a manufacturer that knowingly provides false information an additional penalty not to exceed $100,000 for each item of false information. These civil money penalties are in addition to other penalties as may be prescribed by law.

(c) *Procedures for imposing penalties.* The imposition of a civil money penalty will be made in accordance with the provisions of sections 1128A and 1927(b)(3) of the Act.

§ 447.546 Payment of rebates.

(a) *Basic requirements.* In order for FFP to be available to a State for expenditures for covered outpatient drugs of a manufacturer, the manufacturer must agree to—

(1) Calculate a rebate payment using the formulas specified in paragraph (b) of this section and make a rebate payment to each State Medicaid agency for the manufacturer's covered outpatient drugs paid for by the State Medicaid agency during the rebate period;

(2) Make the rebate payments for each rebate period within 30 days after receiving from the State Medicaid drug utilization data on the total number of units of covered outpatient drugs, by NDC number, paid by the State under the plan during the rebate period, as

reported in accordance with § 447.530; and

(3) Continue to make rebate payments for all of its covered outpatient drugs for as long as an agreement is in force and drug utilization data reports are made and until—

(i) The entire supply of the drug under an NDC number has expired;

(ii) The drug has been taken off the market; or

(iii) For another reason, there no longer exists the potential that the drug may be paid for under the manufacturer's NDC number.

(b) *Formulas for rebates.*

(1) The basic rebate for single source drugs and innovator multiple source drugs is—

(i) For January 1, 1991, through December 31, 1991: The greater of 12.5 percent of the AMP or the AMP minus best price. (The rebate is capped at 25 percent of AMP.)

(ii) For January 1, 1992, through September 30, 1992: The greater of 12.5 percent of the AMP or the AMP minus best price. (The rebate is capped at 50 percent of AMP.)

(iii) For October 1, 1992, through December 31, 1993: The greater of 15.7 percent of the AMP or the AMP minus best price. (The rebate is capped at 50 percent of the AMP for the rebate period of October 1, 1992, through December 31, 1992.)

(iv) For January 1, 1994, through December 31, 1994: The greater of 15.4 percent of the AMP or the AMP minus best price.

(v) For January 1, 1995, through December 31, 1995: The greater of 15.2 percent of the AMP or the AMP minus best price.

(vi) For January 1, 1996, and thereafter: The greater of 15.1 percent of the AMP or the AMP minus best price.

(2) The additional rebate for single source and innovator multiple source drugs is for calendar years 1991 through 1993: On a drug-by-drug basis, the amount by which the increase in the AMP exceeds the increase in the Consumer Price Index-Urban (CPI-U) from October 1, 1990, to the month before the rebate period of the rebate.

(3) The rebate for noninnovator multiple source and other drugs is—

(i) For calendar years 1991 through 1993: 10 percent of the AMP.

(ii) For calendar years 1994 and thereafter: 11 percent of the AMP.

(c) *Late submittal of data.* The manufacturer is not required to pay a rebate if the State does not submit its rebate period utilization data to the manufacturer within 1 year after the rebate period ended.

§ 447.548 Computation of unit rebate amount.

(a) HCFA computes a per drug unit rebate amount on the basis of the formulas specified in § 447.546(b). The rebate amount will be based on unit pricing information supplied by the manufacturer in accordance with § 447.534.

(b) HCFA supplies the per drug unit rebate amount to each State on a rebate period basis. The State must compute the total rebate anticipated, based on its own utilization records, and send an invoice to the manufacturers for a total rebate amount due. However, the manufacturer remains responsible for correctly calculating the rebate amount based on State reported utilization data and its correct determination of AMP and, where applicable, base date AMP and best price, as defined in § 447.534.

§ 447.550 Denial of FFP.

(a) Except for those drugs described in § 447.518, FFP will be denied for payment of any dispensed covered outpatient drug of a manufacturer that does not have in effect and comply with:

(1) A drug rebate agreement, as specified in this subpart;

(2) A pharmaceutical pricing agreement with the Public Health Service, in accordance with section 340B of the Public Health Service Act, for all covered outpatient drugs purchased by a covered entity (as described in section 340B(a)(4) of the Public Health Service Act) on or after December 1, 1992; and

(3) A pharmaceutical pricing agreement with the DVA, in accordance with 38 U.S.C. 8126, for all single source drugs, innovator multiple source drugs, biologicals, and insulin, effective January 1, 1993.

(b) FFP is not available for payment for expenditures that exceed the upper payment limit for an innovator multiple source drug that is subject to the Federal upper limits in §§ 447.332(a) and 447.335 dispensed on or after July 1, 1991, if, under applicable State law, a less expensive noninnovator multiple source drug could have been dispensed.

BILLING CODE 4120–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 90

[PR Docket No. 92–235, DA 95–1967]

Examination of Exclusivity and Frequency Assignment Policies

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On June 15, 1995, the Commission adopted a *Further Notice of Proposed Rule Making* which seeks to introduce market forces into the Private Land Mobile Radio (PLMR) bands. The *Further Notice of Proposed Rule Making* proposed three options to introduce market forces into these bands: exclusivity, user fees, and competitive bidding. The Commission sought comment on each of these options in order to assist in the development and implementation of an overall strategy on how to promote greater efficiency in these bands. This proposed rule extends the period of time in which commenters have to file comments and reply comments.

DATES: Comments are to be filed on or before October 16, 1995, and reply comments are to be filed on or before November 20, 1995.

FOR FURTHER INFORMATION CONTACT: Mark Rubin of the Wireless Telecommunications Bureau at (202) 418–0680.

SUPPLEMENTARY INFORMATION:

Order Extending Comment and Reply Comment Period

Adopted: September 12, 1995
Released: September 13, 1995

By the Chief, Private Wireless Division:

1. On September 1, 1995, the American Public Transit Association (APTA) requested that the time for filing comments in response to the *Further Notice of Proposed Rule Making* in the above-captioned proceeding released by the Commission on June 23, 1995,[1] be extended from September 15, 1995, to October 16, 1995. Likewise, on September 5, 1995, the Land Mobile Communications Council (LMCC) filed a Motion For Extension Of Time until November 20, 1995, to file comments. LMCC also requested that the time for filing reply comments be extended from October 16, 1995, to January 5, 1996.

2. APTA, which represents approximately 400 American public and private mass transit systems, states that it needs additional time to submit comments in order to afford its membership a chance to respond to the Commission's June 15, 1995, action. LMCC states that a deadline for filing comments on November 20th is warranted as that date is coterminous with the due date for the industry's report on its service consolidation efforts. LMCC emphasizes that service consolidation decisions must be made in tandem with those relating to channel exclusivity in order to respond adequately to the Commission's proposals.

3. The Commission does not routinely grant extensions of time. In this instance, however, it is desirable that the record be as complete as possible and that it include the views of as large a cross section of the private land mobile radio (PLMR) user community as possible. We believe an extension of thirty (30) days to be adequate to give the PLMR community sufficient time to respond to the above-captioned proceeding. We therefore extend the period of time for filing comments to and including October 16, 1995, and we extend the period for filing reply comments to and including November 20, 1995. The new reply comment date coincides with the due date for the industry's report on radio service consolidation.

4. Accordingly, it is hereby ordered that AMTA's request to extend the deadline for filing comments in this proceeding is granted and LMCC's Motion For Extension of Time is granted to the extent indicated herein and otherwise denied.

5. This action is taken pursuant to the authority provided in Section 1.46 of the Commission's Rules, 47 C.F.R. 1.46.

Federal Communications Commission.

Robert H. McNamara,

Chief, Private Wireless Division.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 85

RIN 1018–AC67

Clean Vessel Act Pumpout Symbol, Slogan and Program Crediting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rule provides definitions for facilities open to the public and public versus private facilities, clarification on submitting proposals and points for education, and the requirements for a pumpout symbol, slogan and program crediting for the Clean Vessel Act of 1992 as authorized in 50 CFR Part 85. This rule provides a uniform symbol, slogan and crediting logo for the Clean Vessel Act Pumpout Grant Program.

DATES: Comments must be received November 20, 1995.

ADDRESSES: Comments may be mailed to the Division of Federal Aid, Fish and Wildlife Service, U.S. Department of the Interior, 1849 C Street, NW., (MS 140 ARLSZ), Washington, DC 20240, or delivered to Room 140, 4401 North Fairfax Drive, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Robert D. Pacific, (703) 358–1845.

SUPPLEMENTARY INFORMATION:

Background

Section 5604 of the Clean Vessel Act (Pub. L. 102–587, Title V, Subtitle F) authorizes the Director of the U.S. Fish and Wildlife Service to make grants to coastal States for constructing/renovating pumpout and portable toilet dump stations and for implementing associated education programs.

In response to a request from a State and the marine community, the definitions of facilities open to the public, and public versus private facilities have been added. The definition of public/private follows definitions developed earlier by the marine community for surveying marinas for pumpout and other information.

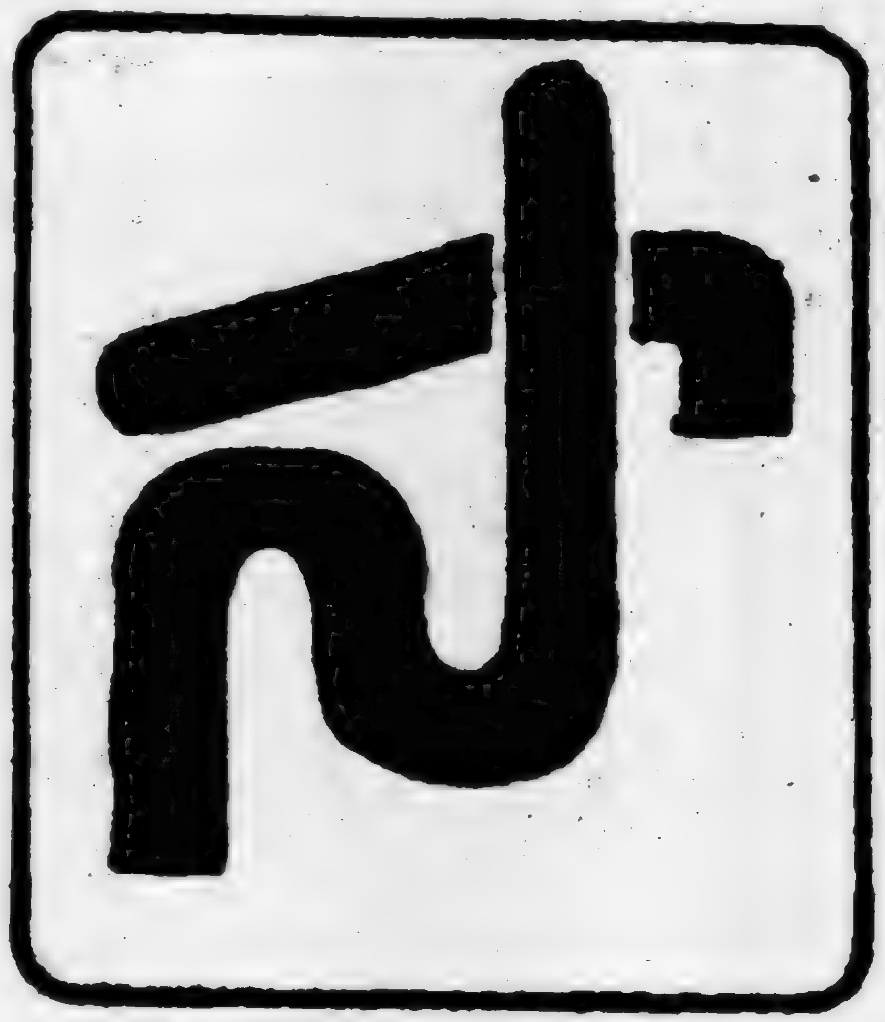
Two proposals are required by coastal States when submitting projects in coastal and inland portions of the State. Without this differentiation, adequate evaluation of proposals is not possible since points are different for the two zones.

Clarification on points for education was added so that States could receive points for education if they had an active, ongoing education program and did not need additional funds in a particular year. Otherwise, States would be forced to request funds to get points even if they did not need the funds.

In order to increase public awareness of the program, the marine community has recommended developing a pumpout symbol, slogan, and program crediting logo. This rule provides the requirements for that pumpout symbol, slogan, and crediting logo.

There has been an International Standards Organization international symbol since 1972. This symbol is depicted below.

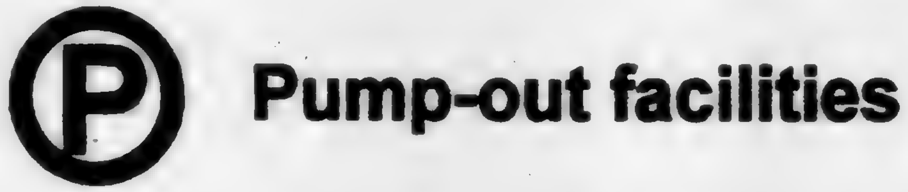
BILLING CODE 4310–55–M



BILLING CODE 4310-55-C

There is also a symbol which appears on National Oceanic and Atmospheric Administration's National Ocean Service nautical charts. The letter "P" and the circle around the "P" are magenta-colored. This symbol is depicted below.

BILLING CODE 4310-55-M



BILLING CODE 4310-55-C

The international symbol has been described by the marine community as not conveying a distinct meaning and is not understood by boaters. That symbol, therefore, has not been accepted by boaters and is not in general use in the United States. Likewise, the NOAA magenta "P" and circle on charts was not accepted as having a distinct message when presented to the marine community and has been deemed by Federal Highway Administration and marine community groups as possibly being in conflict with the symbol for "parking". Therefore, there is no nationally recognized pumpout symbol in general use to indicate to boaters traveling in different parts of the country where pumpout and portable toilet dump stations are located.

Likewise, there is no nationally recognized slogan. There are several State and private pumpout and portable toilet dump station symbols and slogans in use. Each one is different, so that the image and words are different from State to State. In order to have a successful campaign nationwide to get boaters to use pumpouts, a single, coordinated message and symbol is needed.

Therefore, a pumpout symbol and slogan have been developed to provide boaters with a single nationwide symbol of pumpout and portable toilet dump station locations, and to provide a consistent message about the program nationally in education materials produced by each State. Advertising the program with one widely-accepted symbol and slogan will decrease confusion, better advertise the program, result in greater use of pumpout and portable toilet dump stations, improve the aquatic environment, and thus contribute to improve economic and health conditions. The symbol and slogan contributes to environmental improvement goals of other Federal, State and local governmental agencies and has the support of boaters, the boating industry and the marine community.

Currently, § 80.26 of 50 CFR Part 80 contains a crediting logo, and § 85.47 of 50 CFR Part 85 contains suggested language to acknowledge that facilities were constructed with Clean Vessel Act funds. These sections were also reviewed and suggestions made for changes.

Developing a Pumpout Symbol

The Fish and Wildlife Service consulted with Federal and State agencies, and with organizations and individuals within the marine industry and boating community, in developing a pumpout symbol. A scoping meeting was held April 8, 1993 to obtain input on a pumpout symbol. States that presently have pumpout symbols were invited to attend, as well as others. Maryland and Virginia attended, as well as the following Federal agency representatives: National Oceanic and Atmospheric Administration, Environmental Protection Agency, U.S. Coast Guard, and Federal Highway Administration. Representatives from States Organization of Boating Access, National Marine Manufacturers Association, American League of Anglers and Boaters, and the International Association of Fish and Wildlife Agencies also attended. Oregon and the National Association of State Boating Law Administrators did not attend, but provided comments, examples of their current symbols and/or suggested symbols.

A draft scoping document, encompassing the information in this notice, was sent to nearly 250 individuals and organizations for review and comment on July 8, 1994. Comments were received from three Fish and Wildlife Service Regions, Environmental Protection Agency Chesapeake Bay Program, Federal Highway Administration, U.S. Coast Guard (3 letters), Massachusetts Department of Fisheries, Wildlife and Environmental Law Enforcement, Oregon State Marine Board, Maryland Department of Natural Resources Boating Administration, Florida Department of Environmental Protection, National Marine Manufacturers Association, Sealand Technology, Inc., Keco, Inc., and Neil Ross Consultants. A summary of their comments follow.

General: Letters were received from the U.S. Coast Guard, Massachusetts and Oregon, and Keco, Inc., supporting the development of a symbol. Florida expressed concern with publishing a final rule without publishing a draft. Response: The symbol is being developed, and will be published in draft.

Symbol criteria: Oregon agreed with the criteria. Florida and Neil Ross Consultants does not believe that Criterion 7, use of symbol on deck fitting caps, is necessary or important. Response: Criterion 7 was dropped.

Pumpout symbol: The suggested symbol had a white arrow with a blue background, similar to the arrow proposed in this rule, except without the holding tank or boat. Maryland and Neil Ross Consultants supported the symbol, while the Federal Highway Administration, EPA Chesapeake Bay Program, Florida, Oregon, Massachusetts, National Marine Manufacturers Association, Keco, Inc., and Sealand Technology felt it was too abstract, non-communicative, and could be confused with a directional arrow. Fourteen alternative symbols were suggested, ten of which included boats. EPA included a marine toilet, and Massachusetts suggested words only, such as "Pumpout". Response: The overwhelming comments were in favor of a symbol. Therefore, the use of words only was not selected. A boat and holding tank have been added to the symbol.

Sign color and shape: Coast Guard and Florida provided copies of Code of Federal Regulations with sign color and shape requirements on waterways which follow the U.S. Aids to Navigation System. Depending on purpose the sign could have a white background with orange border and orange or black symbol. Oregon and NMMA agreed with the blue and white colors as providing consistency with FHWA standards. Massachusetts stated the FHWA blue and white color scheme would not be visible on the water, and suggested a black symbol on an orange background. Maryland suggested using a red symbol with an orange background, which would not conflict with Coast Guard regulations. Florida suggested an orange border, white background, and black symbol and letters. FWS Atlanta Region, FHWA, Florida and NMMA suggested using reflectorized paint or illuminating the sign. Response: An international orange border with white background and black symbol and letters was selected. These colors follow the Coast Guard colors because of boater recognition and because they are easily visible on the water. Coast Guard colors were selected over FHWA colors because signs will be located on the water rather than on highways. Reflectorized paint or film, or sign illumination is suggested.

Qualifying signs: FHWA, Massachusetts, and NMMA recommended educational plaques to explain the symbol until boaters learn its meaning. Oregon and Keco, Inc. do not support additional signs due to cost and over-signage. Response: The rule provides for both options.

Slogan: Maryland suggested its slogan "Pump Don't Dump", and Oregon and NMMA supports that slogan. Massachusetts and Neil Ross Consultants believe the Maryland slogan is not adequate. Keco, Inc. has indicated the slogan "PUMP IT DON'T DUMP IT" is trademarked by them and no similar slogan should be used. Fifty-two alternative slogans were suggested. Response: The 52 alternatives were reduced to 17, and boaters at four focus group meetings identified the most acceptible slogans. The top four were then reviewed by the FWS, USCG, EPA, and NOAA and one of the four, "KEEP OUR WATER CLEAN—USE PUMPOUTS", was selected.

Crediting logo: FHWA suggested placing the crediting logo away from the symbol so it would not interfere with the pumpout message. Florida suggested the symbol and crediting logo should be strongly correlated. Florida and Oregon suggested crediting language. NMMA supports a crediting logo. Response: A crediting logo is identified in the rule along with crediting language, with instructions on when and where to use the logo and language.

Numerous consultations and scoping meetings were held with Federal, State and marine community staffs, groups and individuals throughout this period. Focus group meetings were held in Miami, FL, Minneapolis, MN, Seattle, WA, and Annapolis, MD, between June 14 and 28, to obtain inputs on a symbol, slogan, and boater attitudes toward pumping out their sewage. Each group was shown the suggested symbol and results show that "the symbol, as tested, is appropriate and easily understood. Boaters volunteered that this symbol can become the 'universal' visual for pumpout stations."

Consultation occurred with the International Standards Organization, American National Standards Institute, American Boat and Yacht Council, Society of Automotive Engineers, American Institute of Graphic Arts, British Standards Institution, and Permanent International Association of Navigation Congresses. Input was obtained on several pumpout symbol designs at the following meetings: seven EPA-sponsored Regional Workshops in 1994, through a grant with The International Marina Institute; at the University of Wisconsin-Madison Docks and Marina National Conference; and, at several marine community conferences, workshops and meetings.

The following current symbols were reviewed: ISO international pumpout symbol, NOAA National Ocean Service

Nautical Chart magenta "P" and circle. Maryland, North Carolina and Keco, Inc. (Pumpout symbols), and Virginia (Pumpout and portable toilet dump station symbols).

The following documents were reviewed: (1) Symbol Signs, The System of Passenger/Pedestrian Oriented Symbols, Developed for the U.S. Dept. of Transportation (DOT), The American Institute of Graphic Arts, 1981; (2) Surface Vehicle Recommended Practice, SAE International, Graphic Symbols for Boats, SAE J1449, Society of Automotive Engineers, Inc., February 1987; (3) British Standard Marine Series: Specification for Shipbuilding—Yachts—Waste water fittings, BS MA 84:1978, ISO 4567–1978, UDC [629.125.12 + 629.125.22] : 628.2, British Standards Institution, London, England; (4) American National Standard Graphic Symbols for Plumbing Fixtures, American National Standards Institute Y32.4–1977; (5) Manual on Uniform Traffic Control Devices for Streets and Highways (MUTCD), U.S. DOT, FHWA, 1988; (6) Standard Highway Signs as Specified in the MUTCD, DOT, FHWA; (7) Standard Alphabets for Highway Signs, DOT, FHWA, Reprinted 4/84.

Over 50 alternative symbols were reviewed by the Service. These symbols were developed by and were reviewed by members of the marine community, and State and Federal agencies. These symbols ranged from very complex, with depictions of water, boats, toilets, docks, pumpout stations, arrows and messages, to very simple, with an arrow and messages.

In addition to a pumpout symbol, three different portable toilet dump station symbols, and three combination pumpout/portable toilet dump station symbols were suggested. Some were completely separate portable toilet dump station or combination symbols, and some were pumpout symbols adapted to portable toilet dump station or combination symbols.

Criteria Used To Develop the Symbol

The following criteria were developed to select the pumpout symbol after discussions with individuals involved in the marine community and State and Federal agencies, and review of the documents identified in this rule: (1) How well the symbol represents the message (It should be kept in mind that many symbols must be learned before there is adequate recognition of the symbol. Constant repetition of the symbol is more important than the style of drawing or appropriateness of concept). (2) The ease with which people learn the symbol (The simpler the symbol, the easier to learn). (3) How well the symbol relates to national standards. (4) How well the symbol is reproducible on letters, etc. (5) How visible the sign is to viewers (The simpler the symbol, the easier to recognize it at greater distances and under all light and background conditions). (6) How easy to reproduce, reduce and enlarge the symbol (The symbol must be legible when reduced significantly).

The Proposed Pumpout Symbol

The current international symbol was rejected by nearly all who commented as not being understood by boaters and not communicating a distinct meaning. The NOAA NOS nautical magenta "P" and circle, although it may be suitable on the NOAA nautical charts, also does not convey the pumpout message adequately on signs and may be in conflict with other symbols such as parking signs, according to comments made by people in the marine community. The current symbols used by States, and the suggested complex symbols, did not fully comply with the criteria. A suggestion was made to develop separate symbols for pumpout and portable toilet dump stations. Comments on this suggestion favored one single symbol which would encompass both pumpout and portable toilet dump stations to decrease confusion and costs.

The proposed symbol encompasses the one feature that invariably appeared in the 50 symbols: the "arrow", as well as the "holding tank" and "boat". The proposed symbol, therefore, represents the core of current and suggested symbols. The symbol is simple and should be easy to learn. The symbol follows U.S. Coast Guard format and color standards for signs on waterways (Symbol is black, border is international orange, and background is white). The symbol is easily reproducible on charts, etc., and should be easily recognizable to viewers at a great distance. The symbol is easily reduced or enlarged without losing legibility.

Developing a Pumpout Slogan

In addition to the pumpout symbol, the Service is proposing a slogan. Some States currently have a slogan, however, no slogan exists which would provide a national level focus for the program. The July 8, 1994, scoping document resulted in 52 suggested slogans. This number was reduced to 17 and presented to boaters at the focus group meetings held June 14 through 28, 1995, around the country. The proposed slogan, "KEEP OUR WATER CLEAN—USE PUMPOUTS", was then selected by the cooperating Federal agencies (FWS, NOAA, EPA and USCG), based on the top four slogans recommended by the boaters. "Boaters prefer a short, straight-forward slogan" as identified during the focus group meetings.

Developing a Program Crediting Logo

In addition to the crediting logo for the Federal Aid in Sport Fish Restoration Act in § 80.26 of 50 CFR Part 80. § 85.47 of 50 CFR Part 85 contains examples of suggested language for crediting the Clean Vessel Act. Inputs were received from the July 8, 1994, scoping document request, and subsequently from States and Fish and Wildlife Service Regions. Suggested language was selected based on these comments.

Public Comment

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions or objections regarding the proposed rule to the location identified in the Address section. Comments must be received on or before November 20, 1995.

Environmental Effects

Because this rule is an administrative action, the effects on the physical biological and sociological environment are too broad, speculative, and conjectural to be analyzed meaningfully. Therefore, the action is categorically excluded from any National Environmental Policy Act documentation pursuant to 516 DM 2.3 A (2). However, installation of symbol signs will be reviewed as part of the construction or renovation of pumpout and portable toilet dump stations which will require separate environmental consideration.

Information Collection Requirements

This proposed rule does not contain information collection requirements that require approval by the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Statement of Effects

This rule was not subject to Office of Management and Budget review under Executive Order 12866. The program does not have significant "taking" implications, as described in Executive Order 12630. The rule allows eligible States to make decisions regarding the use of the pumpout symbol, slogan and crediting logo. This rule does not

contain any federalism impacts as described in Executive Order 12612 on Federalism. This rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. *et seq.*) The effects of these rules occur to agencies in the States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the District of Columbia and the Northern Mariana Islands. These are not small entities under the Regulatory Flexibility Act.

Intergovernmental Review of Federal Programs

This Clean Vessel Act Grant Program is covered under Executive Order 12372 "Intergovernmental Review of Federal Programs" and 43 CFR Part 9 "Intergovernmental Review of Department of the Interior Programs and Activities." Under the Order, States may design their own processes for reviewing and commenting on proposed Federal assistance under covered programs.

Author

The primary author of this rule is Robert D. Pacific, U.S. Fish and Wildlife Service.

List of Subjects in 50 CFR Part 85

Coastal zone, Grant programs—Natural resources, Reporting and recordkeeping requirements, Sewage disposal, and Vessels.

Regulation Promulgation

For the reasons set out in the preamble, Subchapter F of Chapter I, Title 50, Part 85 of the Code of Federal Regulations is proposed to be amended as set forth below.

PART 85—CLEAN VESSEL ACT GRANT PROGRAM

1. The authority citation continues to read as follows:

Authority: Public Law 102–587, Title V, Subtitle F.

Subpart A—General

2. Section 85.11 is amended by removing the paragraph designations and adding the following definitions, in alphabetical order, to read as follows:

§ 85.11 Definitions.

* * * * *

Equitable fees. Fees should be equal for all pumpout users at a marina, for that facility to be open and available to the public. However, members and customers may prepay for pumpouts within a fee structure, so that a separate fee for pumpouts would not be needed for those members and customers.

Facility open to the public. A Clean Vessel Act facility that is open and available to the public is one in which the public has full and reasonable access to the pumpout/dump station at that public or private facility for pumping out, including provisions of signage visible from the water to direct boaters to pumpout/dump stations, location of pumpouts to facilitate ease of use by all boats typical to that particular marina, equitable fees, and reasonable open periods.

Private Facilities. Private facilities include those operated by the following:

(1) For profit or non-profit private marinas, docks etc.,

(2) For profit or non-profit concessionaires, whether they are leased or private facilities, on public lands, and

(3) Yacht or boating clubs, whether they are open to the public or members-only facilities.

Public facilities. Public facilities include municipal, port authority, State and Federal marinas, docks, etc., operated by those agencies.

Reasonable open periods. While no specific hours, days and seasons are specified, some suggested examples, provided no other factors are involved, are presented:

(1) Pumpout/dump stations may be open during the same period the fuel docks are normally open.

(2) Pumpout stations may be open when the marina is open and staff is present to pump out boats.

(3) Pumpout/dump stations may be open during the hours considered to be normal marina business hours as adjusted by seasonal differences, and may be closed entirely during cold winter months.

* * * * *

Subpart B—Application for Grants

3. Section 85.21 is amended by adding a second sentence to the introductory text of paragraph (a) to read as follows:

§ 85.21 Application procedures.

(a) * * * If coastal States submit proposals for both the coastal zone and the inland portion of their States, two separate proposals must be submitted.

* * * * *

Subpart C—Grant Selection

4. Section 85.30(f) is revised to read as follows:

§ 85.30 Grant selection criteria.

* * * * *

(f) Proposals that include an education/information component, or the State has an active, ongoing education program;

* * * * *

Subpart D—Conditions on Use/Acceptance of Funds

5. Section 85.43 is revised to read as follows:

§ 85.43 Signs and symbols.

(a) *Signs.* Appropriate information signs should be installed at pumpout and portable toilet dump stations. Such information should indicate fees, restrictions, hours of operation, operating instructions, and a contact name and telephone number if the facility is inoperable.

(b) *Pumpout symbol.* (1) A pumpout symbol should be used according to Service specifications at the appropriate times to increase public awareness of the Clean Vessel Act Pumpout Grant Program. The symbol is meant to be used

(i) As a sign at the entrance to a marina advertising the presence of a pumpout and/or portable toilet dump station.

(ii) As a directional sign within a marina.

(iii) As a sign at a pumpout and/or portable toilet dump station.

(iv) As a symbol on education and informational material, and

(v) For other uses as appropriate to advance the purposes of the Clean Vessel Act

(2) To avoid confusion with having two symbols, the selected symbol is to be used both for pumpout stations and portable dump stations. This pumpout symbol is not copyrighted, and its appropriate use is encouraged. The NOAA NOS magenta "P" within a magenta circle will continue to be used on nautical charts to identify the location of pumpout and portable toilet dump stations. NOAA will include information about the selected pumpout symbol in the U.S. Coast Pilots, a supplement to the charts, to relate this symbol to the NOAA Nautical Chart magenta "P" and circle.

(3) All recipients identified in § 85.11 should display the appropriate pumpout symbol on facilities, such as pumpout and portable toilet dump stations, or on printed material or other visual representations relating to project accomplishments or education/information, and should encourage others to do so. Subrecipients should also display the symbol and should encourage use by others for purposes as stated in this paragraph.

(4) Other persons or organizations are encouraged to use the symbol to

advance the purposes of the Clean Vessel Act program, such as marinas with pumpout stations not constructed with Clean Vessels Act funds.

(5) The following specifications shall apply: The symbol is black, the background is white, and the border is international orange. There is no standard for the black and white, but use black and white colors, not shades. The standards for the international orange color is as follows: For day boards (signs), use retroflective international orange film. For paint, use international orange conforming to FED–STD 595B, chip number 12197 in daylight conditions. For inks us Pantone Matching System color chart 179C. The symbol sign should use reflectorized film or paint, or should be illuminated so it is viewable at night. Currently, the symbol shown is a rough mockup. When the symbol is finalized, the symbol will be developed on a grid and technical specifications will be completed for constructing signs and for other purposes.

(6) The following rules govern the graphic reproduction of the symbols:

(i) The symbol should not be used smaller than is legible.

(ii) The size and position relationship of the symbol should not be changed in any way.

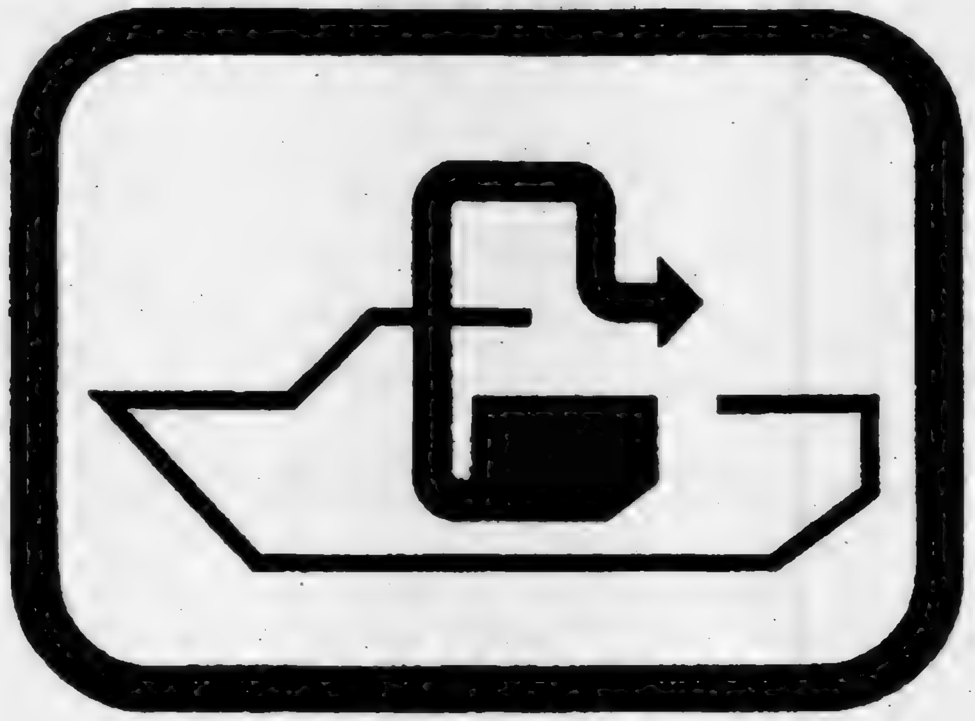
(iii) No portion of the symbol should be obscured by overprinting.

(iv) The symbol should not be placed where it will be split by unlike backgrounds.

(v) The symbol should not be placed on a background that is highly textured or patterned.

(7) The pumpout symbol is depicted as follows:

BILLING CODE 4310-55-M



BILLING CODE 4310-55-C

(c) *Qualifying signs.* (1) In conjunction with the symbol, other qualifying signs may be used below the symbol, either on the same sign or on a separate sign.

(i) The message "Ⓟ PUMP OUT", "Ⓟ PUMPOUT STATION", "Ⓟ PORTABLE" appropriate qualifier, may be placed beneath the symbol. The magenta-colored "P" and circle should be placed in front of the message to relate the pumpout symbol to the NOAA NOS nautical charts. Messages may be appropriate for several years until the symbol is understood without the message.

(ii) Directional arrows may be placed beneath the symbol to indicate the direction of pumpout or portable toilet dump station facilities.

(2) The following specifications shall apply: Symbols, such as directional arrows, and letters, are black, and the background is white. For using inks to create the magenta color, use PMS color chart 259U. Letters and black and white colors shall follow the Federal Highway Administration's Manual on Uniform Traffic Control Devices for Streets and Highways (MUTCD). FHWA, 1988. The 1988 MUTCD, including Revision No. 3 dated September 3, 1993, may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 and has Stock No. 050–001–00308–2.

(3) The same rules governing the graphic reproduction of the pumpout symbol shall apply to qualifying signs.

(d) *Pumpout slogan.* (1) A pumpout slogan should be used according to Service specifications to help increase awareness of the Clean Vessel Act Pumpout Grant Program. The slogan is meant to be used in conjunction with the pumpout symbol, on educational/informational material, and for other uses as appropriate to advance the purposes of the Clean Vessel Act. The slogan is not copyrighted, and its appropriate use is encouraged.

(2) All recipients identified in § 85.11 should display the pumpout slogan on facilities, such as pumpout and portable toilet dump stations as appropriate, and on printed material or other visual representations relating to project accomplishments or education/information, and should encourage others to do so. Subrecipients should display the slogan for purposes as stated in this paragraph and should encourage others to do so.

(3) Other persons or organizations are encouraged to use the slogan to advance the purposes of the Clean Vessel Act program, such as marinas with pumpout stations not constructed with Clean Vessel Act funds.

(4) The following specifications shall apply for signs: Letters are black and background is white. The same reference for paragraph (c)(2) of this section shall apply.

(5) The same rules governing the graphic reproduction of the pumpout symbol shall apply to the pumpout slogan.

(6) The pumpout slogan is depicted as follows:

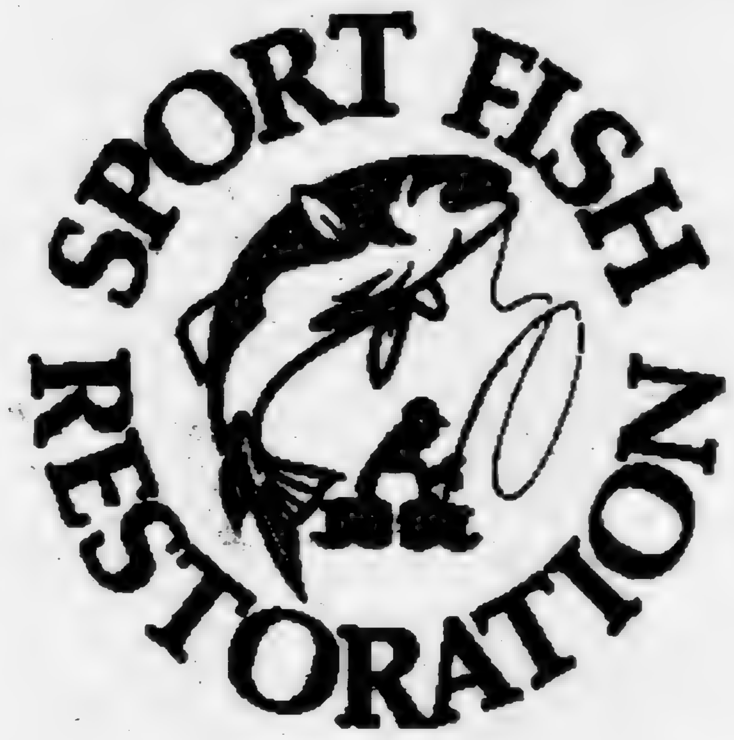
KEEP OUR WATER CLEAN—USE PUMPOUTS

6. Section 85.47 is revised to read as follows:

§ 85.47 Program crediting.

(a) *Crediting logo.* Signs should acknowledge that the facility was constructed or improved with funds from the Sport Fish Restoration Account. The crediting logo identified in § 80.26 of this chapter is prescribed to identify projects funded by the Clean Vessel Act and to identify items on which taxes and duties have been collected to support the Act. That logo is depicted as follows:

BILLING CODE 4310-55-M



BILLING CODE 4310-55-C

(b) *Recipient logo display.* All recipients identified in § 85.11 are authorized, according to § 80.26 of this chapter, to display the appropriate logo on facilities, such as pumpout and portable toilet dump stations, acquired, developed, operated or maintained by these grants, or on printed material or other visual representations relating to project accomplishments or education/information. Recipients may require sub-recipients to display the logo.

(c) *Other display of logo.* Other persons or organizations may use the logo for purposes related to the Federal Aid Clean Vessel Act program as authorized in § 80.26 of this chapter.

(d) *Crediting language.* Following are suggested examples of language to use when crediting the Clean Vessel Act:

(1) Example 1: This pumpout facility was funded under the Sport Fish Restoration Program by your purchase of fishing equipment and motorboat fuels.

(2) This facility is being constructed under the Sport Fish Restoration Program by your purchase of fishing equipment and motorboat fuels.

(3) This pamphlet was funded under the Sport Fish Restoration Program by your purchase of fishing equipment and motorboat fuels.

Dated: August 3, 1995.

George T. Frampton, Jr.,

Assistant Secretary for Fish and Wildlife and Parks.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 658

[I.D. 091295B]

Shrimp Fishery of the Gulf of Mexico; Amendment 8

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of an amendment to a fishery management plan; request for comments.

SUMMARY: NMFS announces that the Gulf of Mexico Fishery Management Council (Council) has submitted Amendment 8 to the Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico (FMP) for review by NMFS. Written comments are requested from the public.

DATES: Written comments must be received on or before November 13, 1995.

ADDRESSES: Comments must be mailed to the Southeast Regional Office, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702.

Requests for copies of Amendment 8, which includes an environmental assessment and a regulatory impact review, should be sent to the Gulf of Mexico Fishery Management Council, 5401 W. Kennedy Boulevard, Suite 331, Tampa, FL 33609-2486, FAX: 813-225-7015.

FOR FURTHER INFORMATION CONTACT: Michael E. Justen, 813-570-5305.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act (Magnuson Act), requires that a council-prepared amendment to a fishery management plan be submitted to NMFS for review and approval, disapproval, or partial disapproval. The Magnuson Act also requires that NMFS, upon receiving an amendment, immediately publish a notice that the amendment is available for public review and comment.

Amendment 8 proposes to establish a framework rulemaking procedure for establishing or modifying the maximum sustainable yield (MSY), optimum yield (OY), and total allowable catch (TAC) for royal red shrimp harvested from the exclusive economic zone of the Gulf of Mexico. That procedure would authorize the Council to recommend, and NMFS to approve and implement, TAC for royal red shrimp no higher than MSY plus 30 percent for a test period of up to 2 consecutive years. This action will allow for testing the response of the resource to a controlled increase in fishing effort and to obtain additional management data on the royal red shrimp resource for refining estimates of MSY and OY.

Proposed regulations to implement Amendment 8 are scheduled for publication within 15 days.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 13, 1995.

Richard W. Surdi,

Acting Director, Office of Fisheries Conservation and Management. National Marine Fisheries Service.

Notices

Federal Register
Vol. 60, No. 181
Tuesday, September 19, 1995

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Historical Reservation Advisory Council Meeting

AGENCY: Advisory Council on Historic Preservation.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given that the Advisory Council on Historic Preservation will meet on Wednesday, September 27, 1995. The meeting will be held in Room M09 at the Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, D.C., beginning at 8:30 a.m.

The Council was established by the National Historic Preservation Act of 1966 (16 U.S.C. Section 470) to advise the President and the Congress on matters relating to historic preservation and to comment upon Federal, federally assisted, and federally licensed undertakings having an effect upon properties listed in or eligible for inclusion in the National Register of Historic Places. The Council's members are the Architect of the Capitol; the Secretaries of the Interior, Agriculture, Housing and Urban Development, and Transportation; the Administrators of the Environmental Protection Agency and General Services Administration; the Chairman of the National Trust for Historic Preservation; the President of the National Conference of State Historic Preservation Officers; a Governor; a Mayor; a Native American; and eight non-Federal members appointed by the President.

The agenda for the meeting includes the following:

I. Chairman's Welcome/Opening
II. Task Force Report on Council's Future
III. Status Report on Appropriations for FY 1996
IV. Report on Council's Regulations
V. Section 106 Cases
VI. Executive Director's Report
VII. New Business
VIII. Adjourn

Note: The meetings of the Council are open to the public. If you need special accommodations due to a disability, please contact the Advisory Council on Historic Preservation, 1100 Pennsylvania Ave., NW., Room 809, Washington, DC., 202–606–8503, at least seven (7) days prior to the meeting.

FOR FURTHER INFORMATION CONTACT: Additional information concerning the meeting is available from the Executive Director, Advisory Council on Historic Preservation, 1100 Pennsylvania Ave., NW., #809, Washington, DC 20004.

Dated: September 14, 1995.

Robert D. Bush,

Executive Director.

DEPARTMENT OF AGRICULTURE

Forest Service

Willamette Provincial Interagency Executive Committee (PIEC), Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Willamette PIEC Advisory Committee will meet on Thursday, October 19, 1995. The meeting will be at the Monarch Hotel and Conference Center, 12566 SE 93rd Avenue; Clackamas, Oregon; phone (503) 652–1515; located in the Clackamas Town Center. The meeting is scheduled to begin at 9:00 a.m. and conclude at approximately 4:00 p.m. Topics scheduled on the agenda include: (1) FY 1995 Status Report of Northwest Forest Plan Implementation in the Willamette Province, (2) NW Forest Plan Standards and Guidelines—Riparian Reserves Practices and Adjustments. (3) Recession Bill Timber Provisions and Linkages to the NW Forest Plan, (4) Watershed Restoration—Examples of Private/Public Initiatives and PAC Role.

The meeting is open to the public and opportunity will be available to address the Advisory Committee during a public forum. The public forum will follow the agenda topics mentioned above and will occur in the afternoon. Time allotted for individual presentations to the committee will be limited to 3–5 minutes each. Written comments are encouraged and can be submitted prior to the meeting.

FOR FURTHER INFORMATION CONTACT: For more information regarding this meeting, such as a detailed agenda, contact Neal Forrester, Designated Federal Official; Willamette National Forest, 211 East Seventh Avenue; Eugene, Oregon; 503–465–6924.

Dated: September 12, 1995.

Darrel L. Kenops,

Forest Supervisor.

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Shipper's Export Declaration Form.

Form Number(s): Form 7525–V–Alternate (Intermodal).

Agency Approval Number: 0607–0152.

Type of Request: Extension of a currently approved collection.

Burden: 473,445 hours.

Number of Respondents: 2,544,037.

Avg Hours Per Response: 11 minutes.

Needs and Uses: Shipper's Export Declarations (SED's) are required from exporters for all shipments valued over $2500 from the United States, Puerto Rico, and the U.S. Virgin Islands to all foreign countries except Canada; between the United States and Puerto Rico; and from the United States or Puerto Rico to the U.S. Virgin Islands. Information on the cargo, its origin and destination, and method and date of export are requested. Customs officials gather the SED forms from export carriers and transmit them to the Census Bureau. The Census Bureau designed Form 7525–V–Alternate primarily for waterborne shipments to simplify documentation. SED's are the basic source of the official U.S. export statistics compiled by the Census Bureau. These statistics provide data for the merchandise trade balance, a major economic indicator and component of the gross domestic product.

Affected Public: Business or other for-profit; Individuals or households, Not-for-profit institutions, Farms, Federal Government, State, local or tribal government.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald TacheAE1, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: September 12, 1995.

Gerald Taché,

Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510-07-F

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Shipper's Export Declaration.

Form Number(s): Form 7525–V.

Agency Approval Number: 0607–0018.

Type of Request: Extension of a currently approved collection.

Burden: 627,590 hours.

Number of Respondents: 3,372,394.

Avg Hours Per Response: 11 minutes.

Needs and Uses: Shipper's Export Declarations (SED's) are required from exporters for all shipments valued over $2500 from the United States, Puerto Rico, and the U.S. Virgin Islands to all foreign countries except Canada; between the United States and Puerto Rico; and from the United States or Puerto Rico to the U.S. Virgin Islands. Information on the cargo, its origin and destination, and method and date of export are requested. Customs officials gather the SED forms from export carriers and transmit them to the Census Bureau. The vertical SED, Form 7525–V is the standard form used to collect these data. SED's are the basic source of the official U.S. export statistics compiled by the Census Bureau. These statistics provide data for the merchandise trade balance, a major economic indicator and component of the gross domestic product.

Affected Public: Business or other for–profit, Individuals or households, Not–for–profit institutions, Farms, Federal Government, State, local or tribal government.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Taché, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: September 12, 1995.

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Shipper's Export Declaration.

Form Number(s): Form 7513.

Agency Approval Number: 0607–0001.

Type of Request: Extension of a currently approved collection.

Burden: 26,165 hours.

Number of Respondents: 140,626.

Avg Hours Per Response: 11 minutes.

Needs and Uses: Shipper's Export Declarations (SED's) are required from exporters for all shipments valued over $2500 from the United States, Puerto Rico, and the U.S. Virgin Islands to all foreign countries except Canada; between the United States and Puerto Rico; and from the United States or Puerto Rico to the U.S. Virgin Islands. Information on the cargo, its origin and destination, and method and date of export are requested. Customs officials gather the SED forms from export carriers and transmit them to the Census Bureau. Carriers must file Form 7513 for merchandise shipped in bond by vessel through the United States enroute from one foreign country to another without having been entered as an import (in-transit goods). SED's are the basic source of the official U.S. export statistics compiled by the Census Bureau. These statistics provide data for the merchandise trade balance, a major economic indicator and component of the gross domestic product.

Affected Public: Business or other for–profit, Individuals or households, Not–for–profit institutions, Farms, Federal Government, State, local or tribal government.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

[FR Doc. 95–23226 Filed 9–18–95; 8:45 am]

BILLING CODE 3510–07–F

Agency Forms Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Export Administration (BXA).

Title: Export of Parcels Through the Postal Service.

Agency Form Numbers: None.

OMB Approval Number: None.

Type of Request: Existing collection in use without an OMB control number.

Burden: 11,110 hours.

Number of Respondents: 8,000,000.

Avg Hours Per Response: A few seconds.

Needs and Uses: The Export Administration Regulations require that persons exporting through the U.S. Postal Service place on the parcel the authorization for the export — i.e., the validated license number or the general license symbol. This information is the declaration to the government that the shipment is allowed.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration.

Title: Destination Control Statement.

Agency Form Number: None.

OMB Approval Number: None.

Type of Request: Existing collection in use without an OMB control number.

Burden: 1,700 hours.

Number of Respondents: 612,000.

Avg Hours Per Response: 5 seconds.

Needs and Uses: The Destination Control Statement serves as notice to all foreign parties in an export transaction that further shipment to any country not authorized is prohibited. In any Office of Export Enforcement proceeding, evidence of the sending of the commercial invoice, bill of lading or other form of notice of the prohibition against diversion will serve as proof of the person's receipt of the notice.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration.

Title: Export License Information on Bill of Lading.

Agency Form Number: None.

OMB Approval Number: None.

Type of Request: Existing collection in use without an OMB control number.

Burden: 4,600 hours.

Number of Respondents: 3,500,000.

Avg Hours Per Response: Several seconds.

Needs and Uses: The Export Administration Regulations requires that all forwarders or brokers who are exempt from filing an individual Shipper's Export Declaration to include on shipping documentation the general license symbol or validated license number. This information furnishes official representation to customs officials that the export is permitted.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Five Year Record Retention Period.

Agency Form Number: None.

OMB Approval Number: None.

Type of Request: New Recordkeeping Requirement.

Burden: 259 hours.

Number of Respondents: 154,816.

Avg Hours Per Response: 10 seconds per record.

Needs and Uses: BXA is proposing that its record retention requirements for records pertaining to exports and foreign boycotts be increased to five years. This change when implemented will correspond with the five year statute of limitations for criminal actions brought under the Export Administration Act. Most firms now have electronic systems for recordkeeping and thus the burden per response is minimal. This request will supplement documents already approved for a five year retention period — namely supporting documentation that was previously submitted to BXA at the time of making application for a license.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Delivery Verification Procedure.

Agency Form Number: BXA–647P.

OMB Approval Number: 0694–0016.

Type of Request: Extension of a currently approved collection.

Burden: 57 hours.

Number of Respondents: 200.

Avg Hours Per Responses: Approximately 15 minutes and recordkeeping.

Needs and Uses: In order to increase the effectiveness of export controls on international trade in strategic commodities, certain countries participate in the import certificate – delivery verification procedure. Its purpose is to make sure that strategic items are not diverted. When a U.S. importer is requested to furnish their foreign supplier with a certificate, the importer must supply certain information to BXA so that the documentation can be issued.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Short Supply Regulations – Petroleum Products.

Agency Form Number: None.

OMB Approval Number: 0694–0026.

Type of Request: Revision of a currently approved collection.

Burden: 43 hours.

Number of Respondents: 165.

Avg Hours Per Response: 15 minutes required for general license shipments and 30 minutes for documentation supporting an export license.

Needs and Uses: The Naval Petroleum Reserves Production Act of 1976 restricts the export of any petroleum product produced from crude oil derived from National Petroleum Reserves. Under very limited circumstances, petroleum products can be exported if a validated license is obtained. For other shipments under a general license, support documentation is required to prove that the petroleum being exported in not from the Naval Reserves.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Statement by Foreign Consignee in Support of Special License Application.

Agency Form Number: BXA–6052P (BXA–752 under new regulations).

OMB Approval Number: 0694–0050.

Type of Request: Extension of a currently approved collection.

Burden: 173 hours.

Number of Respondents: 323.

Avg Hours Per Response: 30 minutes.

Needs and Uses: This form is used as supporting document for three of BXA's special licenses: Project, Distribution and Service Supply Licenses. The completed form provides BXA with end–use and reexport information to aid in controlling commodities shipped under special license procedures.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Procedures for Supporting Documentation.

Agency Form Number: None.

OMB Approval Number: 0694–0064.

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 313 hours.

Number of Respondents: 3,558.

Avg Hours Per Response: Varies between 1 and 30 minutes depending on the requirement.

Needs and Uses: The Export Administration Act requires exporters to maintain certain supporting documentation in their files in support of license applications. This clearance also covers the procedures for returning an unused or partially used import certification, as well as what must be done when a change in representation occurs.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Multi–Purpose Application.

Agency Form Number: BXA–622P, BXA–685P, BXA–699P, BXA–748P.

OMB Approval Number: 0694–0088.

Burden: 13,631 hours.

Number of Respondents: 14,910.

Avg Hours Per Response: Varies between 2 and 45 minutes depending on the requirement.

Needs and Uses: This collection is required in compliance with U.S. export regulations. The information furnished by U.S. exporters provides the basis for decisions to grant licenses for export, reexport, and classifications of commodities, goods and technologies that are controlled for reasons of national security and foreign policy. This revision is necessary to comply with the Paperwork Reduction Act of 1995, which now recognizes and includes the burden associated with third party disclosures, certifications and notification requirements imposed on the public.

Affected Public: Businesses and other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Copies of the above information collection proposals can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, Room 5327, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collections should be sent to Don Arbuckle, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503.

Dated: September 12, 1995.

Gerald Taché,

Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–CW–F

Foreign-Trade Zones Board

[Docket 52–95]

Foreign-Trade Zone 12—McAllen, Texas, Area Application for Expansion

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the McAllen Economic Development Corporation, grantee of Foreign-Trade Zone 12, McAllen, Texas, requesting authority to expand its zone to include an additional site in the McAllen, Texas, area, within the Hidalgo Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on September 11, 1995.

FTZ 12 was approved on October 23, 1970 (Board Order 84, 35 FR 16962, 11/3/70) and expanded on May 2, 1984 (Board Order 254, 49 FR 22842, 6/1/84) and June 19, 1990 (Board Order 469, 55 FR 26225, 6/27/90). The zone currently consists of: Site 1 (80 acres)—within the McAllen Southwest Industrial Area, FM 1016 and Ware Road, Hidalgo County, and, Site 2 (8.5 acres)—at the Air Cargo Facility within McAllen Miller International Airport complex, McAllen, Texas.

The applicant is now requesting authority to expand Site 1 to include an adjacent 695-acre industrial park area located on FM 1016 between Bentsen Road and Shary Road, Hidalgo County, 5 miles south of the McAllen Miller International Airport.

No specific manufacturing requests are being made at this time. Such requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations (as revised, 56 FR 50790–50808, 10–8–91), a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is November 20, 1995. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to December 4, 1995).

A copy of the application and accompanying exhibits will be available for public inspection at each of the following locations:

Office of the Port Director, U.S. Customs Service, Administration Building, International Bridge, Hidalgo, Texas 78557

Office of the Executive Secretary, Foreign-Trade Zones Board, Room 3716, U.S. Department of Commerce, 14th and Pennsylvania Avenue, NW., Washington, DC 20230

Dated: September 13, 1995.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510–DS–P

International Trade Administration

[A–401–805]

Certain Cut-to-Length Carbon Steel Plate From Sweden: Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: In response to a request by a respondent, the Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on *Certain Cut-to Length Carbon Steel Plate from Sweden* (A–401–805). This review covers one manufacturer/exporter of the subject merchandise to the United States during the period of review (POR) February 4, 1993, through July 31, 1994.

We have preliminarily determined that sales to the United States have been made below the foreign market value (FMV). If these preliminary results are adopted in our final results of administrative review, we will instruct U.S. Customs to assess antidumping duties equal to the difference between the United States price (USP) and the FMV. Interested parties are invited to comment on these preliminary results. Parties who submit argument in this proceeding are requested to submit with the argument (1) a statement of the issue and (2) a brief summary of the argument.

EFFECTIVE DATE: September 19, 1995.

FOR FURTHER INFORMATION CONTACT: Elizabeth Patience or Jean Kemp, Office of Agreements Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone: (202) 482–3793.

SUPPLEMENTARY INFORMATION:

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute and to the Department's regulations are references to the provisions as they existed on December 31, 1994.

Background

On July 9, 1993, the Department published in the **Federal Register** (58 FR 37213) the final affirmative antidumping duty determination on Certain Cut-to-Length Carbon Steel Plate from Sweden, and published an antidumping duty order on August 19, 1993 (58 FR 44168). On August 3, 1994, the Department published the notice of "Opportunity to Request an Administrative Review" of this order for the period February 4, 1993, through July 31, 1994 (59 FR 39543). The Department received a request for an administrative review from Svenskt Stal AB (SSAB). On September 8, 1994 (59 FR 46391), we initiated the administrative review of SSAB.

The Department is now conducting this review in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act). This review covers sales of certain cut-to-length carbon steel plate from Sweden. The POR is February 4, 1993 through July 31, 1994.

Scope of the Review

The products covered by this administrative review constitute one "class or kind" of merchandise: certain cut-to-length carbon steel plate. These products include hot-rolled carbon steel universal mill plates (*i.e.*, flat-rolled products rolled on four faces or in closed box pass, of a width exceeding 150 millimeters but not exceeding 1,250 millimeters and of a thickness of not less than 4 millimeters, not in coils and without patterns in relief), of rectangular shape, neither clad, plated nor coated with metal, whether or not painted, varnished or coated with plastics or other nonmetallic substances; and certain hot-rolled carbon steel flat-rolled products in straight lengths, of rectangular shape, hot rolled, neither clad, plated, nor coated with metal, whether or not painted, varnished, or coated with metal, whether or not painted, varnished, or coated with plastics or other nonmetallic substances, 4.75 millimeters or more in thickness and of a width which exceeds 150 millimeters and measures at least twice the thickness, as currently classifiable in the Harmonized Tariff Schedule (HTS) under item numbers 7208.31.0000, 7208.32.0000, 7208.33.1000, 7208.33.5000, 7208.41.0000, 7208.42.0000, 7208.43.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.11.0000, 7211.12.0000, 7211.21.0000, 7211.22.0045, 7211.90.0000,7212.40.1000, 7212.40.5000, and 7212.50.0000. Included are flat-rolled products of nonrectangular cross-section where such cross-section is achieved subsequent to the rolling process (*i.e.*, products which have been "worked after rolling")—for example, products which have been bevelled or rounded at the edges. Excluded is grade X–70 plate. These HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

Verification

As provided in section 776(b) of the Tariff Act, we verified information provided by the respondent by using standard verification procedures, including onsite inspection of the manufacturer's facilities, the examination of relevant sales and financial records, and selection of original documentation containing relevant information. Our verification results are outlined in the public versions of the verification reports.

United States Price

All of SSAB's U.S. sales were based on the packed price to the first unrelated purchaser in the United States. Because the sales were made prior to importation to the United States, the Department determined that purchase price, as defined in section 772(b) of the Tariff Act, was the appropriate basis for calculating USP. For terms of sale, please see Analysis Memorandum to the File, August 31, 1995. We made deductions from purchase price, where appropriate, for foreign inland freight and insurance, ocean freight, marine insurance, brokerage and handling, port charges, U.S. customs duties and fees, wharfage, and U.S. inland freight.

We used as date of sale the date of contract (if the contract set quantity and value) or, if either price or quantity was not set, the date of order confirmation (the date on which price and quantity are fixed).

We adjusted USP for Swedish value-added taxes (VAT) in accordance with our practice as outlined in recent determinations, including Silicomanganese from Venezuela, Final Determination of Sales at Less Than Fair Value, 59 FR 55435, 55439 (November 7, 1994).

Foreign Market Value

Based on a comparison of the volume of home market and third country sales, we determined that the home market was viable because the amount of similar merchandise sold in the home market is more than five percent of the amount sold to third countries. See 19 CFR 353.48(a). Further, SSAB had sales both to related and unrelated parties in the home market during the POR. In order to determine whether sales to related parties might be appropriate to use as the basis of FMV, the Department compared prices of those sales to prices to unrelated parties, on a model-by-model basis. When possible, the Department used unrelated party sales at the same level of trade as the related party sales for this comparison. When the price ratio of related to unrelated purchases was less than 99.5 percent, we determined that those sales were not arm's length sales and disregarded those sales. See Final Determination of Sales at Less Than Fair Value: Certain Cold-Rolled Carbon Steel Flat Products from Argentina, (58 FR 37062, July 9, 1993).

We used prices to related purchasers only if such sales were made at arm's length as defined above. In addition, we determined that sales made by SSAB through its related distributor, Tibnor AB (TAB), were a significant portion of the home market sales listing. We asked SSAB to report the portion of home market sales made through TAB to the first unrelated customer. SSAB claimed TAB could not identify the supplying producer for sales to unrelated customers. We verified this claim. We also verified that TAB's reported price is set without regard to the supplying producer. We asked SSAB to develop an allocation methodology to account for SSAB sales through TAB to unrelated customers. However, TAB's proposed allocation methodology for reporting the downstream sales is inconsistent with standard accounting principles because it does not consider the impact of purchases from non-SSAB suppliers, it assumes that TAB's beginning inventory was zero, and it assumes that the first plate sold is always SSAB plate. It is also inconsistent with TAB's normal methodology for valuing its inventory. Additionally, at verification, we found that the percentage of TAB purchases of SSAB merchandise is significantly less than respondent's methodology assumes. Therefore, the impact of merchandise sourced from producers other than SSAB is greater than indicated by respondent's methodology. After evaluating the larger percentage of non-SSAB merchandise purchased by TAB, the lack of information regarding

OL

995
MI

non-SSAB purchases, and the inconsistencies with standard accounting practices, we decided not to use respondent's methodology. However, we determined that as the final price to the customer was set regardless of producer, and that TAB accurately reported most of its expenses and adjustments, it was reasonable to use TAB's sales listing. Therefore, we rejected TAB's allocation methodology, revised TAB's reported sales to neutralize the effect of non-SSAB suppliers and used the revised sales listing in our calculations. For more information on our use of SSAB's downstream sales, see Analysis Memorandum to the File, August 31, 1995.

In accordance with 19 CFR 353.58 and 353.55, we compared U.S. sales to home market sales made at the same level of trade, and in comparable commercial quantities, where possible. SSAB reported a number of sales in its home market database in currencies other than the Swedish currency. Company officials explained these are typically sales where the merchandise was shipped to an address in Sweden, as indicated by the destination code of the sale, but customer's invoicing address was not in Sweden. We verified that SSAB properly included these home market sales in its reporting to the Department. Therefore, we included these sales in our calculations.

SSAB had sales of secondary merchandise (non-prime) in the home market; however, there were no sales of secondary merchandise in the U.S. market during the POR. Therefore, as per our established model match criteria, the Department only compared prime merchandise sold in the United States to prime merchandise sold in the home market.

Based on the Department's previous determination of sales made at below the cost of production (COP) in the original LTFV investigation in accordance with section 773(b) of the Tariff Act, we determined that there were reasonable grounds to believe or suspect that, for this review period, SSAB had made sales of subject merchandise in the home market at prices less than the COP. As a result, we investigated whether SSAB sold such or similar merchandise in the home market at prices below the COP over an extended period of time, and whether such sales were made at prices which permitted recovery of all costs within a reasonable period of time in the normal course of trade. In accordance with 19 CFR 353.51(c), we calculated COP for SSAB as the sum of reported materials, labor, factory overhead, and general expenses. We compared COP to home market prices, net of price adjustments, discounts, and movement expenses.

Based upon data collected during verification of SSAB, we recalculated SSAB's general and administrative expenses, after adjusting cost of goods sold for one subsidiary for the effect of inter-company transfers. We also recalculated finance expense using SSAB's consolidated financial statements.

Pursuant to the Department's practice, for each model for which less than 10 percent, by quantity, of the home market sales during the POR were made at prices below COP, we included all sales of that model in the computation of FMV. For each model for which 10 percent or more, but less than 90 percent, of the home market sales during the POR were priced below COP, we excluded from the calculation of FMV those home market sales which were priced below COP, provided that they were made over an extended period of time. For each model for which 90 percent or more of the home market sales during the POR were priced below COP and were made over an extended period of time, we disregarded all sales of that model in our calculation. See Final Determination of Sales at Less Than Fair Value: Certain Carbon Steel Butt-Weld Pipe Fittings from the United Kingdom, (60 FR 10558, February 27, 1995).

In accordance with section 773(b)(1) of the Tariff Act, to determine whether sales below cost had been made over an extended period of time, we compared the number of months in which sales below cost occurred for a particular model to the number of months in which that model was sold. If the model was sold in fewer than three months, we did not disregard below-cost sales unless there were below-cost sales of that model in each month sold. If a model was sold in three or more months, we did not disregard below-cost sales unless there were sales below cost in at least three of the months in which the model was sold. See Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, From Japan and Tapered Roller Bearings, Four Inches or Less in Outside Diameter, and Components Thereof, From Japan; Final Results of Antidumping Duty Administrative Reviews, 58 FR 64720, 64729 (December 8, 1993).

Because SSAB provided no indication that its below-cost sales of models within the "greater than 90 percent" and the "between 10 and 90 percent" categories were at prices that would permit recovery of all costs within a reasonable period of time and in the normal course of trade, we disregarded those sales of models within the "10 to 90 percent" category which were made below cost over an extended period of time.

SSAB did not report COP information for all product models. This affected both the home market and downstream sales listings. For certain of these models, respondent provided a methodology for assigning average costs for similar products. We used their methodology to the extent possible. However, this methodology did not cover all product models with missing COP. We have assigned the highest costs for similar products to the sales of models missing COP information as partial BIA. For more information, see our Analysis Memorandum of August 31, 1995.

In accordance with section 773(b) of the Tariff Act, the Department normally uses the constructed value (CV) of those models for which home market price has been disregarded as below COP. See, e.g., Mechanical Transfer Presses from Japan, Final Results of Antidumping Duty Administrative Review, 59 FR 9958 (March 2, 1994). We did not use CV as FMV for those U.S. models for which we were unable to find a home market match because we found during verification that SSAB had not reported certain home market sales of subject merchandise. We therefore assume that all unmatched sales were the result of this reporting failure. We used a margin based upon BIA only for those unmatched U.S. sales. As BIA, we applied to those sales SSAB's final margin determined in the less-than-fair value (LTFV) investigation. We have determined that resorting to total BIA is not warranted because SSAB's U.S. database is not sufficiently flawed such that the response as a whole is unreliable. *See National Steel Corporation* v. *United States,* 870 F. Supp. 1130, 1135 (CIT 1994).

In accordance with section 773 (a)(1)(A) of the Tariff Act, for those U.S. models for which we were able to find a home market such or similar match, we calculated FMV based on the packed home market sales price to unrelated and related purchasers in the home market. For terms of sale, please see Analysis Memorandum to the File, August 31, 1995.

Pursuant to section 773(a)(4)(B) of the Tariff Act and 19 CFR 353.56(a)(2), we made circumstance of sale adjustments to FMV, where applicable, for credit expenses, handling expense, inland freight, discounts and rebates. Where appropriate, we deducted from FMV home market packing costs and added to FMV packing expenses incurred in Sweden for U.S. sales. We also adjusted FMV, where appropriate, for physical differences in the merchandise, in accordance with 19 CFR 353.57. Due to discrepancies found at verification, reporting errors, and unsupported adjustments, we disallowed and/or recalculated certain expenses and adjustments. See Analysis Memorandum to the File, August 31, 1995 for more information on these disallowed and/or recalculated adjustments.

Preliminary Results of Review

As a result of our comparison of USP to FMV, we preliminarily determine that the following margin exists for the period February 4, 1993, through July 31, 1994:

Manufacturer	Margin (percent)
SSAB	10.96

Interested parties may request disclosure within 5 days of the date of publication of this notice and may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication or the first business day thereafter. Case briefs and/or written comments from interested parties may be submitted no later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 37 days after the date of publication of this notice. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between the USP and FMV may vary from the percentages stated above.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided for by section 751(a)(1) of the Tariff Act. A cash deposit of estimated antidumping duties shall be required on shipments of Certain Cut-to-Length Carbon Steel Plate from Sweden as follows: (1) the cash deposit rate for the reviewed company will be the rate established in the final results of this review; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, or the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) if neither the exporter nor the manufacturer is a firm covered in this review, the cash deposit rate will be 24.23 percent, which is the "all others" rate from the LTFV investigation. See Final Determination of Sales at Less Than Fair Value: Certain Cut-to-Length Carbon Steel Plate from Sweden, (58 FR 37213, July 9, 1993).

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and this notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: September 13, 1995.

Susan G. Esserman,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C.

Docket Number: 95-067. *Applicant:* The Salk Institute for Biological Studies, 10010 North Torrey Pines Road, La Jolla, CA 92037. *Instrument:* DIP-2000 Imaging Plate X-ray Diffraction Image Processor with Kappa-goniometer and SRA M18XHF Rotating Anode X-ray Generator. *Manufacturer:* MAC Science Co., Ltd., Japan. *Intended Use:* The instrument will be used to collect X-ray diffraction data from crystals made with biological macromolecules such as signal transduction, ion conductance, and protein-DNA recognition during the study of proteins such as transducin from bovine eye and potassium channels from rat kidney. *Application Accepted by Commissioner of Customs:* August 1, 1995.

Docket Number: 95–068. *Applicant:* University of California, Department of Nutritional Sciences, 119 Morgan Hall, Berkeley, CA 94720-3104. *Instrument:* Mass Spectrometer, Model JMS-AX505WA. *Manufacturer:* JEOL, Japan. *Intended Use:* The instrument will be used to measure isotope incorporation levels in different metabolites during studies of glucose, fat and protein metabolism in animals and humans. *Application Accepted by Commissioner of Customs:* August 1, 1995.

Docket Number: 95–069. *Applicant:* Saint Barnabas Medical Center, 94 Old Short Hills Road, Livingston, NJ 07039. *Instrument:* Electron Microscope, Model JEM-1210. *Manufacturer:* JEOL, Japan. *Intended Use:* The instrument will be used in several research projects to study ultrastructural features of biomedical research specimens from experimental animals, cultured cells and various tissues from patients with pathological disorders. In addition, the instrument will be used to train pathology residents in the application of the electron microscope. *Application Accepted by Commissioner of Customs:* August 1, 1995.

Docket Number: 95–070. *Applicant:* Rutgers, The State University, Waksman Institute, P.O. Box 6999, Piscataway, NJ 08855-6999. *Instrument:* Cryogenic Cooling System. *Manufacturer:* Oxford Cryosystems, United Kingdom. *Intended Use:* The instrument will be used for X-ray crystallographic studies of proteins with the objective of solving the atomic structure of a subject protein. The instrument will also be used to teach undergraduate courses in crystallography in which students will be trained in the skills necessary to the analysis of protein crystal by means of X-ray Diffraction. *Application Accepted by Commissioner of Customs:* August 4, 1995.

Docket Number: 95–071. *Applicant:* Colorado State University, Natural

Resource Ecology Lab, NESB Building, Fort Collins, CO 80523. *Instrument:* Mass Spectrometer, Model OPTIMA. *Manufacturer:* VG - Fisons, United Kingdom. *Intended Use:* The instrument will be used to measure the isotopic abundance of carbon, nitrogen, hydrogen, and oxygen in plant, soil and air samples in experiments ranging from field studies to laboratory analysis. In addition, the instrument will be used in the course Physiological Plant Ecology and Isotope Biogeochemistry to examine plant and soil processes that modify isotope fractionation. *Application Accepted by Commissioner of Customs:* August 4, 1995.

Frank W. Creel

Director, Statutory Import Programs Staff

BILLING CODE 3510-DS-F

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C.

Docket Number: 95–072. *Applicant:* University of Michigan, Department of Geological Sciences, 425 E. University, Ann Arbor, MI 48109-1063. *Instrument:* ICP Multicollector Mass Spectrometer, Model Plasma 54. *Manufacturer:* Fisons Elemental, United Kingdom. *Intended Use:* The instrument will be used in experiments that consist of extracting and purifying elements of interest and measuring their isotopic compositions, with or without enriched spikes to measure concentrations. In addition, the instrument will be used for training purposes in relevant geochemistry courses. *Application Accepted by Commissioner of Customs:* August 11, 1995.

Docket Number: 95–073. *Applicant:* Texas A&M University, College Station, TX 77843. *Instrument:* Automatic Carbonate Preparation Device, Model Kiel II. *Manufacturer:* Finnigan MAT, Germany. *Intended Use:* The instrument is an accessory to an existing mass spectrometer that will be used to provide the means for measuring the stable oxygen and carbon isotopic ratios of very small, individually reacted carbonate mineral samples under study. The instrument will also be used to collect data for classroom teaching and M.S. and Ph.D. thesis. *Application Accepted by Commissioner of Customs:* August 11, 1995.

Docket Number: 95–074. *Applicant:* University of South Florida, Marine Science Department, MSL 119, 830 1st Street South, St. Petersburg, FL 33701. *Instrument:* Fluorimeter, Model Aquatraka MKIII. *Manufacturer:* Chelsea Instruments Ltd., United Kingdom. *Intended Use:* The instrument will be used to measure chlorophyll *a* fluorescence in aquatic environments in a study of the plant plankton in the Caribbean Sea. part of a larger effort to identify and analyze the biological/chemical constituents of marine waters in the Caribbean Sea. In addition, the instrument will be used for educational purposes in the course Remote Sensing in Oceanography. *Application Accepted by Commissioner of Customs:* August 16, 1995.

Docket Number: 95–075. *Applicant:* Georgetown University, 37th and "O" Streets, NW, Washington, DC 20057. *Instrument:* Time-Correlated Single Photon Counting Spectrometer, Model FL900. *Manufacturer:* Edinburgh Instruments, Ltd., United Kingdom. *Intended Use:* The instrument will be used to monitor the excited state lifetime of organic and polymeric molecules by their emissive properties during the study of basic and exotic polymers, gels, liquid crystals, crystals and other materials. The objective of the studies is to characterize the environment in which molecules in the above phases are located. In addition, the instrument will be used for training graduate and undergraduate students to characterize materials of significance. *Application Accepted by Commissioner of Customs:* August 25, 1995.

Docket Number: 95–076. *Applicant:* University of Michigan, 1028 College of Pharmacy, 428 Church Street, Ann Arbor, MI 48109-1065. *Instrument:* Stopped-flow Spectrometer System, Model SF-61AFX. *Manufacturer:* Hi-Tech Scientific, United Kingdom. *Intended Use:* The instrument will be used to study rapid reaction kinetics over the millisecond time scale in experiments involving purification of the enzymes from either bovine lung (guanylate cyclase) or a macrophage cell line (nitric oxide synthase). *Application Accepted by Commissioner of Customs:* August 25, 1995.

Docket Number: 95–077. *Applicant:* Shriners Hospital - Spokane Unit, 911 West Fifth Avenue, Spokane, WA 99204-2472. *Instrument:* 3-Dimensional Motion Analyser System, Model VICON 370. *Manufacturer:* Oxford Metrics, Ltd., United Kingdom. *Intended Use:* The instrument will be used to study the gait cycle/walking patterns, muscle activity and various motions of human subjects. The analysis of this data will then be used in aiding the physicians and therapists in determining the needs of the patient (i.e. continuing therapy, a change in therapy, surgery, etc.). *Application Accepted by Commissioner of Customs:* August 29, 1995.

Docket Number: 95–079. *Applicant:* University of California, Department of Pharmaceutical Chemistry, San Francisco, CA 94143-0446. *Instrument:* Tandem Mass Spectrometer, Model AUTOSPEC - 5000. *Manufacturer:* Fisons Instruments, United Kingdom. *Intended Use:* The instrument will be used for studies of the macromolecular components of normal human and tumor cells and bacterial and viral human pathogens in the context of correlations between cell phenotype and genotype. Overall research purposes will emphasize interdisciplinary studies addressing key unsolved structural issues revolving around the delineation of protein sequence and covalent modification, protein glycosylation, peptide antigens, glycolipid antigens and xenobiotic protein and DNA covalent adducts. In addition, the instrument will be used for educational purposes in the course Pharmaceutical Chemistry 235: Mass Spectrometry in the Health and Life Sciences. *Application Accepted by Commissioner of Customs:* August 29, 1995.

Docket Number: 95–080. *Applicant:* Santa Rosa Outpatient Rehab, 4319 Medical Drive, San Antonio, TX 78229-4899. *Instrument:* 3-Dimensional Motion Analyser System, Model VICON 370. *Manufacturer:* Oxford Metrics, Ltd., United Kingdom. *Intended Use:* The instrument will be used for the study of the walking patterns (i.e. gait) of human subjects, to provide precise information on muscle activity, joint motion, and the forces acting at the joint at different points of human gait or various motions. *Application Accepted by Commissioner of Customs:* August 29, 1995.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-F

University of Pennsylvania, Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket Number: 95–030. *Applicant:* University of Pennsylvania, Philadelphia, PA 19104. *Instrument:* Olfactometer, Transformation Unit and Compressor-Vacuum-Unit, Model OM/4. *Manufacturer:* Heinrich Burghart, Germany. *Intended Use:* See notice at 60 FR 29826, June 6, 1995.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. *Reasons:* The foreign instrument provides: (1) filtered and humidified pulsed odor/air stimuli, (2) controlled stimulus duration between 50ms and infinity, and (3) thermostabilized odorant flow with manual or external triggering. The National Institutes of Health advises in its memorandum dated July 11, 1995 that (1) these capabilities are pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510–DS–F

National Oceanic and Atmospheric Administration

Monterey Bay National Marine Sanctuary Advisory Council; Meeting

AGENCY: Sanctuaries and Reserves Division (SRD), Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Monterey Bay National Marine Sanctuary Advisory Council Open Meeting.

SUMMARY: The Advisory Council was established in December 1993 to advise NOAA's Sanctuaries and Reserve Division regarding the management of the Monterey Bay National Marine Sanctuary. The Advisory Council was convened under the National Marine Sanctuaries Act.

TIME AND PLACE: Friday, September 29, 1995, from 8:30 until 4:30. The meeting will be held at the Moss Landing Chamber of Commerce, Moss Landing, California.

AGENDA: General issues related to the Monterey Bay National Marine Sanctuary are expected to be discussed, including an update from the Sanctuary Manager, reports from the working groups, an update on the Sanctuary license plate marketing program, and discussions about the establishment of a Sanctuary Foundation and proposed central valley water reclamation projects.

PUBLIC PARTICIPATION: The meeting will be open to the public. Seats will be available on a first-come, first-served basis.

FOR FURTHER INFORMATION CONTACT: Jane Delay at (408) 647–4246 or Elizabeth Moore at (301) 713–3141.

Federal Domestic Assistance Catalog Number 11.429

Marine Sanctuary Program

Dated: September 12, 1995.

David L. Evans,

Acting Deputy Assistant Administrator for Ocean Services and Coastal Zone Management.

BILLING CODE 3510–08–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Ballistic Missile Defense Advisory Committee; Meeting

ACTION: Notice of Advisory Committee Meeting.

SUMMARY: The Ballistic Missile Defense (BMD) Advisory Committee will meet in closed session in Washington, D.C., on October 5–6, 1995.

The mission of the BMD Advisory Committee is to advise the Secretary of Defense and Deputy Secretary of Defense, through the Under Secretary of Defense (Acquisition and Technology), on all matters relating to BMD acquisition, system development, and technology.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Public Law No. 92–463, as amended by 5 U.S.C., Appendix II, it is hereby determined that this BMD Advisory-Committee meeting concerns matters listed in 5 U.S.C., 552b(c)(1), and that accordingly this meeting will be closed to the public.

Dated: September 14, 1995.

Linda M. Bynum,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000–04–M

Department of the Army

Meeting of the Industry/Government Working Group for Performance Criteria of Military Clothing and Equipment

AGENCY: U.S. Army Soldier Systems Command, DoD.

ACTION: Meeting announcement.

SUMMARY: The Industry/Government Working Group for Performance Criteria of Military Clothing and Equipment will meet on Wednesday, 25 October 1995 in the Conference Center at the Soldier Systems Command, Natick Research, Development and Engineering Center, Natick, MA. The meeting will be devoted to Comfort, Durability, and Protection Performance Criteria subgroup activities.

The purpose of the Industry/Government Working Group is to identify performance criteria and test methodology that will be used to measure comfort, durability, and protection performance of military clothing and individual equipment. The U.S. Army is interested in consumer and market research data in the areas of comfort, durability, and flame resistance of fabrics, clothing and equipment, as well as related test methods, standards, specifications, or handbooks.

FOR FURTHER INFORMATION CONTACT: Carole A. Faria, Textile Technologist, at (508) 651–5460.

Dated: September 18, 1995.

Carole A. Faria,

Textile Technologist.

BILLING CODE 3710–08–M

Defense Information Systems Agency

Membership of the Defense Information Systems Agency Senior Executive Service (SES) Performance Review Board (PRB)

AGENCY: Defense Information System Agency.

ACTION: Notice of Membership of the Defense Information Systems Agency Performance Review Board.

SUMMARY: This notice announces the appointment of the members of the Performance Review Board of the Defense Information Systems Agency. The publication of membership is required by 5 U.S.C. 4314(c)(4).

The Performance Review Board provides fair and impartial review of Senior Executive Service performance appraisals and makes recommendations regarding performance ratings and performance awards to the Director, DISA.

EFFECTIVE DATE: August 14, 1995.

FOR FURTHER INFORMATION CONTACT: Ms. Carrie K. Bazemore, SES Program Manager, Civilian Personnel Division, Personnel and Administration Directorate, Defense Information Systems Agency (703) 607–4411.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 4314(c)(4), the following are names and titles of the executives who have been appointed to serve as members of the SES Performance Review Board. They will serve a one-year renewable term, effective 14 August 1995.

Slawson, Michael F., Deputy Director, Personnel and Administration
Neill, Louise T., Deputy Director for Procurement and Logistics
Fountaine, D. Diane, Deputy Manager, National Communication Systems
Gauss, John, RADM, USN, Deputy Director for Engineering and Interoperability
Mestrovich, Michael, Dr., Deputy Director for Enterprise Integration

William McAlpin,

Lieutenant Colonel, USA, Acting Chief, Civilian Personnel.

BILLING CODE 3610–05–M

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Information Resources Group, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before November 20, 1995.

ADDRESSES: Written comments and requests for copies of the proposed information collection requests should be addressed to Patrick J. Sherrill, Department of Education, 600 Independence Avenue SW., Room 5624, Regional Office Building 3, Washington, DC 20202–4651, or should be electronic mailed to the internet address #FIRB@ed.gov, or should be faxed to 202–708–9346.

FOR FURTHER INFORMATION CONTACT: Patick J. Sherrill (202) 708–8196. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Department of Education (ED) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The Office of Management and Budget (OMB) may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Director of the Information Resources Group, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. ED invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department, (2) will this information be processed and used in a timely manner, (3) is the estimate of burden accurate, (4) how might the Department enhance the quality, utility, and clarity of the information to be collected, and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: September 13, 1995.

Gloria Parker,

Director, Information Resources Group.

Office of Postsecondary Education

Type of Review: Revision
Title: Reporting and Recordkeeping requirements for the William D. Ford Federal Direct Loan Program
Frequency: Varies by Section
Affected Public: Individuals or households
Reporting Burden:
  Responses: 6,394,992
  Burden Hours: 1,990, 713
Recordkeeping Burden:
  Recordkeepers: 0
  Burden Hours: 0
Abstract: The proposed rules require collection activities that enable the Secretary to determine borrower eligibility and repayment schedules for Direct Loans.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EG95–79–000, et al.]

Brooklyn Navy Yard Cogeneration Partners, L.P., et al.; Electric Rate and Corporate Regulation Filings

September 12, 1995.

Take notice that the following filings have been made with the Commission:

1. Brooklyn Navy Yard Cogeneration Partners, L.P.

[Docket No. EG95–79–000]

On August 16, 1995, Brooklyn Navy Yard Cogeneration Partners, L.P., 366 Madison Avenue, Suite 1103, New York, New York 10017, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Section 32(a)(1) of the Public Utility Holding Company Act of 1935, as amended by section 711 of the Energy Policy Act of 1992.

The applicant is a corporation that will be engaged directly and exclusively in owning and operating an eligible facility under construction in Brooklyn, New York. The facility will consist of a 315 MW (net) topping-cycle cogeneration facility fueled primarily by natural gas. The facility will include such interconnection components as are necessary to interconnect the facility with the facilities of the applicant's wholesale customers.

Comment date: October 3, 1995, in accordance with Standard Paragraph E

at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

2. Pennsylvania Power & Light Company

[Docket No. ER95–1267–000]

Take notice that on August 31, 1995, Pennsylvania Power & Light Company (PP&L), tendered for filing supplemental information with respect to its adoption of certain accounting methods in compliance with the Commission's Statement of Policy issued December 17, 1993, in Docket No. PL93–1–000, *Post-Employment Benefits Other Than Pensions,* 61 FERC ¶ 61,330 (1992), *order on reh'g,* 65 FERC ¶ 61,035 (1993) concerning the treatment of post-retirement benefits other than pensions (PBOPs).

Comment date: September 27, 1995, in accordance with Standard Paragraph E at the end of this notice.

3. Pacific Gas and Electric Company

[Docket No. ER95–1338–000]

Take notice that on August 30, 1995, Pacific Gas and Electric Company (PG&E), tendered for filing an amendment to its July 3, 1995 filing in this docket of a rate change to Rate Schedule FERC No. 149 between PG&E and Lassen Municipal Utility District (Lassen). On July 3, 1995 PG&E submitted the following amendments to the September 22, 1993 Power and Transmission Services Agreement (Agreement) between Lassen and PG&E: 1) a First Amendment to the Agreement (First Amendment); 2) a revised Appendix A—Rates (Revised Appendix A) to the Agreement; and 3) a February 3, 1995 Letter Agreement that establishes the Power Service Demand rate under the Agreement.

At the request of the Commission Staff, PG&E is submitting revised cost support and workpapers to aid the Commission's review of the proposed rate change.

Copies of this filing have been served upon Lassen and the California Public Utilities Commission.

Comment date: September 27, 1995, in accordance with Standard Paragraph E at the end of this notice.

4. The Washington Water Power Company

[Docket No. ER95–1683–000]

Take notice that on September 1, 1995, The Washington Water Power Company (WWP), tendered for filing with the Federal Energy Regulatory Commission pursuant to 18 CFR 35.11 and 35.12a Transmission Service Agreement between WWP and Vaagen Brothers Lumber, Inc. WWP requests waiver of the prior notice requirement and requests an effective time and date of 0001 hours, September 1, 1995.

Comment date: September 27, 1995, in accordance with Standard Paragraph E at the end of this notice.

5. Florida Power & Light Company

[Docket No. ER95–1695–000]

Take notice that on September 5, 1995, Florida Power & Light Company (FPL), tendered for filing a proposed Service Agreement with MidCon Power Services Corp. for transmission service under FPL's Transmission Tariff No. 3.

FPL requests that the proposed Service Agreement be permitted to become effective on September 11, 1995, or as soon thereafter as practicable.

FPL states that this filing is in accordance with Part 35 of the Commission's Regulations.

Comment date: September 27 1995, in accordance with Standard Paragraph E at the end of this notice.

6. Northeast Utilities Service Company

[Docket No. ER95–1696–000]

Take notice that on September 5, 1995, Northeast Utilities Service Company (NU), tendered for filing a new Sale for Resale Tariff No. 7, which provides for wholesale sales by the NU System Companies to customers located outside of New England at market-based rates. NU is requesting an effective date of November 4, 1995.

Comment date: September 27, 1995, in accordance with Standard Paragraph E at the end of this notice.

7. Green Mountain Power Corporation

[Docket No. ER95–1697–000]

Take notice that on September 5, 1995, Green Mountain Power Corporation (GMP), tendered for filing an executed Service Agreement dated September 1, 1995 pursuant to which it has agreed to sell capacity and energy to LGE Power Marketing (LGE) in accordance with the terms and conditions of GMP's FERC Electric Tariff, Original Volume No. 2, and a Certificate of Concurrence to the filing by LGE. GMP has requested that the Commission waive its notice requirements in order to make the Service Agreement and Certificate of Concurrence effective as of September 6, 1995.

Comment date: September 27, 1995, in accordance with Standard Paragraph E at the end of this notice.

8. Pennsylvania Power & Light Company

[Docket No. ER95–1698–000]

Take notice that on September 5, 1995, Pennsylvania Power & Light Company (PP&L), tendered for filing with the Federal Energy Regulatory Commission four Service Agreements (the Agreements) between PP&L and (1) North American Energy Conservation, Inc., dated August 1, 1995; (2) Rainbow Energy Marketing Corp., dated August 11, 1995; (3) Phibro Inc., dated August 23, 1995; and (4) KCS Power Marketing, Inc., dated August 23, 1995.

The Agreements supplement a Short Term Capacity and Energy Sales umbrella tariff approved by the Commission in Docket No. ER95–782–000 on June 21, 1995.

In accordance with the policy announced in *Prior Notice and Filing Requirements Under Part II of the Federal Power Act,* 64 FERC ¶ 61,139, *clarified and reh'g granted in part and denied in part,* 65 FERC ¶ 61,081 (1993). PP&L requests the Commission to make the Agreement effective as of the date of execution of each, because service will be provided under an umbrella tariff and each service agreement is filed within 30 days after the commencement of service. In accordance with 18 CFR 35.11, PP&L has requested waiver of the sixty-day notice period in 18 CFR 35.3(e). PP&L has also requested waiver of certain filing requirements for information previously filed with the Commission in Docket No. ER95–782–000.

PP&L states that a copy of its filing was provided to the customers involved and to the Pennsylvania Public Utility Commission.

Comment date: September 27, 1995, in accordance with Standard Paragraph E at the end of this notice.

9. Florida Power & Light Company

[Docket No. ER95–1699–000]

Take notice that on September 5, 1995, Florida Power & Light Company (FPL), tendered for filing proposed service agreements with NorAm Energy Services, Inc. for transmission service under FPL's Transmission Tariff No. 2 and FPL's Transmission Tariff No. 3.

FPL requests that the proposed service agreements be permitted to become effective on September 11, 1995, or as soon thereafter as practicable.

FPL states that this filing is in accordance with Part 35 of the Commission's regulations.

Comment date: September 27, 1995, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 95–23201 Filed 9–18–95; 8:45 am]

BILLING CODE 6717–01–P

[Docket No. CP85–221–051]

Frontier Gas Storage Co.; Notice of Sale Pursuant to Settlement Agreement

September 13, 1995.

Take notice that on September 7, 1995, Frontier Gas Storage Company (Frontier), c/o Reid & Priest, Market Square, 701 Pennsylvania Avenue, NW., Suite 800, Washington, D.C. 20004, in compliance with the provisions of the Commission's February 13, 1985, Order in Docket No. CP82–487–000, *et al.*, submitted an executed Service Agreement under Rate Schedule LVS–1 providing for the possible sale of up to a daily quantity of 50,000 MMBtu, not to exceed 5 Bcf for the term of the Agreement, of Frontier's gas storage inventory on an "as metered" basis to Western Gas Resources, Inc.

Under Subpart (b) of Ordering Paragraph (F) of the Commission's February 13, 1985, Order, Frontier is "authorized to commence the sale of its inventory under such an executed service agreement fourteen days after filing the agreement with the Commission, and may continue making such sale unless the Commission issues an order either requiring Frontier to stop selling and setting the matter for hearing or permitting the sale to continue and establishing other procedures for resolving the matter."

Any person desiring to be heard or to make a protest with reference to said filing should within 10 days of the publication of such notice in the **Federal Register**, file with the Federal Energy Regulatory Commission (825 North Capitol Street NE., Washington, D.C. 20426) a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedures, 18 CFR 385.214 or 385.211. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. MG88–47–007]

Texas Gas Transmission Corporation; Notice of Filing

September 13, 1995.

Take notice that on September 7, 1995, Texas Gas Transmission Corporation (Texas Gas) submitted revised standards of conduct under Order Nos. 497 *et seq.*[1] and Order Nos. 566 *et seq.*[2] Texas Gas states that it is revising its standards of conduct to incorporate the changes required by Order Nos. 566 and 566–A. The modifications also reflect changes to Texas Gas's list of marketing affiliates and changes to its list of shared Directors.

Texas Gas states that copies of this filing have been mailed to all parties on the official service list compiled by the Secretary in this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211 or 385.214). All such motions to intervene or protest should be filed on or before September 28, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

Office of Hearings and Appeals

Proposed Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of proposed implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals (OHA) of the Department of Energy announces the proposed procedures for disbursement of $4,567,399.72 (plus accrued interest) in alleged or adjudicated crude oil overcharges obtained by the DOE from Malcolm Turner (Case No. VEF–0013), Revere Petroleum Corporation (Case No. VEF–0014), Granite Petroleum Corporation (Case No. VEF–0015), and Dalco Petroleum Corporation (Case No. VEF–0016). The OHA has tentatively determined that the funds obtained from these firms, plus accrued interest, be distributed in accordance with the DOE's Modified Statement of Restitutionary Policy in Crude Oil Cases, 51 Fed. Reg. 27899 (August 4, 1986).

DATE AND ADDRESSES: Comments must be filed in duplicate on or before October 19, 1995, and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, D.C. 20585. All comments should conspicuously display a reference to Case Nos. VEF–0013, *et al.*

FOR FURTHER INFORMATION CONTACT: Richard W. Dugan, Associate Director, Office of Hearings and Appeals, 1000 Independence Avenue SW.,

Washington, D.C. 20585, (202) 586–2860.

SUPPLEMENTARY INFORMATION: In accordance with 10 C.F.R. 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set forth below. The Proposed Decision and Order sets forth the procedures that the DOE has tentatively formulated to distribute a total of $4,567,399.72, plus accrued interest, remitted to the DOE by Malcolm Turner, Revere Petroleum Corporation, Granite Petroleum Corporation and Dalco Petroleum Corporation. The DOE is currently holding these funds in interest bearing escrow accounts pending distribution.

The OHA proposes to distribute these funds in accordance with the DOE's Modified Statement of Restitutionary Policy in Crude Oil Cases, 51 FR 27899 (August 4, 1986) (the MSRP). Under the MSRP, crude oil overcharge monies are divided among the federal government, the states, and injured purchasers of refined petroleum products. Refunds to the states will be distributed in proportion to each state's consumption of petroleum products during the price control period. Refunds to eligible purchasers will be based on the volume of petroleum products that they purchased and the extent to which they can demonstrate injury.

Because the June 30, 1995, deadline for crude oil refund applications has passed, we propose not to accept any new applications from purchasers of refined petroleum products for these funds. As we state in the Proposed Decision, any party who has previously submitted a refund application in the crude oil refund proceeding should not file another Application for Refund. The previously filed crude oil application will be deemed filed in all crude oil proceedings as the proceedings are finalized.

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice in the **Federal Register**, and should be sent to the address set forth at the beginning of this notice. All comments received in these proceedings will be available for public inspection between the hours of 1:00 p.m. to 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E–234, 1000 Independence Avenue SW., Washington, D.C. 20585.

Dated: September 13, 1995.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

Names of Firms:
  Malcolm M. Turner
  Revere Petroleum Corporation *et al.*
  Granite Petroleum Corporation
  Dalco Petroleum Corporation
Dates of Filing:
  April 10, 1995
  April 10, 1995
  April 10, 1995
  May 2, 1995
Case Numbers:
  VEF–0013
  VEF–0014
  VEF–0015
  VEF–0016

September 13, 1995.

In accordance with the procedural regulations of the Department of Energy (DOE), 10 CFR Part 205, Subpart V, the Office of General Counsel, Regulatory Litigation (OGC) (formerly the Economic Regulatory Administration (ERA), Office of Enforcement Litigation), filed four Petitions for the Implementation of Special Refund Procedures with the Office of Hearings and Appeals (OHA) on April 10, 1995, and May 2, 1995. The Petitions request that OHA formulate and implement procedures to distribute funds received by the DOE from Malcolm M. Turner (Turner), Revere Petroleum Corporation (Revere), Granite Petroleum Corporation (Granite), and Dalco Petroleum Corporation (Dalco), pursuant to court-approved settlements between the parties and the DOE, DOE consent orders or remedial orders. This Decision and Order sets forth the OHA's plan to distribute these funds.

I. Background

As indicated by the following summaries of the relevant enforcement proceedings, all of the funds that are subject to this Decision were obtained through enforcement actions involving alleged or adjudicated crude oil overcharges.

A. Malcolm Turner

Turner, the sole Director and President of Bayport Refining Co. (Bayport), was a reseller of crude oil during the period of petroleum price controls and was subject to regulations governing the pricing and allocation of crude oil set forth at 10 CFR Parts 211 and 212 of the Mandatory Petroleum Price and Allocation Regulations. As the result of an ERA audit of Turner's and Bayport's operations, the ERA issued a Proposed Remedial Order (PRO) on September 20, 1984, alleging that they violated the provisions of 10 CFR § 212.186, by charging prices for crude oil in excess of actual purchase prices without providing any service or other function traditionally and historically associated with the resale of crude oil during the period from September 1978 through December 1980. According to the PRO, those transactions resulted in overcharges amounting to $11,810,639.84. The PRO further alleged that during the period from December 1979 through December 1980, the Respondents violated the provisions of 10 CFR § 212.131 by the miscertification of crude oil. According to the PRO, those transactions resulted in overcharges amounting to $12,554,371.74. The OHA in large part affirmed the findings of the PRO and issued a Remedial Order (RO) to the Respondents on February 16, 1989. *Bayport Refining Co.*, 18 DOE ¶ 83,007, (1989). The RO was upheld by the Federal Energy Regulatory Commission (FERC) on October 4, 1993. *Bayport Refining Company and Malcolm M. Turner*, 65 FERC ¶ 61,021 (1993). Turner appealed to the United States District Court for the Northern District of Texas on March 31, 1994.[1] In January 1995, the court entered an Agreed Judgment resolving the issues addressed by the RO against Turner. Pursuant to the Agreed Judgment, Turner agreed to pay to the DOE the sum of $65,000. Turner has fulfilled his financial obligation to the DOE. As of May 31, 1995, the Bayport Consent Order fund contained $65,000 in principal plus accrued interest.[2]

B. Revere Petroleum Corp.

During the period of Federal petroleum price controls, Revere was engaged in crude oil reselling.[3] The firm was therefore subject to regulations governing the pricing of crude oil set forth at 10 CFR Parts 205, 210, 211, and 212 of the Mandatory Petroleum Price and Allocation Regulations. As a result of an ERA investigation of Revere's compliance with the price and allocation regulations, the ERA issued a PRO to Revere on January 18, 1983. However, on August 9, 1983, that PRO was amended by the ERA to include additional violations of 10 CFR § 212.186, alternative violations of 10 CFR § 212.183, and five additional parties as co-respondents of the PRO.[4] On May 29, 1992, the OHA issued the Amended PRO, with modifications, as an RO. *Revere Petroleum Corp.*, 22 DOE ¶ 83,004 (1992). The RO found Revere liable for violations of 10 CFR § 212.186 in connection with its resales of crude oil during the period April 1979 through March 1980. Revere appealed to FERC (Case No;. R092–4–00). However, subsequently, this enforcement proceeding was settled when Revere and DOE entered into a settlement on an ability-to-pay basis in order to resolve DOE's claims against the firm. Revere agreed to pay the DOE the sum of $50,000.00, plus a percentage of the proceeds of Revere's asset liquidation. As of May 31, 1995, Revere and the other respondents have paid to the DOE the sum of $1,310,140.13 in satisfaction of their obligations.[5] Although additional revenues may be collected, no good reason exists to delay implementing distribution of the current balance of the fund.

---

[1] Bayport, which was dissolved in November 1982, did not appeal the RO. While the matter was referred for enforcement of the RO against Bayport, no funds were ever collected from the corporation.

[2] The funds submitted by Turner pursuant to the Agreed Judgment are deposited in the Bayport Consent Order fund, No. 6AOX00329.

[3] References to Revere in this Decision include Richard E. Dobyns, President of Revere, during the price control period.

[4] Those five individuals were James J. Cross, M. Kemp McMillan, Gordon K. Walz, and Milton E. Walz, who entered into a separate Consent Order with the DOE in December 1987, and John E. Woolsey, who entered into a separate Consent Order with the DOE in September 1986.

C. Granite Petroleum Corporation

Granite engaged in the reselling and marketing of crude oil during the period of petroleum price controls. The firm was therefore subject to regulations governing the pricing and allocation of crude oil set forth at 10 CFR Parts 211 and 212 of the Mandatory Petroleum Price and Allocation Regulations. The ERA conducted a detailed audit to determine Granite's compliance with the federal petroleum price and allocation regulations during the period from September 1, 1979 through January 27, 1981. As a result of the audit, on March 4, 1983, the ERA issued a PRO to the firm alleging violations of the crude oil price and allocation regulations (Case No. 640X00447). In September 1983, Granite and the DOE entered into a Consent Order which resolved a number of outstanding enforcement issues involving Granite. Under the terms of the settlement, Granite agreed to pay $200,000 in installment payments to the DOE.[6] As of May 31, 1995, Granite has paid to the DOE the sum of $176,698.85. Granite is currently delinquent in its payments to the DOE. Although we anticipate that additional sums may be collected from Granite, no good reason exists to forestall distribution of the current balance of the fund.

D. Dalco Petroleum Corporation

Dalco[7] was a reseller of crude oil during the period of price controls and was subject to regulations governing the pricing and allocation of crude oil set forth at 10 CFR Parts 211 and 212 of the Mandatory Petroleum Price and Allocation Regulations. As the result of an ERA audit, the ERA issued a PRO to Dalco on April 30, 1982, alleging that between March 1976 and September 1978, Dalco violated the DOE mandatory petroleum price regulations which governed the resale of domestic crude oil, pursuant to 10 CFR §§ 212.93, 212.10, 212.131, 205.202, 210.62(c), and 212.185, resulting in the illegal receipt of revenues. After the issuance of the PRO, but before a Statement of Objections was filed, Dalco filed for bankruptcy.[8] In August 1983, the Bankruptcy Court for the Northern District of Oklahoma issued an injunction which stayed the enforcement proceeding against the respondents. The bankruptcy court ultimately approved and allowed the DOE's claims against Dalco and as of May 31, 1995, Dalco has paid $3,015,560.74 to the DOE. Although the possibility exists that additional revenues will be obtained by the DOE in the Dalco bankruptcy proceeding, no reason exists to delay in implementing distribution of the current balance of the funds.[9]

II. Jurisdiction and Authority

The Subpart V regulations set forth general guidelines which may be used by the OHA in formulating and implementing a plan of distribution of fund received as a result of an enforcement proceeding. The DOE policy is to use the Subpart V process to distribute such funds. For a more detailed discussion of Subpart V and the authority of the OHA to fashion procedures to distribute refunds, *see Petroleum Overcharge Distribution and Restitution Act of 1986*, 15 U.S.C. §§ 4501 et seq.; *see also Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981).

We have considered the OGC's petitions that we implement Subpart V proceedings with respect to the Turner, Revere, Granite and Dalco funds and have determined that such proceedings are appropriate. This Proposed Decision and Order sets forth the OHA's tentative plan to distribute these funds. Before taking the actions proposed in this Decision, we intend to publicize our proposal and solicit comments from interested parties. Comments regarding the tentative distribution process set forth in this Proposed Decision and Order should be filed with the OHA within 30 days of its publication in the **Federal Register**.

III. Proposed Refund Procedures

A. Crude Oil Refund Policy

We propose to distribute the monies remitted pursuant to the Turner, Revere, Granite, and Dalco enforcement proceedings in accordance with DOE's Modified Statement of Restitutionary Policy in Crude Oil Cases (MSRP), 51 FR 27899 (August 4, 1986), which was issued as a result of the Settlement Agreement approved by the court in *The Department of Energy Stripper Well Exemption Litigation*, 653 F. Supp. 108 (D. Kan. 1986). Shortly after the issuance of the MSRP, the OHA issued an Order that announced that this policy would be applied in all Subpart V proceedings involving alleged crude oil violations. Order Implementing the MSRP, 51 FR 29689 (August 20, 1986) (the August 1986 Order).

Under the MSRP, 40 percent of crude oil overcharge funds will be disbursed to the federal government, another 40 percent to the states, and up to 20 percent may initially be reserved for the payment of claims to injured parties. The MSRP also specified that any funds remaining after all valid claims by injured purchasers are paid will be disbursed to the federal government and the states in equal amounts.

In April 1987, the OHA issued a Notice analyzing the numerous comments received in response to the August 1986 Order. 52 FR 11737 (April 10, 1987) (April 10 Notice). This Notice provided guidance to claimants that anticipated filing refund applications for crude oil monies under the Subpart V regulations. In general, we stated that all claimants would be required to (1) document their purchase volumes of petroleum products during the August 19, 1973 through January 27, 1981 crude oil price control period, and (2) prove that they were injured by the alleged crude oil overcharges. Applicants who were end-users or ultimate consumers of petroleum products, whose businesses are unrelated to the petroleum industry, and who were not subject to the DOE price regulations would be presumed to have been injured by any alleged crude oil overcharges. In order to receive a refund, end-users would not need to submit any further evidence of injury beyond the volume of petroleum products purchased during the period of price controls. *See City of Columbus Georgia*, 16 DOE ¶ 85,550 (1987).

The amount of money subject to this Proposed Decision is $4,567,399.72, plus accrued interest. In accordance with the MSRP, we propose initially to reserve 20 percent of those funds ($913,479.94 plus accrued interest) for direct refunds to applicants who claim that they were injured by crude oil overcharges. We propose to base refunds to claimants on a volumetric amount which has been calculated in accordance with the description in the April 10 Notice. That volumetric refund amount is currently $0.0016 per gallon. *See* 60 FR 15562 (March 24, 1995).

Applicants who have executed and submitted a valid waiver pursuant to one of the escrows established by the Stripper Well Settlement Agreement have waived their rights to apply for a crude oil refund under Subpart V. *See Mid-America Dairyman Inc.* v. *Herrington*, 878 F.2d 1448, 3 Fed. Energy Guidelines ¶ 26,617 (Temp. Emer. Ct. App. 1989); *In re Department of Energy Stripper Well Exemption Litigation*, 707 F. Supp. 1267, 3 Fed. Energy Guidelines ¶ 26,613 (D. Kan. 1987). Because the June 30, 1995, deadline for crude oil refund applications has passed, we propose not to accept any new applications from purchasers of refined petroleum products for these funds. *See Western Asphalt Service, Inc.*, 25 DOE ¶ ________, LEF–0047 (July 17, 1995). Instead, these funds will be added to the general crude oil overcharge pool used for direct restitution.[10]

B. Payments to the States and Federal Government

Under the terms of the MSRP, the remaining 80 percent of the alleged crude oil violation amounts subject to this Proposed Decision, or $3,653,919.78 plus accrued interest, should be disbursed in equal shares to the states and federal government, for indirect restitution. Refunds to the states will be in proportion to the consumption of petroleum products in each state during the period of price controls. The share of ratio of the funds which each state will receive is contained in Exhibit H of the Stripper Well Settlement Agreement. When disbursed, these funds will be subject to the same limitations and reporting requirements as all other crude oil monies received by the states under the Stripper Well Agreement.

It Is Therefore Ordered That

The refund amounts remitted to the Department of Energy by Malcolm M. Turner, Revere Petroleum Corporation, Granite Petroleum Corporation, and Dalco Petroleum Corporation pursuant to their respective settlement agreements or judgments will be distributed in accordance with the foregoing Decision.

[FR Doc. 95–23230 Filed 9–18–95; 8:45 am]

BILLING CODE 6450–01–P

---

[5] Revere and all of the named individuals except Woolsey have satisfied their obligations to the DOE. Although Woolsey has made substantial payments to the DOE, he is delinquent in his payments, and the possibility exists that additional funds will be paid by him.

[6] Granite Petroleum Corporation and John E. Woolsey, President of Granite, are collectively referred to as Granite in the text. Both were parties to the Consent Order.

[7] References to Dalco in this Decision include W. Darryl Zang and Louis Porter, the firm's owners.

[8] Zang, Porter and Dalco filed for bankruptcy on August 16, 1982, June 15, 1983, and July 20, 1983 respectively.

[9] Porter has satisfied his obligations to the DOE under the PRO. Additional funds may be collected from the Dalco and Zang estates.

[10] A crude oil refund application is only required to submit one application for its share of all available crude oil overcharge funds. *See, e.g., Ernest A. Allerkamp*, 17 DOE § 85,079 at 88,176 (1988).

Office of Fossil Energy

[FE Docket Nos. 95–60–NG, 95–61–NG]

Phibro Inc.; Order Granting Blanket Authorization To Import and Export Natural Gas, Including Liquefied Natural Gas, From and To Canada and Mexico

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Phibro Inc. (Phibro) authorization to import up to 200 billion cubic feet (Bcf) of Canadian natural gas, including liquefied natural gas (LNG) and to import up to 200 Bcf of Mexican natural gas. Phibro is also authorized to export up to 200 Bcf of natural gas to Canada and to export up to 200 Bcf of natural gas to Mexico. Phibro's authorization is for a two-year term beginning on the date of first delivery of imported natural gas or LNG, or exported natural gas.

This order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 586–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., September 11, 1995.

Clifford P. Tomaszewski,

Director, Office of Natural Gas, Office of Fuels Programs, Office of Fossil Energy.

[FE Docket No. 95–59–NG]

Universal Resources Corporation; Order Granting Blanket Authorization to Export Natural Gas to Canada

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Universal Resources Corporation blanket authorization to export up to 50 Bcf of natural gas to Canada. This authorization is for a period of two years beginning on the date of the first delivery.

This order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 586–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C. on September 5, 1995.

Clifford P. Tomaszewski,

Director, Office of Natural Gas, Office of Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450–01–P

Western Area Power Administration

Pacific Northwest-Pacific Southwest Intertie Project Transmission Service, Phoenix Area

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of sale of additional capacity on the Pacific Northwest-Pacific Southwest Intertie Project.

SUMMARY: The Western Area Power Administration (Western) is requesting comments on the proposed sale of firm transmission service available as a result of the completion of construction of the Mead-Phoenix and Mead-Adelanto Transmission Projects which are a part of the Pacific Northwest-Pacific Southwest Intertie Project (AC Intertie).

DATE: Comments from all interested parties will be accepted until October 19, 1995.

FOR FURTHER INFORMATION CONTACT: Mr. J. Tyler Carlson, Area Manager, Phoenix Area Office, Western Area Power Administration, P.O. Box 6457, Phoenix, AZ 85005–6457, Telephone: (602) 352–2521, Facsimile: (602) 352–2630.

SUPPLEMENTARY INFORMATION:

Background

The Mead-Phoenix Project (MPP) is an electrical transmission system that consists of 256 miles of 500-kV alternating current, convertible to direct current, transmission line constructed from the Perkins Switchyard, located next to Westwing Substation, northwest of Phoenix, Arizona; through Mead Substation, located south of Boulder City, Nevada; and on to Marketplace Switching Station. Mead-Adelanto Project (MAP) is an electrical transmission system that consists of 202 miles of 500-kV AC transmission line from Marketplace Substation to Adelanto Switching Station in southern California. The 500-kV Marketplace Switching Station will be constructed adjacent to and interconnected with the existing McCullough Switching Station in southern Nevada. As part of the MPP, a 1300 megavolt-ampere (MVA), 500/230-kV transformer will be added to the Mead Substation. Western will have approximately 525 MW of capacity entitlement on this transformer.

Marketing Issues

Western is requesting comments on the proposed sale of additional capacity in the AC Intertie created by the completion and availability of MPP and MAP. The quantity of marketable capacity will be limited by Western's entitlement to the available capacity. The additional capacity on the AC Intertie is anticipated to be available as of January 1, 1996. Western's contracted firm transmission service will begin after the MPP and MAP are released for commercial service.

Marketing Criteria

Western will be marketing the capacity from MPP and MAP by line segments in each direction. The following priority method will be used in selecting allotees for this additional capacity and will be based on requests for usage of each line segment as follows:

1. Perkins to Mead, Mead to Marketplace or Marketplace to Adelanto
   (a) Both directions, same amount
   (b) Both directions, different amounts
   (c) one direction only
2. Perkins to Marketplace or Mead to Adelanto
   (a) Both directions, same amount
   (b) Both directions, different amounts
   (c) one direction only
3. Perkins to Adelanto
   (a) Both directions, same amount
   (b) Both directions, different amounts
   (c) one direction only.

Where the priority of requests will be in the following order: 1(a), 1(b), 1(c); 2(a), 2(b), 2(c); 3(a), 3(b), 3(c).

Where if any one path is oversubscribed, the allocations will be prorated.

Marketable Resource

Point of receipt	Point of delivery	Capacity
Perkins Switchyard.	Mead Substation.	412 MW.
Mead Substation.	Perkins Switchyard.	412 MW.
Mead Substation.	Marketplace Switching Station.	580 MW.
Marketplace Switching Station.	Mead Substation.	580 MW.
Marketplace Switching Station.	Adelanto Switching Station.	100 MW.
Adelanto Switching Station.	Marketplace Switching Station.	100 MW.

Selection Process

Based on the comments received on this proposal, Western will furnish the terms, conditions, and procedures governing the selection of allotees in the next **Federal Register** notice to be published by mid-October 1995. The mid-October **Federal Register** notice will also provide a mechanism for applications of requests for transmission capacity.

Applicant deadline and Western's schedule will also be published in the mid-October **Federal Register** notice.

Other Issues

The proposed rate for the additional capacity resulting from the completion of MPP and MAP will be set forth in a public rate process currently under way in the Phoenix Area Office. The proposed rate will be based on Western's expectation that the Marketable Capacity used in the proposed rate calculation for the 500-kV transmission lines will be 668 MW. A rate for firm transmission service will be determined in the public rate process.

Determination Under Executive Order 12866

DOE has determined that this is not a significant regulatory action because it does not meet the criteria of Executive Order 12866 (58 FR 51735). Western has an exemption from centralized regulatory review under Executive Order 12866; accordingly, no clearance of this notice by the Office of Management and Budget is required.

Environmental Evaluation

Western will comply with the National Environmental Policy Act (NEPA) of 1969, 42 U.S.C. 4321 *et seq.*; Council On Environmental Quality (40 CFR Parts 1500–1508) and DOE NEPA regulations (10 CFR Parts 1500–1508) and DOE NEPA regulations (10 CFR Part 1021). Western has determined that this action is categorically excluded from the preparation of an environmental assessment or an environmental impact statement.

Issued in Golden, Colorado, September 7, 1995.

J. M. Shafer,

Administrator

[FRL–5297–6]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

CTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.)*, this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before September 27, 1995.

FOR FURTHER INFORMATION CONTACT: For further information, or a copy of this ICR, contact Sandy Farmer at (202) 260–2740, please refer to EPA #ICR 1230.08.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: New Source Review and Prevention of Significant Deterioration Permitting Programs (EPA ICR #1230.08; OMB #2060–0003). This ICR requests an 18 month renewal of the existing clearance while the Agency revises the underlying regulations at 40 CFR parts 51 and 52.

Abstract: New and modified stationary sources must supply information on estimated emissions, proposed control technology, and air quality impact when applying for a preconstruction permit. EPA or the State or local air pollution control agency uses the information in the permit application to ensure that all regulatory requirements are being met and that the new emissions, in conjunction with existing source emissions in the same area, will not interfere with the attainment or maintenance of the national ambient air quality standards.

The average annual burden to respondents for this collection of information is approximately 5,000 hours per year. This includes time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Owers or operators of new or modified sources of air pollution.

Estimated Number of Respondents: 20,410.

Estimated Total Annual Burden on Respondents: 1,006,070 hours.

Frequency of Collection: On occasion.

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, (please refer to EPA ICR #1230.08 and OMB #2060–0003) to:

Sandy Farmer, EPA ICR #1230.08, U.S. Environmental Protection Agency, Information Policy Branch (2136), 401 M Street, SW, Washington, DC 20460.
and
Chris Wolz, OMB #2060–0003, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th Street, NW., Washington, D.C. 20503.

Dated: September 13, 1995.

Joseph Retzer,

Regulatory Information Division.

[FRL–5298–2]

Notice of Open Meeting of the Office of Water, Environmental Protection Agency on Alternative Financing Options for Water Infrastructure

The Office of Water of the Environmental Protection Agency (EPA) will hold an open meeting on alternative financing options for water infrastructure. The meeting is scheduled for October 10, 1995, in the Conference Center of the Region II Office of EPA located at 290 Broadway in New York City. The meeting will run from 10:00 am to 5:00 pm.

This meeting is the fourth in a series to collect public input on alternative financing options to help pay for

wastewater and drinking water infrastructure. The study is being prepared by the Environmental Finance Center at the Maxwell School of Citizenship and Public Affairs at Syracuse University at the direction of EPA's Office of Wastewater Management (OWM), in response to a congressional request for an evaluation of alternative financing options for water and wastewater projects in EPA's FY 95 appropriations legislation.

The first three meetings have focused primarily on options for a wide variety of fee systems. This meeting will consider other financing options that include encouraging increased investments by the private sector in public purpose water infrastructure, and examining ways to lower the costs of public borrowing for water infrastructure.

Following a discussion among invited panel members, interested parties who wish to speak at the meeting will be allowed to do so. These parties are encouraged to notify the Syracuse University Environmental Finance Center by calling Ms. Ronda Garlow at (315) 443–5612. There will also be a sign-in list for speakers at the meeting. Ten minutes will be available for each presentation. Written comments in advance are encouraged. Please send all written material to: Victoria Kennedy, Syracuse University, Environmental Finance Center, 219 Maxwell Hall, Syracuse, NY 13244–1090.

Dated: September 13, 1995.

Michael B. Cook,

Director, Office of Wastewater Management.

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIONS COMMISSION

Public Safety Wireless Advisory Committee; Procedures for Contacts

AGENCIES: The National Telecommunications and Information Administration (NTIA), Larry Irving, Assistant Secretary for Communications and Information, and the Federal Communications Commission (FCC), Reed E. Hundt, Chairman.

ACTION: Notice of Establishment of Procedures for Oral or Written Contacts with the Chairman of the Public Safety Wireless Advisory Committee (PSWAC) or with any of its members.

SUMMARY: The NTIA and the FCC have established a Public Safety Wireless Advisory Committee to prepare a final report to advise the NTIA and the FCC on operational, technical and spectrum requirements of federal, state and local Public Safety entities through the year 2010. The Federal Advisory Committee Act, Public Law 92–463, as amended, requires public notice of all meetings of the PSWAC. This is to assure full public participation in the discussion of all matters of substance before the PSWAC.

We wish to assure that all contacts regarding the merits or substance of any PSWAC consideration which occur outside the scope of formal meetings are a matter of record. Therefore, the PSWAC will require that any person or entity that makes an oral or written presentation to the Chairman of the PSWAC (Philip L. Verveer) or any of the members of the PSWAC (Louis J. Freeh, Ronald K. Noble, Alan D. Bersin, William Bratton, Michael Freeman, Steven Proctor, Dennis C. Connors, and Fred Kuznik) must provide a document which summarizes that presentation. In the case of an oral communication, the document must be a memorandum reflecting who initiated the contact, which PSWAC officials were involved, and the substance of the conversation. In the case of a written contact, the document must be a copy of the letter or pleading constituting the written contact. The document must be labelled WTB–1.

DATES: This requirement is effective immediately.

ADDRESSES: Documents provided to the PSWAC for the public file should be sent to: John J. Borkowski, Designated Federal Official, Public Safety Wireless Advisory Committee, Private Wireless Division, Wireless Telecommunications Bureau, Federal Communications Commission, Washington, D.C. 20554.

SUPPLEMENTARY INFORMATION: All submissions concerning such contacts will be available for public inspection in a file designated WTB–1 maintained in the Private Wireless Division of the Wireless Telecommunications Bureau, Federal Communications Commission, in Room 8010, 2025 M Street NW.

FOR FURTHER INFORMATION CONTACT:

William Donald Speights, NTIA (202–482–1652), or John J. Borkowski, FCC (202–418–0680), Co-Designated Federal Officials of the Public Safety Wireless Advisory Committee. You may also obtain more information about the PSWAC from the Internet at the Public Safety Wireless Advisory Committee homepage (http://pswac.ntia.doc.gov.).

Federal Communications Commission.

Robert H. McNamara,

Chief, Private Wireless Division, Wireless Telecommunications Bureau.

[FR Doc. 95–23169 Filed 9–18–95; 8:45 am]

BILLING CODE 6712–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Designation of Geographic Shortage Areas for Waiver of Two-Year Home-Country Physical Presence Requirement, International Medical Graduates, Exchange Visitor Program

AGENCY: Office of the Secretary, DHHS.

ACTION: Notice of availability of information about areas with shortages of health care professionals.

FOR FURTHER INFORMATION CONTACT: Dr. Evan R. Arrindell, Acting Director, Division of Shortage Designation, Bureau of Primary Health Care, 4350 East-West Highway, Room 9–1D–1, Bethesda, Maryland 20814, (301) 594–0816.

SUPPLEMENTARY INFORMATION: Section 220 of the Immigration and Nationality Technical Corrections Act of 1994 (Pub. L. 103–416) amended the Immigration and Nationality Act ("the Act") (8 U.S.C. 1182(e)) to add a new subsection (k) to Section 214 of that Act (8 U.S.C. 1184) concerning waiver of the 2-year foreign residence requirement for international medical graduates ("IMGs"). IMGs who were admitted to the United States on a J–1 visa in the exchange visitor program, or who acquired this status after admission to the United States, are subject to a 2-year home country residence and physical presence requirement. This means that they must reside and be physically present in their country of nationality or last residence abroad for an aggregate of at least 2 years following departure from the United States prior to acquiring lawful permanent resident status, unless they have been granted a waiver of this requirement.

Under section 212(e) of the Act, a waiver of the 2-year requirement may be granted by the Immigration and Naturalization Service ("INS") upon favorable recommendation of the Director of the United States Information Agency (USIA) on the basis of: (a) Exceptional hardship to the applicant's U.S. citizen or permanent resident spouse or children; (b) persecution on account of race, religion, or political opinion; (c) a "no objection" statement issued by the applicant's "home" country; or (d) a request made to USIA by an interested U.S. Government agency to recommend a waiver to USIA because the applicant's work is important to the public interest.

The Immigration and Nationality Technical Corrections Act provided an additional basis for waiver of the 2-year requirement. A State Department of Public Health or its equivalent can request the Director of USIA to recommend that INS grant up to 20 waivers a year. Conditions for these requests are that: (a) in the case of an alien who is otherwise contractually obligated to return to a foreign country, the government of that country provides USIA with a written statement that it has no objection to the waiver; (b) the IMG demonstrates that he or she has a bona fide offer of full-time employment and will begin this employment within 90 days of receipt of a waiver, for a period totaling not less than 3 years; (c) the employment is in an area designated by the Secretary of Health and Human Services as having a shortage of health care professionals. Both INS and USIA have published in the **Federal Register** interim-final regulations, with requests for comments, setting forth procedures and requirements for obtaining State-requested waiver requests. 60 F.R. 26676 (May 18, 1995) and 60 F.R. 16785 (April 3, 1995).

Section 214(k)(1) of the Act (8 U.S.C. 1184) authorizes the Secretary of HHS to designate "geographic area or areas * * * as having a shortage of health care professionals" for purposes of the State-requested waiver. Notice is hereby given that both Health Professional Shortage Areas ("HPSAS") and Medically Underserved Areas/Medically Underserved Populations ("MUAs/MUPs"), determined under Sections 332 and 330 of the Public Health Service Act, respectively, (42 U.S.C. 254e and 254c) are designated by the Secretary of HHS for purposes of 2-year home residency waiver requests by States under Section 214(k)(1) of the Act. HPSAs can be geographic areas, population groups, and health care facilities meeting regulatory criteria set forth at 42 CFR Part 5. Only physicians specialized in *primary care* (family practice, general internal medicine, pediatrics, and obstetrics and gynecology) are considered for physician shortage areas.

MUAs/MUPs are shortage areas and population groups designated pursuant to criteria set forth at 42 CFR § 51c.102(e) based on weighted values related to primary care physician ratios, infant mortality rates, the percentage of the population age 65 and over, and the percentage of the population below the poverty level. Whole counties and groups of contiguous counties can be designated.

The Bureau of Primary Health Care, Health Resources Services Administration publishes periodically a list of HPSAs in the **Federal Register**. The latest list was published on January 21, 1994 (59 F.R. 3412). This office also issues a list of MUAs/MUPs. Persons interested in obtaining this list or other information concerning HPSAs and MUAs/MUPs should contact: Dr. Evan R. Arrindell, Acting Director, Division of Shortage Designation, Bureau of Primary Health Care, 4350 East-West Highway, Room 9–1D–1 Bethesda, Maryland 20814 (phone: (301) 594–0816).

Dated: September 1, 1995.

Donna E. Shalala,

Secretary.

BILLING CODE 4160–15–M

Food and Drug Administration

[Docket No. 93N–0293]

Guide to Food Labeling Regulations Implementing the Nutrition Labeling and Education Act of 1990; Questions and Answers; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a document entitled "Food Labeling, Questions and Answers Volume II; A Guide for Restaurants and Other Retail Establishments" that addresses various questions concerning the regulations that FDA issued to implement the Nutrition Labeling and Education Act of 1990 (the 1990 amendments). The agency has received a large number of inquiries about how these final rules are being implemented in restaurants and other retail establishments, and it has prepared "Food Labeling, Questions and Answers Volume II; A Guide for Restaurants and Other Retail Establishments" to respond generally to many of the questions that it has received. Answers to some of the most frequently asked questions are included as an appendix to this notice. This document is intended to facilitate compliance with the new rules.

DATES: Written comments may be submitted at anytime.

ADDRESSES: Copies of the document "Food Labeling, Questions and Answers Volume II; A Guide for Restaurants and Other Retail Establishments" will be available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, 202–512–1800. Please request order No. 017–012–00374–5. Submit written comments on "Food Labeling, Questions and Answers Volume II; A Guide for Restaurants and Other Retail Establishments" to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857. Comments should be identified with the docket number found in brackets in the heading of this document. "Food Labeling, Questions and Answers Volume II; A Guide for Restaurants and Other Retail Establishments" and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Michelle A. Smith, Center for Food Safety and Applied Nutrition (HFS–158), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–205–5099.

SUPPLEMENTARY INFORMATION: FDA has received a number of inquiries from industry, consumers, and others concerning how the regulations it has adopted, implementing the Nutrition Labeling and Education Act of 1990 (the 1990 amendments) apply to retail Food establishments, including restaurants. FDA has prepared a document entitled "Food Labeling, Questions and Answers Volume II; A Guide for Restaurants and Other Retail Establishments" to serve as general guidance on the regulations. This document provides answers to many of the questions that the agency has received. Answers to some of the most frequently asked questions are included as an appendix to this notice.

"Food Labeling, Questions and Answers Volume II; A Guide for Restaurants and Other Retail Establishments" is intended only to be guidance to facilitate compliance with the regulations. It does not bind the agency, nor does it create or confer any rights, privileges, or benefits for or on any person. While "Food Labeling, Questions and Answers Volume II; A Guide for Restaurants and Other Retail Establishments" represents the best advice of FDA, it does not have the force and effect of law. The interpretations presented herein are obviously subject to the requirements of law both in the statute and in the regulations.

Interested persons may, submit written comments on "Food Labeling, Questions and Answers Volume II; A Guide for Restaurants and Other Retail Establishments" to the Dockets Management Branch (address above). FDA will consider these comments in determining whether revisions to the document are warranted. Two copies of any comments should be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The document and received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Appendix—Food Labeling: Questions and Answers, Volume II; A Guide for Restaurants and Other Retail Establishments— Sample Questions

The Guide presents answers to a range of questions, including questions about the application of exemptions and other special labeling provisions in restaurants, about the format for nutrition labeling when it is required, and about other issues concerning the nutrition labeling of retail foods. The Guide also responds to questions about the use of nutrient content claims and health claims on restaurant and other retail foods. It explains how to determine whether there is a reasonable basis for a claim, what foods to use as reference foods, and how to determine reference amounts.

Sample Questions

Question: How does FDA define "restaurants"?

Answer: "Restaurants" include conventional full service restaurants and other establishments where food is sold for immediate, on-site consumption (e.g., institutional food service, delicatessens, and catering where there are facilities for immediate consumption on the premises) and establishments where foods are generally consumed immediately where purchased or while walking away (e.g., lunch wagons, cookie counters in a mall, and vending machines including similar foods sold from convenience stores); and food delivery systems or establishments where ready-to-eat foods are delivered to homes or offices for immediate consumption.

Question: If a restaurant makes a claim for one item, does it need to provide nutrition information for all the foods it serves?

Answer: No. The exemptions from nutrition labeling set out in §§ 101.9(j)(2)(i) through (iii) apply to individual food items that are served or sold in a restaurant or similar establishment, not to the establishment. A restaurant need only provide nutrition information for those items that bear a claim. The restaurant may voluntarily provide nutrition information for foods that do not bear a claim.

It should be noted that the January 6, 1993, final regulations implementing the NLEA currently apply to all forms of restaurant labeling *except for menus*. Thus, a claim on a menu does not trigger FDA's nutrition labeling or claims requirements. However, States are not prohibited from enforcing these requirements with respect to menus. Furthermore, in the **Federal Register** of June 15, 1993 (58 FR 33055), FDA published a proposal to remove the exemption for claims on menus. Should the agency publish a final regulation deleting the menu exemption, the requirements discussed herein for non-menu labeling (e.g., signs, posters, placards, brochures, banners, etc.) will apply to all forms of labeling, including menus.

Question: A restaurant serves a food that is commercially manufactured and packaged and labeled. The food is served to consumers in the form it was purchased by the restaurant, e.g., individual serving size packages of condiments are placed in a bowl for consumer use. Would FDA hold the restaurant that serves the food responsible if the label of the food does not meet FDA's requirements, for example, if a package of salad dressing bears a "lowfat" claim but fails to bear nutrition information?

Answer: FDA requires that the label of a food sold in packaged form identify conspicuously the name and place of business of the manufacturer, packer, or distributor (§ 101.5). The firm that is so identified is generally the firm that is responsible for insuring that the food is properly labeled.

Question: Does a restaurant have to use the Nutrition Facts format to provide nutrition information for a food that bears a claim?

Answer: No. FDA is not requiring full nutrition labeling for restaurant foods, nor is it requiring that nutrition information be presented in the Nutrition Facts format. Because restaurant foods tend to be prepared or sold differently from foods from other sources, FDA is providing flexibility for restaurants in how they determine the nutrient content of a food (e.g., using a cookbook, reliable nutrient data base, or other reasonable bases) and in how this information may be presented to consumers. Information on the nutrient amounts that are the basis for the claim (e.g., "low fat, this meal provides less than 10 grams of fat") may serve as the functional equivalent of complete nutrition labeling (§ 101.10).

Question: Does nutrition information have to appear on the same labeling that bears the claim?

Answer: No. Nutrition information for restaurant foods may appear on the same or different labeling from that which bears the claim. Nutrition information may be presented in various forms, including those specified in § 101.9 (Nutrition Facts), § 101.45 (e.g., displayed at point of purchase by an appropriate means, such as affixing it to the food, by posting a sign, or by making the information readily available in a brochure, notebook, or leaflet, in close proximity to the foods), and by other reasonable means, such as orally by waiters or waitresses. (The agency notes, however, that to ensure that the information is presented accurately by waitpersons the nutrition information should also be maintained in written form by the restaurant management.)

Question: When making a claim for a food, does a restaurateur have to have the food that bears the claim analyzed by a lab to determine its nutrient content?

Answer: No. A restaurant food may bear a nutrient content claim or health claim if the restaurateur has a "reasonable basis" for believing that the food meets the definition for the claim. If a restaurateur labels a food "low fat," for example, he or she must have a reasonable basis for believing that the food complies with FDA's definition for "low fat," i.e., that it contains no more than 3 g of fat per reference amount customarily consumed or, in the case of meals and main dishes, no more than 3 g of fat per 100 g.

Question: Will FDA require prior approval for labeling that bears a claim?

Answer: No. FDA does not have the authority to require prior approval of restaurant labeling that bears a nutrient content claim, health claim, or other nutrition information.

Question: Will restaurants be required to have claim bearing foods "certified" by a third party or an independent dietary professional?

Answer: No. FDA has provided broad flexibility in establishing the "reasonable basis" criterion for restaurant foods. Thus, while some restaurateurs may choose to work with a third party to modify recipes or revise labeling, there is no requirement to do so. Restaurants should be able to make their own determinations once they are familiar with the claims requirements.

Question: Many food service items are partially or wholly processed when they are purchased for use in a restaurant or similar establishment. Thus, it is difficult for the restaurant to keep track of the sodium content of foods. It may also be difficult for a restaurant to monitor the use of sodium in the cooking process and to develop recipes for "low sodium" foods that taste good. How will these problems be addressed in implementing the new requirements?

Answer: FDA does not intend to impose an unrealistic regime (e.g., to require exacting measurements or strict portion controls) in restaurants. However, the agency is requiring that a restaurant have a reasonable basis for believing that a food meets the nutrient requirements for a claim, and that it be able to provide reasonable assurance that the preparation of the food adheres to the basis for the claim. If a restaurateur has no knowledge of, or control over, the sodium content of a food, or some other aspect of its nutrient content, he/she should not attempt to make a sodium content or other claim about the nutrient levels in that food.

Question: What is a "reference amount"? Do restaurants need to alter their serving size to be equal to the reference amount?

Answer: The reference amount or reference amount customarily consumed (RACC) is the amount of a food item customarily consumed per eating occasion as determined by FDA for the purpose of establishing realistic and consistent serving sizes for use in food labeling. Reference amounts for 139 different food categories are set out in 21 CFR 101.12. (Reference amounts for meat and poultry products are listed in 9 CFR 317.312.)

Restaurants do not need to alter the size of the portions they serve to be the same as the reference amount, nor does the serving size used in the labeling for a particular food need to be the same as the reference amount. However, in order to make certain nutrient content claims or health claims, an individual food must meet the definition for the claim based on the amount of the subject nutrient in an amount of the food equal to its reference amount, e.g., a "low fat" food may contain up to 3 grams of fat per reference amount. When a food's reference amount is small (i.e., 30 g or less or 2 tablespoons or less), the food (e.g., a sauce or condiment) must also meet the requirements for the claim based on its nutrient content per 50 grams.

Question: Must a restaurant develop recipes for, analyze, and market, a reference food for every food that bears a relative claim?

Answer: No. The reference food may be the restaurant's regular product, or that of another restaurant, that has been offered for sale to the public on a regular basis for a substantial period of time. Nutrient values for a reference food may also be derived from such sources as a valid data base, an average of top national or regional brands, or a market basket norm (§ 101.13(j)(1)(ii)).

Dated: September 14, 1995

William B. Schultz,

Deputy Commissioner for Policy.

[FR Doc. 95–23242 Filed 9–18–95; 8:45 am]

BILLING CODE 4160–01–F

Public Health Service

National Institutes of Health; Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HN (National Institutes of Health) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (40 FR 22859, May 27, 1975, as amended most recently at 60 FR 30092, June 7, 1995) is amended to reflect the reorganization of the Office of the Director, National Institute of Allergy and Infectious Diseases (OD/NIAID). The reorganization consists of the following: (1) Retitle the Office of Financial Management (HNM12) to the Office of Financial Management and Technology Transfer (HNM12) and revise the functional statement; and (2) retitle the Office of Policy Analysis and Technology Transfer (HNM16) to the Office of Policy Analysis (HNM16) and revise the functional statement. This reorganization will enable the NIAID to better fulfill its mission by restructuring the OD/NIAID to better integrate related program areas and streamline operations.

Section HN–B, Organization and Functions is amended as follows:

(1) Under the heading *Office of Financial Management (HNM12),* delete the title and functional statement in their entirety and substitute the following:

Office of Financial Management and Technology Transfer (HNM12). (1) Is the principal organization that provides advice to the NIAID Director, Deputy Director, and senior staff on all financial management and technology transfer issues affecting the NIAID; (2) has functional responsibilities in financial management and technology transfer, and (3) is intricately involved in (a) program planning, (b) budget preparation and execution, (c) developing position papers for the NIAID Director and other senior staff, (d) managing NIAID's extensive technology transfer program, and (e) accelerating the transfer of NIAID technology to the private sector.

(2) Under the heading *Office of Policy Analysis and Technology Transfer (HNM16),* delete the title and functional statement in their entirety and substitute the following:

Office of Policy Analysis (HNM16). (1) Serves as principal advisor to the Institute Director, Deputy Director, and Division Directors regarding the planning, evaluation, and program, policy, and legislative analytical needs of the Institute; (2) provides support and serves as liaison to program managers in coordinating, integrating, and articulating long-range program goals and strategies; (3) is responsible for the development and coordination of the Institute's annual Planning and Reporting process; (4) maintains a continuing liaison with program planning, evaluation, and legislation counterparts in other ICDs in the OD/NIH; (5) advises Institute Task Forces to assure that the charge and work of the Task Forces are directed toward the projected planning and evaluation needs of the Institute; (6) conducts the intra-institute program assignments of all research, training, career and fellowship grant applications; (7) analyzes, interprets, and classifies the scientific content of research grants, contracts, and intramural research projects, and manages the scientific information data and coding of the Multi-Axis Coding System (MACS); (8) directs and coordinates all program evaluation activities, assessing the impact and focus of programs which are of major concern to the Institute; (9) advises on material for all stages related to Congressional budget presentations; (10) designs, develops and maintains the computer-based scientific and fiscal data collection, storage, and retrieval system for the Institute's contracts, grants, intramural research projects, fellowships and training awards; (11) directs and coordinates the legislative liaison, legislative tracking and analysis for the Institute; (12) manages the Executive Secretariat (controlled correspondence) functions for the Institute; and (13) serves as the focus for communications for trans-NIH concerns.

Dated: August 9, 1995.

Harold Varmus,

Director, NIH.

BILLING CODE 4140–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV–060–1990–01]

Notice of Availability for the Round Mountain Mill and Tailings Facility Draft Environmental Impact Statement and Notice of Comment Period and Public Meetings

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Notice of availability for the Round Mountain Mill and Tailings Facility Draft Environmental Impact Statement (EIS), for the Smoky Valley Common Operation, Nye County, Nevada; and notice of comment period and public meetings.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act, 40 CFR 1500–1508, and 43 CFR 3809, notice is given that the Bureau of Land Management (BLM) has prepared, with the assistance of a third-party consultant, a Draft EIS on the proposed Round Mountain Mill and Tailings Facility, and has made copies available for public and agency review.

DATES: Written comments on the Draft EIS must be submitted or postmarked to the BLM no later than November 22, 1995. Oral and/or written comments may also be presented at two public meetings, to be held:

October 17, 1995; 7 p.m.; Donald Simpson Community Center, Hadley, Nevada

October 18, 1995; 7 p.m.; Airport Plaza Hotel, 1981 Terminal Way, Reno, Nevada

ADDRESSES: Written comments on the Draft EIS should be addressed to: Bureau of Land Management, Battle Mountain District, Post Office Box 1420, Battle Mountain, Nevada 89820, Attn.: Christopher J. Stubbs, Round Mountain EIS Project Manager. A limited number of copies of the Draft EIS may be obtained at the same address. In addition, the Draft EIS and supporting documentation are available for review at the following locations: BLM, Battle Mountain District Office, Battle Mountain, Nevada; BLM, Nevada State Office, Reno, Nevada; and the Getchell Library, University of Nevada, Reno, Nevada.

FOR FURTHER INFORMATION CONTACT: Christopher J. Stubbs, Round Mountain EIS Project Manager, Bureau of Land Management, Post Office Box 1420, Battle Mountain, Nevada 89820, (702) 635–4000.

SUPPLEMENTARY INFORMATION: The Smoky Valley Common Operation has submitted a Plan of Operations Amendment for the construction, operation, and reclamation of a mill and tailings facility at the Round Mountain Mine. The mine currently consists of 4,767 acres of surface disturbance: 3,659 acres of land administered by the BLM, 515 acres of land administered by the Toiyabe National Forest, and 593 acres of patented land owned by the Smoky Valley Common Operation. The proposed facilities would comprise an expansion of the existing operation at the Round Mountain Mine to improve the recovery of gold from ore that is being mined from the existing open pit. Ancillary facilities would include a new primary crusher; a power line; fresh water, reclaim water, and tailings pipelines; and a septic system. The proposed facilities would be located on approximately 757 acres of public land administered by the BLM, Battle Mountain District Office, Tonopah Resource Area. Of this acreage, approximately 250 acres occur on public lands outside of the existing permit boundary. Construction is scheduled to begin in early 1996; operation of the mill and tailings facility would begin in 1997 and continue until 2008.

This Draft EIS analyzes the environmental impacts associated with the proposed mill and tailings facility and ancillary facilities, a range management alternative, an alternative tailings impoundment site, and the no action alternative. In addition, the Draft EIS analyzes potential impacts associated with pit dewatering and pit water quality, and the leach offload piles. Issues analyzed in the Draft EIS include geology and minerals, water resources, soils and watershed, vegetation, wildlife and fisheries, range resources, paleontological resources, cultural resources and Native American concerns, air quality, access and land use, recreation and wilderness, social and economic values, visual resources, noise, and hazardous materials.

A copy of the Draft EIS has been sent to all individuals, agencies, and groups who have expressed interest in the project or as mandated by regulation or policy. A limited number of copies are available upon request from the BLM at the address listed above.

Public participation has occurred during the EIS process. A Notice of Intent was filed in the **Federal Register** in August 1993, and an open scoping period was held for 120 days. Two public scoping meetings to solicit comments and ideas were held in November 1993, and a newsletter was issued to keep the public informed of the progress of the EIS. All comments presented to the BLM throughout the EIS process have been considered.

To assist the BLM in identifying and considering issues and concerns on the proposed action and alternatives, comments on the Draft EIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters in the document. Comments may address the adequacy of the Draft EIS and/or the merits of the alternatives formulated and discussed in the document. Reviewers may wish to refer to the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points. After the comment period ends on the Draft EIS, comments will be analyzed and considered by the BLM in preparing the Final EIS.

Dated: September 12, 1995.

Jeffrey A. Weeks,

Acting District Manager.

[FR Doc. 95–23129 Filed 9–18–95; 8:45 am]

BILLING CODE 4310–HC–P

[WY–981–1640–00–370F; WYW129948]

Notice of Realty Action: Modified Competitive Bidding Sale of Public Lands in Washakie County, WY

AGENCY: Bureau of Land Management, Interior.

SUMMARY: The Bureau of Land Management (BLM) has determined that the public lands described below are suitable for disposal under sections 203 and 209 of the Federal Land Policy and Management Act of 1976 (FLPMA) (43 U.S.C. 1713, 1719).

Sixth Principal Meridian

T. 47 N. R. 92 W.

Sec. 23, W½NE¼SW¼, NW¼SE¼SW¼.

The land aggregates 30 acres more or less.

The BLM must receive fair market value for the land and any bid for less than fair market value will be rejected. The appraised value for the 30 acres is $45,000. The BLM may accept or reject any and all offers, or withdraw any land or interest in the land for sale if the sale would not be consistent with FLPMA or other applicable law.

DATES: All bids must be received in the Bighorn Basin Resource Area Office no later than 10:00 a.m., November 15, 1995.

ADDRESSES: Sealed bids may be handcarried to the Bighorn Basin Resource Area Office, 101 South 23rd Street, Worland, Wyoming, or mailed to the Bighorn Basin Resource Area Office, P.O. Box 119, Worland, Wyoming 82401–0119. The sealed bid envelope must be marked in the front lower-left corner with the words "Public Land Sale, WYW129948, Sale held November 15, 1995. Sealed Bid—Do Not Open in Mail Room."

FOR FURTHER INFORMATION CONTACT: Detailed information concerning the sale is available for review at the BLM office in Worland. For further information contact Karen Hepp, Range Management Specialist or Charles F. Wilkie, Area Manager, Bighorn Basin Resource Area, Bureau of Land Management, P.O. Box 119, Worland, Wyoming 82401–0119, (307)347–9871.

SUPPLEMENTARY INFORMATION: A bid will also constitute an application for conveyance of the unreserved mineral estate, excluding oil and gas resources. The mineral interests being offered have no known value. At the time of the sale, the bidder will be required to pay a $50 filing fee (in addition to their bid) for all unreserved mineral interests.

Sale of the above land will be conducted by modified competitive bidding. Timberline Feedlot Inc. will be allowed preference consideration to meet the high bid. The proposed sale is consistent with the Washakie Resource Management Plan and meets the sale criteria of 43 CFR 2710.0–3(a)(2). Disposal of this tract will serve to increase the economic development of the Worland area through the expansion of Timberline's feedlot.

All bidders must be United States citizens, 18 years of age or older, corporations subject to laws in the state of Wyoming, a state, state instrumentality or political subdivision authorized to hold property, or an entity legally capable of conveying and holding land or interests in land in Wyoming.

All sealed bids must be accompanied by a payment of not less than ten (10) percent of the total bid, plus a $50 filing fee for all unreserved mineral interests. Each bid must be accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management.

The apparent high bidder and the designated bidder (Timberline Feedlot Inc.) will be notified immediately following the opening of the sealed bids on November 15, 1995. If the designated bidder (Timberline Feedlot Inc.) fails to exercise their preference consideration to meet the highest bid within 30 days of the sale, the BLM will offer the lands to the high bidder. If the apparent high bidder is disqualified, the next highest qualified bid will be accepted. If Timberline Feedlot Inc. chooses not to meet the high bid and two (2) or more envelopes containing valid bids of the same amount are received, supplemental sealed bidding will be used to determine the high bid.

The successful bidder shall submit the remainder of the full bid price prior to the expiration of 180 days from the date of the sale. Failure to pay the remainder of the full bid price shall result in cancellation of the sale and the deposit shall be forfeited and disposed of as other receipts of the sale. Conveyance of the public land will except and reserve to the United States:

1. A right-of-way (ROW) thereon for ditches and canals constructed by the authority of the United States. Act of August 30, 1890 (43 U.S.C. 945).
2. All the oil and gas in the land so patented, and to it, or persons authorized by it, the right to prospect for, mine and remove such deposits from the same upon compliance with the conditions and subject to the provisions and limitations of the Act of July 17, 1914, as supplemented (30 U.S.C. 121–124).

Conveyance of the public land will also be subject to:

1. Oil and Gas Pipeline ROW WYW75340.
2. Road ROW WYW81772.
3. Federal Aid Highway ROW WYW0189320.
4. Power Transmission Line ROW WYW72986.
5. Surface Water Flowline ROW WYW75336.
6. Telephone/Telegraph ROW WYW68159.
7. Gas Pipeline and Road ROW WYW94115.
8. Telephone Line ROW WYW89760.

Publication of this notice in the **Federal Register** shall segregate the land from all forms of appropriation under the public land laws, including the general mining laws. The segregative effect will terminate upon issuance of the patent, 270 days from the date of the publication of this notice, or upon publication in the **Federal Register** of a notice of termination of segregation, whichever occurs first.

For a period of forty-five (45) days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Worland District Office, Bureau of Land Management, P.O. Box 119, Worland, Wyoming 82401–0119. Any adverse comments will be evaluated by the State Director, who may sustain, vacate, or modify this realty action. In the absence of any action by the State Director, this realty action will become final.

Dated: September 8, 1995.

David Atkins,

Acting District Manager Worland, Wyoming.

[FR Doc. 95–23188 Filed 9–18–95; 8:45 am]

BILLING CODE 4310–22–P

Bureau of Reclamation

Central Valley Project Improvement Act, Review of Criteria for Evaluating Water Conservation Plans

SUMMARY: Section 3405(e) of the Central Valley Project Improvement Act (CVPIA) Title 34 of Public Law 102–575, requires Reclamation to develop criteria to evaluate water conservation plans for Central Valley Project contractors and to evaluate all the plans by that criteria, including plans required by Section 210 of the Reclamation Reform Act. The Act also requires Reclamation to review the criteria periodically, "but no less than every three years." Reclamation finalized the Criteria for Evaluating Water Conservation Plans (Criteria) in April 1993. The Criteria must now be reviewed and revised, if necessary.

EFFECTIVE DATE: Comments should be provided to Reclamation by November 17, 1995.

ADDRESSES: Written comments should be mailed to the Bureau of Reclamation, Attention: Betsy Reifsnider, 2800 Cottage Way, MP–402, Sacramento, CA 95825.

FOR FURTHER INFORMATION CONTACT: Copies of the Criteria may be obtained by writing the Bureau of Reclamation, Attention: Betsy Reifsnider, 2800 Cottage Way, MP–402, Sacramento, CA 95825; or by calling Betsy at (916) 979–2388.

SUPPLEMENTARY INFORMATION: After considerable public input, Reclamation finalized the initial Criteria for Evaluating Water Conservation Plans (Criteria) in April 1993, and immediately began evaluating plans accordingly. As required by Section 3405(e), the Criteria must now be reviewed and updated if necessary to further promote the highest level of water use efficiency reasonably achievable by project contractors using best available cost-effective technology and best management practices.

As the first step in this review, Reclamation requests public comments on the contents of the April 1993 Criteria. The public is asked to note any problems with the existing Criteria, recommend any modifications which they believe Reclamation should make to the Criteria, and suggest new technology which has been shown to be cost effective in promoting water use efficiency.

Following review of the public comments received, Reclamation will consider whether to make changes to the existing Criteria. If changes are proposed, they will first be released as a draft for public review and comment. At that time, a series of public workshops will be held. Thereafter, changes will be finalized and revised Criteria issued by April 1996.

Dated: September 11, 1995.

Dan M. Fults,

Assistant Regional Director.

National Park Service

Pecos National Historical Park, Draft General Management Plan/Development Concept Plan/Environmental Impact Statement

AGENCY: National Park Service, Interior.

ACTION: Notice of availability of the Draft General Management Plan/Development Concept Plan/Environmental Impact Statement for Pecos National Historical Park, Santa Fe and San Miguel Counties, New Mexico.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the National Park Service announces the availability of the Draft General Management Plan/Development Concept Plan/Environmental Impact Statement (GMP/DCP/EIS) for Pecos National Historical Park. This notice also announces public meetings for the purpose of receiving public comments on the Draft GMP/DCP/EIS.

On June 27, 1990, Congress repealed the act to establish Pecos National Monument and authorized the establishment of Pecos National Historical Park to include the former Pecos National Monument and 5,500 acres of the Forked Lightning Ranch. On November 8, 1990, Congress expanded Pecos National Historical Park to include the 682 acre Glorieta unit. The purpose of this Draft GMP/DCP/EIS is to set forth the basic management philosophy of the park and the overall approaches to resource management, visitor use, and facility development that would be implemented over the next 10–15 years.

This Draft GMP/DCP/EIS describes and analyzes alternatives for the Pecos and Glorieta units of Pecos National Historical Park. Proposed action and no-action alternatives have been developed for each unit. In addition to the proposed action and no-action alternatives, two additional action alternatives have been developed for the Pecos unit; and one additional action alternative has been identified for the Glorieta unit. These alternatives propose future management and use options for the newly established Pecos National Historical Park. Under Pecos Unit Alternative A (no action), present use and management would continue. The primary interpretive focus would continue to be at the Pecos Pueblo/mission ruins complex, and no new visitor facilities would be developed. Under Pecos Unit Alternative B (the proposed action), two visitor staging areas would be developed—the Fogelson visitor center area and Kozlowski's Stage Stop. New visitor facilities would include trails and trailheads and interpretive exhibits. Under Pecos Unit Alternative C, three visitor staging areas would be developed—the Fogelson visitor center, Kozlowski's Stage Stop, and the Gateway overlook. Staging areas and associated facilities would have easy vehicle access. Under Pecos Unit Alternative D, visitors would enter the park from the south; and a new visitor center would be developed at the Gateway overlook area. Other visitor facilities would continue to be provided at Kozlowski's Stage Stop and the Fogelson visitor center. Under Glorieta Unit Alternative 1 (no-action), no new facilities would be provided. Glorieta Unit Alternative 2 (proposed action) would incorporate a staffed visitor contact facility and interpretive trails and exhibits at Pigeon's Ranch and an exterior interpretive exhibit at a pulloff overlooking Cañoncito. Glorieta Unit Alternative 3 would incorporate the same facilities as Alternative 2; however, the staffed contact station would be at a different location. The major impact topics assessed for the proposals and the alternatives are cultural and natural resources and the socioeconomic environment, including the local economy and National Park Service operations.

This Draft GMP/DCP/EIS was prepared in order to evaluate a range of alternatives and an assessment of impacts of these alternatives and to provide the public with an opportunity to comment. This document will be on public review for 60 days. The park would appreciate any comments on these alternatives or other ways to manage the park over the next 15 years.

DATES: Comments on the Draft GMP/DCP/EIS should be received no later than November 17, 1995. The dates and times for public meetings regarding the draft GMP/DCP/EIS can be obtained by contacting Pecos National Historical Park at 505–757–6414.

ADDRESSES: Comments on the Draft GMP/DCP/EIS should be submitted to Superintendent, Pecos National Historical Park, Post Office Drawer 418, Pecos, New Mexico 87552, telephone 505–757–6414.

SUPPLEMENTARY INFORMATION: Public reading copies of the Draft GMP/DCP/EIS will be available for review at the following locations: Office of Public Affairs, National Park Service, 1849 C Street, NW, Washington, D.C.; Department of the Interior Natural Resource Library, 1849 C Street, NW, Washington, D.C.; National Park Service, Southwest System Support Office, 1100 Old Santa Fe Trail, Santa Fe, New Mexico; Santa Fe Public Library Reference Desk, 145 Washington Avenue, Santa Fe, New Mexico; Pecos National Historical Park, Administrative Office, 2 miles south of Pecos, New Mexico on State Highway 63; and local public libraries. You may call the park at 505–757–6032 to arrange for a tour through October 15, 1995.

Dated: September 8, 1995.

Ernest W. Ortega,

Associate Regional Director.

BILLING CODE 4310–70–M

Saint Croix Island International Historic Site Draft General Management Plan/Environmental Impact Statement; Intent

SUMMARY: This notice is to advise the public that the National Park Service is preparing a Draft General Management Plan (GMP)/Environmental Impact Statement (DEIS) for Saint Croix Island International Historic Site, Calais, Maine. The formal 30-day public scoping period for such effort begins October 1 and closes October 31, 1995. This scoping effort allows the public to help the National Park Service identify the most important issues to be addressed and the range of alternatives to be considered, proposed and evaluated in the Draft GMP/EIS.

A public information document is available. The purpose of the document is to invite public participation and to serve as an outline for discussion during public consultations. To ensure that the full range of issues are addressed and a full range of alternatives are identified and evaluated, comments and suggestions are invited from all interested parties. Written comments are welcome and must be postmarked no later than October 31, 1995. A public workshop will be held on Wednesday, October 25, 1995, at 7 pm, at the Washington County Technical College, River Road, U.S. Route 1, Calais, Maine.

SUPPLEMENTARY INFORMATION: The public information document briefly describes the significance of the site, the NPS planning process, preliminary management objectives, as well as an outline of preliminary ideas for the future of the site. No decision has been made regarding what the contents of the draft GMP/EIS will be or what alternatives will be proposed and evaluated in the draft GMP/EIS.

FOR FURTHER INFORMATION CONTACT: Superintendent, Acadia National Park, P.O. Box 177, Bar Harbor, Maine 04609, (207) 288–5472.

Dated: September 11, 1995.

Robert W. McIntosh,

Acting, Deputy Field Director.

[FR Doc. 95–23152 Filed 9–18–95; 8:45 am]

BILLING CODE 4310–70–P

Delta Region Preservation Commission; Meeting

AGENCY: National Park Service, Jean Lafitte National Historical Park and Preserve, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Delta Region Preservation Commission will be held at 7 p.m. at the following location and date.

DATES: October 18, 1995.

LOCATION: Beauregard House, Chalmette Unit, Jean Lafitte National Historical Park and Preserve, 8606 W. Saint Bernard Highway, Chalmette, Louisiana 70043.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Belous, Superintendent, Jean Lafitte National Historical Park and Preserve, 365 Canal Street, Suite 3080, New Orleans, Louisiana 70130–1142, (504) 589–3882, extension 108.

SUPPLEMENTARY INFORMATION: The Delta Region Preservation Commission was established pursuant to section 907 of Pub. L. 95–625 (16 U.S.C. 203f), as amended, to advise the Secretary of the Interior in the selection of sites for inclusion in Jean Lafitte National Historical Park and Preserve, and in the implementation and development of a general management plan and of a comprehensive interpretive program of the natural, historic, and cultural resources of the Region.

The matters to be discussed at this meeting include:

—Impanelment of New Members
—Old Business
—New Business
—Education Program
—General Park Update

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited, and persons will be accommodated on a first-come-first-served basis. Any member of the public may file a written statement concerning matters to be discussed with the Superintendent, Jean Lafitte National Historical Park and Preserve.

Minutes of the meeting will be available for public inspection four weeks after the meeting at the office of Jean Lafitte National Historical Park and Preserve.

Dated: September 6, 1995.

W. Thomas Brown,

Acting Field Director, Southeast Area.

BILLING CODE 4310–70–M

Maine Acadian Culture Preservation Commission; Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (PL 92–463) that the Maine Acadian Culture Preservation Commission will meet on Thursday, October 19, 1995. The meeting will convene at 7 PM in the cafeteria of Van Buren High School on Main Street (U.S. Route 1) in Van Buren, Aroostook County, Maine.

The eleven-member Maine Acadian Culture Preservation Commission was appointed by the Secretary of the Interior pursuant to the Maine Acadian Culture Preservation Act (PL 101–543). The purpose of the Commission is to advise the National Park Service with respect to:

- the development and implementation of an interpretive program of Acadian culture in the state of Maine; and
- the selection of sites for interpretation and preservation by means of cooperative agreements.

The Agenda for this meeting is as follows:

1. Review and approval of the summary report of the meeting held August 17, 1995.
2. Presentation: "Where Two Worlds Met," early history of Saint Croix Island—Wayne Kerr, Heritage Presentation Specialist, Canadian Heritage (Parks Canada).
3. Reports of Maine Acadian Culture Preservation Commission working groups.
4. Report of the National Park Service planning team and project staff.
5. Opportunity for public comment.
6. Proposed agenda, place, and date of the next Commission meeting.

The meeting is open to the public. Further information concerning Commission meetings may be obtained from the Superintendent, Acadia National Park. Interested persons may make oral/written presentations to the Commission or file written statements. Such requests should be made at least seven days prior to the meeting to: Superintendent, Acadia National Park, PO Box 177, Bar Harbor, ME 04609–0177; telephone (207) 288–5472.

Robert W. McIntosh,

Acting Deputy Director, Northeast Field Area.

BILLING CODE 4310–70–P

Notice of Inventory Completion for Native American Human Remains and Associated Funerary Objects in the Possession of the University of Nebraska State Museum, Anthropology Research Division, Lincoln, NE

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is hereby given under the Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003(d), of the completion of an inventory for Native American human remains and associated funerary objects from six sites in Nebraska currently in the possession of the University of Nebraska State Museum, Anthropology Research Division, Lincoln, NE.

A detailed inventory and assessment has been made by members of the professional staff of the University of Nebraska State Museum, in consultation with representatives of the Northern Ponca Tribe of Nebraska and the Southern Ponca Tribe of Oklahoma. Meetings with these tribal representatives have been held at the

Nebraska State Museum on eight occasions during 1993–1995, in addition to many phone conversations during this period.

During 1936–1938, the Nebraska State Archeological Survey conducted excavations of these six sites under the authority of the W.P.A. Official Project #165–81–8095, Work Project #3140. Under agreement with the W.P.A., the collections resulting from these excavations were accessioned by the University of Nebraska State Museum.

Human remains from the Ponca Fort Site (*Nanza*), Knox County, NE consist of sixty-six individuals. No known individuals were identified. A total of 5,310 cultural items are associated with these burials including: Wood (bark fragments, scraper, shaft smoother, shaft straightener); copper (beads, bracelets, bells, buttons, coils; neck rings, projectile points, rings, sheets, and cones); glass (beads, button), pipestone (bannerstone, pipe fragments), bone (bison tools, pendent, hair pipe bead); stone (grinding slab, unknown artifact); iron (ax, bracelets, projectile points, fragments); lead (bracelet, coils); leather fragments; shell (unmodified, gorgets).

The Ponca Fort Site's occupation by the Ponca Tribe is estimated as c. 1790–1800, based on associated cultural items and oral evidence of Ponca ethnohistoric informants in the 1930s (Wood 1965). The J.O. Dorsey "Omaha Map" (1884) indicated the presence of Ponca earthlodges on this site and Ponca ethnohistoric informant J. LaFleshe described "curvilinear entrenchments" and "many earth-lodges" inside the fort (Dorsey 1884). Prince Maximilian in 1832 described a uninhabited Ponca fort at this location. Cultural items found with the burials (such as copper fragments and trade beads), osteological evidence (such as copper staining, marked anterior dental wear, fair to good preservation, and morphological changes related to horseback riding), and the ethnohistoric evidence are consistent with Ponca occupation of the site.

Human remains from the Ponca Point Site (*Ma-azi*), Knox County, NE, consist of the remains of one infant. No known individuals were identified. Two associated funerary objects, consisting of one blue and one white glass bead, were found with this burial.

In 1966, Ponca tribal historian Peter LeClaire identified the Ponca Point site as "*Ma-azi*" or "the burying place on the top of the ridge" used by the Ponca in the historic period. Osteological evidence of red staining on the arm and rib and the two historic beads associated with this burial, the assessment of the site as protohistoric/historic Ponca, and Ponca ethnohistoric informants are consistent with Ponca occupation of this site.

Human remains from the Hogan Site, Knox County, NE consist of the remains of three individuals. No known individuals were identified. Two hundred eighty-one associated funerary objects include glass (beads), copper (button), and unidentified metal (pendant).

Describing this site in the *Report to the Chancellor* (1937), Bell reports that the Hogan site "has been used as a burial ground until very recent times by the Ponca." Osteological evidence of red staining, good preservation, morphological changes related to horseback riding, and the associated funerary objects are consistent with Ponca occupation of this site.

Human remains from the Davis Site, Knox County, NE consist of the remains of nine individuals. No known individuals were identified. Two hundred and thirty-eight associated funerary objects include: Glass (beads, bottle); copper (bell, bracelets, buttons, bands, coils); iron (sheet, nails); pumice; wood (paper, post); tin (bowl, plate); textile (black cloth).

Reference is made to the Ponca living in this area as early as Truteau in 1795, Mackay in 1797, Clark in 1804, and Prince Maximilian in 1832. Ponca tribal members working on the site during excavations in 1937 identified these burials as Ponca. Osteological evidence of brachycephalic skulls, and associated cultural items are consistent with Ponca occupation of this site.

Human remains from the Minaric II Site (25KX9), Knox County, NE, consist of the remains of six individuals. No known individuals were identified. Sixty-eight associated funerary objects include: bone (antler fragments, antler scraper); pipestone (fragments); glass (beads); ceramics (sherds); copper (cones); sandstone abrader; and shells.

In 1938, Chief Birdhead identified the Minaric II Site as a Ponca village "occupied by the lesser chiefs and the common people of the tribe." Chief Birdhead also said that his grandfather had lived in one of the houses on the bottom land. In 1966, Ponca tribal historian Peter LeClaire compiled a list of Ponca sites, and identified the Minaric II site as "Farming Ground Village." Osteological evidence of copper staining, marked anterior dental wear, fair to good preservation, morphological changes related to horseback riding, and Ponca oral history are consistent with Ponca occupation of this site.

Human remains from the Minaric III Site, Knox County, NE, consist of the remains of one individual. No known individual was identified. Twenty-eight associated funerary objects include: glass (beads); metal (ring, copper necklace band); lithic (projectile point).

The archeological evidence of the Minaric III site, located between the Minaric II site and the Ponca Fort Site, indicates Ponca occupation during the historic period consistent with the surrounding Ponca sites. Osteological evidence of copper staining, marked anterior dental wear, good preservation, and the associated cultural items are consistent with Ponca occupation of this site.

Based on the above-mentioned information from these six sites, officials of the Nebraska State Museum have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identify which can be reasonably traced between these human remains and associated funerary objects and the Northern Ponca Tribe of Nebraska and the Southern Ponca Tribe of Oklahoma.

This notice has been sent to officials of the Northern Ponca Tribe of Nebraska and the Southern Ponca Tribe of Oklahoma. Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains and associated funerary objects should contact Dr. Thomas Myers, Curator of Anthropology, University of Nebraska State Museum, Systematics Collections W436 Nebraska Hall, Lincoln, NE 68588–0544, telephone (402) 472–5033 before October 19, 1995. Repatriation of these human remains to the Northern Ponca Tribe of Nebraska and the Southern Ponca Tribe of Oklahoma may begin after this date if no additional claimants come forward.

Dated: September 13, 1995.

Francis P. McManamon,

Departmental Consulting Archeologist, Archeology and Ethnography Program.

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 USC Chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) The title of the form/collection;

(2) The agency form number, if any, and the applicable component of the Department sponsoring the collection;

(3) Who will be asked or required to respond, as well as a brief abstract;

(4) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;

(5) An estimate of the total public burden (in hours) associated with the collection; and,

(6) An indication as to whether Section 3504(h) of Public Law 96–511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Mr. Jeff Hill on (202) 395–7340 and to the Department of Justice's Clearance Officer, Mr. Robert B. Briggs, on (202) 514–4319. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the Department of Justice Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Robert B. Briggs, Department of Justice Clearance Officer, Systems Policy Staff/Information Resources Management/Justice Management Division Suite 850, WCTR, Washington, DC 20530.

Revision of a Currently Approved Collection

(1) Petition for Amerasians, Widow or Special Immigrant.

(2) Form: I–360. Immigration and Naturalization Service, United States Department of Justice.

(3) Primary: Individuals and Households. Other: None. The information collected on Form I–360 will be used by the Immigration and Naturalization Service to determine eligibility for the requested immigration benefit. The form serves the purpose of standardizing request for the benefit, and ensuring that basic information required to assess eligibility is provided by applicants.

(4) 11,000 responses per year at 2 hours per response.

(5) 22,000 annual burden hours.

(6) Not applicable under section 3504(h) of Public Law 96–511.

Public comment on this item is encouraged.

Dated: September 18, 1995.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–31,389]

Don Shapiro Industries, AKA Action West Jeans; El Paso, TX; Notice of Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on September 5, 1995 in response to a worker petition which was filed on September 5, 1995 on behalf of workers at Don Shapiro Industries (aka Action West Jeans), El Paso, Texas.

An active certification covering the petitioning group of workers remains in effect (TA–W–31,352). Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed in Washington, DC this 5th day of September, 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

[FR Doc. 95–23185 Filed 9–18–95; 8:45 am]

BILLING CODE 4510–30–M

[TA–W–31,247]

Fina Oil and Chemical Company Exploration & Production Group Offshore Division at Various Locations in Texas; Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

And Also Operating in The Following Other States:

TA–W–31,247A	Louisiana
TA–W–31,247B	Alabama
TA–W–31,247C	Colorado
TA–W–31,247D	Oklahoma

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) as amended by the Omnibus Trade and Competitiveness Act of 1988 (Pub. L. 100–418), the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is determined in this case that all of the requirements have been met.

The investigation was initiated in response to a petition received on July 17, 1995 and filed on behalf of workers at Fina Oil and Chemical Company, at various locations in Texas, and also operating in the following other states: Louisiana, Alabama, Colorado & Oklahoma. The workers are engaged in occupations related to the production of crude oil and natural gas.

The investigation revealed that production and employment declined at the subject firm in 1994 and in January through June 1995. Company imports of crude oil increased in these same periods.

The investigation also disclosed that crude oil produced by the subject firm is marketed through normal retail channels and has been impacted by the high penetration of imports into the crude oil market.

U.S. imports of crude oil increased absolutely and relative to domestic shipments and consumption in 1994 and again in the twelve month period ending in May 1995. The ratio of imports to domestic production is over 102 percent.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with crude oil and natural gas produced at Fina Oil and Chemical Company, at various locations in Texas, and also operating in the following other states: Louisiana, Alabama, Colorado and Oklahoma contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

> "All workers of Fina Oil and Chemical Company at various locations in Texas (TA–W–31,247) & operating in the following cited States, engaged in employment related to the production of crude oil and natural gas who became totally or partially separated from employment on or after October 8, 1994 through two years from the date of certification are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

TA–W–31,247A	Louisiana
TA–W–31,247B	Alabama
TA–W–31,247C	Colorado
TA–W–31,247D	Oklahoma

Signed in Washington, D.C. this 25th day of August, 1995

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

[FR Doc. 95–23181 Filed 9–18–95; 8:45 am]

BILLING CODE 4510–30–M

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) issued during the period of August and September, 1995.

In order for an affirmative to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–31,260; IBM Corp., Banks Manufacturing, Endicott, NY

TA–W–31,160; Noll Printing Co., Inc., Huntington, IN

TA–W–31,300; Omega News & Advertising, Inc., El Paso, TX

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

TA–W–31,301; Electron Wire, El Paso, TX

TA–W–31,316; Collegiate Pacific, Roanoke, VA

TA–W–31,353; Dura Convertible System, Adrian, MI

TA–W–31,295, TA–W–31,296; Portac, Inc. of Tacoma [illegible]er, WA & Forks, [illegible]

TA–W–31,2[illegible] [illegible]lle Machine Products [illegible]rsville, PA

TA–W–31,291; Lucas AU1, Hazleton Div., Hazleton, PA

Increased imports did not contribute importantly to worker separations at the firm.

TA–W–31,176; Handy & Harman, East Providence, RI

U.S. imports of gold declined in 1994 compared to 1993. The ratio of gold imports to domestic production declined in the same comparative periods.

TA–W–31,172; International Marine Carriers, Mineola, NY

TA–W–31,320; Associated Gas Services, Inc., (A subsidiary of Panhandle Eastern Corp.), Houston, TX

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued; the date following the company name and location for each determination references the impact date for all workers for such determination.

TA–W–31,214, TA–W–31,215, TA–W–31,216, TA–W–31,217; Buddy L., Inc., Lincoln St. Gloversville, NY, Patch Rd., Gloversville, NY Mayfield, NY and New York, NY: July 26, 1994.

TA–W–31,222; Pamco Shoe Machinery Co., Inc., Lewiston, ME: June 22, 1994.
TA–W–31,254; Dexter Shoe Co., Milo Plant, Milo, ME: July 7, 1994.
TA–W–31,177; ITT Automotive, Tonawanda, NY: June 9, 1994.

Also, pursuant to Title V of the North American Free Trade Agreement Implementation Act (P.L. 103–182) concerning transitional adjustment assistance hereinafter called (NAFTA–TAA) and in accordance with Section 250(a) Subchapter D, Chapter 2, Title II, of the Trade Act as amended, the Department of Labor presents summaries of determinations regarding eligibility to apply for NAFTA–TAA issued during the month of August and September, 1995.

In order for an affirmative determination to be made and a certification of eligibility to apply for NAFTA–TAA the following group eligibility requirements of Section 250 of the Trade Act must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, (including workers in any agricultural firm or appropriate subdivision thereof) have become totally or partially separated from employment and either—

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely,

(3) That imports from Mexico or Canada of articles like or directly competitive with articles produced by such firm or subdivision have increased, and that the increases in imports contributed importantly to such workers' separations or threat of separation and to the decline in sales or production of such firm or subdivision; or

(4) That there has been a shift in production by such workers' firm or subdivision to Mexico or Canada of articles like or directly competitive with articles which are produced by the firm or subdivision.

Negative Determinations NAFTA–TAA

In each of the following cases the investigation revealed that criteria (3) and (4) were not met. Imports from Canada or Mexico did not contribute importantly to workers' separations. There was no shift in production from the subject firm to Canada or Mexico during the relevant period.

NAFTA–TAA–00530; Omega News & Advertising, Inc., El Paso, TX
NAFTA–TAA–00370; Washington South Sound Services, Olympia, WA
NAFTA–TAA–00382; Titanium Metals Corp (TIMET), Tremont Div., Henderson, NV

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

NAFTA–TAA–00544; National Tea Co., In., DBA "The Treal Superstore", New Orleans, LA
NAFTA–TAA–00526; USDA Forest Service, Superior, MT

The investigation revealed that the workers of the subject firm do not produce an article within the meaning of Section 250(a) of the Trade Act, as amended.

Affirmative Determinations NAFTA–TAA

The following certifications have been issued; the date following the company name & location for each determination references the impact date for all workers for such determination.

NAFTA–TAA–00549; American Standard, Inc., U.S. Plumbing Products Div., Trenton, NJ: August 4, 1994.
NAFTA–TAA–00554; P&M Tile, Inc., Mount Gilead, NC: July 21, 1994.
NAFTA–TAA–00541; Gould Electronics, Inc., A.K.A. Gould Shawmut Marble Falls, TX: July 31, 1994.
NAFTA–TAA–00537; Vaagen Brothers Lumber, Inc., Colville, WA: July 22, 1994.
NAFTA–TAA–00539 &A, B; The 500 Fashion Group, Northampton, PA, Whitehall, PA & Philadelphia, PA: July 14, 1994.
NAFTA–TAA–00532; Anchor Glass Container Corp., Keyser, WV: July 14, 1994.
NAFTA–TAA–00555; AMCO Manufacturing Corp., Adrian Div., Adrian, MI: August 7, 1994.
NAFTA–TAA–00567; Roadware Corp., Kylertown, PA: August 10, 1994.

I hereby certify that the aforementioned determinations were issued during the months of August and September, 1995. Copies of these determinations are available for inspection in Room C–4318, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210 during normal business hours or will be mailed to persons who write to the above address.

Dated: September 7, 1995.

Victor J. Trunzo,

Program Manager, Policy & Reemployment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the data on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address show below, not later than September 29, 1995.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 29, 1995.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 5th day of September, 1995.

Victor J. Trunzo,

Program manager, Policy & Reemployment Services, Office of Trade Adjustment Assistance.

APPENDIX—PETITIONS INSTITUTED ON SEPTEMBER 5, 1995

[TA–W–30,941]

Miller Brewing Co., Fulton, NY; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued an Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance on August 14, 1995, applicable to workers of Miller Brewing Company in Fulton, New York.

The Amended Certification revised the impact date to cover major layoffs that occurred in January 1994. Recent information revealed that layoffs also occurred in 1993. The Department is issuing another amended notice applicable to TA–W–30,941 to make the impact date one year prior to the date of the petition. The petition date for the subject case was April 13, 1994.

the amended notice applicable to TA–W–30,941 is hereby issued as follows:

> All workers of Miller Brewing Company, Fulton, New York engaged in employment related to the production of beer who became totally or partially separated from employment on or after April 13, 1993 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1994.

Signed at Washington, D.C., this 31st day of August, 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

[FR Doc. 95–23186 Filed 9–18–95; 8:45 am]

BILLING CODE 4510–30–M

[TA–W–31,119]

Wirekraft Industries, Incorporated, Burcliff Industries Division, Cardington, OH; TA–W–31,119A, Wirekraft Industries, Incorporated, Burcliff Industries Division, South Bend, IN; and TA–W–31,119B, Wirekraft Industries, Incorporated, Burcliff Industries Division, Lakeville, IN; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on August 9, 1995, applicable to all workers of Wirekraft Industries, Incorporated, Burcliff Industries Division, located in Cardington, Ohio. The notice was published in the **Federal**

Register on August 24, 1995 (60 FR 44079).

The certification was amended August 18, 1995, to cover workers of the subject firm located in South Bend, Indiana. The notice will soon be published in the **Federal Register**.

New information received from the State Agency shows that worker separations have occurred at Wirekraft Industries, Incorporated, Burcliff Industries Division in Lakeville, Indiana. The workers produce electrical wire harnesses for appliances.

The intent of the Department's certification is to include all workers of Wirekraft Industries adversely affected by imports.

The amended notice applicable to TA–W–31,119 is hereby issued as follows:

> All workers of the Burcliff Industries Division of Wirekraft Industries, Incorporated, Cardington, Ohio (TA–W–31,119), South Bend, Indiana (TA–W–31,119A), and Lakeville, Indiana (TA–W–31,119B) who became totally or partially separated from employment on or after May 26, 1994 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, D.C. this 7th day of September 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Public Meeting; Federal Committee on Apprenticeship

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. 1), notice is hereby given that the Federal Committee on Apprenticeship (FCA) will conduct an open meeting on October 1, 1995, at the Washington Hilton Hotel, 1919 Connecticut Avenue, NW., Washington, DC 20009.

The agenda will include:

12:00 a.m. Call to Order
Administrative Matters
- Meeting Logistics
- Approval of Minutes

Remarks: Assistant Secretary for ETA
Bureau of Apprenticeship and Training Report

Work Group Reports and Recommendations

- Briefing on National Apprenticeship Conference
- Reauthorization/funding Carl Perkins Vocational Education Act
- Pilot test projects for promotion/expansion of registered apprenticeship
- National Registered Apprenticeship Award Program
- Regulatory Barriers to Expansion of Registered Apprenticeship
- Legislation affecting registered apprenticeship
- National Association of State and Territorial Apprenticeship Directors (NASTAD) Report
- National Association of Governmental Labor Officials (NAGLO) Report
- Public Comments
- Other Business

4:00 p.m. Adjournment

The agenda is subject to change due to time constraints and priority items which may come before the Committee between the time of this publication and the scheduled date of the FCA meeting.

Members of the public are invited to attend the proceedings. Individuals with disabilities should contact Marion M. Winters at (202) 219–5921, Ext. 114 no later than September 19, 1995, if special accommodations are needed.

Any member of the public who wishes to file written data, views or arguments pertaining to the agenda may do so by furnishing it to the Designated Federal Official at any time prior to the meeting. His address is: Mr. Anthony Swoope, Director, Bureau of Apprenticeship and Training, ETA, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–4649 Washington, D.C. 20210.

Fifteen duplicate copies are needed for the members and for inclusion in the minutes of the meeting.

Any member of the public who wishes to speak at this meeting should so indicate the nature of intended presentation and the amount of time needed by furnishing a written statement to the Designated Federal Official by September 23, 1995. The Chairperson will announce at the beginning of the meeting the extent to which time will permit the granting of such requests.

Signed at Washington, D.C., this 13th day of September 1995.

Timothy M. Barnicle,

Assistant Secretary of Labor for Employment and Labor.

BILLING CODE 4510-30-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–286]

Power Authority of the State of New York; Indian Point Nuclear Generating Unit No. 3 Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of a one time schedular exemption from the requirements of 10 CFR 50.71(e)(4) for the submittal of the periodic Final Safety Analysis Report (FSAR) update from Facility Operating License No. DPR–64, issued to the Power Authority of the State of New York (the licensee) for the Indian Point Nuclear Generating Unit No. 3 (IP3), located at the licensee's site in Westchester County, New York.

Environmental Assessment

Identification of the Proposed Action

The proposed schedular exemption would reschedule the required FSAR update from July 22, 1995, to December 27, 1995 (i.e. 6 months after restart from the extended shutdown). Title 10 of the Code of Federal Regulations (10 CFR), 10 CFR 50.71(e)(4) requires that FSAR revisions must be submitted annually or 6 months after a refueling outage provided the interval between updates does not exceed 2 years. In addition, 10 CFR 50.54(a)(3) requires that changes to the quality assurance program description that do not reduce commitments must be submitted to the NRC in accordance with the FSAR update requirements of 10 CFR 50.71(e).

The licensee shut down IP3 in February 1993 for a performance improvement outage. The plant was recently restarted on June 27, 1995. Although this extended shutdown was not a refueling outage, the number of facility changes made by the licensee during the shutdown equates it to one. As such, a one time FSAR update schedular exemption would enable the licensee to include most of the modifications, technical specifications amendments, and other changes completed during the extended shutdown in the next FSAR update.

The proposed action is in accordance with the licensee's application for exemption dated June 20, 1995.

The Need for the Proposed Action

The proposed schedular exemption is needed to permit the licensee to include most of the modifications, technical specifications amendments, and other changes completed during the extended shutdown in the next FSAR update.

Literal compliance with the FSAR update schedule of 10 CFR 50.71(e)(4) would result in an FSAR update which would be incomplete and not adequately reflect the actual design of the facility.

Environmental Impacts of the Proposed Action

The proposed action to allow the licensee an additional 6 months to update the IP3 FSAR is administrative in nature. The Commission has completed its evaluation of the proposed action and concludes that the probability or consequences of accidents will not increase, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action is administrative in nature and involves features located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect nonradiological plant effluents and has no other environmental impact. Accordingly, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

Since the Commission has concluded there is no measurable environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. However, as an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action considered are the same.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the "Final Environmental Statement for the Indian Point Nuclear Generating Station Unit No. 3," dated February 1975.

Agencies and Persons Consulted

In accordance with its stated policy, on August 17, 1995, the staff consulted with the New York State official, Jack Spath of the New York State Energy Research and Development Authority, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

Based upon the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated June 20, 1995, which is available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street NW., Washington, DC, and at the White Plains Public Library, 100 Martine Avenue, White Plains, New York.

Dated at Rockville, Maryland, this 12th day of September 1995.

For the Nuclear Regulatory Commission.

Ledyard B. Marsh,

Director, Project Directorate I–1, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

Application for a License To Export a Utilization Facility

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application", please take notice that the Nuclear Regulatory Commission has received the following application for an export license. Copies of the application are on file in the Nuclear Regulatory Commission's Public Document Room located at 2120 L Street, N.W., Washington, DC.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555; the Secretary, U.S. Nuclear Regulatory Commission; and the Executive Secretary, U.S. Department of State, Washington, D.C. 20520.

In its review of the application for a license to export a utilization facility as defined in 10 CFR Part 110 and noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility to be exported. The information concerning this application follows:

Name of applicant	ABB Combustion Engineering., Inc.	Description of facility	End use
Date of Application	10 August 1995	2 (Two) Nuclear Power Reactors/ 1000 MWe (ea) pressurized water reactors/Ulchin units 5 & 6.	Commercial Generation of Electricity.
Date Received	15 August 1995		
Application Number	XR 163		
Country of Destination	Republic of Korea		

Dated this 7th day of September 1995 at Rockville, Maryland.

For the Nuclear Regulatory Commission.

Ronald D. Hauber,

Director, Division of Nonproliferation, Exports and Multilateral Relations, Office of International Programs.

BILLING CODE 7590-01-M

Generic Letter 88–20, Supplement 5, Individual Plant Examination of External Events for Severe Accident Vulnerabilities

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of issuance.

SUMMARY: The Nuclear Regulatory Commission (NRC) has issued Generic Letter 88–20, Supplement 5 to (1) notify all holders of operating licenses (except those licenses that have been amended to possession-only status) or construction permits for nuclear power reactors of modifications in the recommended scope of seismic reviews that are performed as part of individual plant examinations of external events (IPEEE) for the focused-scope and full-

scope plants and (2) provide guidance to licensees who wish to voluntarily modify their previously committed seismic IPEEE programs. This generic letter will be made available in the NRC Public Document Room. The information that was sent to the Committee to Review Generic Requirements, including the resolution of public comments received on this generic letter, will be made available in the NRC Public Document Room. This generic letter is also discussed in Commission information paper SECY–95–213 which will made available in the NRC Public Document Room.

DATES: The generic letter was issued on September 8, 1995.

ADDRESSES: Not Applicable.

FOR FURTHER INFORMATION CONTACT: John T. Chen (301) 415–6549.

SUPPLEMENTARY INFORMATION: None.

Dated at Rockville, MD, this 11th day of September, 1995.

For the Nuclear Regulatory Commission.

Alfred E. Chaffee,

Chief, Events Assessment and Generic Communications Branch, Division of Reactor Program Management, Office of Nuclear Reactor Regulation.

[FR Doc. 95–23175 Filed 9–18–95; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–278]

PECO Energy Co.; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–56, issued to PECO Energy Company, et al., (the licensee), for operation of the Peach Bottom Atomic Power Station, Unit 3, located in York County, Pennsylvania.

The proposed amendment would delete License Condition 2.C(5) from Facility Operating License DPR–56 which restricts power levels to no less than seventy percent in the coastdown condition.

The amendment is being proposed on a exigent basis in accordance with 10 CFR 50.91(a)(6). On August 29, 1995, the licensee discovered that it was operating at sixty-two percent power in the coastdown condition in violation of License Condition 2.C(5). On August 30, 1995, in order to avoid an unwarranted plant shutdown, the licensee requested enforcement condition for this violation until such time as the staff could process a permanent change to the facility operating license that would delete License Condition 2.C(5). The NRC staff authorized enforcement discretion verbally on August 30, 1995 and in writing on September 1, 1995, by letter to Mr. George Hunger, PECO Energy Company. The amendment is being considered on an exigent basis in order to minimize the length of time the licensee is operating in violation of License Condition 2.C(5).

Pursuant to 10 CFR 50.91(a)(6) for amendments to be granted under exigent circumstances, the NRC staff must determine that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of any accident previously evaluated.

Deletion of License Condition 2.C(5) is an administrative change that will not involve a significant increase in the probability or consequences of any accident previously evaluated. This license condition is more appropriately controlled by other licensing bases documents, which include the NRC approved GESTAR II analyses and the cycle specific reload licensing reports, and should not be part of the FOL. Accidentally, this FOL change will not alter any safety limits which ensure the integrity of fuel barriers, and will not result in any increase to onsite or offsite dose.

No physical changes are being made to the plant, nor are there any changes being made in the operation of the plant as a result of this change which could involve a significant increase in the probability or consequences of any accident previously evaluated. Additionally, this change will not alter the operation of equipment assumed to be available for the mitigation of accidents or transients.

2. The proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

Deletion of License Condition 2.C(5) is an administrative change that will not create the possibility of a new or different type of accident from any previously evaluated. Deletion of License Condition 2.C(5) is an administrative change that will not involve any changes to plant systems, structures or components (SCCs) which could act as new accident initiators. This change will not impact the manner in which SSCs are tested such that a new or different type of accident from any previously evaluated could be created.

3. The proposed change does not result in a significant reduction in the margin of safety.

No margins of safety are reduced as a result of the proposed deletion of License Condition 2.C(5). No safety limits will be changed as a result of this change. The proposed change does not involve a reduction in the margin of safety because this change is an administrative change which will not impact core limits or any other parameters that are used in the mitigation of a UFSAR design basis accident or transient. The change to the FOL does not introduce any hardware changes, and will not alter the intended operation of plant structures, systems or components utilized in the mitigation of UFSAR design basis accidents or transients. Additionally, this change will not introduce any new failure modes of plant equipment not previously evaluated.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 15 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 15-day notice period. However, should circumstances change during the notice period, such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 15-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of

this **Federal Register** notice. Written comments may also be delivered to Room 6D22, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC.

The filing of requests for hearing and petitions for leave to intervene is discussed below.

By October 18, 1995, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, and at the local public document room located at the Government Publications Section, State Library of Pennsylvania, (Regional Depository) Education Building, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendment is issued before the expiration of the 30-day hearing period, the Commission will make a final determination on the issue of no significant hazards consideration. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 248–5100 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to John F. Stolz: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to J. W. Durham, Sr., Esquire, Sr. V.P. and General Counsel, PECO Energy Company, 2301 Market Street, Philadelphia, Pennsylvania 19101, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see letter dated August 30, 1995, and the application for amendment dated September 1, 1995, which are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, and at the local public document room, located at the Government Publications Section, State Library of Pennsylvania, (Regional Depository) Education Building, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

Dated at Rockville, MD, this 13th day of September 1995.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I-2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 95–23176 Filed 9–18–95; 8:45 am]

BILLING CODE 7590-01-P

[Docket Nos. 50–338 and 50–339]

Virginia Electric & Power Company, North Anna Power Station Units 1 and 2; Exemption Amendment

I

The Virginia Electric and Power Company (VEPCO, the licensee) is the holder of Operating License No. NPF–4 which authorizes operation of North Anna Power Station Unit 1 and Operating License No. NPF–7 which authorizes operation of Unit 2. These operating licenses provide, among other things, that the North Anna Power Station is subject to all rules, regulations, and Orders of the Commission now or hereafter in effect.

The station comprises two pressurized water reactors at the Licensee's site located in Louisa County, Virginia.

II

By letter to the licensee dated November 6, 1986, Exemption 1 (among others) was approved by the NRC. Exemption 1 was from the technical requirements of Section III.G.3 of Appendix R to 10 CFR Part 50 to the extent that fire detection and fixed suppression systems were not installed throughout the Auxiliary, Fuel, and Decontamination Building (Fire Area 11). The original Safety Evaluation supporting Exemption 1 stated the charging pump cubicles had 3-hour fire-rated walls, and that the penetrations in these walls were sealed to a rating of 3 hours. By letter dated December 11, 1992, the licensee requested an addendum (exemption amendment) which revises the original Exemption 1 to account for non-fire-rated penetration seals and unprotected openings located in the south wall of the charging pump cubicles. The lack of penetration seals was identified in an NRC Inspection Report 50–338, 339/92–18 dated October 19, 1992.

The Commission's staff has evaluated the information provided by the licensee to support the addendum to Exemption 1. The Commission's Safety Evaluation relating to an Addendum to Exemption 1 From Certain Requirements of Appendix R to 10 CFR Part 50 is being issued concurrently with this exemption amendment. The Safety Evaluation concludes that the lack of fire-rated penetration seals in the south wall of the pump cubicles does not present an undue risk to the public health and safety and that special circumstances are present in that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule.

III

The underlying purpose of Section III.G.3 of Appendix R to 10 CFR Part 50 is to ensure that safe shutdown capability is maintained. Notwithstanding the lack of three hour rated penetration seals, the circumstances, as fully described in the Safety Evaluation, are such that the installation of fire detection and fixed suppression systems throughout Fire Area 11 is not necessary to provide reasonable assurance that safe shutdown capability is maintained.

Therefore, the staff concludes that "special circumstances" exist for the licensee's requested exemption amendment in that application of the regulation in these particular circumstances is not necessary to achieve the underlying purposes of Section III.G.3 of Appendix R to 10 CFR Part 50. The Commission hereby grants an amendment to Exemption 1 granted November 6, 1986, and authorizes the subject addendum (attached) to revise Exemption 1 to account for non-fire-rated penetrations in the south wall of the charging pump cubicles.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR Part 50.12(a), (1) the exemption amendment as described in Section II is authorized by law and will not present an undue risk to the public health and safety and is consistent with common defense and security, and (2) special circumstances are present for the exemption amendment in that application of the regulation in this particular circumstance is not necessary to achieve the underlying purposes of Appendix R to 10 CFR Part 50.

Pursuant to 10 CFR 51.32, the Commission has determined that the issuance of the exemption amendment will have no significant impact on the environment (60 FR 45747).

This exemption amendment is effective upon its issuance.

Dated at Rockville, Maryland this 12th day of September 1995.

For the Nuclear Regulatory Commission.

Ledyard B. Marsh,

Acting Director, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Notice of Meeting of the Trade Advisory Committee on Africa

AGENCY: Office of the United States Trade Representative.

ACTION: Notice that the September 28, 1995 meeting of the Trade Advisory Committee on Africa will be held from 11:00 a.m. to 2:00 p.m. The meeting will be closed to the public from 11:00 a.m. to 1:15 p.m. The meeting will be open to the public from 1:15 p.m. to 2:00 p.m.

SUMMARY: The Trade Advisory Committee on Africa will hold a meeting on September 28, 1995 from 11:00 a.m. to 2:00 p.m. The meeting will be closed from 11:00 a.m. to 1:15 p.m. when the meeting will include a review and discussion of current issues which influence U.S. trade policy. Pursuant to Section 2155(f)(2) of Title 19 of the United States Code, I have determined that this portion of the meeting will be concerned with matters the disclosure of which would seriously compromise the development by the United States Government of trade policy, priorities, negotiating objectives or bargaining positions with respect to the operation of any trade agreement and other matters arising in connection with the development, implementation and administration of the trade policy of the United States. The meeting will be open to the public and press from 1:15 p.m. to 2:00 p.m. when trade policy issues will be discussed. Attendance during this part of the meeting is for observation only. Individuals who are not members of the committee will not be invited to comment.

DATES: The meeting is scheduled for September 28, 1995, unless otherwise notified.

ADDRESSES: The meeting will be held at the Jefferson Hotel at 16th and M Street, Washington, D.C., unless otherwise notified.

FOR FURTHER INFORMATION CONTACT: Michaelle Burstin, Director of Public Liaison, Office of the United States Trade Representative, (202) 395–6120.

Michael Kantor,

United States Trade Representative.

[FR Doc. 95–23172 Filed 9–18–95; 8:45 am]

BILLING CODE 3190-01-M

POSTAL SERVICE

Privacy Act of 1974; System of Records

AGENCY: Postal Service.

ACTION: Notice of new system of records.

SUMMARY: The purpose of this document is to publish notice of a new Privacy Act system of records, USPS 120.154, Personnel Records—Employee Survey Process System Records. The new system contains a collection of statistical data compiled from surveys completed by employees on various topics and issues related to their employment. Some surveys within the system relate directly to individual managers or supervisors whose performance has been rated by the questionnaire respondents. Other surveys concern particular work locations rather than individual managers, but these surveys have the potential for being associated, though indirectly, with the particular manager or supervisor who is responsible for the work location.

DATES: This proposal will become effective without further notice October 30, 1995, unless comments are received on or before that date that result in a contrary determination.

ADDRESSES: Written comments on this proposal should be mailed or delivered to Payroll Accounting/Records, United States Postal Service, 475 L'Enfant Plaza SW, Room 8650, Washington, DC 20260–5242. Copies of all written comments will be available for public inspection and photocopying between 8 a.m. and 4:45 p.m., Monday through Friday, at the above address.

FOR FURTHER INFORMATION CONTACT: Betty E. Sheriff, (202) 268–2608.

SUPPLEMENTARY INFORMATION: The Postal Service has, in various stages of development, a number of employee survey processes that are intended to help improve postal operations, employee-management relations and communications, and the leadership skills of managers and supervisors. These survey processes involve the collection of data from employees by means of printed questionnaires or by telephone interviews, tabulation and analysis of the responses, and feedback of the results to the particular manager or supervisor concerned. The manager or supervisor is then expected to develop and implement plans for improvement based upon the problems identified by the responding employees. While intended primarily for developmental purposes, some information also may be used to evaluate a manager or supervisor's success in improving the survey results over time. Records maintained as a result of the data collection contain primarily statistical information and do not identify individual respondents. They are retrieved by reference to a particular manager, supervisor, or work location.

Two examples of surveys that relate to identifiable managers or supervisors are the "Employee Feedback" questionnaire, in which employees are asked to rate their supervisors, and the "360 Degree Feedback" instrument, which is completed by a manager, and his superiors, peers, and subordinates. Respondents to the 360 Degree questionnaire are asked to rate numerically the extent to which the manager has exhibited certain job-related behaviors. In all instances, respondents participate in these surveys voluntarily and anonymously. The results are tabulated and provided to the manager or supervisor in statistical form. The manager or supervisor is instructed how to use the information as a tool for improving his or her leadership skills. Survey results are reported and maintained by reference to the manager's or supervisor's name and social security number.

The Postal Service also periodically asks its employees to complete the Employee Opinion Survey. This survey contains questions that concern a particular work location rather than particular managers or supervisors. The questions cover general topics such as leadership and supervision, communication practices, treatment of employees, working conditions, and attention to quality. As with the other surveys, care is taken to preserve the anonymity of the employees surveyed. Managers and supervisors receive the results in the form of ratings for their own offices. They are instructed to analyze the results, share them with their employees, and prepare a list of strengths and opportunities for improvement from which an action plan may be developed and monitored. Because the results of the Employee Opinion Survey are reported and kept by work location, rather than by an individual manager or supervisor's name or other personal identifier, the information is not maintained or retrieved in a manner that prompts its establishment as a Privacy Act system of records. Since, however, there is the possibility, as noted above, that survey results for a specific work location may become associated with the responsible manager and may also be used in evaluating the manager's progress in implementing an action plan, the Postal Service deems it appropriate to include results of the Employee Opinion Survey in this system of records.

Maintenance of these records is not expected to have a significant effect on individual privacy rights. Individual respondents to the various surveys are assured anonymity. Information kept is limited to aggregate ratings and analyses associated with a particular work location or manager or supervisor. Managers and supervisors are provided the survey results that relate to themselves or to the work locations for which they are responsible. Because the survey results are intended for internal, developmental use, only three of the following Postal Service's general routine uses are being applied to this system of records: Disclosure to a Postal Service contractor, litigation, or storage. The information will be kept in a secured environment, with automated data processing (ADP) physical and administrative security and technical software applied to information on computer media. Contractors who maintain information collected by this system will be made subject to subsection (m) of the Privacy Act and be required to apply appropriate protections subject to audit and inspection by the Postal Inspection Service.

Pursuant to 5 U.S.C. 552a(e)(11), interested persons are invited to submit written data, views, or arguments on this proposal. A report of the following proposed system has been sent to Congress and to the Office of Management and Budget for their evaluation.

USPS 120.154

SYSTEM NAME:

Personnel Records—Employee Survey Process System Records, USPS 120.154.

SYSTEM LOCATIONS:

Human Resources at Headquarters, and at a contractor site.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Supervisors and managers who are rated under an employee survey process or have responsibility for a rated work location.

CATEGORIES OF RECORDS IN THE SYSTEM:

Work location, name and social security number of manager or supervisor, aggregate data and analyses of data, and national feedback reports.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

39 U.S.C. 401, 1001.

PURPOSE(S):

To improve the quality of postal services, employee-management relations, and communication between managers and employees by soliciting employee feedback on job-related issues; to provide management and supervisors with information needed to improve their leadership skills; and to provide information for evaluating manager and supervisor performance.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

General routine use statements b, f, and g listed in the prefatory statement at the beginning of the Postal Service's published system notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper and computer storage media.

RETRIEVABILITY:

Some survey information in the system is retrieved only by work location. Other information is retrieved by manager or supervisor name or social security number.

SAFEGUARDS:

Hardcopy records are maintained in a secured environment, with access limited to those individuals whose official duties require such access. Access to automated records is restricted by authorized user identification codes. Information on computer storage media maintained at a contractor site is protected by ADP physical security, technical software, and administrative security subject to audit and inspection by the Postal Inspection Service.

RETENTION AND DISPOSAL:

a. Employee Opinion Survey Process Records—Retain for 20 years. Destroy paper records by shredding or burning. Destroy computer records by erasure or degaussing.

b. Management Development Process Records: (1) Paper Survey Feeder Records—Cut off at the end of the calendar year and destroy by shredding or burning 3 years from cutoff date; (2) Computer Records—Retain for 20 years and then erase or degauss.

SYSTEM MANAGER(S) AND ADDRESS:

Vice President, Human Resources, United States Postal Service, 475 L'Enfant PLZ SW, Washington DC 20260–4200.

NOTIFICATION PROCEDURE:

Individuals wanting to know whether information about them is maintained in this system of records must address inquiries in writing to the system manager.

RECORD ACCESS PROCEDURES:

Requests for access must be made in accordance with the notification procedure above and the Postal Service Privacy Act regulations regarding access to records and verification of identity under 39 CFR 266.6.

CONTESTING RECORD PROCEDURES:

See Notification Procedure and Record Access Procedures above.

RECORD SOURCE CATEGORIES:

Postal employees.

Stanley F. Mires,

Chief Counsel, Legislative.

[FR Doc. 95–23134 Filed 9–18–95; 8:45 am]

BILLING CODE 7710–12–P

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review by Office of Management and Budget

Agency Clearance Officer: Michael E. Bartell, (202) 942–8800.

Upon written request copy available from: Securities and Exchange Commission, Office of Filings and Information Services, Washington, D.C. 20549.

Extensions:

Form N–8A—File No. 270–135
Rule 6c–6—File No. 270–160
Proposed Rule 0–5—File No. 270–378

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. §§ 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted requests for approval of extension for the following:

Form N–8A is the form that investment companies file with the Commission pursuant to Section 8(a) of the Investment Company Act of 1940 ("1940 Act"), which provides that an investment company may register by filing with the Commission a notification of registration. It is estimated that 610 respondents file form N–8A annually. The form requires approximately one hour of reporting per respondent annually.

Rule 6c–6 continues exemptive relief granted by Commission order to certain investment companies that responded to Internal Revenue Service Revenue Ruling 81–225 (September 25, 1981) by organizing new companies and substituting them for existing companies without prior Commission approval. No respondents incur a burden complying with the rule.

Proposed Rule 0–5 under the 1940 Act would establish an expedited review procedure for certain exemptive applications filed by registered investment companies with the Commission. It is estimated that 60 respondents may expend an estimated 300 total burden hours annually meeting the proposed requirements for receiving expedited review of their exemptive applications.

General comments regarding the estimated burden hours should be directed to the OMB Clearance Officer at the address below. Any comments concerning the accuracy of the estimated average burden hours for compliance with Commission rules and forms should be directed to Michael E. Bartell, Associate Executive Director, Office of Information Technology, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549 and Clearance Officer, Project Numbers: 3235–0175 (Form N–8A), 3235–0245 (Rule 6c–6), and 3235–0432 (Proposed Rule 0–5), Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Dated: September 11, 1995.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Rel. Nos. 33–7215; 34–36220]

Changes and Corrections to EDGAR Phase-In List

AGENCY: Securities and Exchange Commission.

ACTION: Notice.

SUMMARY: The Commission is publishing a list of changes and corrections to the EDGAR phase-in list for companies whose filings are processed by the Division of Corporation Finance.

FOR FURTHER INFORMATION CONTACT: Sylvia J. Reis, Assistant Director, CF EDGAR Policy, Division of Corporation Finance at (202) 942–2940.

SUPPLEMENTARY INFORMATION: In connection with the adoption of the final rules fully implementing the Electronic Data Gathering, Analysis, and Retrieval ("EDGAR") system, on December 19, 1994 the Commission published a list of companies whose filings are processed by the Division of Corporation Finance to place registrants on notice as to when they would become subject to mandated electronic filing.[1] The registrants were divided into ten groups, all of which will be phased in by May 1996. Rule 901 of Regulation S–T[2] provides that registrants may request a change to their assigned phase-in dates. Such requests may be granted pursuant to delegated authority. In addition, modifications are made to the list to reflect name changes, corporate restructurings, the addition of new entities, and similar factors. Changes to the Division of Corporation Finance phase-in list are published from time to time in the SEC News Digest. The Commission today is publishing a comprehensive list of all changes in the Division of Corporation Finance phase-in group assignments made since the phase-in list was published in December 1994. This publication supersedes the last comprehensive list of changes published in the **Federal Register** on April 12, 1995 (Securities Act Release No. 7156). This procedure will be repeated from time to time, in order to further notify the public of changes to the list. A change to a company's phase-in date is of particular importance to persons or entities filing documents with respect to that company, since generally such persons must file electronically with the company become subject to mandated electronic filing.[3]

[1] *See* Release No. 33–7122 (December 19, 1994) [59 FR 67752]. The timing for each phase-in group was included in that release as Appendix A, and the phase-in list as Appendix B. As is true with all rules of the Commission, persons making filings with the Commission are responsible for apprising themselves of their new obligations associated with filing on the EDGAR system. While the Commission attempts to contact registrants in each phase-in group by furnishing a copy of the EDGAR Filer Manual and EDGARLink software prior to phase-in, filers will not be relieved of their electronic filing obligations in the absence of such notification.

[2] 17 CFR 232.901.

[3] Rule 901(b) provides that a party making a filing pursuant to Section 13 or 14 of the Securities Exchange Act of 1934 [15 U.S.C. 78m or 78n, respectively] with respect to a registrant that has become subject to mandated electronic filing is required to submit that filing in electronic format. Consequently, persons filing a Schedule 13D or 13G, a proxy statement, or tender offer material with respect to an electronic filer are required to make such filings electronically.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 95–23141 Filed 9–18–95; 8:45 am]

BILLING CODE 8010-01-P

[Release No. 34–36222; File No. SR–NYSE–95–25]

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change Relating to Amendments to Rules 600 (Arbitration), 619 (General Provision Governing Subpoenas, Production of Documents, etc.), 629 (Schedule of Fees), and 637 (Failure to Honor Award)

September 13, 1995.

On June 26, 1995, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to adopt certain arbitration procedures.

The proposed rule change was published for comment in the **Federal Register** on July 26, 1995.[3] No comments were received on the proposal.

As described more fully below, the Exchange has proposed amendments to its arbitration procedures that were developed primarily by the Securities Industry Conference on Arbitration.[4]

The Commission has reviewed carefully the NYSE's proposed rule changes and concludes that the proposed changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b).[5] The Exchange proposes to amend NYSE Rules 600 (Arbitration), 619 (General Provision Governing Subpoenas, Production of Documents, etc.) 629 (Schedule of Fees), and 637 (Failure to Honor Award).[6]

NYSE Rule 600(d)(iii) currently bars members, allied members, member organizations, and associated persons from seeking to enforce an agreement to arbitrate against a customer where the customer has initiated in court a putative class action or is a member of a putative or certified class with respect to any claims encompassed by the class action. The rule, however, omits specific reference to claims filed by members, allied members, member organizations, and associated persons against other members, allied members, member organizations, and associated persons. This proposed amendment clarifies that all class actions, including claims involving members, allied members, member organizations, and associated persons, are ineligible for submission to the Exchange's arbitration facility.

The Commission finds that the proposed amendment to NYSE Rule 600(d)(iii) is consistent with the Section 6(b)(5)[7] requirements that the rules of an exchange be designed to promote just and equitable principles of trade, prevent unfair discrimination between customers, issuers, brokers, or dealers, and, in general, protect investors and the public. Over the years, the courts have developed procedures and expertise for managing class action litigation and duplicating the often complex procedural safeguards necessary for these lawsuits is unnecessary. In addition, access to the courts for class action litigation should be preserved for claims filed by members, allied members, member organizations, and associated persons against other members, allied members, member organizations, and associated persons, as well as for claims involving investors. Hence, this rule change should provide a sound procedure for the management of class action disputes, should promote the efficient resolution of these types of class action disputes, and should prevent wasteful litigation over the possible applicability of agreements to arbitrate between members, allied members, member organizations, and associated persons, notwithstanding the exclusion of class action claims from NYSE arbitration.

NYSE Rule 619(c) currently requires all parties to serve on each other copies of documents in their possession that they intend to present at the hearing and to identify witnesses they intend to present at the hearing not less than ten calendar days prior to the first scheduled hearing date. The Exchange is proposing to amend this rule to allow parties to: (1) Provide a list of documents that have been produced previously to the other side, instead of providing the actual documents; (2) require the list identifying witnesses to include the address and business affiliation of the witnesses listed; and (3) require prehearing exchanges of documents and the list of documents previously produced to occur twenty days in advance of the hearing, instead of ten days as is presently required.

The Commission finds that the proposed amendments to NYSE Rule 619(c) are consistent with Section 6(b)(5) because they are designed to promote just and equitable principles of trade, prevent unfair discrimination between customers, issuers, brokers, or dealers, and, in general, protect investors and the public,.[8] The proposed amendments should increase the efficiency of the arbitration process because they: (1) Eliminate duplicative prehearing document exchanges; (2) should assist parties in the process of preparing and organizing their cases by providing them with advance notice regarding the background of witnesses and the location of nonparty witnesses; (3) should reduce the number of instances of surprise; and (4) should provide the parties with a more reasonable time frame in which to address last minute discovery requests.

NYSE Rule 629(e) presently provides that the nonrefundable filing fee for a dispute that does not specify a money claim shall be $250, while NYSE Rule 629(i) charges industry parties a $500 nonrefundable filing fee when the dispute does state a money claim. The proposed amendment to NYSE Rule 629(e) would unify the nonrefundable filing fee for all industry claims at $500.

The commission finds that this proposed amendment is consistent with Section 6(b)(4)[9] because it provides for the equitable allocation of reasonable fees among its members and other persons using its facilities. A uniform filing fee would remove any temptation for an industry party to purposely omit the monetary amount of their claim in order to reduce the nonrefundable filing fee from $500 to $250.[10]

Currently, NYSE Rule 637 subjects any member, allied member, registered representative, or member organization who fails to honor an award of arbitrators appointed by the Exchange to disciplinary proceedings in accordance with the Exchange's constitution and rules. The proposed amendment to NYSE Rule 637 would expand the coverage of this rule to include arbitration awards issued at another self-regulatory organization or by the American Arbitration Association. As amended, the penalties authorized under this rule would include disciplinary proceedings at the Exchange or the imposition of a fine by way of a summary proceeding.

The Commission finds that this proposed amendment is consistent with the section 6(b)(6)[11] requirement that the rules of an exchange provide for appropriate disciplinary action for violating the provisions of the Act, the rules and regulations thereunder, or the rules of the Exchange. This proposal would establish the enforceability of arbitration awards issued by other self-regulatory organizations and by the American Arbitration Association and, in turn, should increase the effectiveness of the arbitration process.

It therefore is ordered, pursuant to Section 19(b)(2) of the Act,[12] that the proposed rule change (SR–NYSE–95–25) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[13]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[File No. 1–12212]

Issuer Delisting; Notice of Application to Withdraw From Listing and Registration; (CVD Financial Corporation, Common Stock, $.01 Par Value, Variable Rate Bonds Due 2008)

September 13, 1995.

CVD Financial Corporation ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2 (d) promulgated thereunder, to withdraw the above specified securities ("Securities") from listing and registration on the American Stock Exchange, Inc. ("Amex" or "Exchange").

The reasons alleged in the application for withdrawing the Securities from listing and registration include the following:

According to the Company, it received a letter dated May 26, 1995, from the Exchange stating that it was considering delisting the Securities. The Exchange believed the Company's financial condition was substantially impaired, and it had failed to comply with the Exchange's listing agreement by not holding an annual meeting of shareholders since being listed in August 1993. After the Company submitted its response to the Exchange by a letter dated June 28, 1995 and met with Amex officials on July 6, 1995, the Exchange sent a letter to the Company dated July 13, 1995, stating that the Exchange had decided to delist the Securities. Although the Company initially elected to appeal the Exchange's decision to delist the Securities to the Exchange's Board of Governors, the Company has decided to settle matters by voluntarily removing the Securities from listing on the Exchange. It is now the Company's position, in view of the impasse between the Exchange and the Company and the large expenditures of money and management time that would be required before a final resolution of the matters at issue could be obtained, that it is in the best interest of both the Company and its shareholders that matters be settled by voluntarily delisting the Securities from the Exchange.

The Exchange also has agreed that it would be in the best interest of the

BILLING CODE 8010-01-M

[Rel. No. IC–21349; File No. 812–9388]

Integrity Life Insurance Company, et al.

September 12, 1995.

AGENCY: The Securities and Exchange Commission (the "Commission").

ACTION: Notice of Application for an Order under the Investment Company Act of 1940 ("1940 Act").

APPLICANTS: Integrity Life Insurance Company ("Integrity"), Separate Account I of Integrity Life Insurance Company ("Account I"), Separate Account II of Integrity Life Insurance Company ("Account II," and collectively with Account I, the "Separate Accounts") and Integrity Financial Services, Inc. ("Services").

RELEVANT 1940 ACT SECTIONS: Exemptions requested under Section 6(c) from Sections 26(a)(2)(C) and 27(c)(2) of the 1940 Act.

SUMMARY OF THE APPLICATION: Applicants seek an order under Section 6(c) of the 1940 Act granting exemptions from Sections 26(a)(2)(C) and 27(c)(2) to the extent necessary to permit the deduction of a mortality and expense risk charge from the assets of the Separate Accounts or other Separate Accounts ("Other Accounts") established by Integrity to support certain flexible premium variable annuity policies ("Contracts") as well as other variable annuity contracts that are substantially similar in all material respects to the Contracts ("Future Contracts"). In addition, Applicants propose that Services replace Integrity as principal underwriter for the Contracts, and that the order extend the same exemptions granted to Services, and to any other broker-dealer that may in the future serve a principal underwriter for the Contracts or Future Contracts, the same exemptions currently granted to Integrity.

FILING DATES: The application was filed on December 22, 1994, and was amended on August 2, 1995 and September 8, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m., on October 10, 1995, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the requestor's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicants, Kevin L. Howard, Esq., Integrity Life Insurance Company, 239 S. Fifth Street, 12th Floor, Louisville, Kentucky, 40202.

FOR FURTHER INFORMATION CONTACT: Pamela K. Ellis, Senior Counsel, or Wendy Finck Friedlander, Deputy Chief, at (202) 942–0670, Office of Insurance Products, Division of Investment Management.

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from the SEC's Public Reference Branch.

Applicant's Representations

1. Integrity, a stock life insurance company, is organized in Ohio and licensed to sell life insurance and annuities in forty-four states and the District of Columbia. In addition, Integrity is licensed to sell variable contracts in forty-three states and the District of Columbia. Integrity is an indirect wholly-owned subsidiary of ARM Financial Group, Inc. ("ARM Financial"). Integrity is currently the principal underwriter of the Contracts and is registered as a broker-dealer under the Securities Exchange Act of 1934 and is a member of the National Association of Securities Dealers, Inc. ("NASD").

2. Account I and Account II are separate accounts established by Integrity to fund the Contracts. Both Separate Accounts are registered under the 1940 as unit investment trusts. Interests in the Contracts are registered as securities under the 1933 Act.

3. Account I has ten investment divisions ("Divisions"), each of which invests in one of the ten corresponding portfolios of the Variable Insurance Products Fund and the Variable Insurance Products Fund II, which are both part of the Fidelity Investments (R) group of companies (collectively, "Trusts"). Account II has ten Divisions, each of which invests in a corresponding portfolio of The Legends Fund, Inc. ("Legends Fund," and collectively with the Trusts, "Funds"). The Funds are diversified, open-end management investment companies registered under the 1940 Act.

4. Services, a wholly-owned subsidiary of ARM Financial, is registered with the Commission under the Securities Exchange Act of 1934 as a broker-dealer and is a member of the NASD. Applicants now seek to substitute Services for Integrity as the principal underwriter for the Contracts.[1]

5. Integrity, the Separate Accounts, and Services will enter into an agreement under which Services will become principal underwriter for the Contracts. Integrity and Services propose to enter into selling agreements with broker-dealers for the distribution of the Contracts.

6. The Contracts are flexible premiums variable annuity contracts. Contract owners ("Participants") may allocate premium payments to one or more of the Separate Accounts' Divisions, or to one or more of Integrity's guaranteed periods, or both. Amounts allocated to guarantee periods accumulate on a fixed basis, except as adjusted for any applicable value adjustment.

7. A death benefit is available under the Contracts if a Participant dies prior to his or her retirement date. The amount of the death benefit is equal to the greatest of (1) the Participant's annuity value, (2) the minimum death benefit, which equals total contributions less the sum of the market value adjusted withdrawals, and (3) the Participant's highest annuity value at the beginning of any participation year, plus subsequent contributions and minus subsequent withdrawals ("Enhanced Death Benefit").

8. Retirement benefits under the Contracts may take the form of a lump sum payment or an annuity. The retirement benefits are calculated as of the retirement date selected by the Participant. If no annuity payment option is elected by the retirement date, Integrity will deem the retirement date to have been extended.

9. Certain charges and fees are assessed under the Contracts. Until annuity payments begin, Participants may transfer their Contract values among Divisions of the relevant Separate Account and the relevant guarantee periods, except that transfers to any guarantee period must be to a newly elected guarantee period at the current guaranteed interest rate. No fee currently is imposed for a Participant's first twelve transfers per participation year. Integrity reserves the right to impose a fee of up to $25 for each transfer in excess of twelve per participation year. The transfer fee will be paid to Integrity to compensate it for the anticipated actual administrative expenses relating to transfers and is guaranteed not to increase during the life of the Contracts. In addition, Applicants reserve the right to impose a transfer fee in connection with Future Contracts of up to $25 on transfers beginning with the first transfer of Contract values in any participation year. No charges will be assessed for transfers made under Integrity's dollar cost averaging program.

10. A contingent deferred sales charge ("CDSC") may be imposed on certain withdrawals. The amount of the CDSC decreases annually from 7% to 0% over 7 participation years. No CDSC will be applied to partial withdrawals made during any participation year that do not exceed the specified amount. In addition, Integrity may waive the CDSC in certain circumstances.

11. If a Participant's Contract value is less than $50,000 on the last day of any participation year prior to the Participant's retirement date, Integrity charges an annual administrative charge of $30. In addition, all Contracts are subject to a daily charge equal, on an annual basis, to .15% of the net asset value of the relevant Separate Account to cover policy administration expenses. These daily and annual fees are guaranteed for the life of the Contracts and will not exceed the cost of services to be provided over the life of the Contract.

12. Integrity imposes charges as compensation for bearing certain mortality and expense risks under the Contracts. The amount of the mortality and expense risk charges under the Contracts is equal, on an annual basis, to 1.20% (of which .35% is attributable to mortality risks and .85% to expense risks) of the daily net asset value of the relevant Separate Account. For the Future Contracts, the annual mortality and expense risk charge will not exceed an effective annual rate of 1.20% of the net asset value of any Separate Account, or of Other Accounts, attributable to such contracts.

13. Integrity assumes the mortality risk that the life expectancy of the annuitant will be greater than that assumed in the guaranteed annuity purchase rates, thus requiring Integrity to pay out more in annuity income than it had planned. Integrity assumes an additional mortality risks because of its contractual obligation to provide a minimum death benefit and an Enhanced Death Benefit prior to the annuity date. Thus, Integrity assumes the risk that it may not be able to cover its distribution expenses and that the owner may die at a time when the amount of the death benefit payable exceeds the then net surrender value of the Contracts. The expense risk assumed by Integrity is that the administration charge will be sufficient to cover the actual cost of administering the Contracts.

Applicants' Legal Analysis

1. Section 6(c) of the 1940 Act authorizes the Commission, by order upon application, to conditionally or unconditionally grant an exemption from any provision, rule or regulation of the 1940 to the extent that the exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

2. Sections 26(a)(2)(C) and 27(c)(2) of the 1940, in relevant part, prohibit a registered unit investment trust, its depositor or principal underwriter, from selling periodic payment plan certificates unless the proceeds of all payments, other than sales loads, are deposited with a qualified bank and held under arrangements which prohibit any payment to the depositor or principal underwriter except a reasonable fee, as the Commission may prescribe, for performing bookkeeping and other administrative duties normally performed by the bank itself.

3. Applicants request an order under Section 6(c) exempting them from Sections 26(a)(2)(C) and 27(c)(2) of the 1940 Act to the extent necessary to permit the deduction of the mortality and expense risk charge from the assets of the Separate Accounts or Other Accounts that issue the Contracts or Future Contracts. Applicants also propose that Services replace Integrity as principal underwriter for the Contracts, and that the order extend the same exemptions granted to Services, and to any other broker-dealer that may in the future serve a principal underwriter for the Contracts or Future Contracts, the same exemptions currently granted to Integrity. Any such principal underwriter will be wholly-owned, directly or indirectly, by ARM Financial.

4. Applicants submit that their request for an order is appropriate in the public interest. Such an order would promote competitiveness in the variable annuity contract market by eliminating the need for Integrity to file redundant exemptive applications, thereby reducing Integrity's administrative expenses and maximizing the efficient use of Integrity's resources. The delay and expense involved in having repeatedly to seek exemptive relief would impair Integrity's ability effectively to take advantage of business opportunities as these opportunities arise. Applicants further submit that the requested relief is consistent with the purposes of the 1940 Act and the protection of investors for the same reasons. If Integrity were required repeatedly to seek exemptive relief with respect to the same issues addressed in this Application, investors would not receive any benefit or additional protection thereby. Thus, Applicants believe that the requested exemptions are appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

5. Applicants represent that they have reviewed publicly-available information regarding the aggregate level of the mortality and expense risk charges under variable annuity contracts comparable to the Contracts currently being offered in the insurance industry taking into consideration such factors as current charge levels, the manner in which charges are imposed, the presence of charge-level or annuity-rate guarantees and the markets in which the Contracts will be offered. Based upon the foregoing, Applicants further represent that the mortality and expense risk charges under the Contracts are within the range of industry practice for comparable contracts. Applicants will maintain and make available to the Commission, upon request, a

---

[1] The Commission has previously granted relief permitting Integrity to deduct mortality and expense risk charges from the assets of the Separate Accounts in connection with the sales of the Contracts. See, Integrity Life Insurance Company, Investment Company Act Release No. 19120 (Nov. 24, 1992) and The Equitable Life Assurance Society of the United States, Investment Company Act Release No. 15406 (Nov. 7, 1986) ("Existing Orders"). Applicants are not requesting that the order sought herein amend or supersede the Existing Orders.

memorandum outlining the methodology underlying this representation. Similarly, prior to making available any Future Contracts through the Separate Accounts or Other Accounts, Applicants will represent that the mortality and expense risk charges under any such contracts will be within the range of industry practice for comparable contracts. Applicants will maintain and make available to the Commission, upon request, a memorandum outlining the methodology underlying such representation.

6. Applicants do not believe that the contingent withdrawal charges under the Contracts will necessarily cover the expected costs of distributing the Contracts. Any "shortfall" will be made up from Integrity's general account assets which will include amounts derived from mortality and expense risk charges. Integrity has concluded that there is a reasonable likelihood that the distribution financing arrangement being used in connection with the Contracts will benefit the Separate Accounts and the Contract owners. Integrity will keep and make available to the Commission, upon request, a memorandum setting forth the basis for this representation. Similarly, Integrity will maintain and make available to the Commission, upon request, a memorandum setting forth the basis for the same representation with respect to Future Contracts offered by the Separate Accounts or by Other Accounts established by Integrity.

7. Applicants represent that the Separate Accounts and Other Accounts will invest only in a management investment company which has undertaken, in the event such company adopts a plan under Rule 12b–1 under the 1940 Act to finance distribution expenses, to have a board of directors (or trustees), a majority of whom are not "interested persons" of the management investment company within the meaning of Section 2(a)(19) of the 1940 Act, formulate and approve any plan under Rule 12b–1 to finance distribution expenses.

Conclusion

Applicants assert that, for the reasons and upon the facts set forth above, the requested exemptions from sections 26(a)(2)(C) and 27(c)(2) of the 1940 Act to deduct the mortality and expense risk charge from the assets of the Separate Accounts or Other Accounts that issue the Contracts and/or the Future Contracts, and in connection with Contracts or Future Contracts for which broker-dealers other than Services will serve as principal underwriter, meet the applicable statutory standards in Section 6(c) of the 1940 Act. Applicants assert that the exemptions requested are necessary and appropriate in the public interest and consistent with the protection of investors and the policies and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.
